INDEX

Abrasive Wheels:

"The Safe Installation and Use of Abrasive Wheels"—summary of study issued by I.L.O., 1212.

U.S.A.—

standards and safety codes of American Standards Association, 439-40.

Absenteeism:

Canada—

report of Medical Procurement and Assignment Board—ratio of disabling illnesses to population, 830; recommendation that chronic absenteeism be considered an offence punishable by law, 831.

remarks of Director of N.S.S. in address before editors of business publications, 1208.

referred to in report of Board of Conciliation under I.D.I. Act, 292.

N.S.: reduction of absenteeism discussed at conferences on problems of coal mining industry, 940.

Que.: results of investigation into working conditions of potmen employed in aluminum industry, 724.

South Africa: absence rates of women munition workers in Government ordnance factory, 465.

United Kingdom: controlling absences and fatigue in factories—summary of pamphlet issued by Industrial Health Research Board, 702; report on health and industrial efficiency in Scotland, 20.

U.S.A.: reduced by in-plant food facilities, 9; results of study on effects of increased working hours in metal-working plants, 938; summary of bulletin entitled *The A B C of Absenteeism and Labour Turnover*—methods of calculating absence and labour turn-over rates, 1090; review of booklet on labour-management production committees and absenteeism, 1365; relieved by provision of medical care for children in nursery schools in Minneapolis, 268.

See also Accidents, Industrial; Health; National Registration; Recreation.

Accidents, Industrial:

analytical study of work accidents in shipyards with minimum requirements for safety and health, issued by I.L.O., 1074-76.

Canada—

decrease in fatal accidents (1943), 259.

analysis of 1943 fatalities by industries, causes, etc., 421-30.

supplementary lists of accidents during 1943-44, 1073.

tabulation of fatal and non-fatal accidents as reported by provincial Workmen's Compensation Boards, 430.

Accidents, Industrial—*Con.*

fatalities during first and second quarters of 1944—695, 1072; during fourth quarter of 1943—254.

university courses in prevention of industrial accidents—summary of article by general manager of I.A.P.A., 820.

Alta: accidents in 1942, 410.

B.C.: annual report of Workmen's Compensation Board (1943), 1446.

N.B.: annual report of Workmen's Compensation Board (1943), 543.

N.S.: number of accidents in 1943 as shown in annual report of Department of Labour, 1081.

Ont.: annual report of Workmen's Compensation Board (1943), 1445; amendments in Factory, Shop and Office Building Act, 907-9; annual convention of I.A.P.A., 723; "Health Hazards in Welding"—summary of pamphlet issued by Department of Health, 697.

Que.: annual report of Workmen's Compensation Board (1942), 386.

Sask.: new regulations under Factories Act *re* prevention of accidents in grain elevators, 527; annual report of Workmen's Compensation Board (1943), 543.

South Africa: higher accident rate amongst women munition workers in Government ordnance factory, 465.

Sweden: committee to promote industrial accident prevention legislation established by National Federation of Trade Unions, 134.

United Kingdom: recommendations in report on post-war planning in printing industry, 1322; analysis of accidents in flour milling industry, 701; machinery-guarding under Factories Act, 1073; two judgments involving woodworking regulations, 1054; report of factory inspector (1942), 16.

U.S.A.: causes of accidents in war plants—a production and man-power problem, 361; safety training in vocational school shops, 556; accidents to children in bowling alleys, 130; results of study on effects of increased working hours in metal-working plants, 938; summaries of bulletins and reports—accident records, 1078; "Industrial Safety", 518; "Injuries and Accident Causes in the Longshore Industry, 1942", 1018; remedial measures on occupational hazards for women in wartime, 1014; "Safety Subjects" (industrial safety), 1076; "Safety Through Management Leadership", 1078.

See also Aircraft Industry; Compensation; Legal Decisions; Safety; Workmen's Compensation.

Adult Education:

Canada—

establishment of evening classes in certain areas recommended by C.C. of L., 1439.

Adult Education—*Con.*
U.S.A.—
promotion of adult education program favoured by C.I.O., 1586.
See also Education.

Advisory Committee on Economic Policy:
transfer of functions of Advisory Committee on Reconstruction, to, 2.
study of international trade combinations and their relationship to Canadian interests, 933.

Advisory Committee on Reconstruction:
summary of final report, 150-54.
publication of reports of subcommittees, 437.
summary of report of subcommittee on housing and community planning, 590-92; and on post-war employment opportunities, 446-49.

Advisory Council of Canadian Vocational Training:
appointments, 1516.
recommendations adopted at semi-annual meeting, 1370.

Agreements, Collective:
Canada—
monthly summary of collective agreements and wage schedules, 68, 195, 357, 493, 634, 751, 865, 1003, 1138, 1245, 1366, 1513.
Wartime Labour Relations Regulations, 135.
amendment to W.L.R.R. *re* duration of agreements, 1105.
exclusion of service personnel from union representation votes appealed by certain mining employers, 1300.
study of provisions in collective agreements for settling grievances and disputes, 27-37.
referred to in reports of Boards of Conciliation under I.D.I. Act—48, 177, 182, 293, 294; in applications under Act—46, 47, 174, 287, 479, 480, 481.
recommendations of T. and L.C. *re* placement of war contracts, 367.
legal decisions concerning, 679, 798.
Que.: number of agreements in Quebec province revealed in presidential address at convention of C.C.C.L., 1442.
South Africa: provisions *re* longshoremen in Cape Town, 67.

U.S.A.: summary of report on "Collective Bargaining Developments and Representative Union Agreements", 492; standard provisions for collective agreements covering women workers, *re* sex discrimination, equal pay, seniority, rest and lunch periods and maternity leave, 1143; bulletin on collective agreements in agricultural machinery industry, 552; holidays with pay for New York clothing workers approved by N.W.L.B., 267.
See also Collective Bargaining; Industrial Disputes Investigation Act; Industrial Standards Acts (Alberta, New Brunswick, Nova Scotia, Ontario, Saskatchewan); Labour Court of Ontario; Legal Decisions; Union Security; Vacations with Pay; Wartime Labour Relations Regulations.

Agreements, Collective—*Con.*
CLASSIFICATION BY INDUSTRIES:
Construction—buildings and structures—
bricklayers, Hamilton, 1513; Regina, 753.
building labourers, Vancouver, 68.
building trades, Chicoutimi and Lake St. John District, 1368; Hull, 199; Joliette, 867; Montreal, 359, 868, 1369, 1515; Quebec City and district, 199, 1007; St. Hyacinthe, 70; St. John and Iberville, 867; Sherbrooke, 1368; Sorel, 1142; Three Rivers, 70, 359; Val d'Or and Amos, 359, 753.
carpenters, Brockville, 1008; Hamilton, 636; Toronto, 1367; Victoria, 866.
lathers, Toronto, 1245; Vancouver, 197.
painters, Hamilton, 1367.
plumbers, Hamilton, 1367; Vancouver, 1513.
plumbers and sheet metal workers, Three Rivers, 496.
Logging—
loggers, British Columbia, 357.
Manufacturing—animal foods—
meat packinghouse workers, Hull, 751; Montreal, 751; Toronto, 751.
meat packing plant workers, St. Boniface and Winnipeg, 1003.
Manufacturing—fur and leather products—
fine glove manufacturing industry, Province of Quebec, 867.
fur workers, Quebec City, 637.
fur workers (retail), Montreal, 1141
fur workers (wholesale), Montreal, 637, 867, 1005, 1141, 1368.
glove manufacturing (work gloves) industry, Province of Quebec, 867, 1141.
leather tanning industry, Province of Quebec, 359, 753.
leather workers, London, 493.
shoe manufacturing workers, Batawa, 1366.
Manufacturing—metal products—
agricultural implement factory workers, Hamilton, 1245.
aircraft factory workers, Montreal, 358; Winnipeg, 1139.
aluminum industry, Arvida, 70; La Tuque, 496.
can and metal utensil manufacturing, Province of Quebec, 70, 1247.
clockmakers, Montreal, 1007, 1368, 1515.
electrical goods factory workers, Toronto, 197.
foundry workers, Three Rivers, 865.
garage and service station employees, Calgary, 1515; Montreal, 495, 867.
metal factory workers, Montreal, Toronto, and London, 68; Regina, 197; Sherbrooke, 68; Toronto, 1367; Toronto (Leaside), 196; Windsor, 865, 1139.
metal products factory workers, Lachine, 634; Long Branch (Toronto), 1513; Longueuil, 635.
ornamental iron and bronze industry, Montreal, 70, 359, 496, 637, 753.
radio factory workers, Montreal, 196.
sheet metal manufacturing industry, Montreal, 70, 496, 637, 1141.
steelworkers, Lachine, 1366.

Agreements, Collective—*Con.*
Manufacturing—miscellaneous wood products—
furniture workers, Newmarket, 196.
furniture workers (hard furniture industry), Province of Ontario, 1008.
sawmill workers, British Columbia, 358.

Manufacturing—non-metallic minerals, chemicals, etc.—
building materials industry, Province of Quebec, 867, 1141.
chemical plant workers, Chippawa, 197; Niagara Falls, 635.
munition factory workers, Transcona, 1004.
paint factory workers, Province of Quebec, 1141.

Manufacturing—printing and publishing—
lithographers, Montreal, Ottawa, Toronto, Hamilton, and London, 1003; Province of Quebec, 495.
mailers (newspaper), Toronto, 1139.
photo engravers (newspaper), Toronto, 1139.
printing pressmen (job), Toronto, 1138; Winnipeg, 1245.
printing pressmen (newspaper), Toronto, 196, 1139.
printing trades, Montreal, 70, 637, 1007, 1368; Quebec, 495, 1515.
stereotypers and electrotypers (newspaper), Toronto, 1139.
typo printers (job), Winnipeg, 1245.
typo printers (newspaper), Calgary, 1366; Hamilton, 865; Toronto, 1138; Winnipeg, 196.

Manufacturing—pulp, paper and paper products—
paper box manufacturing industry (corrugated paper), Province of Quebec, 198, 1141; (uncorrugated paper), Province of Quebec, 495, 867, 1141, 1368.
pulp and paper mill workers, Hull, 752; Thorold, 1138.

Manufacturing—rubber and its products—
rubber factory workers, Bowmanville, 493; Kitchener, 865; St. Jerome, 634; Toronto, 634.

Manufacturing—shipbuilding—
boilermakers, Vancouver, 635, 752.
carpenters, Saint John, 866.
electrical workers, Saint John, 866; Vancouver, 635.
machinists, Saint John, 866.
painters, Vancouver, 636.
plumbers, Saint John, 865.
shipbuilding workers, Hamilton, 752; Lauzon, 752; Sorel, 1139.
shipyard labourers, Vancouver, 635.
shipyard workers, Liverpool, 197.
welders, etc., Vancouver, 752.

Manufacturing—textiles and clothing—
cloak and suit manufacturing industry, Province of Quebec, 637.
cotton textile workers, Marysville, 751.
dress manufacturing industry, Province of Quebec, 359.
embroidery industry, Montreal, 1514.
hat and cap workers (men's and boys'), Province of Quebec, 867.
men's and boys' clothing industry, Province of Quebec, 1005, 1141, 1368.
men's clothing workers, Toronto, 196.
millinery workers, Toronto, 195.
rayon factory workers, Cornwall, 195, 1245.
tailors, Toronto, 493.

Agreements, Collective—*Con.*
textile and jute bag manufacturing industry, Montreal, 70.
textile workers, Lachute Mills, 195.

Manufacturing—tobacco and liquors—
tobacco workers, Toronto, 1366.

Manufacturing—vegetable foods, etc.—
bakery employees, Montreal, 70, 637, 753, 1140; Quebec City, 1140; Regina, 493.
coffee and tea packers, Ville LaSalle (Montreal), 357.
flour mill workers, Winnipeg, 1003.
fruit and vegetable shippers, Kelowna and other localities, British Columbia, 357.
maple sugar producers, Plessisville, 195.
sugar refinery workers, Saint John, 634.

Mining—non-ferrous smelting and quarrying—
building materials, Province of Quebec, 1140.
metal miners, Ainsworth, 357.

Service—business and personal—
barbers, Calgary, 1008; Joliette, 70; Medicine Hat, 200; Montreal, 637; Moose Jaw, 199.
barbers and hairdressers, Chicoutimi, 1369; Joliette, 1143; Quebec, 361, 1247; Rouyn and Noranda, 754, 1143; St. Hyacinthe, 199, 868, 1515; St. John and Iberville, 71; Three Rivers, 637, 754.
garage and service station employees, Quebec City, 70.
hairdressers, Montreal, 71, 754; Moose Jaw, 199.

PREPARED AND EDITED BY

THE DEPARTMENT OF LABOUR, OTTAWA, CANADA

Minister—HON. HUMPHREY MITCHELL

Deputy Minister—ARTHUR MACNAMARA

Assistant Deputy Minister—V. C. MACDONALD

Editor—HARRY J. WALKER

VOLUME XLIV] JANUARY, 1944 [NUMBER 1

Notes of Current Interest

New Year's message of Minister of Labour

In a statement issued in the holiday season, the Hon. Humphrey Mitchell, Minister of Labour asserted that success is crowning the efforts of the United Nations and that there is a promise of the end of the present world conflict. He pointed out, however, that the war is not yet won. "The Government must call upon Canadian workers to continue that gigantic effort which for more than four years they have put forth in the interests of our cause—to re-dedicate themselves to this all-important task. And it has been a gigantic effort. Backing our splendid fighting services, Canadian workers have proved by their industry, by their initiative and ingenuity, that they are worthy of the fine young people who have put on our uniform to fight for civilization."

The Minister continued: "We have met our manpower commitments. Individually our workers on the farm, in factory and mine, in transportation and offices, have given an excellent account of themselves. And if now we ask them to renew their enthusiasm to the end, we know that they will do so with a will."

Referring to the post-war period the Minister stated: "Much has been said of post-war reconstruction, and alike in the interests of those who will be the veterans of our Navy, our Army and our Air Force, and in the interests of our industrial workers, we must be prepared to produce the best possible of post-war worlds. We must, however, not allow any consideration at this moment to divert us from our main task of securing peace through victory—of dealing our enemies the knockout blow."

97982—1½

New Year's messages of labour leaders

In a New Year's message issued at the end of December, Percy R. Bengough, President of the Trades and Labour Congress of Canada declared: "The workers . . . have not failed and will not fail to realize that we are engaged in a people's war and that no class of society has more at stake in the outcome than organized labour."

He referred appreciatively to the "wonderful job" workers have done in this mechanized war. He declared that "labour has given up voluntarily many conditions of employment that took years to gain. In many instances overtime rates were not insisted upon and Saturday afternoons and Sundays worked for straight-time". Not only that "but hundreds have left their homes and families to work in industries and places where their ability and training could be put to better service in war requirements."

Mr. Bengough pointed out that labour had contributed heavily to every Victory Bond drive and worked for and supported the Red Cross and other wartime activities, while the sons and daughters of Canadian workers "comprise the vast majority of the personnel of the armed services." He continued: "Those who are fighting for us will meet injury and death if poorly and insufficiently equipped. Labour has and must continue to keep this in mind. Our obligations to our armed forces must at all times take precedence over all other issues. Such actions as strikes during this war must not be allowed.

"The fact that some outside the ranks of labour have not yet fully realized their responsibilities and have not co-operated with labour in the war effort must not be allowed

to side-track the main objective, which is to win the war in the shortest possible time."

Although admittedly heavy fighting and sacrifice lie before the United Nations in 1944, "the people of Canada are thinking more and more about the problems and possibilities of the post-war world, and particularly of Canada's position and prospects in the period of reconstruction", declared A. R. Mosher, President of the Canadian Congress of Labour, in his New Year's message.

"Canada's ability to produce foodstuffs in enormous quantities will," he declared, "make her one of the chief sources of supply for hundreds of millions of people throughout the world". Unprecedented problems will have to be faced "far transcending those which were faced during the war", but the experience gained during the war provides ground for confidence that these will be overcome successfully.

He asserted that "the responsibility for determining the policies which should be followed in providing economic security for Canadians rests directly upon the leaders of business and government". At the same time, he declared, "the labour movement in Canada is willing to co-operate in every effort that is being made to bring about a peaceful and orderly development of Canada's industrial structures and policies in such a way as to ensure the most efficient use of material and human resources for the general welfare".

Mr. Mosher concluded: "What the people of Canada want, and what they are entitled to receive, is the utmost contribution which every citizen can make to the general welfare. Under a proper system of economic organization, it will undoubtedly be possible for every Canadian to enjoy more leisure, security and happiness, and the New Year should see greater progress in this respect than any previous one in our history".

The year 1943 was marked in Canada by social unrest and by serious strikes, Mr. Alfred Charpentier, President of the Canadian and Catholic Confederation of Labour declared in his message of greeting at the time of the New Year. He referred to struggles between labour leaders and employers, to attacks of "unprecedented bitterness" made by some on government officials, and to "violent rivalry" between various labour organizations. "The abuse of violence, if it is not repressed, is contagious . . . is not this the alarming spectacle that 1943 has given us?"

He called on the national Christian syndicate movement to remain calm in the future as in the past, declaring that its mission was "to aid others to raise themselves", and that the results of this mission were reflected in the winning of the provincial Collective Agreement Act, the creation of a Superior Council of Technical Education and of a Superior Council of Labour. Hailing the "triumph of the idea of a law on freedom of association" he hoped that this would be a source of collaboration amongst unions and would bring about greater labour unity.

"During 1944, may the C.C.C.L. continue in the same spirit and by loyal methods, its work of labour emancipation and of social peace, so as to deserve well of society", he declared.

Cost of living index declines slightly

The Dominion Bureau of Statistics cost of living index declined from 119·4 on November 1 to 119·3 on December 1, 1943. Decreases in indexes for foods and fuel and lighting overbalanced a rise in home furnishings and miscellaneous items. The food index dropped from 133·1 to 132·7 with declines for beef, pork, oranges, turnips and cabbage of greater importance than increases for butter, eggs and potatoes. The reduction in the fuel and lighting index from 113·3 to 111·9 was due to rebates in electricity bills in a considerable number of the larger cities. An index for home furnishings and services advanced from 118·2 to 118·8 due to increases in the furniture and chinaware sections. The miscellaneous index moved up from 108·3 to 108·6, reflecting an increase in the recreation sub-group.

Order transferring functions of Advisory Committee on Reconstruction

Reference was made in the November LABOUR GAZETTE (p. 1467) to the submission to the Government of the Report of the Advisory Committee on Reconstruction, headed by Dr. F. Cyril James. In announcing receipt of the Report the Prime Minister, Right Honourable W. L. Mackenzie King, stated that the Government had accepted one of the recommendations of the Committee, to the effect that the time had arrived when detailed responsibility for reconstruction planning should be undertaken by full time members of the government staff, and that the functions of the Reconstruction Committee be merged with those of the Advisory Committee on Economic Policy.

An Order in Council of December 31 (P.C. 9946) effectuates the transfer, effective January 1, of "the functions of the Advisory Committee on Reconstruction" to the Economic Advisory Committee. The order mentions that in addition to the final report of the Reconstruction Committee, the final reports of the various subcommittees to the Committee have also been received by the Government.

Employment and industrial statistics

The latest statistics reflecting industrial conditions in Canada are shown in the table below.

The index number of employment was 188·7 at the beginning of November, 1943, as compared with 187·6 for October, 183·3 for November 1942, and 123·6 for November 1939. An advance in the index at November 1 is unusual according to the experience of pre-war years. Since the outbreak of war, however, increases have been recorded in the index at that date in each year.

The slight advance recorded at the date under review as compared with the preceding

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† Week ended December 30, 1943.

(1) Base, 1926=100. (2) Figures are for the end of the preceding month. (3) Base, June, 1941=100. (4) Base, 1935-1939=100. (5) Adjusted, where necessary, for seasonal variation. (6) Notes in the hands of the public. (7) Figures for four weeks ended January 1, 1944, and corresponding previous periods. (8) MacLean's Building Review.

month was due to increases in logging, mining, services and in trade. The advance in the last named group was substantial, due in part to the employment of unusually large numbers of part time workers. The indexes for other groups including that for manufacturing were lower. This is the sixth decline in manufacturing since the outbreak of war. The other occasions were seasonal losses at January 1 in each year since 1939, and a contra-seasonal decline at May 1, 1943. The employers reporting disbursed $59,950,027 in salaries and wages, an increase of 0·8 per cent as compared with October. The movement in payrolls has been upward, with rare exceptions, throughout the period in which the statistics have been collected, that is, since early in 1941. The weekly per capita earnings averaged $31.59 at November 1, $31.53 at October 1, $29.81 at November 1, 1942, and $27.02 at November 1, 1941.

The index of the physical volume of business advanced slightly in November 1943, to 242·9 as compared with 239·5 for the previous month. As compared with November 1942, the increase was 16·9 per cent. The indexes of mineral production, construction and electric power output were considerably lower than in the previous month but these were more than offset by the advances which occurred in the manufacturing group index and in the index indicating the volume of distribution of goods.

For the first eleven months of 1943, business operations averaged higher than for any other similar period in the record. The increase as compared with the corresponding period of 1942 was 17·1 per cent. It was reported that some evidence toward tapering off was evident after May, 1943, but the index continued to rise slightly even in November over the preceding month.

The index of employment was 6·4 per cent higher for the eleven months' period in 1943 than for the similar period in 1942, mineral production 30·8 per cent higher, and manufacturing 21·5 per cent higher, while the value of construction contracts declined 28·6 per cent.

Immigration status of refugees in Canada

An Order in Council of December 10 (P.C. 9440) makes provision for the status of refugees transferred to this country from the United Kingdom who have been allowed to take up employment or to pursue studies in Canada under prescribed conditions. According to the order, "it is desirable to make provision with regard to their immigration status in this country, and to render their position similar, in essential respects, to that of enemy aliens in general in Canada."

The order states that notwithstanding any provision of the Immigration Act, the Department of Mines and Resources may issue a temporary permit to enter Canada to any refugee whose release in Canada has been approved by the appropriate authorities. Such a permit will be issued for a period of not more than one year, but is renewable. Particulars and proposed address of the refugee will be forwarded to the Registrar General of Enemy Aliens.

The refugee will then "be deemed for purposes of the Defence of Canada Regulations, to be an enemy alien ordinarily resident in Canada, and subject to such restrictions as are placed by the Defence of Canada Regulations or any other Order or Regulation upon any enemy alien ordinarily resident in Canada:"

He will also "be subject to the provisions of the National Selective Service (Civilian) Regulations in the same manner and to the same extent as any other person in Canada."

Commission to investigate welfare of Japanese in British Columbia

The Honourable Humphrey Mitchell, Minister of Labour, announced on December 20 the appointment of a Commission to investigate the present provisions "made for the maintenance and welfare of persons of the Japanese race resident in settlements in the interior of British Columbia under the administration of the Department of Labour."

Most of the Japanese in Canada, especially the Japanese Canadians, are busy at useful employment in various parts of the country. There are still, however, several thousand Japanese unemployables and their families in the British Columbia settlements, and these have made representations that provision made for their maintenance is not adequate.

On the other hand, the Department of Labour has received complaints in British Columbia that the provisions made are, if anything, too generous. It was decided that a careful enquiry was indicated as necessary to establish the facts of the case.

The Minister pointed out that methods of administration are not an issue at this time —that the enquiry relates solely to the policies adopted for the welfare of the Japanese.

The Chairman of the Commission (appointed by Order in Council P.C. 9498, December 14) is Dr. F. W. Jackson, Deputy Minister of Health and Public Welfare, Province of Manitoba. The members of the Commission are Dr. G. F. Davidson, Executive Secretary, Canadian Welfare Council, Ottawa; W. R. Bone, Administrator of Social

Services, City of Vancouver, B.C.; and Mrs. Mary Sutherland, Revelstoke, B.C.

The Commissioners are appointed as a Royal Commission under Part I of the Inquiries Act.

Operation of Unemployment Insurance Act in Canada

Commencing with this issue the LABOUR GAZETTE is presenting as a regular feature some new information concerning the operation of the Unemployment Insurance Act. This will appear as part of the article, *Recent Activities of the Unemployment Insurance Commission.*

The new material consists of four tables. The first shows the number of claims for unemployment insurance benefit filed each month in local Employment and Selective Service offices. In this table the number of applicants month by month may be compared; this comparison makes a useful parallel to the Bureau of Statistics monthly index of employment in tracing the trend of the employment situation in Canada.

A second table gives by provinces the number of claims received, and the disposition of these claims, i.e. claimant entitled to benefit or not entitled to benefit.

Table 3 deals with claims disallowed, and the reasons for disallowance. Up to the present the greatest number of cases of refusal of benefit have been for workers voluntarily leaving their employment without just cause.

The final table shows the number of persons receiving benefit each month, the number of days' benefit paid, and the amount of benefit paid. The table also shows the average duration of each period of compensated unemployment and the average amount paid per beneficiary.

These tables are based on a monthly pamphlet from the Dominion Bureau of Statistics entitled *Statistical Report on the Operation of the Unemployment Insurance Act.*

Travelling boards to interview 1944 university science graduates

Arrangements have been made to facilitate the selection of technical personnel for the Armed Forces from University Science Students graduating in 1944, it was recently announced by Mr. Arthur MacNamara, Director of National Selective Service.

The three services, Army, Navy and Air Force, have informed the Wartime Bureau of Technical Personnel of their needs as to the numbers and types of engineering and science students they will require from the graduating classes. Instead of working independently as in the past the three services will send travelling boards representing the technical branches of the Navy, the Army and the R.C.A.F. together with officials of the Wartime Bureau of Technical Personnel, to visit the various universities in the near future for the purpose of interviewing graduates for technical appointments.

The principal advantage of having all three services represented at a University at the same time is that it becomes possible for a student who is not acceptable to the service of his first choice to be considered at once by the service of his second or third choice so that a final decision in the case of each student may be made with the least possible delay.

Prior to the visit of the travelling boards it is intended that all students who indicated one of the services as their first preference on a declaration form previously completed will be medically examined. While the Boards will be chiefly concerned with interviewing the 1944 graduates for all three services, a number of 1945 graduates in engineering, mathematics and physics are required by the Navy and the Army for summer training during the 1944 vacation, and these will be selected at the same time.

It is understood that after the representatives of the Armed Forces have completed their selection, the needs of civilian industry for technical personnel from the 1944 graduates will be considered.

Enforcement of mobilization regulations

A report received by the Department of Labour from the Commissioner of the Royal Canadian Mounted Police shows that up to November 30 a total of 39,973 men had been questioned by the R.C.M.P. in regard to compliance with Mobilization Regulations as a result of visits to poolrooms, beer parlours and similar places.

Up to the end of November, 1,659 places had been visited, and as a result 2,701 men were detained temporarily, until they could prove they had not failed to comply with the Regulations. Of these, 344 have been charged in court with attempting to evade the military call-up, and 164 have been charged with failure to notify change of address or to give other information under National Registration Regulations. In addition, 105 deserters from the Armed Forces were located, while 662 men found to be without gainful occupation, were referred to Selective Service Offices, and were made available for work.

The campaign being conducted by the R.C.M.P. is continuing.

Appointment of university advisory board

The Honourable Humphrey Mitchell, Minister of Labour, announced on December 27 the appointment of a University Advisory Board, to consider and report on manpower problems affecting the universities in wartime. The Board will concern itself with both problems involved in the military call-up and the shaping of university policies to better serve wartime needs in regard to university graduates.

Arthur MacNamara, Director of National Selective Service, will be chairman of the Board, while Dr. Sidney Smith, president of the University of Manitoba, will be vice-chairman. H. W. Lea, Director of the Wartime Bureau of Technical Personnel, is the secretary.

Other members of the Board include: Dr. R. C. Wallace, principal, Queen's University; Rev. Dr. H. J. Cody, president of the University of Toronto; Paul Beique, consulting engineer of Montreal; Dr. Cyrille Gagnon, rector of Laval University; Dr. Norman MacKenzie, president of the University of New Brunswick; Dr. James S. Thomson, president of the University of Saskatchewan; J. G. Fogo, K.C., Associate Co-ordinator of Controls, Department of Munitions and Supply; Paul Goulet, Associate Director of Selective Service; and S. H. McLaren, Associate Director of Selective Service (Mobilization).

The Board held its initial meeting in Ottawa on January 6.

Committee to enlist public support for economic stabilization

An Economic Stabilization Information Committee has been formed with the object of enlisting the fullest possible public support for the Government's program of controls.

Order in Council P.C. 9746, December 21, which establishes the committee, states that "it has become a matter of national urgency to create a wider understanding of the necessity for economic stabilization in wartime and of the responsibility of individuals and groups to carry out their parts in making the economic stabilization program effective." It points out that the Government has "reaffirmed the necessity of serving the national welfare by the maintenance of economic stabilization."

The duties of the new committee are stated to be to "institute a program of public information designed to increase the understanding of economic stabilization measures, of the need for these measures in the interests of the nation as a whole, of the benefits of these measures to all groups and individuals, and of the responsibility of all groups and individuals to do their part in assuring their success."

The membership of the committee is drawn from Government departments most directly concerned.

Industrial Disputes Investigation Act

Seven applications for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received during the month of December. Five boards submitted their reports; one board was established, and the constitution of another was completed during the month. Five disputes were referred to Industrial Disputes Inquiry Commissioners and reports were received from Commissioners in four cases. The settlement of one dispute was reported, agreement having been reached between the parties. One application was rejected, and two applications were withdrawn.

Bylaws governing co-operative associations in Saskatchewan

A revision of the standard by-laws governing all co-operative associations incorporated under the Saskatchewan Co-operative Associations Act was gazetted on December 23. They deal with meetings, voting, election and duties of officers, special committees, withdrawal of members, audit and inspection, etc. The by-laws governing credit unions incorporated under the Saskatchewan Credit Union Act were revised at the same time. They relate to organization and membership, capital and liability, deposits, pass books, loans, meetings, elections, directors, duties of officers, credit committee, supervisory committee, reserves, banking and use of seal, etc.

In 1941 a total of 768 co-operative organizations submitted financial reports required by the Acts under which they are incorporated to the Commissioner of Co-operation and Markets in Saskatchewan. Of this number, 68 were credit unions, 483 were co-operative purchasing associations, 29 were marketing co-operatives and two were wholesaling and manufacturing organizations.

Home arts and crafts

A recent number of the Maritime Co-operator outlines progress that is being made by the Canadian Handicraft Guild in promoting home arts and crafts. The Guild has its national headquarters in Montreal.

It is stated that the Montreal shop alone has turned over more than one million dollars

to weavers, rug makers, carpenters, iron and silver smiths. In Quebec, the provincial government sets aside $70,000 a year to develop the Art and Craft movement. By this means marked progress is claimed for the revival of regional folk art.

On the Prairies, too, hand craftsmanship is finding new followers. It was reported recently in one of the Montreal newspapers, that "up to last spring there were some 25 classes with an average of 14 pupils each that had completed a six weeks course in weaving". Continuing, the report states that, "Over 300 women had learned to weave, and in addition, to wash, card, spin and dye wool. . . . There are now 25 weaving circles in Saskatchewan and Alberta."

Commission on mothers'allowances in New Brunswick

On November 4, the Minister of Health and Labour for New Brunswick announced the appointment of an Advisory Commission under the Mothers' Allowances Act, which was proclaimed in force August 11, 1943. The members of the Commission, who will consider applications for allowances and to advise the Director administering the Act, are: Mrs. Florence R. Bertelson, Salmonhurst; Mrs. Herminie Goguen, Cocagne Bridge; Mrs. Mary A. Shea, Fredericton; and the Rev. R. H. Scott, Provincial Child Welfare Officer, Fredericton.

Employment of disabled persons in Great Britain

The British Government has recently introduced a Bill in the House of Commons to assist disabled persons in securing employment. The Disabled Persons (Employment) Bill implements the recommendations recently made by the Tomlinson Committee on the Rehabilitation and Resettlement of Disabled Persons (L.G., 1943, p. 425). The Committee expressed the opinion "that the only satisfactory form of resettlement for a disabled person is employment which he can take and keep on his merits as a worker in normal competition with his fellows". The Bill applies not only to war casualties but to persons disabled through injury, disease or congenital deformity.

Under the Bill disabled persons are to be registered by the Ministry of Labour and National Service and provided with remedial treatment and vocational training to fit them for employment. Employers of more than 25 workers will be required to employ a certain quota of disabled persons. In addition, certain employments throughout industry will be reserved for disabled persons. Employment under sheltered conditions will be provided for the more seriously disabled in voluntary undertakings or special centres financed by the Government.

Giving effect to another recommendation of the Committee, the Ministry has recently opened a Rehabilitation Centre for men at Egham, Surrey. The Centre is designed to restore mental and physical fitness to persons who have just recovered from serious injury or illness. It is equipped with workshops in which disabled persons may be trained for new jobs. Attendance at the Centre is voluntary but board, lodging and allowances are paid by the Government to persons in residence.

Regulation of conditions of domestic workers in British hospitals

To overcome the serious shortage of domestic staff in hospitals and institutions, the British Government has announced its intention of taking steps to regulate the wages and working conditions of this class of worker. The shortage is not only hampering the operation of institutions which care for the sick, the aged, the infirm, and young children, but it is aggravating the shortage of nurses by requiring them to perform non-nursing duties which consume time and also deter many persons from entering the profession. Owing to the absence of recognized rates of pay and conditions of service for institutional domestic staff, the Minister of Labour and National Service has heretofore considered it impracticable to solve the problem by using his powers to direct persons into such employment.

Last July the Government appointed a Committee under the chairmanship of Sir Hector Hetherington to consider the wages and working conditions which should be recognized in any scheme for recruiting domestic workers for hospitals and institutions. The Committee heard representations from workers' and employers' organizations in the industry and studied the existing collective agreements. Its report has been published as a White Paper and the Minister of Labour and National Service announced in the House of Commons at the beginning of November that the Government would accept its recommendations. He declared, however, that they would be applied only to institutions where there were no collective agreements in effect, and would not govern mental hospitals for which special arrangements are being planned.

The Committee proposed a scale of minimum wages for the different classes of domestic workers, holidays with pay, sickness benefits, limiting hours to 96 a fortnight, and the

fixing of maximum charges for meals. It was of the opinion "that differential rates for town and country areas are not desirable or equitable" owing to the difficulty of recruiting workers for rural institutions and the isolation and lack of amenities in rural areas. It suggested that if hours exceed 96 a fortnight, compensatory time-off should be given in the next fortnight, or if this was not feasible, the overtime should be paid for at one and one-quarter times the non-resident's hourly rate. The Committee did not favour enhanced pay for Sundays or holidays as work on these days cannot be avoided in institutions. Workers should be granted six statutory holidays or compensatory leave in lieu of them, and after six months' continuous service at least a week's annual holiday with pay; and a holiday allowance of 12s 6d should be paid to resident staff. After six months' continuous service, employees should also be entitled to sick leave of three weeks at full-pay and three weeks at half-pay each year. Sick leave could be accumulated if not used. An allowance of 12s 6d a week should be paid to resident staff who do not receive in-patient treatment.

The Committee expressed the opinion that the status of institutional domestic staff must be raised and efforts made to improve the arrangements made for their accommodation and leisure if sufficient workers are to be attracted to this occupation. The Minister of Labour and National Service stated that he was appointing a small standing committee to advise him on the problems of these workers and was extending the activities of the Welfare Officers and the Welfare Advisory Boards of the Ministry to include domestic workers in institutions. He added:

> I do not propose to rest content with promulgating rates and conditons for adoption by individual institutions. It is my aim that this service should be placed in the general estimation on a footing with any other industry and that it should offer suitable training, prospects of advancement, and proper welfare arrangements.

Joint production committees in British war department establishments

An agreement was recently signed by the official and trade union sides of the War Department Industrial Whitley Council to provide for the establishment of joint production committees in War Department establishments. The War Department Whitley Council is the negotiating machinery for determining the working conditions of civilian employees in industrial establishments operated by the Department.

The agreement stipulates that the production committees are to be purely consultative and advisory. They will not deal with questions such as wages or other matters which are covered by agreements with the unions represented in the establishments. Their purpose is to enable employees to make suggestions for increasing efficiency and output and to bring their practical knowledge and experience to bear on the work of the plant.

The production committee in each establishment is to be set up by agreement between the two sides of each local Industrial Whitley Committee. A production committee should have not more than six representatives each of management and the organized workers. Additional representatives with special knowledge of a particular problem under discussion may be invited to attend certain meetings. Only those workers who belong to a trade union and have completed 12 months' service are eligible for election to the committee or for appointment as a special representative. Each side will appoint a secretary. Meetings will be held when required, but normally, not more than once a month. Recommendations of the meeting must be transmitted to the head of the establishment. In addition, a copy of the minutes should be sent to the joint secretaries of the War Department Industrial Whitley Council.

Wage applications involving ability to secure adequate labour force

Applications to the U.S. National War Labour Board in which a company states that wages are the key factor in determining its ability to secure and hold an adequate labour force, may receive the joint sponsorship of the War Production Board and the War Manpower Commission if "justified in terms of the urgency of essential production." Announcement of an agreement to this effect between these two agencies was made in a recent press release from the U.S. Office of War Information, which further stated that the agreement had received the approval of the Chairman of the National War Labour Board.

In presentations to the War Labour Board, the War Production Board must certify to the importance of the product to the war effort; whether deliveries are behind, on, or ahead of schedule; and to what extent labour appears to be the limiting factor as compared with availability of materials or other production factors.

The War Manpower Commission will certify whether there is in fact a manpower shortage; whether such shortage cannot be remedied solely by the application of measures available to the employer and to the War Man-

power Commission; and the effect that a wage adjustment would have on the manpower situation within the plant and the probable effect of the wage adjustment on the manpower situation within other plants in the area.

Food facilities reduce absenteeism

According to the *Labour Management News* (Washington) for January, the United States Food Distribution Administrator has appointed a committee to work with labour and management in supplying in-plant food facilities. Priorities and materials for kitchen equipment will be provided by the War Production Board; food by the Office of Price Administration; and manpower by the War Manpower Commission. One of the main purposes to be achieved, it is said, is to provide another check on absenteeism in industry.

It is asserted that in-plant feeding facilities, or the lack of them, become increasingly important as absenteeism and quit rates rise in war plants. "Employment of women, food rationing, shortage of housing, inadequate restaurant facilities and transportation problems make some type of food service in the plant necessary."

It is pointed out that Great Britain has found in-plant feeding so important that all British factories with more than 250 employees are required to have it.

Although the provision of such facilities is admittedly not general in United States industrial plants, several concrete illustrations are enumerated to indicate that excellent results have been obtained in individual instances, not only in reducing absenteeism, but in the curtailment of industrial accidents as well.

Cafeterias and in-plant facilities for workers in U.S. war plants

An outline of the program which the United States War Production Board has undertaken to provide cafeterias and other health facilities for workers in war plants appeared in the text of a recent letter from Donald M. Nelson, Chairman of the Board, to President Roosevelt.

"Because proper facilities such as cafeterias, rest rooms, toilets, and locker facilities are a prerequisite for maximum war production, the War Production Board some eighteen months ago established an Industrial Health and Safety Section in our Labour Production Division which has been working on these problems continuously with management and the procurement agencies," the letter states. "An Office of Women Consultants was established in order to work out problems that have arisen or become more acute because of the great increase in woman war workers. Last spring our Labour Production Division initiated an active program on 'in-plant feeding' in co-operation with other agencies and this has been formalized in the War Production Board by an Administrative Order dated November 30, 1943, which designates our Office of Civilian Requirements as the claimant agency responsible for making available the equipment necessary.

"In-plant facilities in war plants have always been considered by our Industry Divisions and Facilities Bureau as 'essential for the war effort' and therefore eligible for construction during war time.

"In order to emphasize the importance of this activity, additional instructions are being issued to our entire organization to approve such essential 'in-plant' facilities in war plants as cafeterias, rest rooms, toilets, and locker facilities when they are submitted by the War Department, Navy Department, or Maritime Commission."

President Roosevelt had previously written letters to the Chairman of the War Production Board, the Secretary of War, the Secretary of the Navy, and the chairman of the U.S. Maritime Commission, stating that "in order to prevent unnecessary loss of man-hours and productive effort in our essential industries and to increase the employment of women, it is my desire that your agency make the necessary funds and materials available for such facilities as may appropriately be installed in the plants and yards under your jurisdiction."

Labour unionism in India

Industrialization in India in proportion to the population is, as yet, not extensive, but substantial progress has been made according to the monthly news-letter issued by the Royal Bank of Canada for December. It is stated that "there are 700 unions with half a million members (in India). Industrial legislation started as early as 1881, and now there are acts limiting working hours to 54 a week, prohibiting children under 12 from working and making provision for the protection of women employees." India also has a seat on the Council of the International Labour Office and an Indian was President in 1927. "More than 50,000 men are being trained in a technical education scheme organized by the labour department."

Manpower

Compliance of Male Employees with Mobilization Regulations

IT will shortly become necessary for every employer of male workers to examine the standing of employees of military call-up age to make sure that they have complied with Mobilization Regulations. An order in council of December 31 (P.C. 9919) authorizes the Minister of Labour to issue an order requiring employers to make a check on their employees to this effect.

Through this survey it is hoped that any men who may be delinquent in regard to the military call-up will be located, so that their cases may be dealt with.

The term "employer" will include Dominion, provincial and municipal governments, as well as all private businesses, and also will include farmers, even where the employee is a son or other relative of the farmer.

The order of the Minister, provided for under the order in council, is to be issued as soon as necessary arrangements have been completed to assist employers in making the necessary survey. The order will set forth the dates between which employers are to check on their employees.

In the meantime male employees are expected to provide themselves with copies of any documents they need to prove that they have not failed to comply with Mobilization Regulations. A warning to this effect was issued by the Department of Labour some time ago to male persons in employment (L.G., Oct., 1943, p. 1340).

The order in council amends National Selective Service Mobilization Regulations by adding a new section 25A.

Labour Supply in the Coal Mining Industry

COAL mines throughout Canada reported a net increase of 3,122 workers during the period June 1 to November 30, 1943, according to a recent announcement by the Honourable Humphrey Mitchell, Minister of Labour. Of the total, 1,100 were added by mines in the Maritimes, 1,832 in the Prairies, and 190 in British Columbia.

The net addition came from three main sources:

(1) the compulsory return of ex-coal mine workers to the industry under Selective Service Regulations;[1]

(2) the voluntary return of skilled miners granted leave from the Armed Forces;

(3) the recruitment through Selective Service Offices of other workers, mainly unskilled.

Another source, in the Prairies, has been a return for the winter months of some farmers who work seasonally at coal mining during the winter.

The Minister pointed out that a governing factor in building up the staffs of the mines is the shortage of "producers". Coal mining is a skilled occupation, which normally requires an extended apprenticeship. While an additional number of unskilled workers could be provided by Selective Service, these could be absorbed by the mines only in proportion to the number of skilled workers available. Although under the Order in Council of last May practically every ex-coal mine worker who is physically fit and who was engaged in any other industry has now been returned to the mines, the Minister stated, a shortage of skilled producers continues to exist, particularly in the Maritime Provinces and on Vancouver Island.

Of the net addition of 3,122 men to the staffs of the coal mining companies, 1,033 were skilled producers, 1,371 were other underground workers (mostly semi-skilled) and 718 were surface workers, most of whom are unskilled.

The net additions brought the total employed in Canadian coal mines at November 30 last to 27,986, compared with 24,864 at June 1 last. The net addition at November 30 compared to a year before was about 3,000.

"While the coal shortage which was anticipated last May when the Government

[1] P.C. 246 as amended by P.C. 4092, May 17, 1943 (L.G., June, 1943, p. 739).

declared labour supply for the coal mines to be a national emergency", the Minister said, "has not been obviated completely, the outlook has improved. Production of Canadian coal from April to November (inclusive) stands at 11,253,000 tons, compared to a total approximately 600,000 tons greater in the same months of 1942. But for the net additions to working forces, the falling off in production would have been much more substantial. However, with these net additions, it is anticipated that production in the immediate future will stand better by comparison with a year before."

Labour Priority of Gold Mines

On January 8 the Minister announced that a temporary change in the labour priority of gold mines had been made, to permit of the mines engaging some men who may be available, and who are not immediately required for other higher priority jobs for which they may be fitted.

National Selective Service has made a survey of the gold mines, and has drawn up a schedule of their minimum labour requirements, that is to say, of the minimum numbers of men necessary to keep the individual mines operating. What is now being done is to temporarily allow a "B" priority to certain gold mines, until they reach minimum labour quotas, after which the priority will again be reduced.

The Minister of Labour emphasized that all coal mines and virtually all base metal mines essential to the war effort are in "A" priority; so that the gold mines are not being placed on an equality basis with those other mines.

The present change is made by Selective Service because some of the gold mines faced a suspension of operations unless they secured some more workers, while at the same time demands for labour from high priority industries have eased to some extent.

Regular Selective Service Regulations are not being changed for gold mining; that is workers will still require work permits, and men will only be allowed to go to the gold mines where higher priority jobs are not available.

Winter Employment of Inland Seamen

SPECIAL arrangements have been made under National Selective Service Civilian Regulations to facilitate the procedure in connection with the laying off of men at the close of navigation on the Great Lakes, and for securing a return of the men to navigation when it re-opens in the Spring.

Selective Service Officers have been extending their facilities to issue the necessary forms in connection with the lay-off of men as shipping closes, visiting boats where possible. The officers and men laid off from the boats are then registered for other essential work during the winter time, and placements are proceeding. Some of the men will take advantage of the winter to take up tuition and examinations for certificates as navigating officers or marine engineers.

It is intended that men who are to return to navigation work next year will be able to claim continuation of postponement of military training by reason of their occupation. Even though these seamen enter an occupation from which Selective Service ordinarily does not permit separation, seamen will be permitted to return to navigation upon the arrival of Spring—and in fact Selective Service is taking measures to assist in locating the men when they are again required on the lakes.

The arrangements have been worked out in consultation with the Director of Merchant Seamen and the Canadian Seamen's Union.

Employment of Prisoners of War at Civilian Work

THE placing of prisoners of war in civilian employment in Canada was authorized in May, 1943, by Order in Council P.C. 2326 (L.G., June, 1943, p. 741).

Prisoners of war, to the number of over 2,400 are now working at 25 labour projects across the country, mainly connected with the production of fuel wood. Production has been satisfactory, the daily rate per prisoner going as high as 1¼ cords in some cases.

Some use has been made of the services of prisoners at farm work. Over 60 men have been assigned to farm jobs in Carleton County, near Ottawa, and 107 in the Brooks, Alta., district. In addition, over 500 prisoners were used on daily work during the harvest, particularly in the sugar beet areas of Alberta.

In the labour projects now in operation, accommodation for prisoners and guards is provided by the employer. Employers pay

the Department of Labour for the services of prisoners at the going rate of wages for such work adjusted to the work output. Prisoners receive from the Department a daily rate of working pay which is fixed in accordance with the provisions of the International Convention governing the employment of prisoners of war.

The fact that the utilization of prisoners' services is working successfully is borne out by continuous requests from their employers asking for more men. In so far as discipline is concerned, the Department states that generally the conduct of the men has given rise to no difficulties.

National Registration Regulations Amended

THE National Registration Regulations have been amended by a recent order in council, P.C. 8789, December 24. Most of the amendments thereby authorized are minor administrative ones, bringing the Regulations and the forms in use thereunder into line and up-to-date with the rapidly changing war conditions.

A few of the amendments are worthy of note, namely:

(1) The general registration of itinerant merchant seamen (other than those of Canadian citizenship) through the post offices is prevented. A special form of temporary registration has been provided for these subjects and registrars appointed at the principal Canadian seaports.

(2) It is made an offence for a person (a) to alter or obliterate any authorized endorsement appearing upon a Registration certificate or to be in possession of a certificate that has been so changed; (b) to counsel any person to commit, or to conspire with any person to commit, offences contrary to the principal penalty clauses of the Regulations.

(3) The two-year time limitation set previously for commencing actions against persons who illegally print, make or alter Registration certificates or who alter or obliterate authorized endorsements on certificates, is extended so that action may be commenced at any time during the continuance of the present war.

Others of the amendments make the forms now in general use under the Regulations integral parts of the Regulations.

National Registration was originally carried out in August, 1940, when all persons in Canada 16 years of age or over were required to register. It has since been kept up to date through the issuance of certificates to individuals reaching the age of 16, through the registration of changes of address, which have averaged many thousand per month, and through various other activities (L.G., March, 1943, p. 312). Information gained from the registration is supplied to the Mobilization Divisions for use in the military call-up, and to various agencies as required.

Drafting of Young Men for Coal Mines in Great Britain

GREAT Britain's Minister of Labour and National Service, the Right Honourable Ernest Bevin, has announced a scheme for conscripting young men for work in coal mines.

For some time previous to this announcement men up to 25 years of age who were available to be conscripted had been given an opportunity of choosing underground work in mines instead of service in the Armed Forces unless they were in certain skilled categories. However (as pointed out in a recent report by the Select Committee on National Expenditure) the labour force available in the coal mining industry is subject to an annual loss, through illness, accident, and retirement of elderly workers, of some 20,000 or more men; and during 1943 this figure was expected to be offset only to the extent of some 4,000 by the entry of young men choosing mining in preference to military service. The net loss during the year was thus estimated at 16,000 men, reducing the total number of men engaged in the industry below the lowest level since August, 1941. Expedients such as the return of miners from the Home Forces had been exhausted, and a dangerous decline in coal production was anticipated.

A few months ago the age limit of 25 years for men given the option of choosing coal mining instead of military service was abolished.

The new plan of conscripting men directly for the mines was announced during December by the Minister of Labour and National Service. It applies to men between the ages of 18 and 25, and is expected to bring more than 30,000 young men to the mines, at the

rate of 7,500 monthly for four months, and 2,500 monthly thereafter.

A draft is being taken during mid-January. Under the plan ten numbers from 0 to 9 will be written on cards which will be placed in a container. A member of the Minister's staff will choose one of the numbers and all those whose national service registration certificates end with that number will be liable for duty in the mines.

Exceptions have been made in respect of men who have been accepted for service with the R.A.F. or Fleet Air Arm, men accepted as artificers in submarines and men in a short list of highly-skilled occupations.

It was announced that men called up for the mines would be treated similarly to men called up for the forces as far as privileges and concessions are concerned. They will be given four weeks' preliminary training at pay ranging from $9.50 to $17.50, depending on age, then posted to collieries and paid full wages for the jobs they do.

The new miners will rank with men in the forces in demobilization plans, and the question of their joining the Miners' Union will be dealt with in arrangements between employers and the union.

Change in United States Manpower Policy

IN the LABOUR GAZETTE for September, 1943, (p. 1218) a description was given of the United States policy for supplying manpower to the armed forces and mobilizing the nation's labour supply for essential industry. The program then in effect under the direction of the War Manpower Commission was based on the principle that deferments from the armed forces should be given primarily to skilled workers employed in essential industry. Under the plan, dependency status was not to be considered as a primary factor for deferment, and fathers between the ages of 18 and 37 were eligible for induction into the armed forces. A list of "non-deferrable occupations" was issued; and draft registrants in these occupations were instructed to transfer to war jobs or be placed first on the list for induction.

The United States Congress recently moved to reverse this program by passing a new draft bill giving preferential treatment to men who were fathers before the United States entered the war. The new law abolishes the War Manpower Commission's list of non-deferrable occupations, and puts pre-Pearl Harbour fathers at the bottom of eligible lists. Occupational deferments are required to be made by appeal boards sitting in registrants' places of employment. The jurisdiction of Mr. Paul V. McNutt, Chairman of the War Manpower Commission, over the Selective Service system headed by Major General Lewis B. Hershey is eliminated.

Labour Turnover in War Plants in United States

APPROXIMATELY twenty-six causes, singly or in combination, underlie the heavy labour turnover in American war plants, according to a recent report issued by the Office of War Information at Washington. The report states that labour turnover has reached the extent where war plants on the average must hire 17 workers to get a net employment increase of three.

Common Causes.—The major cause was found to be the desire for a better job at better wages. Then workers frequently grow restive under the impression that they are not doing enough to aid the war effort; or they are seeking opportunities for promotion; or they feel that their ability is not sufficiently recognized. Inadequate transportation or housing, unsatisfactory hours, and overly hazardous conditions in plants are among other of the leading causes of workers quitting their jobs.

Among the lesser-known reasons mentioned in the report are lack of satisfying social contacts or recreation after work; layoffs and interruptions which the worker does not understand; or lack of proper feeding facilities near the plant.

Women have other types of reasons for quitting, such as the desire to join a husband who is in one of the armed services; or housekeeping difficulties. Others quit to get married, or to have a baby, or to give more care to their children. Other causes are the lack of sanitary facilities; inadequate arrangements for shopping; and promotional discrimination against women.

Corrective Measures.—Among the remedies suggested are labour representation on production committees; hiring and exit interviews; programs stressing the importance of workers' contributions to the war effort; and, in general, careful attention to correcting inadequacies in working and living conditions that create unrest among workers. Various remedies are necessary, requiring the combined efforts of management, labour, community and government.

Industial Welfare

Inquiry Into Hospitals in Quebec

Provincial Commission Recommends Sickness Insurance and Improvement of Working Conditions of Hospital Employees

THE first three parts of the Report of the Commission of Inquiry into Hospitals have been published. This Commission was set up by the Quebec Government in August, 1941, to enquire into Montreal hospitals, and in February, 1942, its terms of reference were extended to include all hospitals in the province. It was directed to examine the economic position of public charitable hospitals and asylums for the insane, the state of their revenue and expenditure and the labour conditions of their employees.

The first part of the Report, which was submitted in February, 1943, merely outlines the scope of the Commission's enquiries. The second and third parts were presented in June, 1943, and deal with "The Legal Problems of Public Charity" and "The Legal Status of Hospital Employees and their Working Conditions". The fourth and fifth parts, which have not been published, are concerned with the "Financial Position of Hosptals" and "General Conditions of Hospitalization in Quebec".

The major recommendation of the second part was that the province should provide for sickness insurance and that a Commission should be established immediately to work out the details. In the third part it was recommended that the existing labour laws of the province should be extended to cover hospital employees wherever possible, and that, as an immediate measure, a minimum wage order applying to these employees should be passed. The recommendations of both parts, insofar as they involve suggestions for immediate action, have already been implemented.

As first set up, the Commission consisted of Dr. Arthur Lessard, Special Officer of Montreal Charities, as chairman, Dr. A. Lorne C. Gilday, superintendent of the Western Division of the Montreal General Hospital, as vice-chairman, and the following members: Rev. Sister Allard, hospitaller-general of the Hotel-Dieu of Montreal, J. O'Connel-Maher, Associate Deputy Minister of Labour for the province, and Alfred Charpentier, president of the Confederation of Catholic Workers of Canada. When the scope of the Commission was extended, the following two members were added: Dr. Renault Lenneux, head physician of the St. Sacrement Hospital of Quebec, and Albert Towner, general manager of the Caisse d'Economie Notre-Dame of Quebec.

Public Charities and Lunatic Asylums Acts

The Commission analysed in detail the Public Charities and Lunatic Asylums Acts, the two statutes under which public assistance is provided to hospitals and other charitable institutions in the province. Under the former, the province and municipality each assume one-third of the cost of providing treatment in an approved hospital or similar institution to persons who are certified to be in need of treatment and unable to pay for it either directly or indirectly. The institution is responsible for the remaining one-third of the cost. The Lunatic Asylums Act provides that the cost of maintaining indigent insane persons will be defrayed entirely by the province and the municipality.

Both these Acts have been on the statute books for over two decades, and the Commission was of the opinion that they show clearly the attitude to public charity which was in fashion at the time they were passed. It was then widely believed that charity was a private matter and that State interference in the field was to be feared. The State had to step in because the institutions were no longer financially able to meet the needs of indigent patients, but it refrained from interfering any more than was absolutely necessary.

The Commission submitted that the system which resulted was inadequate under present conditions. The burden on the institutions was becoming increasingly difficult to bear both because their revenues had suffered as a result of the competitive appeals being made to the public by other charitable agencies and because their obligations had increased with the increase in the number

of cases in which hospital treatment was now considered necessary. An undue burden was also being placed on the municipalities with the increase in the number of indigent patients now being cared for, and a particularly undesirable aspect of the situation was that the poorest municipalities were those in which there was the greatest need for free hospitalization. Moreover, the means test to which the patient was subjected was always humiliating and frequently delayed urgent treatment.

The main criticism, however, went further than this. The Commission stated that the existing system had contributed nothing to the maintenance or improvement of the health of the people of the province, since its purpose was purely to provide hospitalization for indigent persons. It produced evidence to show that there was an "urgent need for the State to interpose more fully in matters of the general health".

Sickness Insurance

Therefore, though it made several minor recommendations, the Commission was mainly concerned to find means whereby the State could protect the health not merely of the poor but of the entire population. This, it believed, could be done through a system of general sickness insurance in which the State, the employer and the worker would contribute and in which the insurance premium would be calculated on a family, not an individual, basis. It therefore recommended the enactment of legislation laying down the principles of such a system and the establishment of a Commission to work out the system in detail.

The Quebec Legislature at its last session passed an Act, which was assented to on June 23, 1943, setting up a Health Insurance Commission. The Commission was directed by the Act to draw up a plan for health insurance along the lines recommended by the present Commission of Inquiry and in the meantime to recommend to the Lieutenant-Governor in Council any measures which might be taken to facilitate the transition from the present to the new system (L.G., July, 1943, p. 1028).

Conditions of Work of Employees

In the third part of its Report the Commission analysed the labour and social laws of the province in so far as they apply to hospitals and similar institutions. It also studied the actual conditions of work of the employees and the opinions of the employees' and hospital associations on these matters. The Commission found that the employees of charitable institutions obtain little protection under existing labour laws and that they are in an unfavourable position as compared with other workers in several respects. For example, they lack a legal minimum wage and protection against industrial accidents and diseases, their hours are unduly long and they have no overtime pay, their wages are low and they have difficulty in obtaining recognition for their associations. These unfavourable conditions react unfavourably on the institutions themselves. It is difficult to obtain competent personnel, labour turnover is high and there is a high degree of discontent and fatigue among the employees which affects their efficiency.

The Commission therefore recommended (1) that existing social legislation should be generally applied to hospitals and similar institutions, (2) that the Act respecting the Arbitration of Disputes between Certain Charitable Institutions and their Employees should be repealed and that the Municipal Strike and Lock-out Act should be applied to hospitals, (3) that the Minister of Labour and the Workmen's Compensation Commission should consider the possibility of applying the Workmen's Compensation Act to charitable institutions, and (4) that the employment of children under 14 should be prohibited and that the employment of those between the ages of 14 and 16 should be regulated by a system of permits.

The Commission also was in favour of the negotiation of collective agreements between hospitals and their employees under either the Collective Agreement or Professional Syndicates Act. It did not expect, however, that this suggestion would be adopted immediately, and it recommended that in the meantime an order should be passed under the Minimum Wage Act applying to hospitals and similar institutions. The Commission appended to its Report a draft order along these lines and this draft has now been made law with only insignificant changes (L.G., Dec., 1943, p. 1743).

Factory Inspection in Great Britain in 1942

A STEADY increase in the number of women workers, a rise in the number of reportable accidents particularly among women, a downward trend in hours of work and a growing interest in factory welfare arrangements are noted in the annual report for 1942 of the Chief Inspector of Factories for Great Britain. The awakened public opinion concerning the well-being of the factory worker is attributed in large part to the increased employment of women and the entry into industry of older persons drawn from the non-industrial population. The development of joint committees of various kinds was also regarded as an important advance during the year. The Senior Medical Inspector reported a satisfactory state of health among industrial workers. A separate report on factory canteens showed a remarkable increase in the number of canteens and an improvement in their service.

The work of the Factory Inspectorate has been greatly increased during the war due to the expansion and dispersal of factories, the employment of inexperienced workers and the development of new processes. About 30 per cent of the 387 members of the Inspectorate are temporary and only short-term training courses could be arranged for them. The appointment of an Industrial Health Advisory Committee to provide expert guidance on new problems was welcomed by the Chief Inspector.

Accident Prevention

While total accidents increased during the year, the percentage increase was slightly less than in 1940 and 1941, and the number of fatal accidents dropped. Only accidents requiring absence from work of three days or more are reported. There was a 66 per cent increase in the number of accidents suffered by women workers. This indicated the sharp increase in the number of women workers and also showed that "women have so largely taken over those accident-producing occupations formerly reserved for male workers of some skill". About 85 per cent of the accidents to women occurred in occupations connected with the manufacture of munitions.

A considerable number of accidents to women were caused by their hair or clothing being caught in machines. The Government has been strongly urged to make the wearing of caps compulsory but the Chief Inspector pointed out that one of the most serious accidents happened to a girl wearing a cap. He stated that "the first line of defence is the efficient fencing of the dangerous part". If cap-wearing was compulsory, there was a danger that "all concerned would tend to trust to this safeguard and neglect secure fencing". He added:

> Until some highly popular lady popularizes a fashion in hairdressing which will make the present puffs and curls unfashionable, I have little hope of the cap being a complete protection.

However, he commended the safety-cap shop run by one firm where the girls could choose whatever style and colour of hat they prefer. A warning was issued to women workers who attempt to protect manicured hands by wearing gloves which might catch in machinery.

Accidents caused by transmission machinery only totalled 17 per cent of the reported accidents and the number of fatalities dropped appreciably in 1942. In 1920 these accidents accounted for 26 per cent of the total. This indicated the effectiveness of the safety provisions of the Factories Act directed against such hazards. A campaign by the Inspectors and a series of court convictions for inadequate fencing have resulted in a greater awareness of the risks from transmission machinery. Accidents not due to machinery rose by 21 per cent. They included falls which accounted for over one-third of the fatalities, and injuries from the handling of goods which amounted to one-fourth of all accidents. The control of such accidents was, in the Chief Inspector's opinion, a problem for safety organizations, joint committees and trained safety officers working inside the plant rather than for legislators.

The increase in accidents was attributed not only to the entry of inexperienced workers such as women into industry, but also to attempts to work too fast or take short-cuts, over-worked supervisory staffs, fatigue from continuous employment at long hours for four years of war, less preliminary training, loss of maintenance staff, employment of older and less fit persons and insufficient medical supervision.

Accident prevention campaigns can only succeed, in the opinion of the Chief Inspector,

> where the management is sympathetic to the idea, where there is a committee . . . . that is given the necessary authority to get things done and where there is a trained safety officer with sufficient status and technical ability to carry out both his own ideas and the decisions of the committee as well as his instructions from his executive.

Cases are reported of firms with these essentials which achieved remarkable reductions in the number of accidents. One Government engineering plant organized four-day training

courses for women entrants and found that their accident rate was only half the rate of those who received no preliminary lectures. "We have no indication", the Chief Inspector commented, "that would lead us to think that safe practices impede output."

Preventive work of the Factory Department during 1942 included stimulating the formation of joint safety committees, producing posters and safety films and organizing lecture courses for safety officers and foremen. Special measures were directed against particular hazards. For example, regulations were issued to protect workers handling radioactive substances and grinding magnesium. A conference of firms filling methyl bromide fire-extinguishers was called to work out a voluntary code of precautions. A committee of representatives of trade unions, employers, a university technical expert and engineering, medical and general inspectors was appointed to study methods of preventing silicosis in steel foundries. A special booklet and posters were issued to warn shipyard workers of the danger of falls and falling objects which caused one-third of the 19,000 accidents in this industry in 1942.

Hours of Work

The Chief Inspector commented on the public's increasing acceptance of the fact

> that long hours do not necessarily mean a proportionate increase in output and that the man-hour is not a mathematical entity but varies with the fitness and vigour of the human being concerned.

A general trend towards a reduction in the hours not only of women and young persons but of adult men, whose hours are not controlled by the Factories Act, was observed during the year. Moreover, about 70 per cent of the 19,000 permissions granted under the general emergency orders (which authorize the employment of women and young persons for longer hours than those allowed by the Act) permitted work-weeks of not more than 55 hours. In many cases the actual hours worked were found to be below the maximum authorized. Shortage of supervisory staff and technicians prevented a wider adoption of rota systems during the year.

An investigation of the hours of young persons under 18 in a representative group of factories showed that of those over 16, 89 per cent of the girls and 85 per cent of the boys were working not more than 54 hours a week. About 55 per cent of the girls and 48 per cent of the boys over 16 had work-weeks of 48 hours or less. Of those between 14 and 16, 37 per cent of the girls and 30 per cent of the boys were employed for 44 hours or less and the remainder were working between 44 and 48 hours. A number of firms were prosecuted for employing girls under 18 and boys under 16 on the night shift or for requiring women and young persons to work excessive hours.

Several district Inspectors drew attention to plants where a reduction in hours resulted in no drop in production but in generally improved attendance. For example, a small plant making tank and aircraft parts reduced its 62-hour week to 47 hours, eliminating Sunday and Saturday afternoon work. At the end of a month piece-work earnings under the 47-hour week were at the same level as under the 62-hour week.

Opinions of employers varied as to the value of part-time women workers who entered industry in large numbers during 1942, "but on the whole the system seems to be working very successfully". Some firms reported that their hourly output was greater than that of full-time workers and in most cases their attendance was better. The majority of the women were employed on morning or afternoon shifts but a few were on evening or night shifts.

Welfare Work

"The swing of public opinion towards the acceptance of a personnel and welfare department as a necessary part of management in all works of any size" was among the significant advances of the year. The Supply Ministries have given impetus to the movement by the development of excellent welfare departments in Royal Ordnance Factories. Even in the long-established cotton industry employers found that they could not recruit labour unless they provided canteens, medical and welfare officers and ambulance rooms. Absenteeism can be appreciably reduced by attention to matters outside the factory such as transport, shopping, billeting, etc.

At the beginning of 1943 there were 5,759 welfare officers serving 3,099 factories, two-thirds of which had over 500 employees. Inspectors are now attempting to assist small factories to improve their amenities and welfare services. Short-term training courses have been organized to overcome the shortage of trained welfare officers. Special welfare arrangements have been made for workers on remote building sites and construction works.

The Chief Inspector does not consider that the time has come to lay down legal standards concerning all welfare services. Certain physical amenities that go to make good welfare conditions can be required but "good personnel management consists so essentially of the 'intangibles' that can hardly be included in a legal formula". Stress is laid on

the importance of co-operating with trade unions and plant committees in welfare work:

> Close team-work of all concerned, with the skilled advice of trained personnel management, will go far towards bringing to the forefront that emphasis on the value of the human side in industry that has been so neglected in the past and is now shown to be of such supreme importance.

Conditions of Work

The fuel economy campaign has resulted in better factory heating as it led to an examination and improvement of heating systems. The Chief Inspector warned that too low temperatures would "lead to a loss of output that would far outweigh any gain in fuel economy, quite apart from any increased accident risk and effect on the workers' health and comfort".

Some progress was noted in air conditioning in glass works and other plants, and one plant reported a 30 per cent reduction in sickness following the introduction of air-conditioning. Methods of controlling excessive temperatures in some foundries and metal-extracting plants had been devised in consultation with shop stewards and management.

Better methods of removing dust and fumes in filling factories have been adopted. Improvements in factory lighting, particularly in smaller factories, were reported. The importance of cleaning lighting installations regularly and painting walls and ceilings a light colour was stressed.

Industrial Health

The Senior Medical Inspector reported that, despite wartime conditions, there was no evidence of a decline in the health of industrial workers, but mental fatigue or staleness is increasing. He warned:

> There must be no lowering of standards of preventive measures . . . . Any increase of output obtained in this way is dearly bought, and at the best is illusory and evanescent . . . . There is a limit to the secondary jobs which can be taken on . . . . The physically immature and the older sections of the community must be watched in this connection, and particularly the hours of work of the former.

An increase was noted too, in non-disabling sickness such as boils, trench-mouth, etc. This indicated a lowered resistence to infection probably due to fatigue.

As regards medical services, the results achieved by plants with such services have stimulated other firms and the demand for medical officers exceeds the supply. Short courses have been arranged for industrial doctors and nurses by the Ministry of Labour and National Service and the medical schools. Special attention was given during the year to developing medical services for dock areas where accidents have increased due to air raids, the blackout and the employment of older and less fit men.

Progress was reported in preventing dermatitis due to tetryl, T.N.T., fulminate of mercury and white spirit in Government filling and explosive factories. This was achieved by "strict supervision of ablutions, the correct application of barrier substances, the gradual elimination of specially susceptible workers and the mechanization of many processes." A small advisory panel on dermatitis in industry made up of experts in dermatology, chemistry and general medicine and of Government officials was appointed to study the problem. Wider use of such specialist panels was recommended.

The number of notifiable industrial diseases was raised to 14 during 1942 by the addition of "toxic anaemia" caused by contact with X-rays, radioactive substances and chemical compounds. Fourteen cases of toxic anaemia were reported, half due to T.N.T. and the rest to solvents used in rubber solutions and aeroplane dope and containing low proportions of benzene. T.N.T. also caused 167 cases of aniline poisoning and 26 cases of toxic jaundice. However, the incidence of toxic jaundice from T.N.T. in the present war is only 19 per cent of what it was from January 1, 1916, to December 31, 1918, despite the increased production of T.N.T.

The number of cases of lead poisoning increased slightly but was still well below the level of the later pre-war years. Decreases were reported in most other notifiable diseases, although still high was the number of cases of gassing from nitrous fumes, producer gas, nickel carbonyl or sulphuretted hydrogen. Close medical supervision of workers handling radioactive substances was maintained but no serious effects have been discovered. Intensified research into causes and preventive measures to control industrial disease were urged.

Canteens

Factory canteens increased by nearly 3,000 in 1942. By the end of the year, 98 per cent of the factories engaged on war work and employing more than 250 persons and over 4,000 of the smaller plants had canteens. There was little need for the Government to use its power to compel war factories with over 250 workers to install canteens. Both management and workers now regard them

as an integral part of the factory. The readiness of small firms to provide them even though they are usually run at a loss in such plants "is proof of their benefit to health and happiness, and therefore to production". Joint canteens have solved the problems of some smaller firms. Special attention has been given by the Government to the provision of canteens at building sites and docks.

Factory Canteen Advisers reported improvements in the attractiveness of canteen premises, the nutritive value of the food and other aspects of canteen service. A special enquiry was made into the difficulties of catering for night-shift workers and it was recommended that a light, easily digested meal be provided as well as a variety of snacks. Re-heating the midday meal for night workers was condemned. Factories were urged to encourage young persons to eat suitable meals by reducing rates and by educational campaigns.

Future of Youth Service in Great Britain

THE future of the Youth Service organized in Great Britain during the war was the subject of a report by the Youth Advisory Council published in August.* The Council was appointed in June, 1942, to advise the President of the Board of Education on problems connected with the Youth Service. It contains representatives of voluntary youth organizations, education authorities, trade unions and employers.

The Board of Education first assumed responsibility for young persons who were over the minimum school-leaving age of 14 in November, 1939, when the Youth Service was established. It was designed to guide young persons from 14 to 20 years of age into worthwhile recreational activities and some form of national service. The scheme was administered through local education authorities assisted by local youth committees. Voluntary organizations were provided with grants, additional leaders, premises and equipment. Local authorities established youth centres and recreational facilities where the voluntary organizations did not meet the need (L.G., 1942, p. 880).

The Youth Advisory Council, in its report, strongly urged that the Youth Service should be continued after the war and should embrace all young persons from 14 to 20. It declared that boys and girls would be

> both better workers and more enlightened citizens later on if their transition from full-time schooling to full-time employment were a longer and more regulated process.

This will be partially effected by the educational changes proposed by the Government in its White Paper on education (L.G., 1943, p. 1207) and embodied in a Bill now before the House. They included raising the school-leaving age to 15 and compulsory part-time education up to the age of 18.

Minimum Age and Hours of Work

The Council recommended 16 as the school-leaving age and endorsed the principle of day continuation schools which would bring all boys and girls up to 18 under some measure of educational supervision. "Continued education must be regarded not as a concession granted by the employer but as a right given by the community." Maintenance grants should be provided to offset the added cost to families of a higher school-leaving age.

Young workers should be prevented from working excessive hours or accepting double employment.

> Even if continued long hours did in fact increase production—and there is plenty of evidence to the contrary—we should still feel that the damage to our young people is a price which the community cannot, on any long view, afford to pay.

It recommended that during wartime those under 16 in all occupations should be restricted to 44 hours a week, the legal maximum in factories, and those from 16 to 18 to 48 hours, the normal legal maximum for this age-class in factories. In peacetime no one under 18 should work more than 44 hours a week, including part-time schooling. Young workers should also be granted adequate holidays with pay. The Council proposed a minimum of 24 working days inclusive of the 6 statutory holidays. It urged that holiday facilities should be provided on a national scale and suggested converting military camps into youth camping centres and granting financial assistance to voluntary organizations which provide holiday facilities.

Co-operation Desirable

Local education authorities, employers, trade unions and the Ministry of Labour should co-operate, in the opinion of the Council, to provide boys and girls with skilled guidance in the choice of employment and of leisure-time activities. The Council was strongly opposed to any compulsion in the selection of recreational activities on the ground that it would place young persons "on the path which leads to a mute acceptance of directions from above." Instead, the widest possible variety of leisure-time activities should be made avail-

* *The Youth Service After the War*, Great Britain, Board of Education, August, 1943.

able for the individual. Particular efforts should be made to encourage boys and girls in the final years of compulsory schooling to participate in a varied program of activities.

The Council urged close co-operation between public authorities and voluntary organizations, emphasizing that both had an essential part to play in providing adequate social and recreational opportunities for young people. It suggested that local planning authorities should be obliged to consult education authorities to ensure proper provision of recreational facilities in both town and country. If communal premises are planned for youth work, they should be part of an adult community centre. Voluntary organizations should be given grants from public funds to enable them to expand their activities, but in return should submit to informal inspection and scrutiny of finances by education authorities.

There was a division of opinion in the Council regarding the future of the pre-Service training organizations. While all agreed that they should be continued after the war with greater emphasis on the educational, social and recreative side of their work, the majority considered that their administration should be transferred to the education authorities, but a minority favoured placing them under the control of an Inter-Services Cadet Committee representing the three Service departments and the Board of Education.

Other recommendations dealt with the need for a housing program to guarantee healthy conditions of living for young people and the necessity for giving religion a place in youth work. It was also suggested that the Board of Education should summarize all available information on local youth committees for the guidance of new committees. As a footnote the Council declared

> We hope that consideration will be given in the near future to such problems as the physical and mental health of the adolescent, vocational guidance, National Service after the war, and, above all, the discovery of a post-war purpose for our young people which will evoke from them in peace-time the magnificent devotion which they are showing in war.

Health and Industrial Efficiency in Scotland

Conclusions Arrived at by Department of Health on Certain Experiments in Social Medicine

DURING the past six years the Department of Health for Scotland has been making a study based on four experiments in social medicine, each of which intimately concerns industry; viz.:

(1) long-term incapacity for work;
(2) the health of young workers;
(3) the health and working experience of persons invalided from the Forces; and
(4) the rehabilitation of sick and injured miners.

Some of the conclusions arrived at were made public late in the autumn and the bi-monthly issue of *Industrial Welfare and Personnel* Management for November-December presents a digest of them under the heading, "Health and Industrial Efficiency".

At the outset it is pointed out that for the year July 1, 1937 to June 30, 1938 "the time lost through sickness in Scotland averaged 14·8 days per person. But of this loss, incapacity which continued throughout the whole of the year was responsible for 43·8 per cent." Mental and nervous diseases, rheumatism and diseases of the respiratory and circulatory systems were held to be the chief causes of such long-term incapacity and it was found that nearly a quarter of the persons concerned were under 35 years of age.

Long-term Disability.—In its study of the long-term incapacity for work the Department of Health for Scotland undertook to review the cases of insured persons whose illnesses extended more than three months. The Department obtained the co-operation of the insurance societies and over a period of two years 50,000 patients were dealt with under the scheme. An analysis was made of 1,000 of these long-term incapacity cases—580 males and 420 females. Of these, it was the opinion of the Regional Medical officers "that although a certain proportion were long past any possibility of re-absorption into industry, 790 of the 1,000 had a reasonable prospect of returning to work and to facilitate this in 350 cases a change of treatment was advised."

Health of Young Industrial Workers.—It is pointed out that the war brought "an increasing recognition of the importance of preventing the breakdown of workers—especially of young workers." Accordingly in 1942, general practitioners and industrial medical or welfare officers in "the Clyde Basin" were asked to refer to the Department's Regional Medical office young workers about whose health there was concern—whether or not they had ceased work. Patients were examined by consultants where necessary and if further

investigation was required they were admitted to emergency hospitals. Those requiring merely a period of rest to prevent break-down in health were sent to one of the country houses that functioned as auxiliary hospitals. In the course of a year some 1,400 young people were dealt with and at the end of 1942 it was decided the scheme should cover workers of all ages in the entire Scottish industrial belt. In the first six months of 1943 nearly 3,000 additional cases were examined.

It is stated that "from a general review of the working of the scheme to June, 1943, certain considerations emerge: (1) There is need for such facilities as those provided under the Clyde Basin scheme—though not necessarily on exactly the same lines—if health and industrial efficiency are to be maintained. (2) Too many persons suffering from fatigue carry on until unfit for work, when the period required for return of capacity is prolonged. More adequate facilities for ordinary (e.g. week-end) rest and recreation would help to prevent some of the conditions found. (3) Much of the vague ill-health is due to long hours of work, travelling difficulties and wrong diet. (4) The vast majority of patients sent for convalescence benefited by the rest and change provided."

Persons Invalided from Armed Forces.—With regard to the health and working experience of men invalided from the armed services, studies were made of the records of 1,000 consecutive men and women of Scottish domicile, discharged as unfit. Questionnaires were sent to each of the 1,000 persons three months after their discharge and a follow-up at the end of six months. Of the 975 persons actually contacted over both periods, two-thirds were under 35 years of age and only 3·5 per cent were over 50. "The chief causes of discharge were: mental and nervous disorders, 38 per cent; peptic ulcer, 17·5 per cent; injuries, 9 per cent; respiratory diseases other than tuberculosis, 8·5 per cent. Those capable of work were allocated to work by Ministry of Labour officials."

At the end of six months after leaving the armed services 161 were unemployed, 389 were doing their old work and 425 had taken up new work. It was noticeable that the percentage of men returning to their old work steadily decreased as the duration of active service increased. Three hundred and sixty men reported that they were having difficulties—many of them associated with their work. A common complaint was that the jobs suitable for disabled men had been filled by men who had not been to the war and by women. Other difficulties centred on housing and transportation problems, obtaining sickness benefit and the settlement of difficulties relating to pensions. Instances were noted of men suffering from chest diseases whose work exposed them to excessive dust and fumes. Regional Medical officers took serious exception to the types of work being done by a number of men who suffered from medical disabilities.

It was ascertained that all the difficulties met with by the men who had been discharged from the armed forces showed "how closely inter-related are their social, medical and occupational needs and how greatly their successful return to industry depends on the sympathetic personal handling of each case, and the close co-operation of all parties concerned to this end."

Rehabilitating Miners.—Results obtained in efforts to rehabilitate miners were considered to be insufficient to assess their real value. In 1939, a large hotel was taken over by the Department of Health as an emergency hospital. Within the succeeding three years it had treated 10,000 patients. In 1942, it was arranged that a certain portion should be used as a rehabilitation or "fitness" centre for miners, taking both surgical and medical cases. The men stayed at the centre for an average of six weeks, during which time a carefully prepared daily time-table was followed, covering remedial exercises, physiotherapy treatment, organized activity and games and simple crafts. The centre for miners was opened in January, 1943, and from that date until June, 1943, 314 patients had been admitted. Of the 184 patients discharged during that period, 111 left fit for return to their former employment in the mines, and 30 fit for light work.

Conclusions Reached.—It is pointed out that the experiments reveal important problems in industry that arise from "incapacitating sickness" and the consequent necessity of securing early and effective treatment, as well as how best to integrate medical and industrial care so as "to obtain for the individual work consistent with his talents and his physical capacity." It was affirmed that "the report not only throws into relief the amount of industrial and social welfare work yet to be tackled, but shows also how necessary it is to secure for each patient a *personal* approach to his problem, plus the effective co-operation of all the official agencies concerned to achieve his return to full working capacity."

Choosing Jobs for Juveniles in War Industries

Advisory Standards of U.S. Department of Labor

BASED on the slogan "The young worker of to-day is the skilled worker of to-morrow—protect him from injury", the Children's Bureau of the United States Department of Labor has published a series of leaflets setting out advisory standards to guide employers in placing 16- and 17-year olds in war jobs. The Fair Labor Standards Act prohibits the employment of children under 16 in industries engaged in inter-state commerce and gives the Chief of the Children's Bureau power to establish by order a minimum age of 18 in any hazardous occupation. Such orders have been made for explosives plants, coal mines, sawmills, logging and woodworking, motor-vehicle driving and work involving exposure to radio-active substances.

The advisory standards were prepared with the advice of workers, employers and safety organizations. Young workers are considered more prone to accidents and industrial disease. They do not appreciate the need for taking precautions and working carefully, and they lack experience, muscular co-ordination and maturity of judgment. Consequently, it is recommended that, if they must be employed, they should be placed in the safest jobs. The most suitable jobs are listed for each industry covered by the advisory standards and the hazardous occupations which should be closed to young persons under 18 are also indicated. The Children's Bureau urges that boys and girls be given jobs which will afford useful training. Employers are reminded that they must comply with Federal and State child labour standards and are urged to seek advice from State labour departments and the Children's Bureau when employing young workers.

Shipbuilding

The advisory standards for shipbuilding were issued in December, 1942. Boys under 18 in this hazardous and rapidly expanding industry should be given a definite training for a skilled or semi-skilled craft and special safety instruction under strict supervision.

The most dangerous work in shipyards is work on the ways and fitting-out work on board ship. Repair work is more hazardous than new construction work. Young workers should be excluded from such operations. In addition, no one under 18 should be permitted to do construction work on the shell or construction, fitting-out and hull-repair work involving rigging, erecting, or handling heavy materials; to clean tanks; to assist in building ways or staging, operating dry docks or marine railways; to do grinding or dry-mixing of paint or spray painting; to help in the transport or storage of steel and lumber or of heavy prefabricated units; to do heavy work in the foundry; to handle hot metal; to operate heavy machines or certain woodworking machines; or to work on the bending slab.

Jobs suitable for 16- and 17-year olds include clerical and other work not directly connected with the actual building of ships, work in the storeroom, toolroom, coreroom, mould loft, pipe shop, copper shop, sheet metal shop or electrical shop, hand blacksmithing, and bench work. In addition they may operate light machines and act as helpers to operators of heavy machines. In the yard or plate-shop they may lay-out, bolt-up, weld or work as helpers on sub-assembly. On board ship they may be permitted to do new or repair work in fitting-out, provided rigging or the handling of heavy materials are not involved.

Lead-using Industries

Under the advisory standards for these industries, also issued in December, 1942, young workers under 18 should not be employed in jobs involving exposure to lead dust or fumes. They are considered more susceptible than adults to lead poisoning partly because they are less likely to observe precautions. In particular, they should not be employed in the production of white lead or other salts of lead, in workrooms where these substances are used and lead dust is evolved, in work connected with tetraethyl lead or in occupations in which metallic lead is regularly used in a molten state. These occupations include lead burning, cable covering, cutting lead-coated materials, foundry work with lead-bearing metals, soldering when carried on continuously as part of the production process, casting stereotype plates and similar work in the printing trades. Lead dust is likely to arise in such operations as the manufacture of storage batteries, pottery, rubber, insecticides, paint and other products into which lead compounds enter, spray painting, vitreous enamelling, junk yard work, sanding of lead-covered surfaces, etc.

Young workers over 16 and under 18 may be safely employed in lead-using industries in workrooms segregated from those in which lead dust is present. They may also work on operations where the lead salts or oxides are in solution or suspension or in impervious containers as no dust arises under such conditions. Suitable jobs in lead-using industries include filling and labelling paint cans, mark-

ing and testing storage battery cases, and approved work in the machine-shop, wood-working-shop and other shops. In addition, work in the shipping department, laboratory and office is recommended.

Industries Using Carbon Disulphide

Carbon disulphide is chiefly used in the manufacture of viscose rayon and such allied products as cellophane, sausage casings, etc. It may cause severe poisoning but modern engineering and close medical supervision of workers have reduced the hazard. Advisory standards for these industries were published in December, 1942.

Before the war many rayon plants refused to employ persons under 18 in departments where workers are exposed to carbon disulphide but the labour shortage has brought a change. While the Children's Bureau considers that boys and girls under 18 can be safely employed in certain occupations in such plants, it strongly recommends that no one under 18 should be exposed to carbon disulphide or work in any room where occupations involving exposure are carried on. Such risk attaches to the production or handling of carbon disulphide, reeling unprocessed yarn, cake wrapping, cake, skein or bobbin washing, trucking unprocessed cakes and bobbins, acid collection and correction, fumigating corn bins and the manufacture and repair of rubber articles involving the use of carbon disulphide. In addition, the hazard is present in churn or barrette rooms, mixing rooms, ripening and filtration rooms, spinning rooms and cake cabinets.

Safe jobs for young workers of 16 and 17 years include work in the office, laboratory, stock room or shipping department and work in the machine shops not designated as hazardous. Also recommended is employment in the assembly of jets and as a coner, winder, spooler, twister or reeler of finished yarn, an inspector of cones, skeins or bobbins of finished yarn, a wrapper of cones or skeins, a trucker of finished yarn or a filter wrapper.

Industries Using Chlorinated Solvents

Standards for these industries were published in February, 1943. Chlorinated solvents such as carbon tetrachloride, trichloroethylene, ethylene dichloride, chloroform and methyl chloride are extensively used as degreasers for metals, refrigerants, fumigants, dry cleaners, paint removers, fire extinguishers and in various other chemical and manufacturing processes. Their toxicity varies, but all may cause damage to the liver and kidneys. When used in modern degreasing machines which clean with vapour, only the operator is exposed to the hazard, but in manufacturing processes and cleaning by cold dipping, the danger may extend to other workers in the immediate vicinity.

Workers can be protected by good engineering, close medical supervision, the provision of personal protective equipment such as respirators and the strict observance of safe practices. Young persons, however, cannot be depended on to exercise sufficient care. No one under 18 should, therefore, be employed in occupations involving exposure to excessive amounts of chlorinated solvents. These include operating and cleaning degreasing machines, cleaning metal by cold dipping in chlorinated solvents, dry-cleaning clothes, furs, etc., with chlorinated solvents, charging and repairing fire-extinguishers and refrigerators and all work in places where chlorinated solvents are used in manufacturing processes such as in the processing of fats and in the chemical, rubber and petroleum industries.

Welding

Protection against welding hazards depends to a large extent on the operator's "knowledge of the welding process and its dangers, combined with experience, caution and maturity of judgment." The advisory standards issued in April, 1943, stipulate that young persons should not be employed as welders except where older workers are not available. If it is necessary to use them, they should be given the least hazardous type of welding. No one should be employed as a welder before he has completed a recognized training course and been instructed in welding safeguards, the care of equipment, methods of ventilation, etc. Inexperienced welders should work under the supervision of an experienced operator for at least 30 days after the completion of their training in order to become familiar with safety rules and job procedure.

Young persons under 18 should not be permitted to do the following types of welding or cutting operations: gas or arc welding in other than the flat position; manual oxygen cutting at other than designated cutting stations; arc welding with stainless steel electrodes; gas or arc welding or oxygen cutting on materials coated with lead, cadmium or zinc (galvanized), on lead-bearing metals, in tanks or confined spaces, or done from scaffolding; welding on preheated assemblies except locally preheated parts; resistance welding when mechanical equipment is necessary to handle the material.

Young persons of 16 and 17 should be restricted to bench welding, tack welding, gas and arc welding in the flat position, machine

and manual oxygen-cutting on work that is properly supported, and resistance welding when no mechanical equipment is necessary to handle the material to be welded.

Metal-working Machines

Advisory standards for metal-working machines were published in May, 1943. While some of these machines can be operated safely by young workers, others "are inherently hazardous, or require such a degree of skill, caution, or muscular co-ordination that only older and more experienced workers should be permitted to operate them." Injuries from such machines are usually serious, but can be prevented by adequate guarding of all dangerous moving parts, including the point of operation, and by observance of safe practices in operating the machine and handling materials.

Young workers must be given careful supervision, instruction and training before being allowed to operate a metal-working machine. They should be placed on the safest machines at first until they have sufficient skill and knowledge to operate more hazardous machines safely. Those under 18 should not be permitted to adjust, oil or clean machinery in motion, set up or change tools or dies, operate machines with unguarded gears or other dangerous moving parts or those which require strenuous physical exertion such as the constant lifting of heavy materials. They should be forbidden to use a wiping rag or waste for removing chips when the machine is in motion or to operate machines while wearing loose clothing, neckties, long sleeves, etc. Girls must be provided with head protection.

Machines considered too hazardous for workers under 18 include grinding and abrasive wheels, large engine and turret lathes and milling machines, horizontal or vertical boring mills, radial and other types of drills, metal planers, power presses unless provided with automatic or semi-automatic feed and with complete enclosure of the ram, power-driven shears, plate punchers, brakes, crimpers, drop hammers, etc., centrifugal extractors, sand-blasting machines, riveting machines for hot riveting, all hot-metal forging, forming or rolling machines and die-casting machines, circular saws, and a number of other machines.

Machines which are considered relatively safe for workers of 16 and 17 years of age include small engine and turret lathes, horizontal milling machines, sensitive drill presses, metal shapers, keyseaters, filing, threading and tapping machines and non-power-driven presses, brakes, rolls or shears provided with barrier guards.

Aircraft

Standards for the aircraft industry were issued in November, 1943. Aircraft work is not, in general, particularly hazardous, but some types of jobs are too dangerous for young workers. Even those in relatively safe work require special supervision and training and should be identified by a distinctive badge.

Some of the operations in the industry are of the type listed as unsuitable for young persons under 18 in such advisory standards as those on metal-working machines, welding, etc. Most woodworking operations are forbidden under a Hazardous-Occupation Order. In addition, it is recommended that minors under 18 should be excluded from all work in the dope-room where highly inflammable and toxic substances are used, in flight ramps where there is danger of whirling propellers, in the foundry, in the anodizing, heat treating and degreasing departments, in plant engineering and maintenance work, in draw-bench operations, or in work involving the operation of cranes, carriers, hoists, elevators or other mechanical lifting equipment.

However, there is still a wide variety of safe jobs for 16- and 17-year olds in the industry. Suitable work includes most types of assembly, work in the tool crib, paint shop and pattern shop, hand forming or sub-assembling of sheet metal or sheet-metal products, light hand work in the receiving, packing, electrical, radio, instrument-assembly and upholstering departments, tube bending, the assembly of hydraulic landing gears and controls and inspection of small parts with simple gauges. In addition they may do machine and welding work of the type indicated as suitable for young workers in the advisory standards for these operations.

Music In War Plants In The United States

Survey Conducted by War Production Drive Headquarters Indicates Increased Expansion in Industrial Music Programs

ISSUED as one of a series of publications for the guidance of labour-management committees, *Music in War Plants* is a comprehensive statistical survey on the use of music in war industries to improve morale and production. Recently released by War Production Drive Headquarters of the United States War Production Board, the bulletin provides a progressive report on the growth and development of industrial music programs. (The establishment and development of these programs in Canada, Great Britain, Australia and the United States, was reviewed in earlier issues of the LABOUR GAZETTE—March, 1943, page 319; April, 1943, page 454.)

The survey, undertaken by Mr. Wheeler Beckett, conductor-composer, reveals a number of interesting facts concerning a comparatively new phase of industrial relations which, it has been definitely established, is equally enjoyed by both management and labour. A detailed analysis of the results of the survey, which covers 100 war plants[1] in all parts of the United States, is given (with charts and tables), together with a report sheet of questions used in the investigation.

Types of Industrial Plants Surveyed

Nine industrial classifications were used in the research, including aircraft, shipbuilding, communications—electrical equipment and instrument manufacturing, ordnance manufacturing, machinery and machine tools, auto and auto parts, miscellaneous stamping and metal parts, textiles, and " all other."

The type of music played in shipyards employing 11 per cent female workers differed from the kind used in communication, electrical equipment and instrument manufacturing plants where the female employees amounted to 52 per cent of the total, which indicates, the report states, that "it seems more desirable to make efforts to improve the atmosphere and working conditions in plants predominantly female than in those where male employees are more numerous."

The total number of workers covered by the survey was over 500,000 and "whereas only 25 per cent of these were female at the time of the survey, new employment is causing a rapid rise in the percentage ratio of women to men, which makes music of more and more importance in maintaining efficiency among women workers."

[1]In 76 of the 100 plants surveyed, the music originates from phonograph records broadcast over a public address system reaching all or part of the plant. The other 24 plants have either live bands, orchestras and choruses composed of plant personnel, or they secure outside talent for lunch hour programs.

Relation of Music to Production

In fifty-seven per cent of the 76 plants surveyed, it was declared that music *did* increase production, while in thirty per cent the results were "uncertain" which means that unless a "yes" response was received from all persons[2] queried in the plant the answer was listed as "uncertain."

According to the report, "this accounts for about one-half of the cases, while the balance of the 'uncertain' answers are mainly due to the extreme newness of the program. The one plant which was sure music did not increase production had a program of only 15 minutes per shift. The 12 per cent which refused to give an opinion disregarded the question on the grounds that their interest in music was other than its effect on production, i.e., making the plant an attractive place to work; to recruit workers by advertising 'music while you work'; because the workers like it; or finally, because music is believed to improve morale."

	Number of plants	Per cent of plants
Increased production claimed	43	57
Uncertain	23	30
Did not increase production.	1	1

Relation of Music to Plant Morale

That music has a positive effect on plant morale is an important fact disclosed in the survey. In the report morale is defined "as a state of mind conducive to sustained efficiency in the war effort under difficult conditions".

Of the 76 plants using phonograph records, 87 per cent claimed that music improved morale. Ten per cent did not know what the effect was beyond the fact that workers liked it, and only three per cent noticed no improvement in morale. The two plants (three per cent) who claimed no improvement had music for less than one-half hour each day, which would indicate that there is a definite relationship between the length of the program and improved morale. Where music programs last for one hour or more, improved morale is claimed in every plant, but in only one-half of the six plants where it lasts for less than half an hour.

[2]The answers are the opinions of foremen, personnel managers, union leaders, members of labour-management committees, and others.

Relation of Music to Plant Morale

	Number of plants	Per cent of plants
Plants in which morale was improved	66	87
Plants in which effect on morale was uncertain	8	10
Plants in which morale was not improved	2	3
Total	76	100

Length of Music Period

"Music programs lasting more than one hour are found for the most part in the communication equipment and 'all other' miscellaneous manufacturing plants, with aircraft and machinery second and auto parts third", the bulletin states. "Very long music programs, however, occur mainly in communication equipment and 'all other' groups". The length of program most desired is between 30 minutes and one hour with 28 out of 76 plants falling in this category. "This is partly due to the fact that music in shipbuilding and aircraft plants has been limited to lunch periods, change of shifts and rest periods. The same is partly true of ordnance". These three classifications account for 24 out of 34 plants having music for less than 1 hour per shift, and for 19 out of 28 plants having music for 30 to 59 minutes per shift. If conditions allow, it is pointed out, it would appear that two hours of music per shift are more effective than one.

Labour-Management Committees and Industrial Music

A prominent part in the successful development of industrial music programs is played by labour-management committees, according to the survey. "The organization of the labour-management committee usually includes a sub-committee on publicity and education, which handles numerous educational activities connected with the work of the committee. Music should also be guided by this sub-committee. . . . It is important, therefore, that some of the publicity sub-committee members be musical, at least from a listening point of view, and able to appraise the value of various kinds of music played for the workers. In large plants, the music program becomes a full-time job. It must be thought of in terms of three shifts. It must be run as a 'live' program would be run, with an ear to the ground for listener reaction. . . .

"To get maximum results from a music program, it is important to have labour members of joint production committees take a more active part in reporting workers' reactions. Their advice and guidance can be very helpful in improving the effectiveness of music on morale and, as a by-product of morale, on increased production".

Psychological Attitude of Workers

The psychological attitude of the workers toward industrial music is one of the most significant factors in the establishment of a plant program. In some instances, the report declares, programs were rendered ineffective because the workers suspected that they were being used for an "experiment".

The best psychological attitude results from a feeling on the part of the workers that they have a voice in the music program. Although request boxes and suggestion boxes are recommended, the survey shows that questionnaires on music preferences are more reliable. It also appears that good results follow the practice of giving the labour-management production committee the responsibility of maintaining the music program. The labour members of this committee are in a better position to reflect the workers' desires and to correct faults in mechanical reception, while management members should supervise the kind of music played and check results.

Kind of Music Played

It is emphasized in the report that the kind of music played is of the greatest importance. In some plants, questionnaires were issued in order to ascertain what type of music the workers preferred, and the results were as follows: Strauss waltzes were first in popularity; hit parade numbers, second; patriotic music, third; semi-classical and light salon music, fourth; classical music, fifth; hymns and Negro spirituals, sixth; with hot swing and jitterbug, last.

"Some plants which have experimented by introducing more music of good quality" the bulletin declares, "have been amply rewarded by worker response. In one of these plants 33 per cent of the workers now favour classical music during lunch periods. The idea that the only kind of music workers wish to hear is popular swing, turns out to be erroneous, if for no other reason than that variety cannot be obtained without going outside this field, especially variety in tone colour. . . ."

Other Factors

Other phases of the survey on "music in war plants" are dealt with in the bulletin as follows: Music in noisy departments; the ideal sound equipment for music; the right moment to use music; the public address system; the use of plant talent; original music in war plants; nationality and type of music; night-shift music; use of radio programs; size of record libraries in war plants; unfamiliar music; and, what to avoid.

Settlement of Disputes Under Collective Agreements

An Analysis of Provisions in Canadian Agreements for Adjusting Grievances and Disputes Arising During the Life of the Agreements[1]

THE conclusion of a collective agreement between an employer or group of employers and one or more trade unions indicates that many of the most important causes of disputes between the parties have been removed, since agreement has been reached regarding wages, hours and other conditions of work.

No collective agreement, however, can eliminate entirely the possibility of disputes. Matters inevitably arise during its currency which were not foreseen when it was signed and differences arise over its interpretation or application even when it was negotiated in good faith. In addition, the grievances of individual employers and workers must be adjusted. These grievances in themselves may appear to be trivial or insignificant but if they are not dealt with promptly and satisfactorily, they may have the cumulative effect of undermining the good-will without which the agreement is unworkable. Moreover, the grievance of a single worker may involve a question of principle on which the future of the agreement depends. Thus the whole success of the method of collective bargaining may depend on the provision made by the parties to ensure the smooth working of the agreement and its satisfactory application to particular jobs and under particular conditions.

The Government of Canada in a declaration of principles for the regulation of labour conditions during the war (P.C. 2685, June 19, 1940) advocated "that every collective agreement should provide machinery for the settlement of disputes." Similarly, the chairman of the United States National War Labor Board stated recently:

> Long before we got into the war . . . many of us urged that every labor agreement should contain . . . a covenant not to strike or lockout during the term of the agreement and to settle by grievance machinery or finally by arbitration all disputes about the meaning and application of the agreement. More and more labor agreements have included such stabilizing clauses, particularly in recent years. However, we have by no means reached the goal of including such a stabilizing clause in every labor agreement.
>
> Everyone connected with the making of labor agreements should join in the effort to have such clauses universally adopted.[2]

The full National War Labor Board has emphasized the same principles in several of its decisions.

Great Britain

In Great Britain, where collective bargaining has been practised longer than in any other country, machinery for the settlement of disputes has been operating for many years in all the major industries, such as coal mining, iron and steel, engineering, shipbuilding, cotton and railway transport, and in many other industries as well.

The term "collective agreement" in Great Britain is used only when there is a collectivity on each side: a trade union or group of trade unions for the workers and one or more employers' associations for the employers. A "shop" agreement between a single firm and its employees, in the words of a British Government report,

> while securing uniformity in conditions of employment as between the different operatives employed by the firm to which it applies . . . affords no security against undermining by other firms. On the other hand, when the agreement . . . is entered into by a number of different firms and in particular where as is often the case, the firm bound by a collective agreement comprise the whole or greater part of . . . a given industry within a wide area, the whole of the workpeople employed by the employers concerned are secured equality of treatment, while each of those employers is, so far as regards all his competitors who are parties to the agreement, protected against the danger of being underbid by firms obtaining their labour upon easier terms than he himself enjoys.[3]

The national or regional character of a collective agreement or series of agreements (because there may be several agreements dealing with different subjects) ensures that certain basic conditions are standard throughout the industry. Even where there are

[1] The generalizations concerning Canadian collective agreements which are made in this article are based on a study of the agreements received in the Department of Labour. The reader who is interested in consulting the text of agreements is referred to *Recent Collective Bargaining Agreements* (Queen's University, Industrial Relations Section, Bulletin No. 7, July, 1943.) which contains the full text of 15 agreements signed during 1942 and 1943. An earlier publication of the same institution (Bulletin No. 6, Sept., 1942) is an analysis of the terms of 150 agreements in various industries.

A publication of the Division of Labor Standards of the U.S. Department of Labor (*Settling Plant Grievances*, Bulletin No. 60) gives in considerably greater detail in regard to the United States much of the information presented here for Canada.

[2] W. H. Davis: *Collective Bargaining and the War; American Federationist*, Jan., 1943, p. 12.

[3] *Report on Collective Agreements*, 1910, p. xi.

employers outside the organization they usually observe the conditions laid down in the agreement. Special conditions obtaining in any district or undertaking are taken care of by district or local agreements or by special conditions in the principal agreement.

The machinery for settling disputes established by collective agreement thus operates in many cases on a scale co-extensive with the industry so that uniform conditions of employment are not only established but are also interpreted and enforced, where necessary, by the national or regional representatives of the employers and trade unions. The result is that many differences arising, in part, from local or personal friction are removed to a larger arena where these factors do not operate and where disputes can be settled in a judicial temper. Under such a system, with employers and employed well organized and submitting to the rules and discipline of their respective organizations, a high degree of self-government and stability in the field of industrial relations is achieved.

A statement of the Engineering and Allied Employers' National Federation shows the importance attached by employers in Britain to machinery for ensuring the satisfactory interpretation and application of collective agreements and the prompt adjustment of grievances of individual employers and workers. These provisions, the Federation states,

> have been recognized as of the utmost value in preventing unconstitutional action either by the employers or the workpeople, and have admittedly avoided difficulties becoming acute. This has been in great measure brought about by the principle underlying the provisions, which is that each stage of the proceedings removes the question under discussion one stage further from the contending parties, while at the same time it keeps the discussion within the province of the parties themselves and thereby imposes an increasing degree of responsibility at each stage. No restriction is placed on any action which either of the parties may ultimately think fit to take, but naturally that freedom implies a sense of responsibility.
>
> The various stages of the procedure correspond almost exactly with the various steps which must be taken in accordance with the constitutions of many of the trade unions before their members are at liberty to take action of an extreme character. The principle has been maintained since 1898, but has been amplified in accordance with the development of organization and ideas of representation. The recognition of the trade unions has been maintained right through and the recognition of their officials has been amplified to the extent that there is no stage beyond the primary discussion in the works where the right of a workman to be represented by his official, if he desires it, is not in some way conceded.[1]

Main Types of Machinery

In certain Canadian industries, particularly in those such as coal mining, pulp and paper, printing, building construction and clothing, where there is a well-established tradition of collective bargaining, collective agreements have for many years provided for the settlement of disputes. On the other hand, many agreements in the past made no such provision or made it only in very general terms, and even to-day there are some agreements of which this is true. The trend, however, seems to be decidedly in the other direction. Organizing activity in Canada has increased greatly in recent years and many agreements are now being concluded in industries in which there had previously been no collective bargaining. Most of these new agreements provide machinery for the settlement of disputes.

Though there is a fundamental similarity in the procedure established by various agreements, there are also some important differences. These differences are due, to a considerable extent, to (1) the varying degree of organization of workers and employers and their experience in collective bargaining, (2) the nature of the industries concerned and (3) the varying number of employees covered by the agreements. What is perhaps the most important difference, however, arises from the fact that some agreements apply only to single undertakings while others cover all or most of the employers in an industry.

The great majority of Canadian agreements are still restricted in their coverage to individual employer-units. Certain industries, however, are characterized by the existence of a large number of small employers in a city or other single area, and in some of these it has been found that conditions can be satisfactorily regulated only if the collective agreements are subscribed to by all the employers acting together in an association. There are also a few examples in Canada of adjustment machinery of national scope.

In this article, the machinery which is set up under Canadian collective agreements for the adjustment of differences during the life of the agreement is considered in three main groups, according as it applies to an individual employer-unit, to a multiple employer-unit in a metropolitan area or to the whole or a considerable portion of an industry. In the first case the agreement is made with a single employer; in the other two cases it is made with an employers' association or several employers acting together. In all

[1] *Thirty Years of Industrial Conciliation*, Engineering and Allied Employers' National Federation, December, 1927, p. 4.

three cases there is a trade union which has, or seeks to have, members in all undertakings in the trade or industry.

Examples are cited from several industries, but it should be remembered that an article of this scope cannot pretend to be exhaustive.

Machinery Applying to Single Employer-Units

In some cases, a collective agreement may apply only to a specified group of workers who are distinguished from the remaining workers in the undertaking because of their craft or for some other reason. That is, it will cover perhaps only a hundred or fifty or even fewer employees. In other cases, there may be an agreement applying to all the workers in an establishment whose employees are numbered in thousands. It is obvious that, as far as handling disputes is concerned, much more elaborate machinery is necessary under the latter type of agreement than under the former.

Apart from this, however, there is a basic similarity in the machinery established by all agreements applying only to individual undertakings. In all cases, whether a large or small number of employees is involved, the procedure consists of a series of stages and the agreement applying to a small number of workers differs from that covering a large number mainly in that there are fewer stages.

In this section, therefore, it is proposed to make a general summary of the provisions of agreements applying only to individual undertakings, with variations in detail being noted. The section concludes, however, with a description of four actual agreements.

Union Representatives

Procedure for the settlement of disputes and grievances involves the appointment of union representatives who are responsible for taking up matters as they arise with the supervisors and other representatives of management. In cases in which only a few workers are covered by an agreement, even individual grievances are sometimes handled by the union's business agent or similar full-time official. In all but the smallest establishments, however, the matters which arise are usually too numerous to be dealt with in the first instance by one person. As a rule, therefore, some of the employees in the plant are designated to act as representatives of the other employees in all but the cases which have to be referred to the highest authorities.

The representative with whom the individual worker is in immediate contact is the steward, though he does not always go by that name. In large plants there are many such stewards and each one is responsible for a specific group of employees. This group normally consists of the employees in a given department or other unit in the plant. In some cases, one department may be represented by a committee consisting of a head steward and a number of other stewards each of whom may be immediately responsible for the employees under a given foreman in the department.

In the company as a whole there is what is variously called a plant committee, negotiating committee, administrative committee, etc. In small plants this committee may consist of all the departmental stewards. Usually, however, there are too many stewards to form an effective committee and even in cases where the committee consists of all the stewards there may be a sub-committee to deal with grievances.

The stewards must invariably be both employees of the company on the seniority list and members of the union in good standing. The method of appointing them varies, however. A steward may be elected by the employees he is to represent but it is not uncommon for the union to appoint him from among those employees.

The members of the shop, administrative or negotiating committee are also generally employees of the company as well as union members. They are usually appointed by the union, frequently from among the stewards, or they may be elected. In addition, most agreements provide that one or two permanent officers of the union are entitled to be members of the committee.

Under most agreements the steward and committee-men are given specific protection against discrimination on the part of the employer. In addition, many agreements provide that they will not suffer loss of pay if by permission they leave their regular duties for a reasonable period (on which a maximum is sometimes placed) in order to adjust or present grievances. In other cases the union must make up the lost pay, and occasionally grievances and disputes must be dealt with outside working hours, except in cases of extreme urgency.

The importance of the work of the stewards can hardly be overemphasized. They are the immediate representatives of the rank-and file employees and on their skill in making day-to-day adjustments may depend the morale of the working force as well as its loyalty to the union. Some unions, therefore, have instituted training courses to educate the stewards in the proper discharge

of their duties, and in addition, the permanent union officers normally supervise and assist them in their work.[1] Moreover, most agreements provide that in the case of layoffs the stewards and committee-men will be given special consideration in regard to seniority—frequently that they will be placed at the top of the list. This promotes continuity in their work.

The foreman is the counterpart of the steward in the system for handling grievances, and the maintenance of industrial harmony is no less dependent on his aptitude for handling men than on that of the steward. Many companies, therefore, carefully select, train and supervise their foremen with this consideration in mind.

Procedure

A matter affecting only one employee or a group within a department is settled as far as possible within the department itself. It reaches the higher representatives only if the representatives within the department cannot agree or if it is beyond their jurisdiction as involving either company or union policy. On the other hand, the earlier stages are naturally omitted in cases which clearly affect all or most of the employees of the company, e.g., complaints by the union against the company or by the company against the union for general non-observance of the agreement. The same is true of grievances involving the dismissal of a worker since these, more than any others affecting only individuals, may give rise to general trouble in a plant.

A worker who feels that he has cause for dissatisfaction must first take the matter up with his foreman, unless of course his complaint is that he has been unjustly dismissed. Under some agreements the worker may deal only with the foreman. In other cases he may take the matter up through his steward and in still others the foreman must consult the steward. Each method has its advantages and disadvantages. When the worker must first go to his foreman he is discouraged from making frivolous complaints, but, on the other hand, he may also be disinclined to give expression to a genuine grievance. The advantage of having the steward present is that the worker is more likely to feel that his case has been given a fair hearing and that he has not been talked out of his grievance.

If the worker is dissatisfied with the foreman's decision, he may appeal within a specified time to the superintendent either directly or through the head steward of the department or similar union representative. It is often provided that whichever way the appeal is made the steward must be notified and that the worker's case will be presented by him. An appeal may be made from the superintendent's decision to a higher supervisor, if there is one, and in that event the worker's case is usually presented by a member of the grievance committee.

If the worker is not satisfied with the decision of the superintendent or higher supervisor, his case goes to the next stage. Here it is taken up by the shop or other committee, which, as we have seen, represents all the employees, with company representatives who have similarly comprehensive authority. This stage is usually also the first stage for complaints regarding unjust dismissal and for disputes affecting the workers generally.

The agreements vary as to the persons designated to represent the management at this stage. Under some agreements the shop committee deals with the personnel department, under others with a committee appointed by the management of which the personnel manager is usually a member, and under still others it deals with both in succession. Some agreements provide that meetings between the shop and management committees must be held regularly—usually at intervals of two weeks—and that any question which arises will be dealt with at the next meeting. In other cases meetings are held only when items for the agenda are presented by one side to the other.

The procedure varies for cases in which the shop committee and management representatives are unable to reach an understanding. Some agreements merely leave the matter there but this is not typical. Sometimes the case is referred directly to arbitration but usually it is taken up by the highest company officials and the national officers of the union, after which it may be referred to arbitration.

In order that disputes may not be allowed to drag on indefinitely, a time-limit is usually set on all stages of the above procedure. At some stage in the proceedings, moreover, the grievance must be committed to writing so that when it is appealed to each stage of higher authority no misunderstanding may arise as to the exact point involved nor as to the decisions already made by the lower authorities.[2] The exact stage at which the

---

[1] *Preparing a Stewards' Manual* (U.S. Department of Labor, Division of Labor Standards, Bulletin No. 59) gives useful information on how to prepare a manual for the guidance of stewards.

[2] Several examples of the forms used in the U.S. to commit grievances to writing are given on pp. 18-23 of *Settling Plant Grievances*, a publication of the U.S. Division of Labor Standards which has already been referred to.

grievance must be written out varies, but usually it is after the department superintendent has given his decision. If a claim by a worker that he is entitled to higher wages under the terms of the agreement is appealed through several stages and is ultimately decided in his favour, it is usually provided that the increase will be made retrospective to the date when the claim was first presented to the management in writing.

Arbitration

The above proceedings, if fully used, are undoubtedly sufficient to settle most disputes and incipient disputes. There still remains the possibility, however, that the highest representatives of management and the union will not be able to reach a settlement. In some agreements no provision is made for such an eventuality and presumably the workers are then faced with the choice of accepting the decision of the management or of striking. To an increasing degree, however, provision is being made for the reference to arbitration of matters which cannot be settled otherwise. It is stated in a recent publication of the U.S. Bureau of Labor Statistics that

> The absence of such an arbitration provision usually reflects immaturity in the collective bargaining relationship. Where agreements have been entered into year after year, both company and union have found that it is to their advantage to have well-defined procedures established for the final settlelment of all questions which may arise while the agreement is in effect.[1]

Most agreements provide for arbitration by an *ad hoc* bi-partite board with an impartial chairman. That is, when a case requiring arbitration arises, each of the parties names a certain number of representatives, usually two, and these members nominate a chairman. If they fail to agree on the selection, an impartial authority, usually the provincial or Dominion Minister of Labour, is asked to make the appointment. The decision of the board, which must be handed down in a specified time, is final. Occasionally, a standing arbitration board is set up.

Some agreements provide for an impartial umpire who is appointed in the same manner as the chairman of an arbitration board. It is sometimes provided, too, that disputes which cannot be settled in the plant will be referred to a Board of Conciliation and Investigation set up under the Industrial Disputes Investigation Act or to a similar board established under provincial legislation.

Work Stoppages

Most agreements specify that there will be no strike or lockout while a dispute is being handled in accordance with the procedure set forth in the agreement. Under agreements which provide for arbitration, the decision of the arbitration body is final and no work stoppage may occur after it is made.

Many agreements fail to set forth sanctions to enforce this provision, but there is a moral obligation on the union to impose on any members who strike such penalties as are permitted by its constitution for participation in outlaw strikes, that is, strikes not approved by the union. In some cases the agreement provides that the employer may discipline striking workers without interference from the union. In some cases, too, the union agrees to replace any of its members who strike and in general to take steps to keep the plant operating.

Examples

The following examples refer to employer-units of varying sizes. They will serve both to illustrate how the more general statements made above are carried out in practice and also to show some of the differences between large and small employer-units.

On May 1, 1943, two locals of the United Brotherhood of Electrical Workers entered into a number of agreements with the municipal authorities administering electrical and telephone utilities in Port Arthur and Fort William. One of these agreements, which is similar in principle to the others, was signed by the union and the Fort William Public Utilities Committee and applies to 51 telephone operators. Under it grievances must be reported to the management and the management must give a written reply within five days. If the reply is unsatisfactory, the matter will be taken up by a union committee with the Public Utilities Committee. Matters which are not settled within ten days must be referred for final settlement to a three-man arbitration board, whose chairman is to be chosen, if necessary, by the Dominion Minister of Labour.

An agreement of May 1, 1943, between the Spruce Falls Power and Paper Company Ltd. and the International Brotherhoods of Paper Makers, of Pulp, Sulphite and Paper Mill Workers and of Electrical Workers, applies to about 750 workers. Its provisions regarding disputes are similar to those which have appeared for over twenty years in agreements in the industry. The agreement is also interesting in that it was signed by three

[1] *Union Agreement Provisions*, U.S. Department of Labor, Bureau of Labor Statistics, Bulletin No. 686, p. 154.

unions whose collective membership covers all the occupations in the plant. This method of collective bargaining is common in pulp and paper.

A complaint arising in any department must be reported to the superintendent, either in writing by the secretary of the local branch of the union to which the worker belongs or orally by the adjustment committee appointed to act for the members of that union. The superintendent must reply within 48 hours. Appeals may be made first to the general manager who must meet with the superintendent and the committee and give his decision within five days, and then to the general manager of the company and a representative of the president of the International Union. The last two officials must reach a decision within ten days. The matter, if still unsettled, will be finally disposed of by a three-man board of arbitration, whose chairman will be selected if necessary by the Ontario Minister of Labour.

An agreement of December 3, 1943, between the Asbestos Corporation Limited and the Syndicat National Catholique de l'Amiante, which is similar to agreements concluded by the same union with other employers in the industry, applies to some 1,500 employees. The agreement provides for the continuation in the various mines of the corporation of the "shop committees" established under an earlier agreement, each of which consists of a specified number of representatives elected by the employees of the various departments in the mine concerned. Complaints and suggestions must be made to the shop committee in writing and the committee takes them up with the management. Meetings between the committee and the management are held when necessary. Disputes which cannot be settled are to be finally determined under the Quebec Trade Disputes Act. This Act provides first for conciliation and, if conciliation fails, for reference to a three-man council of arbitration, the award of which is binding on the parties if they agree in advance to make it so. The signatories of the present agreement have so bound themselves.

Under an agreement of January 15, 1943, between Research Enterprises Limited and a local of the United Steelworkers of America, the adjustment procedure consists of six stages. The agreement applies to about 7,000 workers. A grievance is dealt with in turn by the following parties: (1) the employee, with or without the department steward, and the foreman; (2) the employee with the chief steward of the department and the head of the department; (3) the appropriate shop committee-man and the division head; (4) the shop committee and selected representatives of the company; (5) the national office of the union and the management; and (6) an arbitration board appointed in the usual way. The first three stages together may not take more than 48 hours, and for matters of general interest as well as dismissals these stages are omitted altogether. The shop committee and representatives of the company meet regularly on the first and third Tuesdays of each month. All matters which are not disposed of in the first or second stage must be reduced to writing.

Machinery Applying In Cities

Printing, clothing and building construction are all industries in which there are large numbers of relatively small employers in single cities or districts. Included in these industries are some of the oldest trade unions in Canada, and collective bargaining has been carried on continuously for many years. As a result, agreements are almost always concluded on a city-wide basis, usually with employers' associations. That is, several employers have in each case co-operated with a trade union to establish standard conditions for the whole of their industry in the area. In addition, they have in most cases established adjustment machinery through which they have co-operated to make the agreement operate smoothly and to reduce the causes of industrial strife not merely in a single plant but in the entire area.

Printing

The organization representing printers in Canada as in the United States is the International Typographical Union. The agreements concluded by this union may, on the whole, be divided into two groups—those with the newspaper publishers and those with the book and job printers. In both groups of agreements, however, the general provisions, including those relating to disputes, are almost identical.

A grievance developing in any printing shop is first taken up with the employer by the elected officers of the "chapel", the term applied to the union organization within the individual shop. If a settlement is not made it is referred to the headquarters of the local branch of the union. Matters which cannot be disposed of by the union officers and the employer must, under almost all agreements, be submitted in writing to a joint standing committee. This committee represents equally the union and all the employers who entered into the agreement.

If the committee is unable to reach a decision within a specified period, many

agreements provide that an impartial chairman will be appointed. Under other agreements the matter is referred to a separate arbitration committee, which is usually composed of three members, one appointed by the union, one by the employers and the third by the other two. The decision of the impartial chairman or of the arbitration committee, as the case may be, is binding on both parties. All agreements specify that the local union laws which do not affect wages, hours and other conditions and the laws of the International Typographical Union will not be subject to arbitration.

Manufacture of Clothing

The manufacture of clothing in Canada has been chiefly confined in the past to the cities of Toronto and Montreal, and in both cities the clothing workers are well organized, particularly in the shops producing men's and women's outer-garments. The Amalgamated Clothing Workers of America and the International Ladies' Garment Workers' Union in these industries have highly developed grievance machinery.

In each city the workers in these unions belong to separate locals according to the type of work they do. However, all the local in a particular industry, i.e., the men's clothing industry, the women's cloak and suit industry or the women's dress industry, are organized in a Joint Board. The Board conducts negotiations on behalf of all the workers with the appropriate employers' association, which is also of city wide scope.

In the past, disputes in this group of industries were found to be numerous and difficult to settle. This was largely due to the nature of the industries. There is a multiplicity of small shops. Many of these require little capital expenditure and change management frequently. Many also work only on contract for the larger shops. Good working conditions are therefore difficult to maintain. Moreover, piece rates, which are common, are subject to constant revision because of the rapid style variations. Under such circumstances, only strong employers' associations and trade unions can attain any adequate measure of self government in the industries.

At the present time a considerable degree of stability in industrial relations has been achieved. The employers in each city have gradually organized associations — chiefly to protect themselves against competition on the basis of working conditions, but also in response, to a considerable degree, to the efforts of the unions, which found it impossible to regulate conditions if there was no agency to speak for all the employers. In addition, the letting of contracts is regulated by the agreements and the principal employers are usually held responsible for seeing that union conditions are observed on work on the contracts they let. Finally, out of the bitter experience of the past in both the United States and Canada there has developed a carefully defined adjustment procedure.

The various agreements provide for the appointment in each shop of a shop steward or shop chairman. This officer, like the department steward in agreements applying to individual undertakings, deals with the shop superintendent on behalf of the employees he represents. Any matter which he is unable to adjust is referred to a full-time union officer who takes it up with the employer or in one case with an officer of the employers' association.

The distinctive feature of these agreements is the provision made in each for permanent arbitration machinery. A joint chairman or arbitrator is appointed by the union and employers' association concerned not merely to deal with an individual dispute, but for an indefinite period. In one case he is named in the agreement. Under that agreement he is the sole arbitrator, but in other cases he is assisted by a standing joint commission or board of arbitration of which he is the chairman.

The powers of the arbitrator, or of the board on which he casts the determining vote, are extensive. All disputes which cannot otherwise be settled by the union and employers' association are referred to him or the board. The award is binding on both parties and the arbitrator may impose penalties on either party for violation of the terms of the agreement or of an award. This includes the power to impose penalties for strikes or lockouts.

The fact that the arbitrator is permanent means both that he can obtain experience in his work and also that his awards may become the basis for future settlements. There is a definite effort to avoid rigid adherence to precedent, but, at the same time, the parties can frequently settle matters among themselves, without reference to arbitration, merely by applying principles established in previous cases of a similar nature.

Because of the frequent changes in styles in women's clothing, the I.L.G.W.U. agreements provide special machinery for dealing with piece rates. In each establishment there is a price committee which, acting under the shop chairman, negotiates the rates for each garment before work begins.

Building Construction

The building trades are organized in a number of unions and the various craft unions normally bargain on behalf of their members with city-wide associations of employers.

As the workers are usually employed only for the duration of a job, continuing shop organizations cannot be established. Some agreements provide for the appointment of stewards, as for example the present agreement between the Electrical Contractors of the County of Essex and a local of the International Brotherhood of Electrical Workers, and in many other cases stewards are no doubt appointed informally. The business agent of the local branch of the union, however, necessarily plays a central role in the settlement of disputes, and almost all agreements provide that for this purpose he will have ready access to any site where work is being carried on.

Disputes which cannot be disposed of by the business agent are referred in many cases to a joint committee of the employers' association and union, variously called a conference board, industrial council, etc. Under some agreements, such as that between the Ottawa Branch of the Canadian Construction Association and the Ottawa local of the United Brotherhood of Carpenters and Joiners of America, an impartial chairman presides over the joint body. The provision for a joint committee is not universal in agreements in the construction industry, but we shall see below that the employers' associations and trade unions in the industry agreed in a national conference that such committees should be established for any disputes which cannot otherwise be settled. Moreover, it was agreed at the same conference that disputes which could not be settled locally would be arbitrated by national representatives.

Machinery of National or Regional Application

There are only a few cases in Canada of adjustment machinery which applies to a broader geographic area than a city. In the coal mining industry both in Nova Scotia and western Canada, detailed provision for the settlement of disputes has been made in collective agreements since the beginning of the century and earlier, and in Alberta and eastern British Columbia collective bargaining, and with it adjustment procedure, was of regional scope for a long period. In building construction, the employers' associations and trade unions have attempted both in the 'twenties and during the present war to develop a national system of negotiation and consultation. Perhaps the best-known examples of national adjustment machinery, however, are to be found in railway transport —particularly the Canadian Railway Boards of Adjustment.

U.M.W.A., District 18

The United Mine Workers of America entered western Canada in 1903. At first it made its agreements with individual coal operators, but in 1906 the Western Canada Coal Operators' Association was formed, including ultimately most of the operators in the Alberta and eastern British Columbia coal fields. In 1907 the U.M.W.A. entered into an agreement with the Association and for almost twenty years thereafter conditions of work in the major part of the industry were regulated by agreement between these two parties.

The adjustment machinery which operated under these successive regional agreements was as follows. An individual workman had first to submit his grievance to the pit boss. Disputes of a general nature and also grievances on which the pit boss's decision was unsatisfactory were to be dealt with by the pit committee and the mine superintendent, and, failing agreement between them, by the general manager of the company and the officers of District 18. So far, the procedure was the same as that described above for individual large-scale establishments.

In District 18, however, the regional scope of the agreements made it possible for disputes to be dealt with on a broader basis where necessary. If the general manager and union officers failed to agree, the dispute had to be referred to a joint committee consisting of three members appointed by the employers' association and three by the union. If it was still impossible to reach a settlement, an impartial chairman, whose decision was final, was appointed by the parties or, if they could not agree, by the Dominion Minister of Labour.

Due to a variety of factors arising chiefly out of the economic difficulties faced by the industry in the 'twenties, the Western Canada Coal Operators' Association disbanded in November, 1925, and has never been reorganized, although some smaller associations continued in existence or were later organized. The absence of a district-wide employers' association has been regretted by authorities investigating conditions in the industry. The Alberta Coal Commission which was appointed by the provincial Government in 1925 reported in 1926 that

> . . . . the Commission regards the passing out of existence of the Western Canada Coal Operators' Association as a retrograde step

and believes that no time should be lost in forming some organization or organizations of operators to take its place . . . . For the sake of the industry as a whole it is highly important that there should be effective organization by the operators, so as to bring to bear on their common problems the combined experience, knowledge and ability of all. This is particularly necessary in relation to their labour policy. The office of the Commissioner [the full-time officer of the Association] is considered of increasing importance and too great care cannot be exercised in the choice of a man to fill this position. In the negotiating of new agreements and the adjusting of differences under existing agreements, a Commissioner, who understands the industry and also the aspirations and limitations of union leaders, can do an immense amount to secure the smooth running of the industry.[1]

This view was reiterated ten years later by Sir Montague Barlow, Minister of Labour in Great Britain from 1922-24, who was commissioned to investigate the industry:

In an industry of this character the ideal undoubtedly is that there should be strong and responsible associations of operators on one side and of workers on the other; and it is unfortunate that no such association of operators exists.[2]

National Joint Conference Board, Construction Industry

In the construction industry, a National Joint Conference Board, representing the trade unions and employers' associations in the industry, was set up in 1920. It survived only a few years, but the principle of negotiation and consultation on a national scale was not abandoned, and during the present war a new effort was made to put it into effect.

With the financial assistance of the Dominion Government, a National Joint Conference of the employers' and workers' organizations was held in February, 1941, "in an effort to establish principles and create machinery to govern conditions in their own industry under war conditions". As a result of the conference a new National Joint Conference Board was set up, consisting of an independent chairman and nine employers' and nine workers' representatives from the various branches of the industry. This Board, together with a number of zone committees which it has assisted in establishing, has carried on the work of the Conference by providing a means whereby the employers and workers may jointly settle the problems affecting the industry.

Among the resolutions adopted by the Conference was one regarding disputes which arise out of the interpretation of an existing agreement or the negotiation of a new one. It is expressly declared that there will be no stoppages of work but that the following procedure will be adopted. Where arbitration is found necessary, the local union and employers' association must set up a joint committee within 72 hours. (A provision of this nature, we have seen, is already included in many local agreements.) The committee must meet within 48 hours and render a decision within 72 hours. Any question which it cannot settle must be referred to the National Joint Conference Board, and the Board must meet within five days of receipt of the notice of reference and give its decision within two days.

The importance of the Board was emphasized in October, 1943, by the Canadian Construction Association before the Special Committee of the House of Commons on Reconstruction and Re-establishment:

Meetings of this board have been held periodically . . . and have dealt successfully with the many problems, which have arisen. Evidence of this has been the absence of any serious strikes or shut-downs in our industry . . . .

We are desirous that in the future these relations be maintained and improved. For this reason we believe and respectfully recommend that this National Joint Board be continued in the post-war period under the provisions now made by the Department of Labour, and as in the past problems affecting our industry be dealt with by this Board . . .[3]

Canadian Railway Boards of Adjustment

In railway transport, the problem of collective bargaining is simplified because on the one hand there is a high degree of centralization on the employers' side in that there are only two large railway systems and on the other hand the workmen have long been organized. Moreover, most of the railways, including the two major systems, work together in the Railway Association of Canada.

The Brotherhood of Maintenance-of-way Employees has a national agreement with the Railway Association which covers practically all maintenance-of-way workers in Canada. Similarly there is a national agreement with the Railway Association covering workers in the railway shops. In the case of the other classes of railway employees, each agreement is concluded between the appropriate union and an individual railway only. That is, except in the case of the maintenance-of-way and shop employees the collective agreements are not national in the sense that any one covers all the workers in the class who are

[1] *Report of Alberta Coal Commission*, Feb. 15, 1926 p. 188.

[2] *Report of Royal Commission respecting the Coal Industry of the Province of Alberta*, Dec. 1935, p. 55.

[3] Special Committee of House of Commons on Reconstruction and Re-establishment, Minutes of Proceedings and Evidence, No. 29, Nov. 25, 1943, pp. 783-84.

employed by all or most of the employers. Nevertheless, there is a high degree of uniformity among the various agreements because in the case of any particular class of workmen the same union enters into agreements with all the railways.

Moreover, in the matter of disputes arising out of the interpretation or application of the agreement, machinery of national scope has operated successfully since the last war. All the agreements provide for definite grievance procedure of the same general nature as that established by agreements in other industries. Provision is made for progressive appeals to the officers of the company in order of their authority, and the employee is permitted to be accompanied by one or more union representatives. Disputes which cannot be settled under the agreement itself may be referred to a national tribunal—one or other of the two Boards of Adjustment which have been set up by agreement between the companies and the brotherhoods.

The Canadian Railway Board of Adjustment No. 1, established during the last war under an agreement between the Canadian Railway War Labour Board and certain of the brotherhoods, was continued by an agreement of April, 1921, between the Railway Association acting for the railways and the unions of engineers, firemen, conductors, trainmen, telegraphers and maintenance-of-way employees. By an agreement of September, 1925, between the Canadian National Railways and the Canadian Brotherhood of Railway Employees, the Canadian Railway Board of Adjustment No. 2 was set up covering the station and freight shed groups on the Canadian National Railway. Disputes in connection with other groups or railway workers may be referred to Board No. 1 if the parties submit a joint statement and are willing to be bound by the decision. Men in the railway shops have their own machinery which is described below.

Each of the Boards of Adjustment consists of an equal number of representatives of management and workers, and it deals with disputes arising out of the interpretation of wage schedules or agreements and with personal grievances. If there is a deadlock, a referee may be appointed by unanimous decision, or, in the case of Board No. 1, by the Minister of Labour if a unanimous choice cannot be made. It has rarely been found necessary, however, to appoint an arbitrator.

Railway Shops

As regards men employed in the railway car shops, there is an agreement between the Railway Association and Division 4, Railway Employees' Department of the American Federation of Labour. Division 4 comprises the Canadian membership of nine unions of men in the railway shops.

The preliminary stages of procedure for the settlement of grievances are similar in principle to those in other agreements: a case is taken up successively with the foreman, general foreman, shop superintendent, and master mechanic by a committee in the local shop or one of its members, and if the result is unsatisfactory, it is referred to a union committee of men employed by the particular railway with the highest railway officials designated to deal with such matters. If a settlement is still not achieved the matter is then dealt with jointly by the Railway Association and Division 4, who finally dispose of it.

Inland and Coastal Shipping

In June, 1940, after a period of unsettled industrial relations, a collective agreement was concluded, with the assistance of a board of conciliation, between the Canadian Seamen's Union and seven companies operating ships on the Great Lakes, the St. Lawrence and the Atlantic Coast. In June, 1943, a new agreement, which is still in effect, was signed by the union and the representatives of nine companies. Included among the signatories of both agreements is the Canada Steamship Lines Ltd., which is by far the largest company engaged in the trade.

Detailed provisions for the settlement of disputes appeared in the 1940 agreement and have been repeated in the current one. On each ship the unlicensed personnel who are members of the union elect a ship's delegate whose functions are similar to those of the shop steward in an industrial plant. He must submit a written statement of any dispute or grievance to the master of the ship. If the matter is not disposed of, it must be referred to a representative of the union, who will take it up with the management. All disputes which cannot be settled by the union and the particular company are referred to a permanent Maritime Adjustment Board whose decision is binding on both parties. It consists of one representative of the union, one of all the employers and an impartial chairman.

For the purpose of consulting any member of the crew, a representative of the union may board any ship covered by the agreement at any of the principal ports. This provision disposes of the problem of maintaining contact between the officers and members of the union in all matters including the settlement of disputes.

Quebec Collective Agreement Act

In any article of this nature, reference should be made to the Quebec Collective Agreement Act. Under this Act the Lieutenant-Governor in Council may make mandatory on an entire industry, either regionally or provincially, the wages, hours or apprenticeship terms of a collective agreement which has been voluntarily entered into by such a proportion of the employers and workers in the industry and region that it may be considered to "have acquired a preponderant significance and importance for the establishing of conditions of labour." It may be noted in passing that the principle of this statute is merely the general application throughout a trade or industry of "the common rule" as to working conditions which is the normal objective of any trade union. Where any part of an industry fails to achieve by voluntary agreement between employers and trade unions the standards set by the agreement, the State steps in to bring about by legislative act uniform minimum conditions of work. Such legislation has been adopted in Great Britain and the Commonwealth of Australia as a wartime measure. It has been in effect for some years in New Zealand, several Australian States, in South Africa, in most European countries and is now in force in several Latin American Republics.

The Quebec Act provides that when an agreement has been extended, the parties to the agreement must form a joint committee to which the Lieutenant-Governor in Council may add not more than four members representing equally the employers and workers who are not parties to the agreement. This committee is responsible for ensuring that the terms of the agreement are carried out. It is, of course, not primarily a grievance committee. Its duty of enforcing the agreement, however, involves dealing with grievances and disputes arising out of the agreement, and the Act requires it to "hear and consider any written complaint from an employer or from an employee respecting the carrying out of the decree."

"Cutbacks" in United States War Production

A REPORT recently issued by the United States Office of War Information deals with curtailments and "cutbacks" in certain types of war production.

"At the beginning of the war," the report states, "American production goals had to be set high enough to provide for any contingency —the possibility of Russia's fall, the invasion of this continent or the destruction of most British and Russian industry." Subsequent events, together with changing military requirements resulting from combat experience, have caused the cutbacks and changes in production which have already occurred or which are contemplated.

The report indicates that there will probably be only minor cases of resumption of output of civilian goods; instead, most plants affected will shift from the manufacture of one type of war material to another. However, a certain amount of production for civilian use may be planned, including some electric irons, bathtubs, electric refrigerators and stoves for war housing.

"Two events could completely change the production picture," the O.W.I. points out. "If the United Nations' armies should be checked during the year—if, say, large-scale landings in Europee were repulsed—the current trend would be abruptly reversed. If, on the other hand, the European campaign should go better than even the more optimistic conjectures, it would no longer be possible for plants to shift from the manufacture of one type of war goods to another."

Tentative schedules for 1944 call for further cuts in some types of equipment, while production of other war items will be advanced, the report states. Thus, despite cutbacks, the over-all program will be an estimated 17 per cent greater than in 1943.

The chief cutbacks during the coming months, according to the report, will come in small arms and ammunition, tanks, certain types of anti-aircraft equipment, non-combat aircraft, and artillery fire-control equipment. More than offsetting this will be an almost doubled production of combat aircraft, with greatly increased emphasis on bombers, a tripled requirement for high-octane gasoline, and other expansions in merchant shipping (an estimated 1,000,000 deadweight tons), trucks (about 50 per cent), electronic equipment, heavy guns, heavy artillery shells, ground ordnance, and signal items.

Decisions of National War Labour Board

DURING the month of December, the National War Labour Board has issued decisions in the following cases:—

Dominion Paper Company, and National Syndicate of Pulp and Paper Workers of Kingsey Falls.

J. and D. A. Harquail Company, Limited, Campbellton, N.B., and United Brotherhood of Carpenters and Joiners of America, Local Union No. 2539.

International Business Machines Company, Limited.

Wabasso Cotton Company, Limited, Three Rivers, P.Q.

Brackman-Ker Milling Company, Limited.

Hamilton Construction Association, and Builders' Exchange and United Brotherhood of Carpenters and Joiners of America, Local 18.

Standard Chemical Company, Limited, and Le Syndicat Industriel de Fassett, Inc.

Canadian Marconi Company, and Commercial Telegraphers' Union (Canadian Marconi System, Division No. 59).

Manitoba and Saskatchewan Coal Company, Limited, Bienfait, Sask.; Lignite Mines Limited, Pinto, Sask.; Eastern Collieries Limited, Estevan, Sask.; Roche Percee Coal Mining Company, Limited, Roche Percee, Sask.; Jenish Brothers, Estevan, Sask.; North-West Coal Company, Bienfait, Sask.; High Test Lignite Coal Company, Bienfait, Sask.; H. Banks and Son, Pinto, Sask.; Rock Springs Coal Mine, Pinto, Sask.; Banner Mine, Pinto, Sask., and Mineworkers' Central Union of Estevan and District.

Great American Insurance Company, New York.

Neaman Fur Company, and its employees.

Great Western Garments Limited, Edmonton, Alta., and United Garment Workers of America, Local 120.

Standard Clay Products Limited, New Glasgow, N.S., and United Steel Workers of America, Local 1231.

Re: Dominion Paper Company and National Syndicate of Pulp and Paper Workers of Kingsey Falls

Reasons for Decision

(Oral Decision)

This is an appeal from the finding and direction of the Quebec Regional Board which is dated the first of September, 1943.

In that finding and direction, certain changes and increases in rates were directed. Although the official of the Company seems to have been of the opinion that the Quebec Regional Board had established an eight-hour day, the finding and direction does not do anything of the kind, it merely increases the hourly rate.

It is quite apparent to us that the Quebec Regional Board has justified its decision by comparison of the wages in some of the other craft mills, particularly that of the Canada Paper Company at Windsor Mills. And, if one looks at the matter from that point of view, there does not appear to be anything unreasonable in the finding and direction made by the Quebec Regional Board.

The Company has advanced to us the question of financial inability to pay the increase ordered.

An examination of its profit and loss statement for the year ending December 31, 1942, shows a net profit for that year—before taxes of $26,648.55.

Mr. Riendeau estimates that the increase, as ordered by the Quebec Regional Board, will result in an extra expense of approximately $18,000; he also points out that there is an increase in the cost-of-living bonus and that there will be a higher consumption of coal.

However, it must be plain that, in order to make out a case of inability to pay, a Company must establish in a reasonable way that the result of the increase will be a loss. That does not appear to be the case here. It does look as if the payment, in the absence of some improvement in the manufacturing method, may cut down the Company's profit to a comparatively small amount.

We all feel that on appeal we cannot disturb the decision of the Quebec Regional Board on the evidence presented here: so the appeal will be dismissed.

December 1, 1943.

Re: J. & D. A. Harquail Company Limited (Campbellton, N.B.) and United Brotherhood of Carpenters and Joiners of America—Local Union No. 2539.

Reasons for Decision

This is an appeal by the Union from a decision of the Regional War Labour Board for New Brunswick. The Regional Board has granted leave to appeal.

The application was for a 7 cent hourly increase in the basic rate and full cost-of-living bonus. The Regional Board allowed a 3 cent increase and raised the weekly bonus from $2.86 to $3.50 effective from September 1, 1943. The Union contends for the balance of its application and asks further that the effective date should be the date of its application to the Regional Board, namely July 24, 1943. The basis of the argument for the further increase is comparison with local industries of another type. The Company involved here is engaged in the general manufacture of wood products, while the companies referred to by the Union are in the pulp and paper and foundry industry.

We have in this case the advantage of written reasons for the decision of the Regional Board and we find that their direction was founded upon what appears to have been a perhaps incomplete examination of rates paid by wood-working firms in St. John and Moncton. Although on an appeal, we are not inclined to substitute our views for those of the Regional Board, we must conclude from our review of this case that there does appear to be ground, on a comparative basis within the industry concerned, for the granting of the extra 4 cent hourly increase. However, we do not think we should disturb the adjustment in the cost-of-living bonus as ordered by the Regional Board.

The Regional Board gave effect to its decision from the effective date (September 1, 1943) of the collective agreement between the Union and the Company, rather than from the date of the Union's application, and with that feature we do not think there is ground for intervention on our part and the additional 4 cent increase ordered by this Board will also be payable from September 1, 1943.

The appeal is therefore allowed to the extent indicated.

December 6, 1943.

Re: International Business Machines Co., Limited

Reasons for Decision

This is an appeal from a decision of the Regional War Labour Board for Ontario denying the Company's application for permission to increase the coverage under a non-contributory group life insurance plan.

The plan was first established on a non-contributory basis well before November 15, 1941, and has been extended on two other occasions with the Regional Board's approval. Under the present application the Company's yearly premium payment in respect of its Ontario employees will be increased by 12·36 per cent.

Premium payments made by an employer for insurance on the life of his employees strictly fall within the definition of wages found in section 15 (I) (iv) of P.C. 5963, because they are made "in respect of services rendered by the employee(s)". But, we think that without departing from the purposes of the Wages Control Order, an application of this nature can be viewed in a less stringent manner than ordinary wage rate increases. The plan here is an old established one and was inaugurated on a fairly liberal basis from the start. We are of opinion that the extensions asked should be approved and the appeal allowed.

December 6, 1943.

Re: Wabasso Cotton Company Limited (Three Rivers, P.Q.)

Reasons for Decision

By leave of the Regional War Labour Board for Quebec, this appeal is taken by the Company from a decision of September 16, 1943, approving vacations with pay for 1944, in the terms of bulletin D.B. 17. The Company's application was for one week's vacation with full pay to all employees on its payroll at the time of shut-down, regardless of service requirements.

The Company forcefully argues that paid vacations are not a condition of employment having the effect of increasing wage rates and consequently that a Labour Board's approval is not required by the Order in Council (P.C. 5963). We need hardly elaborate upon this subject, because the view has been consistently taken by this Board and by its predecessor that the inauguration of a paid-vacation plan was subject to Board approval

under the provision laid down in section 23 (2) of the Order. The effect of paid vacations is to raise the wage rate for time worked and undoubtedly they are a condition of employment governed by the Wartime Wages Control Order.

On its merits, we can understand that the plan proposed by the Company is from its viewpoint advantageously simple of operation. Moreover, the Company has placed itself in a difficulty caused by the plan having been put into effect in 1943, with the approval obtained from the Regional Board after the fact. However, we are not prepared to sanction a vacation plan which does away entirely with service qualifications, although strict compliance with all conditions of D.B. 17 may not necessarily have to be required. The Company may on a fresh application to the Regional Board perhaps obtain modification of the plan under review by introducing flexibility and scaling in paragraph (*a*) of the present finding and direction which requires a minimum qualifying period of 300 days actual work before any paid vacation is granted.

As to the presently proposed plan, however, we must dismiss the appeal.

December 6, 1943.

Re: Brackman-Ker Milling Company, Limited

Reasons for Decision

This is an appeal from a decision of the British Columbia Regional Board declaring two employees to be above the rank of foreman.

The Regional Board has found that the one so-called employee is the Secretary of the Company and the other the Treasurer. The Board has also reached the view that the duties which they perform are definitely of an executive character.

We find nothing wrong in principle in the decision. Accordingly, the appeal will be dismissed.

December 8, 1943.

Re: Hamilton Construction Association and Builders' Exchange and United Brotherhood of Carpenters and Joiners of America, Local 18

Supplementary Reasons for Decision

This was an appeal from the Ontario Regional Board which we dismissed on September 22, 1943.[1] The Ontario Regional Board had purported to grant an increase to carpenters in the City of Hamilton from 90 cents to 95 cents an hour.

Unfortunately the Regional Board's finding and direction read as follows:

> "The Board therefore directs that carpenters in the Hamilton area shall be paid a maximum basic wage rate of 95 cents per hour, effective as of the first day of June, 1943."

No attention was paid to the use of the word "maximum" by the parties on the appeal. The appeal was obviously taken and certainly was argued before us on the sole basis that the employers, members of the Association, were ordered by the Regional Board to pay 95 cents per hour to carpenters from June 1, 1943.

It appears that the employers, having undertaken the appeal on that basis and having argued it on that basis, now take the position that there is no liability on their part to pay the 95 cents an hour as that was the maximum ordered and they can pay less. On November 2, 1943, the Chief Executive Officer of the Regional Board advised the Association that the Board intended that its direction was to be a clear order requiring the employers to pay 95 cents an hour. Apparently the employers still maintain the position first advanced as an afterthought.

We are still seized of the matter. Accordingly, we order that the word "maximum" be deleted from the Regional Board's finding and direction. In the event of the employers still refusing to pay the wage on the basis ordered, the Union may apply to the Regional Board to have the necessary steps taken for prosecution under the wages order.

December 9, 1943.

Re: Standard Chemical Company Limited and Le Syndicat Industriel de Fassett Inc.

Reasons for Decision
(Oral Decision)

We think we can dispose of this matter without reserving judgment on it.

It appears that on the application to the Regional Board, in Quebec, the merits of the matter were not really gone into at all. The decision seems to have been based largely on a communication from the Company in which it puts forward the proposition that it could not take care of an increase without a substantial reduction in the general profits, and, that any increase which was granted at the

[1] L.G. Oct., 1943, p. 1351.

Fassett plant would have to be similarly extended to two similar operations, at South River and at Donald in Ontario. Therefore, the application comes to us in such a way that we really have to make an initial decision rather than deal with any decision of the Quebec Board in a strictly appellate way.

The basic wage rate at this plant and at the two Ontario plants appears to be thirty-seven and a half cents an hour and we are of the view, in the main, that the labour may be said to be unskilled and semi-skilled labour and that enables us, under section 25 —5963, to make some fairly general comparison in the Ottawa Valley insofar as the Fassett plant is concerned.

As to the basic wage rate, we feel there should be an increase of five and a half cents per hour throughout the various classifications. The Company has suggested to us that we should make this apply at the South River operation and also at the Donald operation. We simply could not do that, sitting in an appellate position as we are. If similar increases are to be granted for the Ontario operations, no doubt an application to the Ontario Regional Board for authority to pay them will be granted.

As to the application for increase in the cost-of-living bonus, we all feel we cannot make any change in this because our power to increase the cost-of-living bonus under Order in Council must be within an industry and comparative industries, at least. The industries which have been put forward to us on a comparative basis cannot be said to be of the same type as this industry involved here. Accordingly, there will be no change in the cost-of-living bonus.

The application was made to the Regional Board on September 1, 1943, and although there may have been some negotiations before, the position is not the same as that of a Union having a contract. The increases, which we are directing, will be retroactive to September 1, 1943.

December 9, 1943.

Re: Canadian Marconi Company and Commercial Telegraphers' Union (Canadian Marconi System, Division No. 59)

Reasons for Decision

This is an application by the Union for a direction to the Company—

(1) to extend paid vacations from two to three weeks;
(2) to pay, in addition to the monthly wage, premium rate of one and one-half times the regular *pro rata* rate for all time worked on Sundays and holidays.

The Union represents the operators in the Company's Central Telegraph Office at Montreal and the shift engineers at its sending and receiving stations at Drummondville, Que., and Yamachiche, Que. All of these employees are engaged in the Company's trans-oceanic service. The premium rate for Sunday work is at present being paid to the operators, and that part of the application is for the benefit of the shift engineers only.

With respect to the extension of the vacation plan now in effect, the Union bases its claim upon comparison with the practice prevailing in the Pacific Cable Board where a one-month paid vacation was established prior to November 15, 1941. Although on a prior occasion, this Board has held that comparison with the Pacific Cable Board (*see* 1943 Labour Gazette, p. 446) was a proper one to make for the purpose of a wage increase to the operators, we are not prepared to direct an extension of the existing vacation provisions of the parties' agreement just because a comparable firm has a longer vacation period. The country being at war is a "material circumstance" which it is incumbent upon this Board to take into account when exercising the jurisdiction conferred by section 29 of the Order in Council (P.C. 5963). We have by direction introduced paid vacations in branches of industry and for classes of employees who had not enjoyed them before, but we are of opinion that in this case the power should not be used in wartime to force the employer to extend a vacation allowance from two to three weeks. On this point, the application will be refused.

With regard to remuneration for work performed on holidays, the draft agreement submitted by the Company provides the following:

> "All time up to eight hours worked by operators and shift engineers on Dominion Public Legal Holidays, referred to in Clause E of this Article, shall be paid for at *pro rata* rates in addition to the monthly wage. After eight hours worked on such holidays, time and one-half of the regular wage rate shall be paid."

The Union asks that *all* time worked on holidays be paid at time and one-half in addition to the monthly wage. The rule generally prevailing in the railway agreements is the one quoted above. However, the Board, in the case cited, has found that the operators "are performing a special type of work requiring particular skill and under conditions not generally comparable with those obtaining in railroad and other classes of commercial telegraphy". The same observation can be made about the engineers referred

to in the application. On the basis of the comparison previously used by the Board, we find the time and one-half rule prevailing and we think that on this branch, the application should be approved. The direction will apply to the six holidays mentioned in P.C. 4671 and in the draft agreement.

On the question of remuneration for Sunday work, the following are the provisions of the Company's draft agreement:

"All time worked in the Control Telegraph Office in excess of the regular eight hour tour of duty, and all time worked on Sundays, shall be paid for at the rate of time and one-half of the regular wage rate.

"All time worked at Drummondville and Yamachiche in excess of the regular tour of duty, exceeding forty-eight hours per week, averaged over a period not exceeding six weeks, shall be paid for at the rate of time and one-half of the regular wage rate."

The Union contends that the shift engineers at the Drummondville and Yamachiche stations should be placed upon the same footing as the operators in the Montreal Office. Although they are all part of the one trans-oceanic system, there is a difference between the nature of the Sunday work required in the telegraph office and at the stations. The station need a full staff on Sundays, while the telegraph office operates with only a small staff. Hence the difference in the provisions for premium rates. However, our view is that the engineers should have one day off duty each week and they should be paid the premium rate for all time worked on their assigned day off and, if no day is assigned, for all time worked on Sundays.

Findings and directions accordingly, effective from June 1, 1943.

The establishment of the new classification discussed in the Company's brief is a matter which is irrelevant to the application and we therefore refrain from dealing with it.

December 10, 1943.

Re: Manitoba & Saskatchewan Coal Company, Limited, Bienfait, Sask.; Lignite Mines Limited, Pinto, Sask.; Eastern Collieries Limited, Estevan, Sask.; Roche Percee Coal Mining Company, Limited, Roche Percee, Sask.; Jenish Brothers, Estevan, Sask.; North-West Coal Company, Bienfait, Sask.; High Test Lignite Coal Company, Bienfait, Sask.; H. Banks and Son, Pinto, Sask.; Rock Springs Coal Mine, Pinto, Sask.; Banner Mine, Pinto, Sask., and Mineworkers Central Union of Estevan and District.

Reasons for Decision

This is an application for increased wages in all classifications whether hourly rated or on contract. In the particular field, there is both shaft mining and strip mining.

At the end of the hearing we intimated to the parties that in view of recent increases given to District U.M.W.A. 18, increase would also be granted to the Saskatchewan miners. It appeared to us that the schedule of proposed rates would tend to throw the existing wage structure out of balance and we suggested to the parties that they get together and see if a more balanced schedule could not be worked out even if they were not agreed on specific rates.

We have now received a revised schedule of classifications and rates agreed upon in writing by the parties. It quite clearly accomplishes the purpose we had in mind. We feel we should express our gratitude for the constructive work given to the matter by both the Union and the operators. In the result it means substantial increases to the miners and the elimination of some objectionable features contained in the old agreed schedule. Finding and direction will issue in the agreed terms including adjustment of the cost-of-living bonus, all effective December 1, 1943.

On the question of overtime still not agreed upon, we feel we should find in favour of the Union's contention. It seems quite evident that the 1939 contract did not contemplate present conditions when overtime work is urgently required. Accordingly, overtime will be directed at the rate of time and one-half for work on Sundays and legal holidays and for hours worked over the presently recognized normal working day.

December 10, 1943.

Re: Great American Insurance Company, New York

Reasons for Decision

This is an appeal from a decision of the Regional Board for Saskatchewan declaring the Company's Hail Superintendent in that Province to be above the rank of foreman.

The Regional Board made its finding on the basis of representations made to them by the employee concerned in the application. It appears that from the description made to them of the duties and responsibilities involved, the Regional Board correctly took the

view that they were of an executive character. Before this Board however, the Company's manager for Canada submitted a brief which rather indicates a different conclusion. In the circumstances and placed as we are in an appellate position, we feel we should not interfere and we would prefer to leave the matter to be settled by the Regional Board.

We must therefore dismiss the appeal.

December 15, 1943.

Re: Neaman Fur Company and its Employees (joint application)

Reasons for Decision

This is an appeal from a decision of the Manitoba Regional Board dated September 29, 1943, refusing to authorize,

(*a*) overtime rates of time and one-quarter after the regular day's work of eight hours and on Sundays and holidays;

(*b*) one week's vacation with pay under certain conditions.

It is quite clear from the records of the Regional Board that it made a thorough and searching investigation into the matters involved and that its decision was not lightly made. It had an inspector check the actual situation prevailing in the industry in the City of Winnipeg. The results of the investigation in the opinion of the Regional Board were not in accord with the representations upon which it was invited to act.

Besides it appears that the Neaman Fur Company jointly with six other firms and the Manitoba Fur Employees' Association had previously made an application for the same consideration among others as have been applied for here. The Regional Board refused to grant the request with respect to these claims on July 22, 1943. The present application is by the Company and an international union. In substance it is an application for review of the former decision made within two months. The Regional Board could not find any change in conditions meantime justifying a reversal of its former decision. On such a matter of fact we cannot substitute our judgment for that of the Regional Board.

The Regional Board quite evidently was distrustful of the representations made to it. In effect the appeal is substantially from an exercise of discretion. We are unable to say that in the circumstances that the discretion was wrongly exercised. The Regional Board is more thoroughly acquainted with conditions prevailing in the industry in the City of Winnipeg than we are. It would be too dangerous for us to interfere in a matter where the evidence presented did not appear to carry the confidence of the Regional Board.

The appeal must be dismissed.

December 15, 1943.

Re: Great Western Garments Limited, Edmonton, Alberta, and United Garment Workers of America, Local 120

Reasons for Decision

(Oral Decision)

We think we can dispose of this matter now, without reserving judgment on it.

Substantially what the union has requested in its application to the Alberta Regional War Labour Board, is the return of the rates as they existed in 1929. During the depression years following 1929 there had been reductions, accepted voluntarily by the union; and there were some restorations as well. It appears that at the present time, after giving effect to the 6 per cent increase which was granted by the Regional Board, rates are still 11·8 per cent below the 1929 rates.

The evidence before us, presented by the union, is that generally speaking, in different centres such as Vancouver, Toronto, and pretty much throughout the industry, the 1929 rates have been restored, with the exception of Winnipeg, where they are still 10 per cent below the 1929 rates.

It seems quite clear to us that when the reductions were agreed to by the union, it was on some basis of understanding that when conditions became better a restoration would be made.

It also appears from the evidence of the company, that the selling price is substantially the same now as it was in 1929. That being the case, we are all of the opinion that the appeal should be allowed and the 1929 rate should be restored.

As far as the question of retroactivity is concerned, while it is true that the union made its application sometime about April or May, 1943, and the decision of the Regional Board granting the 6 per cent increase was only made retroactive to October 1, 1943, it looks as if neither of the parties here should be blamed particularly in connection with that, so we will not make the award retroactive to May 1. The overall increase will date from October 1, 1943.

December 16, 1943.

Re: Standard Clay Products Limited (New Glasgow, N.S.) and United Steel Workers of America, Local 1231

Reasons for Decision

This is an appeal from a decision of the Regional Board for Nova Scotia. The application was for a general increase in wages (based from a common labour rate of 55 cents) and full cost-of-living bonus and was first dealt with by the Regional Board on October 30, 1942, in the following terms:

"The Regional War Labour Board for Nova Scotia finds:

1. That an examination of the schedule of wage rates now being paid by the Standard Clay Products Limited discloses that the said rates are low when compared with those generally prevailing for the same or substantially similar occupations in the locality.
2. That examination of attested statements discloses the fact that the financial position of the Standard Clay Products is such that the company cannot undertake the further expense involved in an increase of wage rates.

and directs:

1. That the present application for an increase in wage rates be disallowed.
2. That within 30 days of the end of the calendar year, 1942, and within 30 days of each 6-month period thereafter, the Standard Clay Products Limited shall submit to this Board a financial statement showing its position at the end of the 6-month period immediately prior thereto, in order that the Board may give the application further consideration.

The Regional War Labour Board for Nova Scotia recommends that the Management of the Standard Clay Products Limited and the representatives of their employees enter into consultation forthwith, with a view to working out some means (possibly an incentive bonus) whereby production may be increased, and the company reach the desirable position of being able to increase wages to the rates generally prevailing in the locality."

Pursuant to this finding and direction a 2-cent increase was ordered by the Regional Board on the basis of the Company's financial position at December 31, 1942. An operating loss was shown at the end of the first semester of 1943 and the Regional Board refused to order any further increase. Although under the comparative rule of section 25 of the Wages Control Order (P.C. 5963), the Union has a case supported by the Regional Board's finding—there is a material consideration which cannot be overlooked: the employer's financial ability to meet an increased wage bill. That feature was examined by a Conciliation Board in 1940 and has apparently been given careful study by the Regional Board. It was shown to us that quite apart from any administrative cost or general expenses, the plant is losing money on its 1943 production operations. It will perhaps be sufficient to point out that as against an average labour cost of $7.38 per ton of clay pipe produced in 1940, the average for the first ten months of 1943 is $13.77 and is increasing month by month. That situation may be due to reasons over which the men have no control, but we feel rather inclined to adopt the view expressed by the Regional Board in recommending the working out of an incentive plan to increase production, so that it may become possible for the Company to pay higher wages.

Our conclusion is that the Regional Board's handling of the matter should not be disturbed and we must dismiss the appeal.

December 17, 1943.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with Recent Proceedings under the Industrial Disputes Investigation Act, Conciliation Work of the Department of Labour, and Strikes and Lockouts in Canada, Great Britain and other countries.

Recent Proceedings under the Industrial Disputes Investigation Act.—This article gives an account of all applications for Boards of Conciliation and Investigation, and the disposition of these applications. In cases where Boards are established, the LABOUR GAZETTE publishes in due course the full text of their reports, as submitted to the Minister of Labour.

Since the outbreak of war and the extension of the Industrial Disputes Investigation Act to cover disputes in war industries, the number of applications for Boards of Conciliation and Investigation has greatly increased. In recent months the majority of applications for Boards have been referred to Industrial Disputes Inquiry Commissioners for preliminary investigation, to determine whether the circumstances warrant the establishment of a Board. Reports of Commissioners appointed under the Act are summarized in this article.

Disputes which concern wage demands come under the jurisdiction of the National and Regional War Labour Boards.

Conciliation Work of the Department of Labour.—Conciliation proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purposes of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, and war work, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

Strikes and Lockouts.—The latest information concerning strikes and lockouts in Canada is published monthly in tabular form, with a summary appearing once a year. The summary of strikes and lockouts in Canada and other countries during 1942 appeared in the LABOUR GAZETTE for July, 1943.

The latest available information as to strikes and lockouts in Great Britain and other countries appears from month to month.

Recent Proceedings under the Industrial Disputes Investigation Act

IN the month of December five Boards of Conciliation and Investigation submitted their reports in connection with the following disputes:

(1) Between Ayers, Limited, Lachute Mills, P.Q., and its employees, members of Local 9, United Textile Workers of Canada.

(2) Between the Scott Tool and Machine Company, Montreal, P.Q., and its employees, members of Aircraft Lodge 712, International Association of Machinists.

(3) Between the Goodyear Tire and Rubber Company of Canada, Limited, New Toronto, Ont., and its employees, members of Local 189, United Rubber Workers of America.

(4) Between the Canadian Marconi Company, Montreal, P.Q., and its employees, members of Division No. 59, Canadian Marconi System, Commercial Telegraphers' Union.

(5) Between the Collingwood Shipyards, Limited, Collingwood, Ont., and its employees, members of Local No. 4, Industrial Union of Marine and Shipbuilding Workers of Canada (C.C.L.).

The texts of the reports of the Boards will be found at the conclusion of this statement.

Applications Received

During the month of December seven applications for the establishment of Boards of

Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act* were received in the Department of Labour as follows:—

(1) From employees of the Johnson Wire Works, Limited, Montreal, P.Q., members of Lodge 1758, International Association of Machinists. The dispute, which concerns the negotiation of a collective labour agreement, was said to affect 145 employees. On December 27, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

(2) From employees of the Legare Foundry, Sherbrooke, P.Q., members of Local 2525, United Steelworkers of America. The dispute which arose out of the union's request for recognition and the negotiation of a collective labour agreement, was said to affect 14 employees directly and 3 indirectly. On December 29, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

(3) From shot firers, examiners, foremen, weighmen and watchmen, employees of the Cumberland Railway and Coal Company, Springhill, N.S. The dispute, which developed out of the refusal of the management to recognize the Association of Employees for the purpose of adjusting differences as to working conditions, rates of wages, and seniority rights, was said to affect 60 employees directly and 1,400 indirectly. At the end of the month, the dispute had been referred to Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, for investigation as Industrial Disputes Inquiry Commissioner.

(4) From employees of Asbestos Corporation, Limited, Vimy Ridge, P.Q., members of Local No. 1, Canadian Union of Asbestos Workers (C.C.L.). The dispute, which was said to affect 280 employees, concerns union recognition and the negotiation of a collective labour agreement.

(5) From employees of Johnson's Company, Thetford Mines, P.Q., members of Local No. 6, Canadian Union of Asbestos Workers (C.C.L.). The dispute, which concerns union recognition and the negotiation of a collective labour agreement, was said to affect 616 employees.

(6) From employees of Asbestos Corporation, Limited, Black Lake, P.Q., members of Local No. 2, Canadian Union of Asbestos Workers (C.C.L.). The dispute, which developed out of the request of the union for recognition and the negotiation of a collective labour agreement, was said to affect 235 employees.

(7) From employees of Bell Asbestos Mines, Limited, Thetford Mines, P.Q., members of Local No. 5, Canadian Union of Asbestos Workers (C.C.L.). The dispute, which was said to affect 335 employeees, concerns union recognition and the negotiation of a collective labour agreement.

Board Established

On December 16, a Board of Conciliation and Investigation was established to deal with a dispute between the Horseshoe Lake Mining Company, Ormiston, Sask., and its employees, members of Local 2, Sodium Sulphate Workers' Union (C.C.L.) (L.G., Dec. 1943, p. 1651). On December 15, Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg, Man., who was appointed an Industrial Disputes Inquiry Commissioner, recommended the establishment of a Board of Conciliation and Investigation as he had found it impossible to settle the dispute At the end of the month, Professor John E. L. Graham, Winnipeg, Man., and Mr. D. S. MacDonald, Regina, Sask., had been appointed members of the Board on the nomination of the employees and employer, respectively, and they had been requested to confer with a view to making a joint recommendation of a person to be appointed third member and chairman of the Board.

Board Fully Constituted

The Board of Conciliation and Investigation established on November 27, to deal with a dispute between Dominion Rubber Company, Limited (Papineau Plant), Montreal, P.Q., and its employees, members of Distillery, Rectifying, Brewery and Wine Workers International Union (L.G., Dec. 1943, p. 1650) was fully constituted on December 7. The personnel of the Board is as follows: Honourable Mr. Justice Alfred Savard, Quebec, P.Q., chairman, appointed on the joint recommendation of Messrs. George H. Foster, K.C., and Paul Fournier, both of Montreal, P.Q., the employer's and employees' nominees, respectively.

Other Disputes Referred to Industrial Disputes Inquiry Commissioners

On December 14, Honourable Mr. Justice Oscar L. Boulanger, of the Superior Court,

* By P.C. 9384, the National and Regional War Labour Boards are specifically charged with the duty of adjudicating wage demands. Therefore all applications for the establishment of Boards of Conciliation and Investigation in which wages are the sole cause of the dispute are removed from the ambit of the Industrial Disputes Investigation Act and the applicants are referred to their respective War Labour Board.

Quebec, P.Q., was appointed an Industrial Disputes Inquiry Commissioner to investigate a dispute between the Aluminum Company of Canada, Limited, Shawinigan Falls, P.Q., and its employees, members of the International Union of Aluminum Workers (L.G., Dec. 1943, p. 1649).

An application for the establishment of a Board of Conciliation and Investigation was received from employees of the Canadian Bridge Company, Limited, Windsor, Ont., members of Local 195, United Automobile, Aircraft and Agricultural Implement Workers of America (L.G., Dec. 1943, p. 1649). On December 13, Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, Ont., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute. The Commissioner recommended that the application for a Board of Conciliation and Investigation be denied. The interested parties were subsequently advised that a Board would not be established.

Other Reports of Industrial Disputes Inquiry Commissioners

A report was received on December 1, from Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, Ont., who had been authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute between the General Engineering Company (Canada) Limited, Scarboro, Ont., and its employees, members of Local No. 1, Chemical Workers of Canada (C.C.L.) (L.G., Nov. 1943, p. 1499). The Commissioner recommended that the application for the establishment of a Board of Conciliation and Investigation be held in abeyance pending application of the union to the Ontario Labour Court for the certification as the bargaining agency.

Industrial Disputes Inquiry Commission at Arvida

In the December, 1943, issue of the LABOUR GAZETTE, reference was made to the appointment of an Industrial Disputes Inquiry Commission, under the chairmanship of Mr. Cyprien Miron of the Quebec Department of Labour for the purpose of determining the proper bargaining agency of the employees upon the expiration of the existing agreement between the Aluminum Company of Canada, Limited, Arvida, P.Q., and the National Catholic Syndicate of the Aluminum Industry of Arvida.

The majority report of the Commission, signed by the chairman and Mr. Louis Philippe Boily, the latter the nominee of the National Catholic Syndicate, was received on December 10, and recommended: (*a*) the verification of the membership books of the International Union of Aluminum Workers, Local 22022, and the National Catholic Syndicate of the Aluminum Industry of Arvida, Incorporated; (*b*) that for a period of one year, the International Union of Aluminum Workers, Local 22022, be accepted as a co-contracting party in the agreement between the Aluminum Company of Canada, Limited, Arvida, P.Q., and the National Catholic Syndicate of the Aluminum Industry of Arvida, Incorporated; (*c*) that the representation of both co-contracting unions on the Parity Committee be established in proportion to their verified membership.

In a minority report, Mr. Adrien Villeneuve, the nominee of the International Union recommended that the Minister of Labour order the taking of a representation vote at the Arvida plant in order to determine the bargaining agency desired by the employees; failing which, effect be given to the application of the International Union of Aluminum Workers, Local 22022, for the establishment of a Board of Conciliation and Investigation.

Subsequently the company, as well as the two unions involved in the dispute, indicated their acceptance of the majority report of the Industrial Disputes Inquiry Commission.

On the recommendation of the Quebec Department of Labour, the Minister of Labour appointed Messrs. W. C. Teakle, Albert Parent and N. Berube all of Quebec, P.Q., to verify the membership records of both unions.

The notice of termination date in the existing agreement was November 30, but by agreement this was extended to January 7, 1944.

Settlement

On December 27, at the request of the applicant union, the application for the establishment of a Board of Conciliation and Investigation to deal with a dispute between the Canadian National Railways, Montreal, P.Q., and certain of its employees in the Dining and Sleeping Car Service, members of the Canadian Brotherhood of Railway Employees and Other Transport Workers (L.G., July, 1943, p. 920) was withdrawn, the parties to the dispute having reached a tentative agreement, which it was anticipated would be signed when certain questions concerning the remuneration of the employees had been dealt with by the National War Labour Board.

Application Withdrawn

On December 4, at the request of the applicant union, the application for the establishment of a Board of Conciliation and Investigation to deal with a dispute between Canadian Car Munitions, Limited and Allied War Supplies Corporation, Montreal, P.Q., and their employees, members of Local 23216, Ammunition Workers Union of Cherrier (A.F.L.) (L.G., Nov., 1943, p. 1496) was withdrawn.

Report of Board in Dispute between Ayers, Limited, Lachute Mills, P.Q., and its Employees

On December 4, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between Ayers, Limited, Lachute Mills, P.Q., and its employees, members of Local 9, United Textile Workers of Canada (L.G., Nov. 1943, p. 1498).

The personnel of the Board was as follows: The Honourable Justice Oscar L. Boulanger, Quebec, P.Q., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from Messrs. D. A. Paterson, Montreal, P.Q., and Frank Querat, Cornwall, Ont., the employer's and employees' nominees respectively.

The report of the Board was signed by the chairman and Mr. Paterson. Mr. Querat submitted a minority report.

The texts of the report of the Board and the minority report follow:—

Report of Board

In the matter of the Industrial Disputes Investigation Act and of a dispute between Ayers, Limited, Lachute, P.Q., (Employer) and employees, members of Local No. 9 United Textile Workers of Canada, (Employees).

THE HONOURABLE
THE MINISTER OF LABOUR,
OTTAWA, CANADA.

Sir:—

The undersigned have been duly appointed and sworn in as members of the Board of Conciliation and Investigation charged with the above matter. At various times they have met in Montreal in Mr. Paterson's office and at Lachute in the Company's Board Room, for which thanks are given to Mr. Paterson and the Company. They have discussed with the interested parties different proposals put forward for the amicable settlement of the difficulty between the Union and the Company. After these consultations and after consideration of the problem, they desire to offer the suggestions hereinafter set forth as the proper and equitable method, in their opinion, of avoiding the threatened strike in the Company's plant, where war work is being carried on. They, therefore, respectfully beg to recommend as follows:

1. That the Company do, with all good-will and good grace, concede that Local No. 9 of the United Textile Workers of Canada controls and represents about 70 per cent of its employees and is entitled, therefore, to speak and act for said employees collectively.

2. That the Company do recognize said Local No. 9 as the sole bargaining agent of its employees for the conclusion of a collective labour agreement between the Company and its employees.

3. That the Company do consent to sign with said Local No. 9 a collective labour agreement, similar to the draft agreement submitted to the Company by the Local by its letter of May 18, 1943, and annexed hereto, but containing the recommendations of the present report.

4. That the execution of said agreement be left to a joint Council composed of the constitutionally elected Executive Officers of the Local and of an equal number of executive Officers of the Company. In order to insure representation of the 30 per cent minority of employees, a non-unionist employee will be appointed to the joint Council by the other members thereof by mutual agreement or, failing such agreement, by the judge of the Superior Court sitting in and for the District of Terrebonne on petition of either the Local or the Company. The principal duty of the joint Council shall be to see that the collective agreement is carried out loyally and harmoniously according to its letter and spirit and that its terms and conditions are respected by all concerned. The joint Council shall make the rules of procedure necessary for its proper functioning.

5. That a Grievance Committee composed of one steward for each department of the plant be formed to settle grievances and difficulties which may arise in the course of the daily occupation of the employees. Each steward shall be elected by the vote of all the employees of his department under the supervision of a representative of the Company and of a representative of the Local. If and when the Grievance Committee is unable to

settle a matter with the foreman, the Department Superintendents or the General Superintendent, such matter shall be referred to the joint Council.

6. That the matters referred to in paragraphs C. D. E. F. of the statement of the nature and cause of the dispute in the application for a Board of Investigation and Conciliation be settled by mutual agreement between the Company and the Local, the present Board offering its assistance for that purpose, or submitted to the Regional War Labour Board, the Company agreeing to furnish to said Board all information necessary for the determination of the matters submitted.

7. That the Local do renounce its demand for a closed shop in the Company's plant.

(Sgd.) O. L. Boulanger,
Chairman.

(Sgd.) D. A. Paterson,
Member.

Montreal, November 27, 1943.

TRANSLATION

Minority Report

CORNWALL, ONT.,
December 2, 1943.

In the matter of the Industrial Disputes Investigation Act and of a dispute between Ayers Ltd., Lachute, P.Q., and United Textile Workers of Canada Local No. 9

Mr. M. M. MACLEAN,
DIRECTOR OF INDUSTRIAL RELATIONS,
OTTAWA.

Dear Sir:

Following our sittings at Montreal and Lachute, P.Q., and from the facts presented during this investigation, my recommendation as the employees' representative on this Conciliation Board may be summarized as follows:—

A—Recognition of Local No. 9 of the United Textile Workers of Canada as the sole collective bargaining agent for the employees of Ayers Ltd.

B—Recognition of the Executive Committee of Local No. 9 of the U.T.W.C. as now in office as the official representative of all employees;

C—Under no circumstances to allow non-members of the U.T.W.C. to interfere in the internal or external business of the union, either by vote, nomination or election;

D—That the clause C (a and b) of the memorandum submitted by Ayers Ltd. under the title *Bulletins* be accepted in full by both parties;

E—That the clause entitled *Minimum Fee* of the memorandum submitted by Ayers Ltd. be accepted in full by both parties.

F—That a collective agreement following these principles be signed immediately between Ayers Limited and Local No. 9 of the United Textile Workers of Canada, as representative of all the employees of Ayers Limited, Lachute Mills, Lachute, P.Q.

This recommendation is based on the following facts:—

1. Following my long experience in the labour movement in Canada, as for the ticklish question of employees who are members and those non-members of a union in a mill or any other plant, I believe it is plain nonsense to allow employees who had nothing to do with the negotiation of a collective agreement between such a union and the company concerned, to vote, nominate or elect officers who are not concerned with the carrying out of the said collective agreement;
2. Local No. 9 of the United Textile Workers of Canada, affiliated to the Trades and Labour Congress of Canada, has without any possible doubt a very strong majority of the employees of the company and as the majority has priority over the minority, it is only logical that it alone should have the necessary power to transact, negotiate or sign anything in the name of the employees;
3. Concerning the matter of the election of the union grievance committee (called the *Permanent Committee* in the company's memorandum), I see no reason why such an election should not be held in the company's mills under the supervision of the Dominion or Provincial Department of Labour, inasmuch as only members in good standing of Local No. 9 of the United Textile Workers of Canada will be entitled to nominate and elect the said committee.

The Canadian workman has joined the union and insists on bargaining collectively through the union ... we must have democracy in industry if we are to have it in our society. And we must have it in Canadian industry if democracy is to survive the present crisis. Union members have the right to refuse to work with non-unionist, who are sharing in the benefits from the Union without sharing in its upkeep and the determination of its policies. This is a basic democratic right workers cannot in law or justice be required to continue working under conditions which they find abhorrent, and any attempt to force them to do so is a form of forced labour.

The reason why a union workman does not choose to work with a non-union workman is plain and evident and founded in the protection of himself and his fellow craftsmen. Instinctively men love the company of others of their kind ... The man who desires the society of his companions must so conduct himself that his associates are content to live with him ... Trade unionists for centuries have

believed that they are upholding the right of man, the welfare of their class; that without their organization their liberty and independence would be lost; they have come to regard the non-union man as one who not only refuses to stand with them but, who is disloyal to his class, a traitor to his kind.

This is the reason why in my minority report having over seventy per cent of the employees of Ayers Ltd. in the union United Textile Workers of Canada Local No. 9 that the Company should negotiate a collective agreement with the majority of their employees and nobody else.

I am fraternally yours, Frank Querat, chairman, representing the employees on the Board.

(Sgd.) Frank Querat,
12c Montreal Road, Cornwall, Ont.

Report of Board in Dispute between the Scott Tool and Machine Company, Montreal, P.Q., and its Employees

On December 8, the Minister of Labour received a unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between the Scott Tool and Machine Company, Montreal, P.Q., and its employees, members of Aircraft Lodge 712, International Association of Machinists. (L.G., Dec., 1943, p. 1650).

The personnel of the Board was as follows: Mr. J. Wright, Montreal, P.Q., chairman, appointed on the joint recommendation of the other two members; Messrs. George S. Thom, Ville la Salle, P.Q., and Paul Fournier, Montreal, P.Q., appointed on the nomination of the employer and employees respectively.

The report of the Board follows:—

Report of Board

In the matter of the Industrial Disputes Investigation Act and of the dispute between Scott Tool and Machine Company, Montreal, P.Q., and employees, members of Aircraft Lodge 712, International Association of Machinists.

To the Hon. Humphrey Mitchell,
Minister of Labour,
Ottawa, Ont.

Dear Sir:—

The Board convened its first meeting on November 16, at the Scott Tool and Machine Company. Those present were Messrs. Paul Fournier, George Thom and Jack Wright, for the Board, and Mr. Oliver, representative of Scott Tool and Machine Company.

At the first sitting, Mr. Oliver made the following declaration: In his opinion the Union represents only ten per cent of his employees, in figure, four or five. That after a personal investigation in the shop he found that the employees did not wish to be represented by the Machinists Union. That as far as he personally was concerned he had no objections to such an arrangement. Noting the definite assurance of the company to the effect that there were no members desirous of being represented, the Board ordered another session in the Windsor Hotel on November 17. The Board sat in the presence of the representative of the Union, Mr. Jean Pare and Mr. Gravel a member of the firm, Mr. Oliver and Mr. S. W. W. Wilson representing the Company.

Upon the assurance of the Union that out of thirty-nine employees, thirty-four were members of their Lodge 712, they submitted their case to Mr. Bernard Rose, K.C., Commissioner under the Industrial Disputes Investigation Act, who after investigation and necessary proof, had the Department establish the right for the Union to represent the employees of Scott Tool and Machine Company and that as a result he recommended a Board of Conciliation.

Mr. Fournier claimed that it was the usual procedure in such a case and that in his experience recently you could not obtain a Board of Conciliation unless you could prove that the Union represents the majority of the employees. Mr. Pare admitted, however, that he made the following statement at the time when the Board of Conciliation was requested. "It is quite possible that our members have changed their opinion, and in view of this fact, I suggest that a vote be taken in order to define whether or not the workers still want to be represented by this Union."

Mr. Oliver, President of the Company, was quite in agreement with the proposed procedure and Mr. Pare requested from the Board that a vote be taken and that if the Union loses, they will automatically withdraw their claim and "We are walking out". On the other hand, he suggested that if the Union wins the vote, the Company agrees to start negotiations with the Union. Mr. Oliver was in agreement with the above conditions.

Therefore, we unanimously recommend to the Government that a representation vote be taken at the earliest convenience of the Department of Labour. We respectfully suggest that two weeks after the receipt of this report would be an appropriate time, namely on or about December 15, 1943.

The conditions of the vote will be as follows: If the Union wins the vote the company will immediately begin negotiations with the International Association of Machinists, Lodge 712. However, if it is proven that the employees do not desire to be represented by the International Association of Machinists, Lodge 712, then the above mentioned Union shall withdraw its claim to represent the workers of Scott Tool and Machine Company.

The above conditions have been amicably accepted by both parties before our Board and have agreed that the above terms shall be binding on both parties.

We propose to the Department that the ballot should be made as follows:—

In your negotiations with your employer, do you wish to be represented by the International Association of Machinists, Lodge 712?

Yes
No

Our Board met once more to study the final report on November 22 and to adopt unanimously the recommendation which we respectfully submit for action.

(Sgd.) Paul Fournier,
(Sgd.) Geo. S. Thom,
(Sgd.) Jack Wright.

Report of Board in Dispute between the Goodyear Tire and Rubber Company of Canada, Limited, New Toronto, Ont., and its Employees

On December 14, the Minister of Labour received a unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between the Goodyear Tire and Rubber Company of Canada, Limited, New Toronto, Ont., and its employees, members of Local 189, United Rubber Workers of America (L.G., September, 1943, p. 1225).

The personnel of the Board was as follows: Honourable Mr. Justice W. D. Roach, Osgoode Hall, Toronto, Ont., chairman, appointed on the joint recommendation of the other two members; Messrs. J. J. Robinette, and F. Andrew Brewin, both of Toronto, Ont., appointed on the nomination of the employer and employees respectively.

The report of the Board follows:—

Report of Board

In the matter of the Industrial Disputes Investigation Act and in the matter of a dispute between Goodyear Tire and Rubber Company of Canada, Limited, New Toronto, and its Employees, Members of Local 232, United Rubber Workers of America.

To the Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation and Investigation appointed by you, in this matter, hereby submits its report as follows:—

Sittings of the Board were held at Toronto.

The Company was represented by:
Mr. K. E. Kennedy, Secretary;
Mr. Harley Allman, Factory Superintendent;
Mr. C. E. Shumaker, Personnel Manager;
Mr. J. E. W. Cumberland, appeared as counsel.

The applicant Union was represented by:
Mr. J. Lerette, President of Local 232;
Mr. J. MacKenzie, District Representative of United Rubber Workers of America;
Mr. C. Godard, member of Negotiating Committee of Local 232;
Mr. B. Laskin, appeared as counsel.

The Company is engaged in the manufacture of tires, tubes, tire accessories, bullet-seal fuel cells, life rafts and other war products. It operates two plants, one at New Toronto and the other at Bowmanville, both in Ontario.

A dispute is pending between the Company and its employees who are employed at the Bowmanville plant. That dispute is the subject of a separate inquiry. Accordingly, this report is limited to disputes which arose between the company and its employees at the New Toronto plant.

The Union is a chartered local of the United Rubber Workers of America, an international union, affiliated in the United States with the Congress of Industrial Organizations, and in Canada with the Canadian Congress of Labour. Membership in the local is confined to hourly and piece-rated employees of the Company employed in the New Toronto plant.

Concerning the history of the relationship between the Company and the local it will suffice to say that at the request of the local and with the consent of the Company a vote of the employees was taken on December 18, 1942, by secret ballot to determine whether the employees desired the Union or the "Joint Conference"—a group of elected representatives of the employees—to represent them for collective bargaining purposes with the Company. The result of the ballot was as follows: 1,198 ballots were cast; 990 favoured the Union, 204 the "Joint Conference" and 4 ballots were spoiled. Those thus favouring the

Union represented approximately 83 per cent of all the employees who voted. Since then the Company has recognized the Union as the collective bargaining agency of the eligible employees. The Union has represented that at present it has a fully paid-up membership of 1,220 out of a total payroll of 1,450 eligibles.

There followed a series of meetings between representatives of the Company and of the Union, the purpose of which was to negotiate a collective bargaining agreement. Differences arose between the parties as to certain basic provisions in the proposed agreement, and they were unable to reconcile their respective opinions.

The Union sought:—

(*a*) A "Union Shop".
(*b*) A system of voluntary check-off.
(*c*) The inclusion of two groups of employees:
  (*a*) the "Flying Squadron".
  (*b*) the Company Police.

The Company would not agree to those proposals and the parties were deadlocked.

It should be noted that those provisions of a collective bargaining agreement upon which the parties, as a result of their negotiations, came in accord, were embodied in a written document and have been governing the relations between the Company and its employees.

The Union then applied under the Industrial Disputes Investigation Act for the establishment of a Board to consider the matters upon which the parties were in dispute and this Board was appointed.

At the first meeting at which the Board met with the representatives of the parties the Company raised the preliminary objection that the Board had no jurisdiction to deal with the matters in dispute between it and its employees. The Company in a written submission contended,

(*a*) That the matters in dispute do not fall within the class of disputes to which the statute (sec. 3) applies; and
(*b*) That a condition precedent to the establishment of the Board is the imminence of a strike, and that a strike is not imminent.

The Board is of the opinion that it is precluded from considering the merits of the Company's submissions for two reasons:—

First: Authority is given by the statute to the Minister of Labour to establish a Board of Conciliation "if satisfied that the provisions of this Act apply". Every such Board is therefore the creature of the Minister acting under the statute, and the Board should not attempt to review the decision of the Minister who created it.

Secondly: The statute, sec. 7 (2) expressly provides that "when a Board is granted by the Minister, it shall be conclusively deemed to be authorized by and to be in accordance with the provisions of this Act".

Before the Board entered into any discussion with the parties concerning the matters in dispute, briefs and replies were filed with the Board by each of the parties, and during the discussions which ensued, these briefs were supplemented as occasion required by verbal submissions. The Board desires to record its appreciation for the very great assistance given to it by the representatives of the parties and for their co-operation with the Board.

It was manifest throughout all the discussions that the parties were anxious to co-operate with one another in an effort to reach a mutually satisfactory solution of the matters in dispute.

The Board is happy to report that at the conclusion of the discussions the parties had agreed on two of the matters that were in dispute, viz., a system of voluntary check-off and the eligibility of two groups of employees, the Company Police and the Flying Squadron.

The parties were unable to agree on the third item in dispute, viz., the "Union Shop".

As a matter of record and convenience the parties have filed with the Board a copy of the collective bargaining agreement which embraces all the terms upon which they have agreed and which leaves in abeyance only the dispute as to the "Union Shop". (This agreement has been filed with the Department of Labour as Appendix "A" of the Report.)

Dispute as to "Union Shop"

In the negotiations which preceded the establishment of this Board the Union sought to have the following provision included in the proposed collective bargaining agreement, viz.,

> "All future hourly-rated employees who have completed an accumulative period of service of three months (excluding overtime) with the Company shall be considered as having become regular employees of the Company. All future regular employees, together with all present regular employees, shall be members of the Union in good standing during the life of this agreement as one of their conditions of employment with the Company."

In its application for the establishment of this Board the Union referred to this provision as a "closed shop" clause. The Union has pointed out to the Board that in reality this provision does not provide for a "closed shop" but for a "union shop". Under a "closed shop" agreement only Union members may be employed and employees must retain their Union membership as a condition of continued employment. Under a "union shop" agreement the employer may hire persons who are

not Union members but all employees must, after a defined period, become and remain Union members as a condition of continued employment.

On behalf of the Union the following submissions were presented as justifying its demand for a "union shop":—

I. That it is essential to the principle of collective bargaining because,
   (*a*) The advantages to employees under a collective bargaining agreement accrue to all employees. The cost of operating the collective bargaining agency should, in equity, be borne by all the employees.
   (*b*) It eliminates strife and friction among employees.
   (*c*) Since the collective bargaining agency must accept responsibility for enforcing the collective bargaining agreement, a union shop clause permits the requisite discipline and control over all employees.
   (*d*) It is conducive to stability in the relationship between employees and management.

II. That it provides an essential security to the Union thereby enabling it to devote its cumulative experience and energies to the advantage of the employer, the industry and the public, without being distracted by doubts or fears as to its continued existence, or, to quote from the Union's brief, it dissipates any feeling among the members "that they are still engaged in a struggle for existence".

As justifying its opposition to the principle of a "union shop" the Company submitted:—

I. That, viewed from the standpoint of the employee, it is a policy of coercion resulting in,
   (*a*) A denial to the employee of his democratic right to decide freely whether or not and when he should join any labour union.
   (*b*) A denial to the employee of his right to join any other trade union if he so desired.
   (*c*) An interference with his economic freedom to earn a living because the price of continued employment is continued membership in the Union.
   (*d*) A dangerous concentration of power in the Union which might be used by careless or unscrupulous leaders to the disadvantage of its members whom it purports to serve.

II. That, viewed as a social problem, it is the negation of democracy, and

III. That, having regard to recent labour legislation, a "union shop" clause in any agreement entered into by the Company would put the Company in an intolerable position.

P.C. 2685 provides (interalia) as follows:—

"That employees should be free to organize in trade unions free from any control by employers or their agents . . . ."

If the Company should enter into a closed shop agreement with the Union it would thereby deny to its employees the right to join or organize any other trade union because to do so would incur the penalty of loss of employment.

The National Selective Service Civilian Regulations (Order in Council P.C. 246, January 19, 1943) provides by section 202 that seven days' notice in the prescribed form must be given by one party to the other in terminating employment.

Order in Council P.C. 6625 (September 1, 1943) amended P.C. 246 (supra) by adding thereto section 202A. Subsection 4 of section 202A provides:—

(*a*) "Subject to section 203" (which regulates dismissal for cause) "of these regulations, no employer whose establishment has been classified as a 'designated establishment' may give notice of separation to an employee pursuant to section 202 of these regulations without the permission of a Selective Service Officer."

The Company was notified by the Department of Labour on September 21, 1943, that it is a designated establishment. If the Company should enter into a "union shop" agreement, then, upon an employee refusing or ceasing to belong to the Union, it would, on the one hand, be required by the term of the agreement to forthwith discharge that particular employee, and on the other hand, by virtue of the foregoing legislation refrain from discharging him until the consent of the Selective Service Officer was first obtained.

IV. That a "union shop" agreement would deprive the Company of its inherent right to select and discipline its own employees.

V. That it tends to create dangerous labour monopoly and is a deterrent to individual initiative and aggressiveness.

The foregoing, while not exhaustive of the submissions put forward by the Company and the Union respectively, exemplifies their divergent views, and having regard to the earnestness which marked their presentment of those views it is understandable that the parties were unable to agree.

It is important to note that there were 1,846 employees on the payroll of the Company as of September 23, 1943, of whom 1,468 are male and 378 female. In addition there are 440 employees who are members of the armed forces who have been granted leave of absence and are accumulating seniority rights.

The Board was informed that of the Company's total production 93·2 per cent is war materials.

The Board understands that the parties have agreed that the term of any agreement between them shall be one year. If the Board's understanding as to this is wrong, then the Board is of the unanimous opinion that the term should be for one year with the provision as

contained in the form (Appendix "A") for revision and/or extension of the agreement for a further term of one year.

On the basis of that understanding or recommendation, and on the facts of this particular case, and without either accepting or rejecting the principle of "union shop" the Board unanimously recommends that the agreement between the parties instead of providing for a "union shop" should contain a "Maintenance of Membership" provision. The specific "Maintenance of Membership" provision which the Board has in mind should provide:—

(*a*) That every present employee who is a member of the Union should be given a period of thirty days from the date of the agreement within which to elect in writing to be filed with the Company, either to remain a Union member or to withdraw from the Union. If he elects to retain his membership in the Union then a continuance of his membership shall be a condition precedent to his retaining his employment with the Company.

(*b*) Every future new employee, including any employee who returns to his employment from the Armed Forces, if he is a member of the Union on the date of his new or resumed employment shall as a condition precedent to his continued employment retain his membership in the Union.

(*c*) Every employee, whether present or future shall, once he becomes a member of the Union retain his membership in the Union as a condition precedent to his continued employment with the Company.

(*d*) The obligation of the Company to discharge the employee for failure to retain his membership in the Union shall arise only if in the opinion of the Company such employee could be promptly replaced by an equally well trained and competent employee; such decision by the Company, if the Union so desires, to be subject to appeal to the National Selective Service authorities.

(*e*) If the number of Company employees, members of the Union, should at any time become 50% or less of the total number of employees eligible for such membership either by way of resignation within the thirty day period referred to in (*a*) above and/or failure to become members of the Union, then the obligation of the Company under this general provision for "Maintenance of Membership" shall forthwith terminate.

(*f*) These provisions should be expressly subject to any regulations of National Selective Service that may from time to time be in force.

The Board is of the opinion that the mechanics necessary to the satisfactory application of a Maintenance of Membership clause as above defined can be supplied by the parties themselves.

In making the foregoing recommendation the Board desires to adopt the language in the decision of the National War Labour Board of the United States in what has come to be known as the Little Steel case, decided on July 16, 1942, as follows:—

> "This provision is not a closed shop, is not a union shop, and is not a preferential shop. No old employee and no new employee is required to join the Union to keep his job. If in the Union, a member has the freedom for 15 days to get out and keep his job. If not in the Union, the worker has the freedom to stay out and keep his job. This freedom to join or not to join, to stay in or get out, with foreknowledge of being bound by this clause as a condition of employment during the term of the contract, provides for both individual liberty and Union security."

The provision making the Maintenance of Membership inapplicable if and when less than a majority of the employees are Union members is a protection to workers who, being members of the Union, for reasons that might appeal to them might, during the term of the agreement, desire to discontinue their membership without incurring the penalty of loss of employment and is an application of the democratic principle of majority rule.

All of which is respectfully submitted.

Dated at Toronto, this 11th day of December, 1943.

Report of Board in Dispute between the Canadian Marconi Company, Montreal, P.Q., and its Employees

On December 27, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between the Canadian Marconi Company, Montreal, P.Q., and its employees, members of Division No. 59, Canadian Marconi System, Commercial Telegraphers' Union (L.G. Dec., 1943, p. 1649).

The personnel of the Board was as follows: His Honour Judge Ian M. Macdonell, Toronto, Ont., chairman, appointed on the joint recommendation of the other two members; Messrs. Walter A. Merrill, K.C., Montreal, P.Q., and Drummond Wren, Toronto, Ont., appointed on the nomination of the employer and employees respectively.

The report of the Board was signed by the chairman and Mr. Merrill, employer's representative. Mr. Drummond Wren submitted a minority report.

The texts of the report of the Board and the minority report follow.

Report of Board

Re: *Industrial Disputes Investigation Act, and* re *dispute between Canadian Marconi Company, Montreal, P.Q., and employees, members of the Commercial Telegraphers' Union, Canadian Marconi System, Division 59.*

To the Honourable Humphrey Mitchell,
M.P.,
Minister of Labour,
Ottawa, Ont.

Sir:

The Board of Conciliation and Investigation appointed by you has investigated the above dispute, and now has the honour to submit its report.

Upon convening in Montreal, the Board found that there was only one matter in dispute, namely, the refusal of the Company to agree to the inclusion of a provision for "union shop" in the renewal of the labour agreement in force between the Commercial Telegraphers' Union and the Company.

There had been a considerable amount of negotiation between the parties to try and effect a settlement, which, however, had proved impossible. The Board also found itself unable to propose any satisfactory compromise. The Union had already offered to substitute the following maintenance clause as a compromise for a union shop provision:—

> "All operators and shift engineers who are members of the Union at the date of this agreement, or who subsequently become members of the Union, shall be required by the Company as a condition of continued employment to retain their membership in the Union according to its constitution and by-laws."

The Company, however, refuse to accept this or any similar provision.

The history of labour relations between the parties shows that a labour agreement has been in force for twenty-five years, and apparently satisfactory conditions have existed. The employees affected are thirty-six highly skilled technicians (employed in connection with the trans-Atlantic service of the Company) who are described as "shift engineers". All of them are members of the Union, in good standing, and it appears that through the period mentioned substantially all of the employees of this class have been members of the Union and have been covered by agreement. The Board does not find that there are any special facts or circumstances which would distinguish this case from any others in which a union shop is desired by a Union. There are no abuses to correct, and all other matters in dispute between the parties have been satisfactorily adjusted.

The Board is conscious of the many arguments in favour of union or closed shop conditions, a great number of which were ably and convincingly set forth in the brief filed on behalf of the Union. It is also fully aware that a great many union shop agreements are working satisfactorily in the United States and Canada. It is of the opinion, however, that the success of such agreements is generally due to the fact that both employers and employees willingly enter into them. In the absence of special circumstances, and having regard to the present development of labour relations in Canada, the Board does not feel that a union shop agreement should be forced upon an unwilling employer.

It should be remarked here that the Board is in no position to pass upon the complete labour relations picture of the employer which employs thousands of men in addition to the small group involved here. There are no doubt many considerations which would affect the decision of the employer in this matter.

For the reasons indicated, the Board recommends that the parties proceed to execute the renewal agreement as already negotiated without a clause providing for union shop or maintenance membership.

All of which is respectfully submitted.

Dated this 21st day of December, 1943.

(Sgd.) I. M. Macdonell,
Chairman.
(Sgd.) Walter A. Merrill,
Member of the Board.
.....
Member of the Board.

Minority Report

In the matter of the Industrial Disputes Investigations Act and the dispute between the Commercial Telegraphers' Union, Marconi System, Division No. 59, employees, and the Canadian Marconi Company, Ltd., Montreal, Employer.

The Hon. Humphrey Mitchell,
Minister of Labour,
Ottawa.

Sir:—

The Board established by you in the above matter has completed its investigations and much of the details undoubtedly have been included in the report submitted to you by my colleagues together with their conclusions, with which I am not in agreement.

The Local Union in this case consists of thirty-six members—all of the employees en-

gaged in the Company's Central Telegraph Office, Montreal; transmitting station at Drummondville, Quebec, and receiving station at Yamachiche, Quebec.

The Union and the Company have enjoyed harmonious contractual relations for the past twenty-five years. The Union's request, therefore, for the inclusion of a closed shop clause in the renewal of their collective agreement, which was the only matter in dispute before the Board, is a most natural result of that relationship over a considerable period of time.

In order to arrive at a compromise acceptable to the Company, the Union was willing to forego the closed shop for provisions for maintenance of membership, even to the extent that such a provision would apply only to those now members of the Union.

In most countries, where democracy prevails, the right of the worker to collective action through union recognition has long been accepted and there has developed from that acceptance a more enlightened labour relations policy providing for the inclusion of the closed shop and other forms of union security. It is unfortunate that in Canada, so far as labour relations is concerned, harmony in industry should at this late date still be disturbed with the necessity of Labour struggling to secure those rights. That struggle is also reflected in the opposition of employers to any form of union security, because it must now be accepted as a truism that "when trade unionism is endorsed, sanctioned or encouraged, the closed shop must also be approved and fostered."

The Union presentation dealt with the various aspects of the Closed Shop, including (*a*) Acceptance and success of maintenance of membership, (*b*) Individual rights, (*c*) Union-Management Co-operation, and (*d*) Democratic Majority Rule.

The Employer, in rebuttal, relied mainly on their thesis that a maintenance of membership provisions in the collective agreement would, in effect, place him in the position of maintaining the Union membership, which should be the sole responsibility of the Union.

However, in my confirmed opinion, that in adition to the many other arguments presented, those employees who are members of the Union and who, through their agents or officers obtain a collective agreement which they accept and thereby become a party to, should be compelled to recognize it singly and collectively for the period it is in force. This is only possible by each employee maintaining his or her union membership. This presumes a joint co-operative responsibility on the part of both Union and Employer.

In view of the above, therefore, I would recommend that the collective agreement between the parties in this dispute should include the following or similar clause:

> "No employee occupying a position governed by the terms of this agreement shall be retained in the services of the Company for a period exceeding thirty days except those who are members in good standing in the Union."

Respectfully submitted,

(Sgd.) Drummond Wren
Member.

December 14, 1943.

Report of Re-Convened Board in Dispute between the Collingwood Shipyards, Limited, Collingwood, Ont., and its Employees

In an interim report of October 27, the Board of Conciliation and Investigation established to deal with a dispute between Collingwood Shipyards, Limited, Collingwood, Ont., and its employees, members of Local No. 4, Industrial Union of Marine and Shipbuilding Workers of Canada (C.C.L.) (L.G., Dec., 1943, p. 1648), indicated that it was not prepared to make a final recommendation until such time as a representation vote had been held to determine the bargaining agency through which the employees desired to negotiate with their employer. Accordingly a representation vote was conducted under the auspices of the Department of Labour, on December 8 and 9, and resulted in 783 votes out of 819 being cast in favour of the applicant union.

The personnel of the Board was as follows: His Honour Judge Ian M. Macdonell, Toronto, Ont., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board; Messrs. L. A. Forsyth, K.C., Montreal, P.Q., and Drummond Wren, Toronto, Ont., appointed on the nomination of the employer and employees respectively.

The report of the Board follows:—

Report of Board

Re: *Industrial Disputes Investigation Act and* re *dispute between Collingwood Shipyards, Limited, and its employees, members of Industrial Union of Marine and Shipbuilding Workers of Canada, Local 4.*

To the Honourable Humphrey Mitchell,
M.P.,
Minister of Labour,
Ottawa, Ont.

Sir:

In its Interim Report, dated October 27, 1943, the Board of Conciliation and Investiga-

tion appointed by you to deal with the above dispute indicated that it was not prepared to make final recommendations until a representation vote was held at the plant.

Pursuant to the recommendation of the Board, a representation vote of the employees was conducted by the Department of Labour on December 8 and 9, 1943, with the following result:—

"The ballot read as follows:

"Do you wish local No. 4, Industrial Union of Marine and Shipbuilding Workers of Canada to represent you in negotiations with the Collingwood Shipyards Ltd., covering Union contracts, working conditions and wages?"

"The ballot resulted as follows:

Number of eligible voters	1,012
Number of votes cast	819
Number voting in favour of Local No. 4, Industrial Union of Marine and Shipbuilding Workers of Canada	783
Number voting against Union	34
Spoilt ballots	2"

Upon the request of the Department of Labour and the parties, the Board reconvened on December 28, 1943, to consider the result of the vote, and now begs to submit its report.

The result of the vote as above set out is such as to require the Board to report that the Industrial Union of Marine and Shipbuilding Workers of Canada, Local No. 4, should be recognized by the employer as a collective bargaining agency on behalf of the employees, and that the employer should forthwith enter into negotiations with that Union with a view to the conclusion of a collective agreement.

The Board is of the opinion that in such negotiations both parties should not leave out of consideration the fact that earlier negotiations did take place between another bargaining agency and the employer, but regardless of those negotiations and of their result the Board feels that the overwhelming majority registered in favour of the applicant Union here indicates that the employees desire to be represented by the applicant Union as their collective bargaining agency, and the Board recommends that this desire as manifested by the vote be given effect to.

All of which is respectfully submitted.

Dated at Toronto this 28th day of December, 1943.

(Sgd.) I. M. Macdonell,
Chairman.

(Sgd.) Drummond Wren,
Employees' Nominee.

(Sgd.) L. A. Forsyth,
Company's Nominee.

Conciliation Work of the Department of Labour During December, 1943

NEW industrial disputes numbering 50 and involving 54 employers were dealt with by the Industrial Relations Branch during December, 1943, under the provisions of the Conciliation and Labour Act. At the same time 24 disputes affecting 68 establishments, which were in progress prior to December, also were handled by Industrial Relations Officers. These 74 cases were distinct from, and in addition to, those receiving attention under the Industrial Disputes Investigation Act which are described on previous pages of this issue.

There were 20,118 employees involved in the 50 new disputes, which were distributed by industries as follows:—Mining, 10 (including 6 in coal mining); Manufacturing, 32; Construction, 1; Transportation, 5; Service, 2. Thirty of these disputes were "pending" as at January 1. The 24 "old" cases involved a total of 51,086 employees and were distributed by industries as follows:—Mining, 6 (including 4 in coal mining); Manufacturing, 11; Construction, 1; Transportation, 6. Three disputes in this group lapsed during the month, 10 were terminated through conciliation, and 11 remained "pending" at the end of the month.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B., and Sydney, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and northwestern Ontario; four officers resident in Toronto confine their activities to Ontario, and work in close collaboration with the Provincial Conciliation Service; two officers in Montreal are assigned to the province of Quebec and two officers resident in Fredericton, N.B., and Sydney, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Construction Workers, Malton, Ontario.—At noon on November 19, 1943, some 123 employees of the Russell Construction Company, Limited, engaged on the construction of hostels for Wartime Housing Limited at the plant of Victory Aircraft Company, Malton, Ontario, went on strike in order to secure the employ-

ment of union members only. It was reported that the construction company had 3 non-union men in its employ. Members of locals of both the United Brotherhood of Carpenters and Joiners of America and the National Union of Carpenters, Bricklayers, Painters and Labourers, were involved in the stoppage of work. Mr. H. Perkins, federal Industrial Relations Officer, Toronto, was assigned to the case and during November and December held numerous conferences with the parties. Various compromise proposals were suggested. Finally the company agreed to remove from the job one non-union sub-foreman and two non-union carpenters, and to employ union carpenters from Toronto in connection with a gyproc work. It was also agreed that the company should co-operate with the unions in connection with negotiations with its sub-contractors on plumbing and electrical work. On December 27th the labour organizations again supplied union tradesmen to the project after a stoppage of 25 working days. It was reported that the 90 men whose action caused the work stoppage were unemployed for only 5 working days.

Metal Workers, Montreal, P.Q.—On December 1 the Department was notified that Dowty Equipment Canada Limited, and the Montreal Aircraft Lodge 712 of the International Association of Machinists, had agreed to request the Minister of Labour to appoint the Chairman of an Arbitration Committee to deal with certain grievances under the terms of the collective agreement between the parties. Mr. Bernard Rose, K.C., of Montreal, was appointed as the independent Arbitrator. He recommended that one inspector, whose dismissal was at first apparently justified, be re-employed as the material used in the manufacture of certain articles which he inspected was later proved to have been defective. The Chairman also suggested that another employee who had resigned be re-employed, and that the matter of an increase which had led to his resignation should be left to the discretion of the management.

Coal Miners, Bellevue, Alberta.—On December 1, 1943, about 655 employees of West Canadian Collieries Limited and Hillcrest-Mohawk Collieries Limited, both of Bellevue, Alberta, ceased work because there was no miners' physician in the area. The men were accustomed to having a doctor under contract with Local 7924, United Mine Workers of America, of which they were members. Mr. F. E. Harrison, Western Representative, Department of Labour, communicated with the officers of District 18, United Mine Workers of America, and urged an immediate resumption of work. The matter was also taken up by the Deputy Minister of Labour, through whose efforts the doctor, who had been serving the miners on loan from the Army and who had been recalled, was released from duty to return to the Bellevue area. The miners returned to work when the doctor resumed his practice on December 6.

Unlicensed Steamship Personnel, Vancouver, B.C.—In November and during the early part of December, 1943, Mr. G. R. Currie, Industrial Relations Officer, Vancouver, was called upon to deal with a dispute involving a request by the B.C. Seamen's Union for a collective agreement covering some 179 unlicensed deck and engine-room employees of Union Steamships Limited, Vancouver, B.C. Joint conferences with the parties were arranged by Mr. Currie but no settlement was reached and the company communicated its intention of postponing a final decision in the matter pending the adoption of a labour relations code by the Federal Government.

Foundry Workers, Montreal, P.Q.—During November, 1943, the Department received a complaint from a representative of the International Moulders' and Foundry Employees' Union of North America, alleging that an employee of the Montreal Foundry Limited, Montreal, P.Q., had been dismissed because of his union activity. The worker in question had been Chairman of the Shop Committee of the local union. Following a preliminary investigation by Mr. L. Pepin, Industrial Relations Officer, Montreal, the Minister of Labour appointed the Honourable Mr. Justice W. Lazure as an Industrial Disputes Inquiry Commissioner to make a formal investigation into the circumstances. The Commissioner was able to bring about a mutually satisfactory settlement between the aggrieved employee and the company, as a result of which no action by the Minister of Labour was required under Order in Council P.C. 4020.

Shipbuilding Workers, Vancouver, B.C.—Late in November, a dispute affecting 20,876 employees in six yards operated by four shipbuilding companies in Vancouver was brought to the attention of the Department. The controversy came to a head when members of the Boilermakers and Iron Shipbuilders Union refused to work overtime at West Coast Shipbuilders Limited, unless that company accepted the interpretation of overtime conditions laid down by the union, which was that a shift bonus of 1½ and 2 hours should be paid to second and third shift workers respectively when employed on Saturdays and Sundays. The union also sought to establish the prin-

ciple that day shift workers whose overtime extended into the second shift should receive, in addition to the regular time and a half premium, a further increment in proportion to the amount of the bonus which second shift employees are paid over and above day shift rates. Adoption of the same principle was also requested in respect of second shift workers whose overtime extended into the third shift. Later these secondary demands were dropped and the union's requests limited to payment of shift differential in addition to the usual double time for hours actually worked by second and third shifts on Saturdays and Sundays. The existing practice under the basic agreements effective in most Vancouver shipyards, to which the companies reverted after discontinuing the continuous 7-day production program, was that overtime on week days should be paid for at the rate of time and one-half for the first four hours after the end of a normal shift and double time thereafter. Double time was also paid for all work performed on Sundays and on certain prescribed holidays. For second and third shifts 40 hours constituted a week's work, so that these employees put in five regular shifts in a normal work week. The second shift received nine hours' pay for 7½ hours' work while on regular shift work, and the third shift received 9 hours' pay for 7 hours of work. In practice these two shifts received double time rates for work on the 6th as well as the 7th day of the week, although this was not expressly provided for in the basic agreements. Thus, the claims for shift differentials in addition to punitive wage rates for overtime worked on week-ends would mean that a second shift employee, for example, who presently received 15 hours' pay for 7½ hours' work on Saturdays and Sundays would also be paid an additional premium of 1½ hours. These demands were taken up by other unions until 17 labour organizations were involved and eventually were pressed upon all Vancouver shipbuilding companies and a fifth company performing ancillary work adjacent to the shipyards. The Boilermakers and Iron Shipbuilders' Union together with the Dock and Shipyards Workers' Union succeeded in preventing their members from working overtime pending acceptance of their demands and on December 12 members of the Dock and Shipyard Workers' Union were withdrawn from one shipyard when important repair work was underway on a naval vessel. It was the contention of the union officials that their demands were in accordance with a proper definition of the word "time" in the basic agreements as applied to second and third shift workers. The ship-building companies, on the other hand, maintained that the unions were seeking to establish new contract conditions and would not agree to any changes. Mr. G. R. Currie, Industrial Relations Officer, Vancouver, was asked to mediate and later was joined by Mr. F. E. Harrison, Western Representative, Department of Labour, in seeking to find a solution to the dispute. After some difficulty these Departmental officers secured a joint conference between representatives of the companies and of the unions, on the understanding that the unions would withdraw their objection to overtime work pending discussion of the problem with the employers. At a conference on December 20 the union representatives confined their demands to the payment of the shift differential for second and third shift workers who were employed on Saturdays or Sundays. The employers refused to join in a submission to the National War Labour Board and a separate application was drawn up and presented to the Board by the unions later in the month. At the end of December the case was still pending.

Rubber Workers, New Toronto, Ontario.—Suspicion on the part of employees that a new time allowance for a certain operation would lead to a reduction in earnings gave rise to a stoppage of work at the plant of the Goodyear Tire and Rubber Company, New Toronto, Ontario, on December 6, 1943. A group of 11 tire builders first ceased work and the strike then spread until 270 employees were involved. Some 579 other workers were indirectly affected and unable to work. Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, arranged a joint conference of company officers and representatives of the United Rubber Workers on December 7. The union committee did not support the strike and at this meeting was convinced that the company had no ulterior motive in taking the action it did in regard to the lost-time allowance. The employees returned to work on December 9 with the company's assurance that it was not the intention that any employee should suffer a loss of earnings if a fair day's work was performed.

Gold Miners, Larder Lake, Ontario.—Late in November, 1943, the Department received an application from an international representative of the United Steel Workers of America for the appointment of an Industrial Disputes Inquiry Commissioner to investigate a case of alleged discrimination against an employee of Kerr Addison Mine Limited, Larder Lake, Ontario. The application was made on behalf of Local 240, International Union of Mine, Mill, and Smelter Workers, in respect of a man who had been suspended by the management for breaking a company regulation forbidding employees to carry union

literature or application cards on their person while on the company premises. Three days after his suspension the employee in question submitted to the company his separation notice which was accepted. Mr. F. J. Ainsborough, Industrial Disputes Officer, Toronto, made a preliminary investigation early in December to determine if the appointment of a Commissioner was warranted. He verified the fact that a company rule of long standing had been broken and ascertained that the employee was not a member of the union although he had made an application for membership. It was shown that the employee had a record of absenteeism which permitted his removal from the payroll under the terms of an agreement between the company and the certified bargaining agency in the mine. It was suggested to the complainant union that if the employees' civil rights were being violated by the company's rules prohibiting union literature from being carried on the person, the matter might be dealt with through other channels but was beyond the jurisdiction of the Department of Labour. No Commissioner was appointed.

Electrical and Machine Workers, Hamilton, Ontario.—On December 7th, the Department received a request for the appointment of an Industrial Disputes Inquiry Commissioner under Order in Council P.C. 4020, to investigate the dismissal of two members of the executive of Local 504, United Electrical Radio and Machine Workers of America, by Canadian Westinghouse Limited, Hamilton, Ontario. A preliminary investigation conducted by Mr. J. Hutcheon, Conciliation Officer for the Province of Ontario, showed that the dismissal of the two employees occurred in connection with the lay-off of about 79 workers in two departments. In one case the company had followed seniority as far as possible and in the other, the experience of the union executive member was not such as to permit her retention or transfer to any other department. The request for the appointment of a Commissioner was accordingly refused.

Metal Factory Workers, Hamilton, Ontario.—On December 13, 1943, a charge of alleged discrimination against one employee on the part of Sawyer-Massey Limited, Hamilton, Ontario, was made to the Department by an officer of Local 520, United Electrical Radio and Machinery Workers of America. During the course of a preliminary investigation by Mr. J. P. Nicol, Industrial Relations Officer, Toronto, it was revealed that the union had not approached the management in connection with the grievance and the company readily agreed to find a place for the employee in question which would be satisfactory to all concerned.

Shipbuilding Workers, Toronto, Ontario.—Violation of seniority provisions of its collective agreement was alleged by Local 128, International Brotherhood of Boilermakers, Iron Shipbuilders, Welders and Helpers of America, in a telegram to the Department on December 2, stating that a union member had been unjustly dismissed by the Toronto Shipbuilding Company, Limited. An investigation by Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, revealed that the work of a small department had been sub-let and that 4 of its 5 employees had been placed elsewhere in the plant while one plater-fitter had been laid off. No intentional discrimination on the part of the company was shown. Following the intervention of Mr. Ainsborough, the management was successful in having the man in question employed at his own trade by the sub-contractor who took over the work of the department that was closed down.

Textile Workers, Cornwall, Ontario.—The assistance of the Industrial Relations Branch was requested on December 6 by the management of Courtaulds-(Canada) Limited, Cornwall, Ontario, to deal with an apprehended refusal of Local No. 3, United Textile Workers of Canada, to permit its members to undertake a new operation unless paid an additional 10 cents per hour. The company was about to go into production of a special type of strong rayon yarn to be used in the manufacture of heavy tires from synthetic rubber. The situation was thoroughly discussed at a meeting of the parties held in the office of Mr. R. Trepanier, Industrial Relations Officer, Montreal. It was agreed that the representatives of the union would recommend to the members that production be commenced immediately and that an appeal would be presented to the Regional War Labour Board for the readjustment of wage rates.

Coal Miners, Princeton, B.C.—During December the services of Mr. F. E. Harrison, Western Representative, Department of Labour, were requested in connection with a dispute which had arisen between Tulameen Collieries Limited and the United Mine Workers of America with regard to the renewal of a union contract which had expired on October 31. The union sought to have the old agreement revised to make provision for closed shop conditions but the parties were unable to agree upon the wording of the new contract. Following a prolonged conference in the Vancouver office of the Department a contract was concluded upon a closed shop basis and signed on December 13.

Shipbuilding Workers, Vancouver, B.C.—On December 16 a group of 136 electricians employed at the Lapointe Pier outfitting yard of the Burrard Dry Dock Company, Limited, ceased work, demanding that heat be supplied in the hull of one of the vessels under construction. The strike was not authorized by the Amalgamated Building Workers of Canada, to the Electrical Workers' Section of which the men belonged, and officers of the union intimated that the leaders responsible for the stoppage would be disciplined. Following a conference arranged by Vancouver officers of the Department of Labour, the electricians resumed work on December 18 under the same conditions that prevailed previously but with the assurance of the company that heat would be provided as soon as possible.

Textile Workers, Cornwall, Ontario.—A joint request having been made to the Department for his services, Mr. R. Trepanier, Industrial Relations Officer, Montreal, was sent to Cornwall in the latter part of December, 1943, to arbitrate a dispute over the interpretation of an agreement between Canadian Cottons Limited, Canada Mills, and United Textile Workers of Canada, Local No. 2. After hearing both sides of the case Mr. Trepanier ruled that the company had been justified in hiring an outside person to fill a vacant position of loom fixer on the grounds that there was no evidence that any employee inside the plant possessed the necessary qualifications for promotion to the job.

Coal Miners, Robb, Alberta.—On the afternoon of December 10, 36 employees of Thirty-two Collieries Limited, Mile 32, Robb, Alberta, went on strike. The men were members of Local No. 22, United Mine Workers of America. Union officials maintained that the cause of the strike was the failure of the company to pay retroactive wages due under the earlier award of the National War Labour Board, the increased cost-of-living bonus or the wage increase directed by the Royal Commission, under the Chairmanship of the Honourable Mr. Justice O'Connor. The management of the company denied that these reasons for the strike were correct, stating that the stoppage occurred when a Bank sent payroll cash to the wrong address. The company met its payroll obligations when the money arrived on December 13, but according to the management's version, the strike was continued at the instigation of a few employees under the pretext of unsatisfactory boarding conditions. Mr. F. E. Harrison of Vancouver dealt with the situation in his capacity as Western Representative, Department of Labour. The employees returned to work on December 22. The management asked National Selective Service for permission to dismiss 9 unmarried employees which would it to close the company boarding house. Union representatives joined in requesting the immediate release of the men concerned. Information was received that the complaints regarding wages had been satisfactorily adjusted.

Foundry Workers, Sherbrooke, P.Q.—While an application for the establishment of a Board of Conciliation and Investigation was before the Department for consideration, as reported elsewhere in this issue, a complaint was received from the United Steel Workers of America, that the Legare Foundry of Sherbrooke, Quebec, had dismissed the President of Local Union No. 2525. An investigation was requested to ascertain if the employee had been discharged on account of union activity. The matter was referred to Mr. Bernard Rose, K.C., of Montreal, who secured a mutually satisfactory settlement involving the re-employment of the dismissed worker.

Metal Products Factory Workers, Guelph, Ontario.—After Local No. 3021, United Steel Workers of America, had been certified by the Labour Court for Ontario, as bargaining agency in the plant of Federal Wire and Cable Company, Limited, Guelph, Ontario, the assistance of Mr. H. Perkins, federal Industrial Relations Officer, Toronto, was requested during December to assist in negotiations for an agreement. Following a lengthy joint conference the deadlock was broken when the union withdrew its demands for a closed shop, maintenance of membership and checkoff provisions, and the company agreed to sign the remainder of the proposed agreement.

Coal Miners, Clover Bar, Alberta.—A strike by 30 miners employed by the Ottewell Coal Company, Clover Bar, Alberta, on December 15, 1943, was variously reported as being caused by the failure of the company to pay the Edmonton scale of coal mine wages as established by the National War Labour Board and the O'Connor Royal Commission, and the inability of the company and the employees to negotiate an agreement recognizing District No. 18, United Mine Workers of America, as the bargaining agency on behalf of the miners. The case was investigated by Mr. F. E. Harrison, Western Representative, Department of Labour, who reported that the men resumed work on December 23, when the company agreed to pay the Edmonton scale of wages and signed an agreement with the union.

Aircraft Workers, Montreal, P.Q.—On joint request of Lodge 712, International Association

of Machinists and the Canadian Power Boat Company, Limited (Aircraft Division), Montreal, P.Q., the Minister of Labour, late in December, 1943, named Mr. Bernard Rose, K.C., of Montreal, as Chairman of an Arbitration Committee to deal with a dispute between the parties under the terms of their collective agreement. The Chairman ruled that no discrimination had been used by the company against a dismissed employee but that the management had exercised its prerogative under the collective agreement to lay off an employee with inadequate qualifications even if he had more seniority than was possessed by other employees who were retained.

Metal Products Factory Workers, St. Catharines, Ontario.—During August, 1943, a dispute arose at the plant of St. Catharines Steel Products Limited, St. Catharines, Ontario, over the inauguration of a system involving the punching of two time clocks. Some 60 dissatisfied employeeos gave the company Notices of Separation and later various investigations were conducted. Officers of the United Automobile Workers of America charged that three of the employees involved in the dispute had been dismissed on account of union membership and activity. On October 28, the Minister of Labour appointed His Honour Judge J. G. S. Stanbury of Saint Catharines, to act as Industrial Disputes Commissioner and investigate the circumstances under the provisions of Order in Council, P.C. 4020. The Commissioner's report, which was received on December 21, 1943, indicated that the employees in question had resigned voluntarily and that the charges that they were dismissed because of union membership and activity were unfounded.

Foundry Workers, Sydney, N.S.—On December 28 a request was received by the Department for an investigation into the dismissal of two members of the Industrial Union of Foundry and Machine Workers of Canada, Local No. 1, by Sydney Foundry and Machine Works Limited, Sydney, N.S. The union alleged that in dismissing the men, the company had violated the terms of a collective agreement between the parties. Mr. Allan MacDonald, Industrial Relations Officer, Sydney, N.S., conducted an investigation and, although the company maintained that the two employees had been dismissed because of insubordination succeeded in having them reinstated on a sixty-day probationary basis.

Aircraft Workers, Leaside, Ontario.—Early in October the Department received a complaint that an employee of Sutton-Horsley Company, Limited, Leaside, Ontario, had been dismissed because of union membership and activity on behalf of the National Association of Technical Employees (T.L.C.C.). A preliminary inquiry into the circumstances made by Mr. J. P. Nicol, Industrial Relations Officer, Toronto, following which the Minister of Labour, on October 19, appointed Judge Ian M. Macdonell of Toronto as Industrial Disputes Inquiry Commissioner to make an investigation. The Commissioner reported that the employee had been dismissed in contravention of Order in Council, P.C. 4020. In accordance with the Commissioner's recommendation the Minister of Labour, on December 6, 1943, ordered that the employee be reinstated immediately in his former employment in the same, or substantially the same, occupation as he was formerly engaged in, at no lesser rate of pay, and with reimbursement for wages lost.

Textile Workers, Marieville, P.Q.—On November 19 the Department was asked to investigate the dismissal of four employees by Knitters Limited of Marieville, P.Q. allegedly on account of membership in and activity on behalf of Local No. 7, United Textile Workers of Canada. Mr. Frank Lafortune, Industrial Relations Officer, Ottawa, was assigned to make a preliminary investigation to determine if a Commissioner should be appointed to make a formal inquiry. Previously Mr. LaFortune had been called upon to mediate in connection with strikes at the same plant which occurred on September 22 to 25 and from November 11 to 13. The object of the first strike, which involved 140 workers, was to secure the reinstatement of one employee who had been dismissed allegedly for union activity and to force certain employees to join the union. The discharged worker was reinstated and 3 out of 4 of the other employees became union members. The November strike, involving 134 employees, resulted from demands for the maximum cost-of-living bonus. Normal operations were resumed pending a reference of the case to the Regional War Labour Board for Quebec only after Mr. LaFortune had, with difficulty, restrained the management from refusing to take back two union officers who acted as spokesmen for the employees. An investigation into the four dismissals on November 19 led to a recommendation that the Minister of Labour appoint an Industrial Disputes Inquiry Commissioner under the provisions of Order in Council P.C. 4020. Mr. Bernard Rose, K.C., of Montreal, was authorized to investigate as Commissioner and found that the employees were discriminated against and dismissed because of union office and membership. On December 7, the Minister of

Labour ordered the company immediately to reinstate all 4 employees in their former positions without loss of seniority or any other rights to which they were entitled prior to their dismissal and that they be reimbursed at their regular rates of wage for the period November 29 up to the date of their reinstatement.

Union Representation Votes

Railway Workers, Central and Western Canada.—During December, 1943, by joint consent of the parties, a representation vote was conducted by mail among yardmasters, assistant yardmasters, and yard agents of the Canadian National Railways under the supervision of Mr. Bernard Rose, K.C., Industrial Disputes Inquiry Commissioner of the Department of Labour, Montreal. The ballot, which affected 202 employees, was to determine whether they desired to be represented for collective bargaining purposes by the Brotherhood of Railroad Trainmen. A total of 158 of those eligible to vote cast their ballots in favour of representation through the union, while 14 voted against union representation and one ballot was rejected.

Air Line Pilots, Moncton, N.B., to Vancouver, B.C.—Pursuant to procedure mutually agreed upon in November, 1943, a vote was conducted under Departmental auspices in December to determine if pilots employed by Canadian Pacific Air Lines Limited in commercial air transportation, desired to be represented for the purpose of collective bargaining with the company by a duly accredited committee of employees affiliated with the Canadian Air Line Pilots Association. There were 109 captains and first-officers eligible to vote, most of them being based in Western Canada. Out of 94 votes cast, 93 were in favour of a committee affiliated with the Canadian Air Line Pilots Association. None was negative and one ballot was rejected as spoiled. The vote was conducted by mail under the supervision of Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg.

Storage Plant Employees, Winnipeg.—By joint consent of the parties a representation vote was conducted on December 15 to determine whether or not the employees of the Manitoba Cold Storage Limited, Winnipeg, Manitoba, desired to be represented for the purpose of collective bargaining by Local 235, United Packinghouse Workers of America. Votes were cast by 73 out of 79 voters eligible. There were 71 ballots cast in favour of representation through the union, while one person voted no and one ballot was rejected. The vote was conducted under the supervision of Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg.

Aircraft Maintenance and Transport Workers, Winnipeg, Manitoba.—On December 22, 1943, Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg, supervised, by joint consent of the parties, a representation vote among the aircraft maintenance, flight and motor transport staffs of Winnipeg Air Observer School Limited, to determine whether the workers desired to have a committee of employees affiliated with Lodge 764, International Association of Machinists, act as their bargaining agency in dealings with their employer. There were 249 voters eligible, of whom 175 voted in favour of representation through the union, while 21 voted against.

Metal Products Factory Workers, Smiths Falls, Ontario.—By joint consent of the parties, Mr. J. P. Nicol, Industrial Relations Officer, Toronto, on December 28, 1943, supervised a vote among certain employees of the Frost and Wood Company, Limited, Smiths Falls, Ontario. The vote was to determine whether, in dealing with the management, the employees wished to be represented by the Employees' Association (Industrial Council) No. 1 Plant or the United Steel Workers of America. Ballots were cast by 531 of the 596 eligible. A total of 96 voted for the Employees' Association, No. 1 Plant, as against 427 for the United Steel Workers of America. There were 8 spoiled ballots.

Metal Products Factory Workers, Toronto, Ontario.—On December 14th, Mr. J. P. Nicol, Industrial Relations Officer, Toronto, supervised a representation vote to determine if the employees of Ajax-Doret Metal Products Limited, Toronto, Ontario, desired to be represented for collective bargaining purposes by an Employees' Shop Committee or by Local 514, United Electrical, Radio and Machine Workers of America. There were 78 names on the voters' list and out of 72 votes cast, 41 voted for the Union and 31 for the Employees' Shop Committee.

Metal Workers, Longueuil, P.Q.—As a result of a contest as to the bargaining agency for employees in the Longueuil plant of Dominion Engineering Works between the International Association of Machinists, Local 1596 (T.L.C.C.) and Machinists, Fitters, Helpers and Other Occupations, Local No. 3 (C.C.L.), the Department was requested on November 30, 1943, to conduct a representation vote with the joint consent of all parties. The vote was taken on December 6, 1943, under the super-

vision of Mr. L. Pepin, Industrial Relations Officer, Montreal, P.Q. There were 1,979 hourly rated employees eligible and 1,327 cast their ballots. A total of 824 voted in favour of the International Association of Machinists and 473 in favour of Machinists, Fitters, Helpers and Other Occupations, Local No. 3. There were 30 spoiled ballots.

Packing Plant Employees, Hull, P.Q.—By joint consent of the parties, Mr. L. Pepin, Industrial Relations Officer, Montreal, supervised the conduct of a representation vote on December 17 among the employees of Canada Packers Limited, Hull, P.Q., to ascertain if they desired to be represented by a Plant Relations Committee or by Hull Packing Plant Employees' Federal Union, Local 92 (T.L.C.C.). Out of 179 employees eligible, 176 took part in the voting. The Federal Union won the vote by a majority of 124 to 52.

Strikes and Lockouts in Canada during December, 1943

THE number of strikes and lockouts recorded for the month of December was less than in the previous month. The time loss in man working days declined substantially but the number of workers involved was much higher. There were 21 strikes during the month, involving 36,142 workers, with a time loss of 57,227 man working days, as compared with 27 strikes in November, involving 16,784 workers and a time loss of 97,004 days. In December, 1942, there were 15 strikes, involving 1,488 workers, with a time loss of 6,044 days.

During December two strikes of civic employees in Montreal, involving police, firemen, public works employees and office workers, and two strikes in Nova Scotia, involving steel mill, metal factory, civic and shipyard workers and salt and coal miners, were responsible for more than 87 percent of the workers involved and about 80 per cent of the time loss. In November a general strike of coal miners in Alberta and British Columbia accounted for most of the time loss.

Two strikes, involving 178 workers, were carried over from November and 19 commenced during December. Of these 21 strikes, 17 were terminated during the month. Eleven resulted in favour of the employers, four in favour of the workers, one was a compromise settlement and one was indefinite in result. At the end of the month, therefore, there were four strikes unterminated, namely: rubber factory workers at Acton Vale, P.Q., hotel employees at Edmonton, Alta., coal miners at Springhill, N.S., and civic employees at Montreal, P.Q.

A strike of clothing factory workers at Winnipeg, Man., which commenced on December 20, was reported but sufficient information was not received in time for inclusion in the statistical table.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to one dispute of this nature, namely: fur factory workers, Quebec, P.Q., one employer, May 12, 1943.

The following table gives information for December and November, 1943, and December, 1942:

Date	Number of strikes	Number of workers involved	Time loss in man working days
*December, 1943.....	21	36,142	57,227
*November, 1943.....	27	16,784	97,004
December, 1942.....	15	1,488	6,044

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless 10 days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review.

The record includes all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING DECEMBER, 1943*

Industry, occupation and locality	Number involved		Time loss in man working days	Particulars†
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to December, 1943				
MANUFACTURING—				
Rubber and Its Products—				
Rubber factory workers (footwear), Acton Vale, P.Q.	1	152	3,500	Commenced November 22, 1943; for union recognition and agreement; unterminated.
SERVICE—				
Business and Personal—				
Hotel employees, Edmonton, Alta.	1	26	500	Commenced October 1, 1943; for payment of wage increases for porters as approved by RWLB‡; unterminated.
Strikes and Lockouts Commencing during December, 1943				
MINING—				
Coal miners, New Waterford, N.S.	1	*(a)* 37	74	Commenced December 1; *re* working conditions (ventilation allegedly poor); terminated December 3; return of workers; in favour of employer.
Coal miners, Bellevue, Alta.	2	655	2,500	Commenced December 1; against call-up of doctor for military service; terminated December 4; conciliation (federal); in favour of workers.
Coal miners, Standard, Alta.	1	11	33	Commenced December 2; for increased wages; terminated December 4; negotiations; in favour of employer.
Coal miners, Princeton, B.C.	1	108	650	Commenced December 6; for closed shop agreement; mine closed down after one week; indefinite.
Coal miners, Robb, Alta.	1	36	250	Commenced December 10; against delay (unavoidable) in payment of wages and for better meals; terminated December 21; negotiations; (boarding house closed and unmarried men secured work elsewhere) in favour of employer.
Coal miners, Clover Bar, Alta.	1	28	280	Commenced December 15; for greater increase in rates for mine cars than proposed; terminated December 27; reference to a Royal Commissioner; in favour of workers.
Coal miners, Forestburg, Alta.	1	5	10	Commenced December 17; against alleged wet condition of mine; terminated December 20; conciliation (federal); in favour of employer.
Coal miners. Bellevue, Alta.	1	23	46	Commenced December 20; for enclosed bus to mine; terminated December 21; return of workers; (bus being overhauled) in favour of employer.
Coal miners, Springhill, N.S.	3	1,500	3,000	Commenced December 29; against suspension of three officials for insubordination; unterminated.
MANUFACTURING—				
Rubber and Its Products—				
Tire factory workers, New Toronto, Ont.	1	*(c)* 267	534	Commenced December 6; for payment for time lost due to stock conditions; terminated December 8; conciliation (federal); in favour of employer.
Tire factory workers, Kitchener, Ont.	1	80	60	Commenced December 28; against transfer of eight workers to another department at lower wages; terminated December 29; negotiations; compromise.

STRIKES AND LOCKOUTS IN CANADA DURING DECEMBER, 1943*—*Concluded*

Industry, occupation and locality	Number involved		Time loss in man working days	Particulars†
	Establishments	Workers		
Strikes and Lockouts Commencing during December, 1943—*Concluded*				
MANUFACTURING—*Con.*				
Animal Foods—				
Meat packing plant workers (fertilizer division), Saint John, N.B.	1	*(d)* 30	15	Commenced December 6; for increased wages; terminated December 6; return of workers; in favour of employer.
Metal Products—				
Steel mill, metal factory, shipyard workers and coal miners, Trenton, Pictou and Westville, N.S.	6	3,800	3,800	Commenced December 8; in protest against closing down rolling mills and nut and bolt department of Trenton Steel Works Limited; terminated December 8; return of workers; in favour of employers.
Steel mill, metal factory, civic and shipyard workers, and salt and coal miners, Nova Scotia.	43	20,000	20,000	Commenced December 28; in protest against closing down rolling mills and nut and bolt department of Trenton Steel Works Limited; terminated December 28; return of workers; in favour of employers.
Shipbuilding—				
Electricians, Vancouver, B.C.	1	134	200	Commenced December 16; against lack of heat in hulls during construction; terminated December 17; return of workers pending negotiations; in favour of employer.
Shipyard workers, Montreal, P.Q.	1	1,500	750	Commenced December 22; misunderstanding *re* holidays with pay; terminated December 22; negotiations; in favour of employer.
CONSTRUCTION—				
Miscellaneous—				
Dam repair workers, Lake Manouan, P.Q.	1	50	25	Commenced December 11; for payment for 10 hours per day when able to work only 8 hours due to darkness; terminated December 11; negotiations; in favour of workers.
SERVICE—				
Public Administration—				
Civic employees (police, firemen, public works, etc.), Montreal, P.Q.	1	6,000	7,500	Commenced December 14; for union recognition; terminated December 15; conciliation (provincial); in favour of workers.
Civic employees (office workers, etc.), Montreal, P.Q.	1	1,700	13,500	Commenced December 21; for increased wages; unterminated.

* Preliminary data, based where possible on direct reports from parties involved, in some cases incomplete; subject to revision for the annual review.

† In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

‡ RWLB—Regional War Labour Board.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the July, 1943, issue, in the review of "Strikes and Lockouts in Canada and Other Countries, 1942." The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919, in the various countries for which such figures are available. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones. An order under the Defence Regulations, effective July 25, 1940, provides for the settlement of disputes and the prevention of strikes and lockouts, as noted in the LABOUR GAZETTE, August, 1940, page 760.

The number of disputes beginning in October was 143, and 20 were still in progress from the previous month, making a total of 163 disputes in progress during the month, in which 67,500 workers were involved. The time loss in October was 157,000 working days.

Of the 143 disputes beginning in October, 28 arose out of demands for increased wages and 54 over other wage questions, 12 on questions respecting the employment of particular classes or persons, 47 over questions as to working arrangements and two on questions of trade union principle. Final settlements were reached in 138 disputes, of which 35 were settled in favour of workers, 75 in favour of employers and 28 resulted in a compromise; in 16 other disputes, work was resumed pending negotiations.

United States

Preliminary figures for November show 300 new strikes beginning in the month, in which 500,000 workers were involved. The time loss for all strikes in progress during the month was 2,825,000 working days, about 87 per cent of which was due to the general stoppage of coal miners.

Longshoremen in Cape Town

A collective agreement was signed last June by the employers' associations and trade unions making up the Industrial Council for the stevedoring industry in the municipal areas of Capetown and Simonstown, South Africa. The Council was established under the South African Industrial Conciliation Act of 1924 which encourages self-government in industry by means of collective bargaining and joint councils. The Act provides for the extension of an agreement to cover employers and workers in the industry who are not members of the organizations which negotiated the agreement. The stevedoring agreement has been extended in this way and is to be effective from August 2, 1943 to December 31, 1944.

The agreement fixes a minimum age of 15 years for employment in the industry. It permits employers to hire longshoremen on either a daily or weekly basis and prescribes minimum daily and weekly rates. It stipulates that except in certain specified cases, workers must be paid the full rate for the day even when their daily hours are less than those prescribed as ordinary working hours in the agreement. No one is to be permitted to work for more than five hours without a break of at least one hour, and 30-minute breaks must be given after each four hours of overtime. If workers are employed on a weekly basis they are entitled to four public holidays with pay, to annual leave of two consecutive weeks with pay and to 12 days sick leave a year. "Sick leave" does not include absence from work on account of compensatable accidents or due to the workman's misconduct. Employers are required to provide suitable protective clothing for employees required to work inside freezing chambers.

The agreement is to be administered by the Industrial Council which may appoint agents to inspect establishments and wage records. The Council may grant exemptions from any provision of the agreement. Council funds are to be obtained by a payroll levy, with workers and employers contributing equal amounts.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Manufacturing: Metal Products

MONTREAL, TORONTO AND LONDON.—GENERAL STEEL WARES LTD. AND UNITED STEELWORKERS OF AMERICA.

Agreement to be in effect from December 1, 1943, to December 31, 1944, and thereafter subject to notice. All employees who are or who may become union members are to remain members of the union. The company agrees to deduct a certain amount each month as union dues, to be transmitted to the union.

Hours are not set out in the agreement but it is provided that time and one half be paid for the first four hours of overtime and double time thereafter; time and one half for all work on Sundays and holidays except where the practice has been to pay double time. A rest period of 15 minutes morning and afternoon. Wages: piece rates are not to be altered except because of a change in the method of manufacture, request of the employees or by mutual agreement, any change to be subject to the approval of the Regional War Labour Board. Seniority and grievance procedure are included in the agreement.

SHERBROOKE, P.Q.—THE CANADIAN FAIRBANKS-MORSE CO. LTD., AND UNITED STEELWORKERS OF AMERICA, LOCAL 2983.

Agreement made in settlement of a strike (LABOUR GAZETTE, August, 1943, p. 1126), to be in effect from October 1, 1943, to October 1, 1944, and thereafter from year to year, subject to notice. The company recognizes the union as the bargaining agency for its members and will not make an agreement with any other union without a vote being taken under government supervision. Neither the company nor the union will coerce any person on account of union membership or non-membership.

Hours: 9 per day, 5 on Saturdays, a 50-hour week. Overtime and all work on Sundays and holidays is payable at time and one half. A wage scale forms part of the agreement; it became effective September 18, 1943. Hourly wage rates for some classes: toolmakers 70 to 80 cents, machinists 55 to 65 cents, machine operators 40 to 50 cents, moulders 55 to 70 cents, core-makers 50 to 65 cents, welders 65 cents, wood working machine operators 40 to 50 cents, labourers 40 cents. The full cost of living bonus is payable ($4.25 per week, at the time the agreement was made, for adult male employees, etc.). For work on the night shift, 5 cents per hour extra is paid.

Apprentices are limited to one for every eight journeymen and are to serve four years. Seniority and grievance procedure are provided for.

Construction: Buildings and Structures

VANCOUVER, B.C.—GENERAL CONTRACTORS' ASSOCIATION AND INTERNATIONAL HOD CARRIERS, BUILDING AND COMMON LABOURERS' UNION, NO. 602 (BUILDING LABOURERS)

Agreement to be in effect from September 1, 1943, to August 31, 1944, and thereafter from year to year, subject to notice. Job stewards are recognized and are not to be discriminated against. Preference in employment to be given union members.

Hours: 8 per day, 4 on Saturdays. Overtime and work on holidays is payable at time and one half. Hourly wage rates: common labourers 55 cents; experienced building labourers 65 cents; concrete and cement labourers, tradesmen's helpers, jackhammer men, vibrator men, etc. 75 cents; concrete gunmen and powdermen 90 cents. A cost of living bonus of $2.25 per week is payable and this as well as the basic rate of wages are subject to any change authorized by the War Labour Boards.

Transportation and Public Utilities: Electric Railways

TORONTO, ONTARIO.—TORONTO TRANSPORTATION COMMISSION AND THE AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES OF AMERICA, LOCAL 113.

The agreement came into effect March 31, 1934, and was noted in the LABOUR GAZETTE, September, 1934, p. 876, with amendments noted in the issue of June, 1941, p. 700. Further amendments have since been made:

From March 1, 1941, motor coach drivers were to be paid time and one quarter for Sunday work.

From June 1, 1941, all hourly rated employees were granted a 2 cent per hour additional increase. The agreement is to continue after March 31, 1942, for three months periods, until changed.

From December 1, 1941, a further increase of 3 cents per hour was granted all hourly paid employees, making the total increase 8 cents per hour since the outbreak of war.

From April 20, 1942, weekly hours were increased from 44 to 48 or 49 hours in garages, and from 44 hours to 49 hours at Hillcrest Repair Shops, Rolling Stock Department; overtime to be paid after 8½ hours; men on monthly basis to have salaries adjusted, by 10 per cent for foremen and storemen and by 5 per cent for shop clerks.

From May 1, 1942, hours in way and structures department are 10 per day from May 1 to October 31, with overtime to be paid after 10 hours; 8 hours per day the remainder of the year.

From August 16, 1942, an additional bonus of 60 cents per week was granted.

From October 16, 1942, an increase of 5 cents per hour was granted to hourly rated employees.

LONDON, ONTARIO.—LONDON STREET RAILWAY COMPANY AND AMALGAMATED ASSOCIATION OF STREET AND ELECTRIC RAILWAY EMPLOYEES, DIVISION 741 (BUS DRIVERS, ETC.)

Agreement to be in effect from November 1, 1943, subject to 60 days' notice. This agreement is similar to the one previously in effect and summarized in the LABOUR GAZETTE, December, 1942, p. 1485, with these exceptions:

Wages for bus operators are 53 cents per hour for first year and 56 cents thereafter, with 14 cents per hour extra payable for overtime and for all work on Sundays. Wage rates for other employees are also increased by 2 cents per hour, with overtime at 14 cents per hour extra.

Service: Public Administration

WINDSOR, ONTARIO.—CITY OF WINDSOR AND INTERNATIONAL ASSOCIATION OF FIRE FIGHTERS LOCAL 455.

Agreement to be in effect from November 1, 1943, until 30 days' notice. The corporation will deal with union representatives. Vacation: three weeks' annual vacation to employees with one year's service or more. Employees are entitled to sick leave up to one month with pay in each year, if necessary. Each employee to be pensioned at the age of 65 years or earlier. Seniority rights and grievance procedure are included in the agreement.

WINDSOR, ONTARIO.—CITY OF WINDSOR AND DEPARTMENT OF PARKS EMPLOYEES' UNION, LOCAL 75.

Agreement to be in effect from November 1, 1943, until 30 days' notice. All employees of the department are required to be union members. Vacation: two weeks annually, with pay, to employees with one year's service or more. Sick leave: one month with pay each year, where required.

Hours: 8 per day, 44 per week. Employees to be paid for ten legal holidays. Seniority rights and grievance procedure are provided for.

Collective Agreement Act, Quebec

Recent Proceedings Under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable to the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the LABOUR GAZETTE, January, 1943, page 86. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

Recent proceedings under the Act include the extension of one new agreement and the amendment of fourteen others which are noted below. A request for the extension of a new agreement for wholesale foods and hay and grain trades at Quebec was published in the *Quebec Official Gazette,* December 18; and a request for a new agreement for the aluminum industry at La Tuque was published December 31; a request for amendment of the agreements for the aluminum industry at Arvida was gazetted December 4; for the tannery industry throughout the province December 11; for the paper box (uncorrugated) industry throughout the province, December 18; for retail stores at Chicoutimi and building trades at Three Rivers, December 31.

In addition Orders in Council were published in the *Quebec Official Gazette* during December approving or amending the constitution and by-laws of certain joint committees, and others approving the levy of assessment on the parties, or amending previous Orders in Council in this connection by certain other joint committees.

Manufacturing: Vegetable Foods, etc.

BAKERS, MONTREAL.

An Order in Council, dated December 23, and gazetted December 31, extends the previous Orders in Council for this trade (L.G., Oct., 1939, p. 1064; Sept., 1940, p. 970; Jan., 1941, p. 70, Feb., p. 183; Jan., 1942, p. 110, Mar., p. 352, Apr., p. 483; May, 1943, p. 639, Nov., p. 1529) for a period of three (3) months, from December 31, 1943, to March 31, 1944.

Manufacturing: Textiles and Clothing

TEXTILE AND JUTE BAG MANUFACTURING INDUSTRY, MONTREAL.

An Order in Council, dated December 21, and gazetted December 31, extends the term of this agreement (L.G., May, 1939, p. 527; Mar., 1940, p. 282, June, p. 608; Feb., 1941, p. 183; Jan., 1942, p. 110; Jan., 1943, p. 88) to December 31, 1944.

Manufacturing: Printing and Publishing

PRINTING TRADES, MONTREAL.

An Order in Council, dated December 2, and published in the *Quebec Official Gazette,* December 11, extends the term of this agreement (L.G., Nov., 1943, p. 1530, Aug., p. 1131, April, p. 490, and Jan., p. 88, and previous issues as noted therein) to March 31, 1944.

Manufacturing: Metal Products

CAN AND METAL UTENSIL MANUFACTURING, PROVINCE OF QUEBEC.

An Order in Council, dated December 17, and published in the *Quebec Official Gazette,* December 31, extends the terms of this agreement (L.G., May, 1940, p. 496, June, p. 608, July, p. 730; Jan., 1941, p. 70, May, p. 593; Jan., 1942, p. 110; Jan., 1943, p. 88) to December 31, 1944.

ALUMINUM INDUSTRY, ARVIDA.

An Order in Council approved December 17, and published in the *Quebec Official Gazette,* December 24, amends the previous Orders in Council for this industry (L.G., Nov., 1937, p. 1272; July, 1939, p. 728, Oct., p. 1065) as follows:

Vacations with pay—After one year of continuous service for the employer, each employee paid by the week or month shall be entitled to a vacation of two weeks with pay. Hourly paid employees shall be entitled to a vacation of one week, with pay, after completion of one year's service and to a vacation of two weeks, with pay, after ten years' service.

ORNAMENTAL IRON AND BRONZE INDUSTRY, MONTREAL.

An Order in Council, dated December 17, and gazetted December 31, extends the term of this agreement (L.G., Nov., 1941, p. 1424; June, 1942, p. 738, Nov., p. 1348) for a period of 30 days from December 31, 1943.

SHEET METAL MANUFACTURING INDUSTRY, MONTREAL.

An Order in Council, dated December 18 and gazetted December 31 extends the term of this agreement (L.G. Mar., 1943, p. 340, Oct., p. 1381) for ninety days from January 1, 1944.

Construction: Buildings and Structures

BUILDING TRADES, THREE RIVERS.

An Order in Council, dated December 17, and gazetted December 24, amends the previous Orders in Council for these trades (L.G., May, 1940, p. 497, June, p. 609, Aug., p. 866; Mar., 1941, p. 334, Aug., p. 1010; Sept., 1942, p. 1097, Nov., p. 1348; Feb., 1943, p. 220) by providing for an increase of 5 cents per hour in the basic wage rates then being paid.

BUILDING TRADES, ST. HYACINTHE.

An Order in Council, dated December 17, and gazetted December 24, amends the previous Orders in Council for these trades (L.G., Aug., 1940, p. 867, Dec., p. 1311; Mar., 1941, p. 334, Sept., p. 1160; Sept., 1942, p. 1097; Jan., 1943, p. 88, Feb., p. 220) from April 7, 1943, to April 7, 1944; employers to pay a cost-of-living bonus of 7½ cents per hour over the hourly rates paid on November 15, 1941; this is payable for regular hours but not for overtime hours.

Trade

DAIRY EMPLOYEES, QUEBEC.

An Order in Council, dated December 17, and gazetted December 24, amends the previous Orders in Council for these workers (L.G., July, 1938, p. 799; July, 1939, p. 729, Aug., p. 862; Dec., 1940, p. 1312; Apr., 1941, p. 473; Oct., 1943, p. 1381) by providing that the cost-of-living bonus be payable only for work on the regular weekly hours (not for overtime).

CLERKS AND BOOKKEEPERS, JONQUIERE, KENOGAMI, ARVIDA AND ST. JOSEPH D'ALMA.

An Order in Council, dated December 17, and gazetted December 24, amends the previous Orders in Council (L.G., July, 1939, p. 730; Jan., 1940, p. 69, Oct., p. 1076, Nov., p. 1203, Dec., p. 1312; Feb., 1941, p. 184, Mar., p. 234; June, 1942, p. 739; Feb., 1943, p. 220). Le Syndicat National Catholique des Commis-Comptables masculins et féminins de Kenogami, inc." (The National Catholic Union of Clerks and Accountants of Kenogami, Inc.) is added to the parties to the agreement.

Vacation: one week with pay to employees with one year's service. Wages: for female employees of commercial establishments, minimum wage rates are from $7 during first six months to $13 after three years. The weekly wages of manager of retail commercial establishments is raised to $45.

Service: Business and Personal

GARAGES AND SERVICE STATIONS, QUEBEC CITY.

An Order in Council, dated December 17, and gazetted December 24, amends the previous Orders in Council for this trade (L.G., May, 1941, p. 631), and previous issues by providing for one week's vacation to employees of one year or more.

BARBERS, JOLIETTE.

An Order in Council, dated December 17, and gazetted December 18, makes obligatory the terms of a new agreement between L'Association des Barbiers et Coiffeurs de Joliette (The Association of Barbers and Hairdressers of Joliette) and Le Syndicat catholique et national des Employés Barbiers, Coiffeurs et Coiffeuses des Comtés de Joliette, Berthier, l'Assomption et Montcalm. (The National Catholic Union of

Employed Barbers and Hairdressers of the counties of Joliette, Berthier, l'Assomption and Montcalm). The agreement is to be in effect from December 18, 1943, to December 17, 1944, and thereafter from year to year, subject to notice.

Hours are 63 per week for barber shops, 58 for hairdressing shops except for May, June and July when they are 63 hours for both. Minimum weekly wage rates: for barbers, $12 per week plus 50 per cent of receipts in excess of $20, hairdressers (female) $10, extra employees 40 cents per hour. Minimum prices for services are specified. Apprentice regulations are also included in the agreement.

BARBERS AND HAIRDRESSERS, ST. JOHN AND IBERVILLE.

An Order in Council, dated December 23, and gazetted December 31, amends the previous Orders in Council for these trades (L.G., Dec., 1941, p. 1573; May, 1942, p. 631; May, 1943, p. 639) by making a slight change in hours.

HAIRDRESSERS, MONTREAL.

An Order in Council, dated December 17, and gazetted December 24, amends the previous Orders in Council for this trade (L.G., Oct., 1941, p. 1315, Dec., p. 1573; July, 1942, p. 857; Apr., 1943, p. 490, June, p. 813) by making certain changes in apprenticeship regulations.

Wartime Pay of Women in Industry in United States

THE National Industrial Conference Board of New York, a federation of employers' associations formed to do research work, recently completed a study of the *Wartime Pay of Women in Industry,* specifically those women replacing men as a result of wartime conditions. Data were obtained from 155 United States plants, selected amongst those most likely to have replaced men with women.

In general, the study notes, both the U.S. Government policy, as reflected in the decisions of the National War Labor Board, and the union attitude have favoured the principle of equal pay for work comparable to that done formerly by men. Often, however, when women replace men it has been necessary to modify the job in some way to bring it within a woman's physical capacity. This was the case in 69 per cent of the companies. The most frequent change which had to be made was reducing the amount of heavy lifting, either through male assistance or mechanical aids. Whereas men had been accustomed to setting up their machines, frequently it had been necessary when women took over the job, to eliminate this responsibility. Simplification of the job came third highest in the list of changes.

The most usual working schedule for women was found to be the 6-day, 48-hour week (55 per cent of the plants). Women work on all shifts, but where the two or three-shift system prevail, they are slightly less often employed on the second and third shifts than men. Frequently, too, the shifts are made shorter for women. Only five of the plants reported the split shift, whereby two or more women working part-time combine to form a complete daily or weekly shift. One-half of the companies had regular rest periods for their women workers doing jobs comparable to men, whereas only one-third were giving rest periods to men also.

A comparison was made of the entrance rates of untrained men and women, all of whom were expected to become skilled workers. The entrance rates of women on men's jobs were not always identical with the male entrance rates, but on the whole they were higher than those paid women employed for women's jobs. However, slightly more than half of the plants adhered to the policy of the rate for the job.

Automatic progression to the base rate, used as another measuring rod, showed that in almost all the plants where the entrance rates were the same for both sexes, the automatic increases also corresponded; whereas in those plants with different entrance rates, the differential was gradually reduced as the rate increased in about 50 per cent of the cases, and unchanged in the remainder. Companies generally estimated that the training periods needed were identical for both men and women in 94, or 72 per cent of the 131 production jobs listed.

After the base rate has been reached, the decision of the supervisor was found to play a major part in any further upgrading. The study pointed out that this factor opens the way for prejudice. Moreover, the impossibility of weighing the part played by the supervisor's opinion, prevented accurate study of upgrading rates. Nevertheless, some indication of the degree to which women have advanced was given by a list showing the most highly skilled production jobs performed by women in each plant, together with the corresponding rates of pay. One quarter of these jobs paid from 70 to 79c an hour, one fifth paid 80 to 89c, one tenth paid 90 to 99c, and nearly one-fourth paid $1.00 or more.

In considering whether the production of women equalled that of men in quantity and quality, nearly 60 per cent of the companies stated that the production of women workers who were on men's jobs was equal to, or greater than, that of men on similar work. In one-fourth of the plants women in men's jobs were producing less than men, but in some cases this was because they were new at their job. Production is also sharply affected by the fact that women show a much higher rate of absences, about 1·7 times that of men in this project.

War Emergency Training

Summary of Program—Progress of Enrolment—Industrial Training—Assistance to Students

THE War Emergency Training Program provides the following types of training:—

(1) Pre-employment classes in vocational schools for men and women about to enter war industry;

(2) Part-time classes, principally for the upgrading of persons already employed;

(3) Training in plant schools;

(4) Special classes for foremen and supervisors;

(5) Training of enlisted men as tradesmen for the Army, Navy and R.C.A.F.

(6) Rehabilitation training for persons discharged from the Armed Forces in the present war and referred for training by the Department of Pensions and National Health.

(7) Assistance to certain categories of university students whose services are needed in connection with the war effort.

War Emergency Training is carried on under agreements made by the Dominion Government with each province. The administration is decentralized with a Regional Director in each province. Training is given in technical schools, special training centres and in industrial plants. The provinces and municipalities supply the shop facilities of the technical schools to the Program free of charge. Provincial Governments also pay certain administrative costs and share with the Dominion in the cost of machinery and equipment purchased. All other costs are paid by the Dominion with funds from the War Appropriation.

Progress of Enrolment

From the beginning of the Program up to November 30, 1943, the gross enrolment in all types of projects has been as follows:—

Training in Industry	194,575
Army	37,062
Navy	6,703
R.C.A.F.	58,299
Rehabilitation (discharged persons from the forces)	2,139
Students	5,137
Total	303,915

Industrial Training

The enrolment in full-time pre-employment classes has remained fairly stable during the last 2 or 3 months and showed a total of 2,118 enrolled at the end of November. There was a great reduction in those placed in employment from the full-time pre-employment classes, the number being 741 during the month of November. The numbers placed in employment from the Plant Schools now greatly exceed the numbers placed from pre-employment classes and amounted to 1,365 in November.

The rehabilitation training given to discharged members of the forces showed an enrolment of 398 at the end of November constituting the peak enrolment in this type of training up to the present time. Additional representatives have been taken on the staff in several of the provinces to assist in rehabilitation training by attending meetings in the Rehabilitation Boards, advising discharged persons as to the best type of training for them to follow and making surveys of suitable training opportunities now available among employers in their own area.

The training of foremen and supervisors in industry continues to be most successfully received and up to the end of November, approximately 38,000 have certificated in one or more of the various units of training. This supervisory training was made available to the Dominion Civil Service and an Appreciation Session was held in Ottawa in the beginning of December for ranking officials of the Civil Service Commission and of various Government Departments. The indications are that the units of Job Instructor Training and Job Relations Training will be widely used in the Civil Service among those employed in a supervisory capacity.

Assistance to Students

During the present fiscal year, financial assistance has been given to 2,231 students up to the end of November. In all provinces except in Ontario, this has been done in co-operation with the Provincial Governments, which for the most part, contribute 50 per cent of the costs. The assistance is available for students of good academic standing in courses considered necessary for the war effort, who are in financial need and who agree to make their services available in connection with the war, in the capacity for which they have been trained. The assistance is given by way of an outright grant, a loan or a combination of both. Up to the end of November the Provincial contributions amounted to approximately $155,000 and the Dominion contributions to $245,000. Among the students helped in the various faculties are the following:

Medicine	377
Dentistry	89
Engineering and Science (1st year Students)	215
Engineering and Science (other Years)	513
Nurses in Training	106

(1) Trainees in Part-time Classes consist largely of employed persons who are being given training at the request of employers in war production who wish to up-grade their employees.

(2) Includes those graduates who, though actually placed prior to November 30, 1943, were not so reported until after November 1, 1943.

Activities of the Unemployment Insurance Commission[1]

Placement of Physically Handicapped—Proceedings of Conference on Vocational Rehabilitation Published—Extended Tables Covering Claims for Benefit—Unemployment Insurance Registration—Insurance Fund

THE growing interest in the employment possibilities of physically handicapped workers was clearly indicated by the large attendance and the nature of the discussions at eight public meetings on the subject of "National Planning for the Physically Handicapped," addressed by Mr. Allan M. Mitchell, Director, Employment Service and Unemployment Insurance Branch, Department of Labour, and members of the staff of the Special Placements Division, in Western Canada recently. More than 1,100 persons attended the various meetings and participated actively in the discussions which followed the formal addresses.

Employers of labour volunteered the information at the meetings that the physically handicapped, when properly placed in positions for which they are qualified, maintain records of production quite up to the standards, and in some cases above those of the physically fit workers. In addition, tribute was paid to the spirit shown by the handicapped persons, which resulted in their having a favourable record of lower labour turnover, lower rate of absenteeism, and in many cases a higher degree of concentration on their work. One aircraft manufacturer, for example, stated that the seventeen totally deaf persons in his employ were not distracted by noises in the factory, and maintain productoin records quite up to the standards of the other workers in the plant. Other employers mentioned the advantage of engaging handicapped persons because of their freedom from call for Army service.

In his addresses at Edmonton, Vancouver, Victoria and Winnipeg, Mr. Mitchell outlined the steps now under way to expand the facilities of the Employment and Selective Service Offices in connection with the placement of the physically handicapped, and mentioned the fact that leadership in this field would be given by the appointment of five specialists at the various regional headquarters.

At the various meetings it was stressed that the newly formed Special Placements Divisions would work in the closest possible co-operation with the rehabilitation program of the Department of Pensions and National Health in Winnipeg and other centres. Members of the Rehabilitation Committees and various welfare Officers of the Department of Pensions participated in the discussion. (See also L.G. 1942, p. 1387).

An interesting side-light at one of the meetings, addressed by Mr. Mitchell, was the "translation" of his remarks by a young lady who, using the sign language, made an interested group of sixteen totally deaf persons aware of what the speaker was saying.

In conformity with a suggestion made by Mr. Mitchell in his public addresses, a committee has already been organized by representatives of 28 local organizations in Vancouver to promote the welfare of the handicapped and to co-operate with the regional and local employment services in that area.

Proceedings of Conference on "Vocational Rehabilitation of Physically Handicapped" Published

Reference was made in the October issue of the LABOUR GAZETTE (p. 1387) to the conference on the "Vocational Rehabilitation of the Physically Handicapped", held in Toronto at the end of September.

Representatives of various governmental, welfare employment and other agencies interested in the rehabilitation of the handicapped, both during the war and in the post-war period, attended the conference and took an active part in its deliberations.

The proceedings have been issued in pamphlet form by the Unemployment Insurance Commission, thus making available in succinct and non-technical terms a body of information that is of interest and value to special placement officials throughout Canada, as well as to all handicapped persons who are anxious to obtain a secure place in business or industrial lfie.

Although the conference was called primarily, merely for informal discussions and not for the formulation of official policy or action, unanimous approval was given to a formal closing resolution. In it, the "Conference respectfully urge that consideration be given to the development of both a comprehensive plan and actual facilities at the earliest possible moment in order that the needs of the handicapped may be more adequately met and that the interest and co-operation of employers may be stimulated and broadened."

Because of restrictions on the use of paper only a limited edition has been printed, mainly

[1]Two recent amendments to the Unemployment Insurance Act and 15 special orders issued under the Regulations are described in the *Labour Law* section, p. 105.

for the benefit of officials of employment offices, pension officials, social and other agencies.

Applications for Unemployment Insurance Benefit

(The following statistical report on the operation of the Unemployment Insurance Act comes from the Dominion Bureau of Statistics.)

During November, 2,896 applications for unemployment insurance benefit were filed in the local offices of the Unemployment Insurance Commission. This is almost double the number registered in October, when 1,475 claims were filed. During the corresponding months of 1942 the number of claims increased from 1,058 to 1,748, an increase of 65 per cent. The monthly figures on claims filed have shown a definite seasonal variation, with the low point occurring in September or October and the high point in March (see Table 1). These seasonal fluctuations correspond closely with those shown in the Bureau of Statistics monthly index of employment (See p. 82). Thus some of the increase from October to November can be ascribed to normal seasonal tendencies, but some is due no doubt to changes in emphasis on the production of war items resulting in layoffs of workers who cannot immediately be re-absorbed.

The number of claims sent forward to insurance offices for adjudication was 2,389 in November as against 1,318 in October of this year and 1,365 in November, 1942. During November, 1,610 claimants were considered entitled to benefit while 460 were deemed not entitled of whom 262 were disqualified because they had voluntarily left their employment without just cause and 124 were found to have insufficient contributions.

The number of persons who signed the live register during the last six working days of November was 2,436 as against 1,267 who signed during the last six working days of October. Those who sign the live unemployment register are claimants who are reporting unemployed days during the preceding week. Since each such claimant reports once a week on a specified day, those who signed in a six day period represent all those who are claimants and beneficiaries at a given time. Excluded are those unemployed who are not insured, those who for some reason do not claim and those who have exhausted their benefit rights.

Persons Receiving Benefit

One thousand two hundred and ninety-seven persons received benefit payments in November, while 1,036 were paid benefit during November of last year. These 1,297 persons received a total of $33,584 for 19,275 unemployed days. This compares with $27,221 for 14,581 days paid to the 1,036 persons who received benefit in November, 1942. Thus, in the present month the average duration of the unemployment compensated was 14·9 days as against 14·1 days in November, 1942. The average amount paid per beneficiary was $25.89 in November, 1943, and $26.27 in November, 1942. The average amount paid per compensated day of unemployment was $1.74 this November and $1.87 last November.

Tables 1 to 4 present data respecting the number of claims forwarded to insurance offices and their disposition, reasons for non-allowance of claims, persons receiving benefit, benefit days paid and amount of benefit paid.

Insurance Registration

Reports received from Local Offices of the Unemployment Insurance Commission showed that at January 1, 1944, 137,280 employers with insured employees were registered and 3,053,836 employees had been issued with insurance books.

A breakdown of employers and employees according to Regions in which registration took place is shown in the following table:

PROGRESS OF REGISTRATION AS AT JANUARY 1, 1944

Region	Employers establishments registered	Insured persons registered
Maritimes	11,220	228,862

Contributions in respect of services in the Armed Forces	43,547 79
Miscellaneous	1,724 18
	$ 46,632 75

Employment and Unemployment

Summary

INFORMATION in this section regarding the employment situation in Canada is based upon reports from the following sources:

The employment situation at the beginning of November, as reported by employers.—The Dominion Bureau of Statistics receives each month reports from firms employing fifteen or more employees. These firms represent practically all industries except agriculture, fishing, hunting and highly specialized business operations.

The Bureau has been receiving these reports for many years; hence, although the figures given show considerably less than the total number of persons employed in Canada, they give a valid picture of the *trend* of employment in Canada over a period of years.

Returns received from 14,099 co-operating firms indicated further important increases in employment and payrolls when 11,853 persons were added to their staffs which aggregated 1,897,661 at the beginning of November. On October 1, the staffs of the reporting establishments had aggregated 1,885,808.

The index number of employment (based on the 1926 average as 100) was 188·7 as compared with 187·6 in the preceding month and was 5·4 per cent higher than at November 1, 1942.

Information is also embodied in this article concerning payrolls, which is furnished each month by the co-operating firms. The per capita average weekly wage, at $31.59, showed a further increase, rising from $31.53 at the beginning of October, as compared with $29.81 at November 1, 1942.

Report on employment conditions for December.—A summary of employment conditions for the month of December has been prepared by the Research and Statistics Branch, Department of Labour, on the basis of reports received from Local Employment and Selective Service Offices across Canada. These reports describe employment conditions in the Maritime, Quebec, Ontario, Prairie and Pacific Regions.

Applications for employment; vacancies, and placements, November, 1943.—From the Employment and Selective Service Offices of the Unemployment Insurance Commission come reports showing the number of positions reported as vacant across the Dominion, together with the number of applications for employment and the number of placements effected.

Reports received from Employment and Selective Service Offices during the five-week period October 29, to December 2, 1943, showed a loss from November, 1942, in the average number of placements recorded daily but a slight increase over the previous period October 1, to October 28, 1943. Vacancies in the five weeks ending December 2, 1943, numbered 281,536. There were 261,309 applications for employment; and 189,410 placements in regular and casual employment.

Unemployment in Trade Unions.—The Department of Labour receives reports from the local trade unions throughout Canada, showing the number of their members who were unemployed during the period under review.

At the beginning of December, the percentage of unemployment among trade union members was ·6 as compared with percentages of ·3 in November and ·8 in December, a year ago. The December figure was based on returns received from 2,359 labour organizations, having a combined membership of 483,933 persons.

The Employment Situation at the Beginning of November, 1943 as Reported by Employers

FURTHER important increases in employment and payrolls were indicated at the beginning of November, when the 14,099 firms co-operating in the Dominion Bureau of Statistics' monthly survey reported the addition of 11,853 persons to their staffs, which aggregated 1,897,661. The weekly salaries and wages disbursed at November 1 by these establishments amounted to $59,950,027 as compared with the sum of $59,456,274 paid on or about October 1, representing an advance of 0·8 per cent. The contents of the average pay envelope of the men and women in recorded employment rose from $31.53 paid in

the preceding period of observation, to a new maximum of $31.59 at the beginning of November; the general increase in the cost-of-living bonus authorized as from November 15, 1943, will be reflected for the first time in the next report.

An upward movement in industrial employment at November 1 is contra-seasonal, according to the experience of pre-war years. Since the outbreak of hostilities, however, there have been annual increases in employment at that date; the latest gain is smaller than at any other November 1 in the period of the war.

The expansion at the date under review took place in the non-manufacturing industries, there being a slight falling-off in manufacturing, mainly in the vegetable foods and lumber divisions. This is the sixth general decline in manufacturing since the outbreak of war; the other occasions were the seasonal losses at January 1 in each of the years since 1939, and that of a contra-seasonal character at May 1, 1943. Among the non-manufacturing industries, logging showed considerably greater seasonal activity, some 11,000 men having been taken on by the co-operating camps. As in recently-preceding months, this advance was on a scale somewhat below the average for the time of year. Coal mining, services and trade also afforded more employment. The most pronounced gain was in the last-named, in which it was considerably greater than usual for November 1; this was no doubt partly due to the employment of unusually

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

large numbers of part-time workers. On the other hand, communications, transportation and construction and maintenance reported reduced activity, the losses being seasonal. In the last two industries, they were less than normal for the beginning of November, while that in communications approximated the average in the experience of the period, 1920-1942.

Based on the 1926 average as 100, the general index number of employment at the beginning of November, 1943, was 188·7, the highest to date. The October 1 figure was 187·6, while that for November 1, 1942, was 183·3. The increase of almost three per cent in the latter comparison was accompanied by that of 8·1 per cent in the index number of payrolls. The seasonally-adjusted index number of employment rose from 178·5 in the preceding month, to 180·6 at the beginning of November, 1943, when it was the highest since that for August 1, 1943.

Payrolls

As already stated, the firms whose returns were tabulated reported the payment of $59,950,027 in salaries and wages at November 1, a sum which exceeded by 0·8 per cent the amounts they had disbursed at the beginning of October. The latest figure is the highest yet recorded. The movement in payrolls has, with rare exceptions, been steadily upward throughout the whole period in which the statistics have been collected, that is, from the spring of 1941. The exceptions were at the beginning of January, 1942 and 1943, when the observance of the Christmas and New Year's holidays had lowered the reported aggregates, and at May 1, 1943, following the Easter holidays. The weekly per capita earnings averaged $31.53 at October 1 and $31.59 at November 1, 1943, being then considerably above the November 1, 1942, average of $29.81; the figure at November 1, 1941 had been $27.02.

If the statistics for financial institutions are included, the latest survey of employment and payrolls shows that the number of persons in recorded employment was 1,962,404, as compared with 1,950,662 at the beginning of October. The amounts received as weekly earnings by these persons were stated as $61,984,606 paid on or about November 1, and $61,488,958 paid on or about October 1.

Dec. 1						

The per capita average for the nine industries, including finance, was also $31.59; this was seven cents higher than the figure indicated at the beginning of October. At November 1, 1942, the average in the nine leading industrial groups was $29.85, while in 1941, the November 1 figure was $27.10.

Table II summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas and the eight leading industrial cities, and gives comparisons as at October 1, 1943, and November 1, 1942.

The indexes of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the index numbers of employment have been converted from their original base 1926=100 to June 1, 1941, as 100. The report shows that there has been an increase of 23·4 per cent in the number of persons in recorded employment in the eight leading industrial groups while the weekly earnings of these persons have risen by 52 per cent. Including finance, the gain in employment

[1] This classification comprises the following:—Iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

from June 1, 1941, to November 1, 1943, amounted to 22·8 per cent and that in payrolls to 50·6 per cent.

From November 1, 1942, to November 1, 1943, the increase in employment in manufacturing, logging, mining, communications, transportation, construction and maintenance, services and trade was just under three per cent, as compared with a gain of 8·1 per cent in the weekly payrolls. The reasons previously given for the relatively greater rise in the latter than in employment may again be stated:—(1) the growing concentration of workers in the heavy manufacturing industries, where rates of pay are above the average, and, in addition, there is a considerable amount of overtime work, (2) the extension of the system of paying a cost-of-living bonus to the majority of workers; the rates at which this allowance has been calculated have been enlarged on more than one occasion since its institution, (3) the progressive upgrading of employees as they gain experience.

The expansion in employment and payrolls in manufacturing in the period of observation has for obvious reasons been on a much greater scale than that in the non-manufacturing industries, the index of employment in factories having risen by 37·4 per cent from June 1, 1941, and that of payrolls by 72·8 per cent. The factors given above as influencing the all-industries statistics operate with greater force in the case of the manufacturing group.

Even more striking than the advance in personnel and payrolls in manufacturing as a whole in recent months is that which has taken place in plants producing durable goods. Thus, the index of employment in this class has risen by 60·3 per cent and that of payrolls by 105·2 per cent from June 1, 1941, to the beginning of November, 1943. Despite curtailment in certain lines in the non-durable goods division, the index number of employment in this group was 16·4 per cent above that indicated at June 1, 1941, while the increase in payrolls amounted to 38·5 per cent.

In regard to the marked variations shown in the average earnings of workers in the different industrial classes, it must be borne in mind that the sex distribution of such persons is an important factor, frequently associated with

Note.—The "Relative Weight", as given just above, shows the proportion of employees in the indicated area, to the total number of all employees reported in Canada by the firms making returns at the date under review.

variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or overtime may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is also obviously an extremely important factor.

[1]The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

Employment and Payrolls by Industries

Manufacturing.—Employment in factories at the beginning of November showed a slight curtailment; this was seasonal in character, according to the experience of pre-war years, but was contrary to the movement indicated annually at November 1 since the outbreak of hostilities. The index slightly declined from its all-time maximum of 231·3 at October 1, to 230·8 at the date under review, when it was higher by 5·6 per cent than the figure of 218·6 at November 1, 1942. The 1926 average equals 100 in calculating these index numbers. After correction for seasonal influences, however, the index showed a further gain, rising from 224·2 at October 1, to 228·8 at the beginning of November.

Data were received from 7,845 manufacturers, whose staffs included 1,206,032 men and women—3,020, or 0·3 per cent fewer than they had employed at October 1. This decline was accompanied by an increase of 0·5 per cent in the reported weekly payrolls. The pay envelope of the typical individual in recorded employment in manufacturing at November 1 contained $32.62; this was 25 cents more than the per capita average earnings of those employed by the same firms at the beginning of October, and $1.92 more than the November 1, 1942, average of $30.70. The gain over the twelve months is partly due to the growing concentration of employment in the more highly-paid heavy industries, together with the progressive up-grading of employees as they acquire experience, factors which have offset the effect of the considerable dilution of labour which has been rendered necessary by wartime conditions. The payment of higher wage rates in a number of cases has also contributed to the result; it may again be mentioned that the general increase recently authorized in the cost-of-living bonus took effect only from November 15, and consequently will not be reflected in the current statistics of payrolls until the next report.

There were increases at the beginning of November in the iron and steel, non-ferrous metal, electrical apparatus, chemical, tobacco, rubber, pulp and paper and animal food divisions. The advances, however, were not particularly large, that in the animal food group being most noteworthy. On the other hand, there was considerable seasonal curtailment in the vegetable food group (from which nearly 5,000 persons were released), and in lumber mills. Textiles and beverages also showed reduced activity.

The co-operating manufacturers reported the disbursement of $39,337,584 in weekly payrolls at November 1. This was an increase of $200,443, or 0·5 per cent, over the weekly salaries and wages paid on or about October 1. The per capita average, at $32.62, was the highest in the record which dates from June 1, 1941. The October 1, 1943, figure was $32.37, and that at November 1, 1942, $30.70. In 1941, the November 1 average had been $27.59.

Based on the weekly salaries and wages paid by the co-operating establishments on or about June 1, 1941, as 100 per cent, the index of payrolls at November 1, 1943, stood at 172·8, as compared with 171·9 per cent at October 1, 1943, and 155·3 at November 1, 1942. The increase of 11·3 per cent in the reported payrolls at the date under review as compared with twelve months earlier, considerably exceeds that of 5·6 per cent in the number of persons employed by the co-operating manufacturers. The reasons for this disparity in the rates of gain have already been given. In the manufacturing industries, the up-grading of employees as they gain experience is of particular and growing importance, tending to offset the effect of the large-scale dilution of labour consequent upon the shortage of workers which has become increasingly acute with the development of the war effort. As was pointed out in preceding bulletins, the changing industrial distribution of wage-earners in recorded employment has also contributed materially to the relatively greater rise in payrolls, there being a growing proportion of workers in the more highly-paid heavy industries. At November 1, 1943, such industries provided work for 57·6 per cent of all those engaged in manufacturing, exclusive of electric light and power, while at June 1, 1941, the proportion was 49·7 per cent. The effect of this change in distribution is emphasized by the fact that the latest per capita average earnings of persons engaged in these classes stood at $35.86, an amount which was higher by $8.07 than at June 1, 1941, while in the light manufacturing industries the November 1 average, standing at $28.06, has risen by only $4.76 in the 29 months.

During the period for which statistics of payrolls are available, there have been especially noteworthy increases in the salaries and wages reported in the non-ferrous metal, chemical, iron and steel, miscellaneous manufactured products and electrical apparatus and equipment industries. These gains have been associated with important, though relatively smaller advances in employment. In practically every case, the per capita average weekly earnings in the various branches of manufacturing are higher than they were at the same date of 1941.

Many factors contribute to the existing differences in the figures of per capita averages in various industries as shown in the text. Important among these is the sex distribution of

workers in the various industries; with this factor is associated that of age, the women workers in general tending to belong in the younger age groups, where earnings normally are less than among more experienced workers. The presence or absence of overtime also affects substantially the per capita average earnings.

Logging.—There was a further seasonal increase in logging at November 1, 1943, when the expansion was smaller than that reported at the same date in any other year since 1932. Returns were received from 524 operators having 54,644 workers, as compared with 43,690 at October 1. The index of employment, at 182·6, was the lowest for November since the outbreak of war. As compared with November 1, 1942, there was a decline of 4 per cent in the index of employment, while that of weekly payrolls was higher by 9·2 per cent. The salaries and wages reported at the latest date amounted to $1,389,263, showing an advance of 14·7 per cent over the payrolls indicated in the preceding period of observation.

The per capita average earnings fell from $27.71 at October 1, 1943, to $25.42 at the date under review; this decline is associated with the large increase in the number of employees. The average at November 1, 1942, was $21.32. In considering the figures of aggregate and average earnings in logging, it must be recalled that they do not include the value of board and lodging, frequently a part of the remuneration of workers engaged in bush operations. The high labour turnover in many camps is also a factor in lowering the reported earnings; these differ greatly in various parts of the country, the average in British Columbia being considerably higher than in any other province.

Mining.—Heightened activity was indicated in mining as a whole at the beginning of November, when information tabulated from 479 operators showed a combined working force of 72,480 persons, as against 71,855 in their last return. There was a falling-off in the extraction of metallic ores, and of miscellaneous non-metallic minerals, but coal-mining was considerably brisker. The index of employment in the mining group at November 1 was 155·4, being 4·7 per cent below that of 163·0 at the same date in 1942. In the 12 months, the index of payrolls has fractionally declined.

The weekly payrolls reported at the latest date amounted to $2,687,955, a sum of 2·9 per cent greater than the salaries and wages disbursed by the same firms at October 1. The per capita average earnings were also slightly higher, standing at $37.09, as compared with $36.36 in the preceding period of observation. The November 1, 1942, figure had been $35.36.

Communications.—The trend in the communications division was again downward, as is usual at the beginning of November. The staffs of the co-operating establishments aggregated 28,121, a decline of 311 from their last report. The loss was about normal in extent. There was also a falling-off in the payrolls distributed; these amounted to $844,945, as compared with $852,118 paid on or about October 1. The per capita average rose from $29.97 at October 1, to $30.05 at the first of November. The November 1, 1942, figure had been 28.65. Based on the 1926 average as 100, the latest index of employment was 105·3; this was fractionally higher than that of 104·7 at November 1, 1942, while there was a gain of 5·5 per cent in the index of payrolls in the twelve months.

Transportation.—A smaller-than-usual seasonal contraction was noted in transportation as a whole at November 1. The reduction took place in shipping and stevedoring and steam railway operation, local transportation showing a moderate advance. Employment continued in greater volume than at the same date in any earlier year of the record. The index stood at 119·4, 8 per cent higher than that of 110·6 at November 1, 1942; this gain has been accompanied by that of 11·2 per cent in the reported weekly payrolls. The staffs of the 595 firms and branches furnishing returns totalled 150,887, as compared with 151,602 at October 1. The weekly salaries and wages disbursed at November 1 were given as $5,390,262; this was not quite one per cent greater than that of $5,338,921 recorded in the preceding period of observation. The average per capita weekly earnings rose from $35.22 at October 1 to $35.72 at the date under review. The November 1, 1942, figure had been $34.55.

Construction and Maintenance.—There was a further recession in the construction industries, in which the loss was below-average for the time of year. Highway work was more active, but building and railway construction and maintenance released employees. Statements were tabulated from 1,563 contractors, employing 170,673 men and women, 2,054 fewer than in the preceding month. The weekly payrolls reported by these employers amounted to $5,152,334; this was a decrease of two per cent from their October 1 total. There was also a falling-off in the per capita average earnings, which stood at $30.19 at November 1, as compared with $30.45 at the beginning of October. The November 1, 1942, figure was $28.51.

The latest index in construction, at 135·3, was lower than that of 154·9 at the beginning of November of last year. This decrease of 12·7 per cent was accompanied by that of 7·7 per cent in the reported payrolls.

Services.—A contra-seasonal advance was indicated in the service division, in which the 655 co-operating establishments added 457 persons, bringing their staffs to 44,935 at November 1. The gain took place in hotels and restaurants, employment in laundries and dry-cleaning plants slightly declining. The salaries and wages distributed at the beginning of November amounted to $845,456, compared with $842,469 in the preceding period of observation.

During the last 12 months, there has been an advance of 9·8 per cent in the number of persons in recorded employment, while the reported payrolls have shown a gain of 12·6 per cent. The per capita averages were $18.82 at November 1, and $18.94 at October 1, 1943, as compared with $18.23 at the beginning of November, 1942. Attention must again be drawn to the fact that in hotels and restaurants, as in logging, many of those employed receive board and lodging as part of their remuneration; the former division constituted some 64 per cent of the total in the service division as a whole at the beginning of November.

Trade.—Employment in trade showed extremely marked expansion at November 1; this may be due in part to the employment of unusually large numbers of part-time workers. Data were furnished by 2,378 establishments, with a total personnel of 169,889 men and women, as compared with 163,972 at October 1. The sum of $4,302,228 was paid at the date under review in weekly salaries and wages by the co-operating firms, whose payrolls at October 1 had aggregated $4,203,394. The percentage gain in the disbursements was smaller than that in the employees, so that the per capita average declined, standing at $25.32, as compared with $25.63 in the preceding report; the November 1, 1942, figure had been $24.51.

The index number of employment in trade at November 1 was 161·9, as compared with 156·5 at the same date in 1942. The latest figure therefore showed an increase of 3·5 per cent in the twelve months. The index of payrolls was 4·5 per cent higher.

Financial Institutions.—Information from 757 financial institutions showed a personnel of 64,743, 111 fewer than at October 1. The weekly earnings paid at the date under review amounted to $2,034,579, as compared with $2,032,684 paid on or about October 1. The per capita weekly average was $31.43, as compared with $31.34 in the last report, and $30.79 at November 1, 1942. The latest index of employment in financial institutions was higher by one per cent than at the same date in 1942, while that of payrolls was higher by 3·2 per cent.

Sex Distribution of Persons in Recorded Employment at October 1, 1943

IN connection with its monthly survey of employment and payrolls as at October 1, 1943, the Dominion Bureau of Statistics requested employers for a statement of the number of females on their staffs in the pay periods for which they were furnishing data, repeating the enquiry undertaken at the same date in 1942. The response to these enquiries was highly gratifying, indicating a very general realization of the present-day importance of information respecting the sex distribution of those in recorded employment. The value of the data for October 1 of the present year is greatly enhanced by the fact that changes in the numbers and proportions of female workers over the 12 months can now be measured, whereas the October 1, 1942, data could be compared only with the information obtained in the 1940 Census of Industry, and with the distribution existing at the date of the 1931 Decennial Census. (L.G., 1942, p. 1464.)

The Coverage of Industry.—The monthly surveys cover large proportions of the total numbers employed in the following industries: manufacturing, logging, mining, communications, transportation, construction, services, trade and finance. The more important groups excluded are the following: agriculture, domestic and personal services, and professional services, such as governmental, educational, etc. In these industries (except agriculture), and in many of the smaller establishments excluded from the current surveys, the proportions of female employees are relatively high, in some cases exceeding the ratios found among the industries for which current statistics are available. The proportions given in this supplement are therefore probably rather lower than those which would be indicated in a census taken at the same date.

The Situation at October 1, 1943.—The number of females in recorded employment at October 1, 1943, in the nine leading industrial divisions, was 510,715, constituting 262 per thousand of the total personnel of 1,950,131. At the same date in 1942, 441,156 women had been reported in a staff of 1,879,845. The proportion then was 235 per thousand.

The proportion of 262 women per thousand employees at October 1, 1943, was considerably

higher than that of 235 per thousand a year earlier, there being a rise of 11½ per cent in this comparison. The increase in the number of females (approximately 67,000, or 15 per cent), accounted wholly for the general gain of 3·4 per cent in recorded employment in the nine leading industries; the number of males showed a small decline in the 12 months.

Sources Contributing to the Supplies of Male and Female Workers.—During the year, large numbers of men have been withdrawn from industrial employment to serve in the Armed Forces; the reserve of women has also been affected to some extent by enlistments, although the number involved is naturally much smaller. The virtual maintenance of the number of males in recorded employment, notwithstanding the demands from the various Services, reflects the operation of several factors: (1) The transfer from the less-essential to the more-essential industries (the latter being heavily represented in the current surveys); (2) The continued movement from the own-account and small-employer classes to employment in industry; (3) The employment of increasingly large numbers of boys of pre-enlistment age, and to a lesser extent of older and physically-handicapped men, to replace those of military age and fitness; (4) The industrial reabsorption of men discharged from the Armed Forces.

The female accessions to the number in recorded employment have also come from various reserves, among which may be mentioned considerable numbers of married women (either returning to work or as recruits), young

SEX DISTRIBUTION OF THE WORKERS IN RECORDED EMPLOYMENT IN THE PROVINCES, THE LEADING INDUSTRIAL CITIES, AND THE MAIN INDUSTRIAL GROUPS, AS AT OCT. 1, 1943 AND OCT. 1, 1942.

[1] This classification comprises the following:—Iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products. The non-durable group includes the remaining manufacturing industries with the exception of electric light and power.

girls who under ordinary circumstances would continue at school for a longer or a shorter period, domestic servants, and other women and girls normally engaged in kinds of work which are excluded from the monthly surveys. The employment of part-time workers has considerably increased in the year; the number of such workers is not available, but in some industries is probably fairly substantial.

The Trend of Average Earnings.—It is worthy of note that despite the virtual stabilization of the number of male wage-earners reported in the year, and the widely-distributed gains in the number of females, there have almost invariably been increases in the average weekly earnings in the various industries and areas between October 1 of 1942 and 1943. Since no general increase in the cost-of-living allowances was authorized during this period, the widespread rises in the average weekly earnings result in specific cases from increases in the rates of wages or bonus, but more generally, from the upgrading of workers (male and female) as they acquire experience. As would probably be expected, there also appeared a tendency for the smallest advance in the weekly averages to be indicated in the industries and areas where the proportions of women workers showed greater-than-average increases. The length of service of the female recruits to industry would obviously be one of many factors contributing to this result.

Comparison with Annual Census of Industry Data.—In many respects, the comparison of the current statistics of employment with the data of the Census of Industry is of greater interest than any other, despite the fact that the comparison is limited to the manufacturing industries. The use of the Census data permits a comparison with pre-war years, so that the steadily upward trend in the proportions of female employees may be roughly measured. It should be noted that the annual and the current statistics are not strictly comparable, the former covering all manufacturing establishments without regard to size, while the latter are limited in the main to those employing 15 persons and over.

The females in 1938 constituted 214 per thousand of all persons employed in factories, while in 1939, the proportion was 220 per thousand; the marked increase in activity in the heavy manufacturing industries in the following year as a result of the war, slightly lowered this proportion, which declined to 218 in 1940. The ratio in 1941 was 226 per thousand workers enumerated in the Annual Census. At October 1, 1942, the proportion of females was 260 per thousand, and that at October 1, 1943, 282 per thousand. From 1939 to the latest date, therefore, there has been an increase of roughly 28 per cent in the number of women in each 1,000 employees in manufacturing, while the proportion of males per thousand has fallen by nearly eight per cent.

The Distribution of the Women Workers in Recorded Employment at October 1, 1943.—The accompanying table summarizes the statistics reported at October 1, in 1942 and 1943. Of the total of 510,715 women in recorded employment in the nine leading industrial divisions, 337,251, or 66 per cent, were engaged in manufacturing, including electric light and power; the October 1, 1942, proportion had been 66·4 per cent. The next largest groups of female employees were those of 80,238 in trade, 32,958 in finance and 25,819 in services. Communications, transportation, construction, mining and logging together reported approximately 34,450 women workers, or only 6·7 per cent of the total. Small though this proportion was, it fractionally exceeded that of just over six per cent at the time of the October 1, 1942, survey.

The number of females engaged in plants turning out heavy manufactured goods constituted 25·6 per cent of the total at October 1, 1943, as compared with 20·9 per cent in 1942. On the other hand, the proportion of the total reported by the light goods manufacturers declined from 45 per cent at the time of the first survey, to little more than 40 per cent at the date under review; employment in this class was then generally quieter than a year earlier, the falling-off taking place among the male workers. Certain manufacturers of consumers' goods reported growing difficulty in obtaining the services of women and girls; in a few cases, it was stated that shortages of such workers were being made up by the employment of increasingly large numbers of boys of pre-enlistment ages.

Among the provinces, Ontario and Quebec ranked first and second, respectively, in the number of females in recorded employment; 46·7 per cent of the Dominion total belonged in Ontario, while Quebec firms reported 31·6 per cent of the aggregate. The greatest gains over the year in the number of women in each 1,000 persons on the reported payrolls were in Manitoba and British Columbia, where the proportions rose by some 27 per cent and 25 per cent, respectively. The largest increases in the number of females at work were shown in British Columbia, with a rise of 34·5 per cent, and in Alberta, where the number at October 1, 1943, exceeded by 30·2 per cent that indicated at the same date in 1942.

Firms in Toronto again reported the employment of a larger number, and a higher proportion of female workers than any other of the eight cities for which statistics are

regularly segregated in the monthly surveys; 107,903, or rather more than 21 per cent of the total women on the staffs of the co-operating employers throughout the Dominion were in the Toronto Metropolitan Area, where such workers constituted 404 per thousand of the reported aggregate of both sexes. Montreal took second place in the number of females, there being 101,277 women in recorded employment at October 1, 1943; this was slightly less than 20 per cent of the Dominion aggregate. The proportion of females in that city was 329 per thousand workers of both sexes. The lowest ratios at the date under review were in Windsor, Vancouver and Hamilton, in all of which, however, the proportions were considerably higher than at October 1, 1942.

Report on Employment Conditions for December, 1943

The following summary of employment conditions for the month of December has been prepared by the Research and Statistics Branch, Department of Labour, on the basis of reports received from Local Employment and Selective Service offices across Canada.

AT the close of December, 1943, developments in the labour market foreshadowed changing conditions in manpower requirements to be met in 1944.

Alterations in the war production program had, of necessity, entailed the diminution of staffs in certain industries, but to date the workers affected by such layoffs were for the most part being absorbed into other essential industries.

Three of the most productive months of the logging season were over, and the acute shortage of bush workers had caused output to drop behind schedule. During the vacation period, the number of men entering the logging camps fell off somewhat, but it was anticipated that in the new year the movement of men into the industry would accelerate. The cessation of construction work in most parts of the country was resulting in the direction of many labourers to the logging industry.

Maritime Region

Agriculture—In the Maritime Provinces the agricultural season had drawn to a successful conclusion, although it was reported that in some districts Fall ploughing had been curtailed by the early migration of farmers to the woods. There was a minimum of demands for permanent farm labour, as well as for a few assistants on dairy farms, none of whom were procurable.

Logging—Although a substantial number of men had been hired by authorized canvassers, and the number of vacancies had materially decreased for the logging industry, the majority of operators could use more men to advantage: in fact, Campbellton, which had curtailed its operations, was the only area in which no labour shortage existed. There was at present very little movement of skilled men to the woods, as few operators were working their camps during the holiday season, but full production was expected to begin in January, when Moncton, New Glasgow, Sussex and Truro would all be in need of a large number of sawlog cutters and general lumbermen.

Coal Mining—Slight change was recorded in the coal mining situation throughout the region. Although employment was improving somewhat with the return of soldier miners released on leave to work in the mines, and with the hiring of young men leaving school, a definite shortage of certified miners persisted, aggravated in some instances by poor housing facilities and the scarcity of board. Most of the collieries of the region had more than enough labourers on hand, until a greater number of certified men could be procured.

Manufacturing—A survey of the manufacturing field revealed alternating labour demands and labour layoffs, and it was apparent that while manufacturing industries on the whole were busy, there was no drastic shortage of workers (except in shipbuilding and repairs)—due undoubtedly to the absorption of men released from other projects.

At Charlottetown considerable difficulty was being encountered in the placing of some men who had worked in shipyards or steel works during the past few winters. The Pictou-New Glasgow area was reported as unwilling to accept any men from the Charlottetown area at the present time, and many of them were unsuitable for woods work. The closing down of two departments in the Trenton Steel Works at New Glasgow had resulted in the layoff of about 1,100 men and women. To date some 425 of these workers had been placed.

To offset such layoffs there was a continued demand for labour in various industries throughout the region. At Halifax, the shipbuilding industry needed a considerable number of skilled workers and expected to get a number of these from the Quebec area. Many skilled workers were also required by H.M.C. Dockyard, and very few had come from outside places to take employment there. At New Glasgow an additional 200 workers would be required at the beginning of the year

for car construction. At St. Stephen there was an urgent need for workers for the cotton mills, fish canning factories and lumber mills, and a shortage of skilled textile workers at Kentville was being met by a canvass for workers throughout the region.

Construction—With the closing-in of the season, the manpower needs of construction were by no means so exigent, and many men released by the termination of contracts made a pool available from which to draw for projects not yet completed. Halifax labour needs continued to be partially met from the Longshoremen's Reserve Labour Pool, but Moncton was experiencing difficulty in finding good labourers, housing conditions presenting a real drawback. Throughout the area, the need for unskilled labour and carpenters had shown a sharp reduction during the past few weeks. This reduction was partly seasonal and partly due to the completion of various projects. However, there was still an immediate demand for bricklayers, which could not be filled in the region.

Quebec Region

Agriculture—In this region, too, agriculture had concluded a profitable season, and many farmers were busy with fuelwood cutting to fill their own winter needs. Some had gone into the bush, or to other essential industries, but this migration had slackened and would probably not speed up again until after New Year's.

Logging—In the Quebec region the problem of fuelwood cutting had been practically solved, but not the difficulties of the pulpwood cutting industry. Quite a number of men had left the lumber camps for Christmas, and would not be back until January, with the result that operations were impaired. The labour picture throughout the province seemed to be rather an uneven one: recruiting for bushmen in Quebec, Three Rivers, Baie St. Paul, La Tuque, Rimouski, Coaticook, Riviere du Loup and the Eastern Townships was reported as having been quite satisfactory, and at Hull and Montreal the situation had improved materially. However, at Campbell's Bay and Rouyn, Shawinigan Falls and Val d'Or, shortages were still recorded.

Mining—In the mining field, the base metal mines of the region were producing to capacity, with labour demands reasonably well satisfied. At Campbell's Bay, experienced miners were needed for the lead and zinc and molybdenum mines, with qualified applicants scarce, and at Val d'Or both beginners and experienced workers were required for the gold mines.

Manufacturing—Extensive layoffs were an outstanding feature of the labour situation in certain of the manufacturing industries in the region. At Chicoutimi the aluminum plants were releasing or transferring workers from one department to another, and many farmers working there had returned home to cut fuelwood. At Levis and Quebec the shipbuilding yards had closed from December 23 to January 3.

In Montreal layoffs from munitions plants, and reduction in orders for women workers in war factories, made it easier to obtain assistants for the primary textile plants, with the result that sufficient female help was available for immediate needs, but the outlook as regards male workers was not so encouraging, partly because of the dearth of young male apprentices. The shortage of skilled operators in all the clothing manufacturing trades remained acute, and shoe operators were in great demand in all the factories, with the production of children's footwear seriously retarded by lack of the requisite labour.

Orders for workers in the aircraft industry in Montreal had been reduced, and only one local plant was continuing to hire new staff. Layoffs in the Montreal shipyards had come to an end, and the general slackening off in heavy industry was reflected throughout the local machine shops handling subcontracts. Orders for general machinists and toolmakers had declined, and only experienced and specialized workers were easy to place. Manpower layoffs were also quite extensive at Quebec, where the arsenals and shipbuilding yards were gradually decreasing their payrolls.

However, the Quebec region's manufacturing story was not solely one of dwindling manpower requirements. The aluminum plant at Ile Maligne was maintaining full production, and the paper mills there were carrying on about 50 per cent of their ordinary production. At Verdun the over-all labour shortage was still acute, with unskilled hands particularly needed by the steel foundries, as well as by the chemical, glass and electrical devices manufacturers. In all parts of the region, with the sole exception of Montreal, there was an urgent appeal for workers in textile plants, as well as hosiery and shoe factories.

Construction—The approach of Winter was gradually lessening the manpower needs of the construction industry in the Quebec region, as elsewhere in the Dominion. Chicoutimi reported that men had been laid off daily from Arvida and Shipshaw construction during the month. It was anticipated that there would be several hundred unemployed workers during the course of the coming Winter who would register for insurance benefits, unless they accepted work in the bush or outside districts.

The dam under construction at Lac Morin had been completed, and over 200 labourers

from this project were out of work, 25 of the number being carpenters for whom no openings were available in the area. The local office of St. Joseph d'Alma was encountering difficulty in placing elsewhere labourers released from the Ile Maligne project who could not be directed to the bush, either through inexperience or inability. Valleyfield, too, reported a surplus of 500 workers from completed construction projects.

In Montreal construction work in the high priority brackets had been reduced, though the supply of tinsmiths fell far short of the demand and orders for stationary engineers were becoming heavier. However, most local projects throughout the Quebec region—bridge building, roadwork and building—had either been completed or were being left unfinished until Spring.

Ontario Region

Agriculture—The continued mild weather had prolonged the agricultural season in the province, affording farmers an excellent opportunity to repair buildings and farm equipment and complete any late unfinished Fall chores. Many farmers were taking out their own fuelwood. There was little demand for farm labourers, and a few requests for helpers for dairy farmers.

Logging—The open season had to some extent been a deterrent to farmers enlisting for logging activities: a smaller number than usual had, so far, taken out seasonal permits. However, December showed a marked improvement both in production and in the number of men in bushwork.

At Kapuskasing, logging and pulpwood referrals had declined during the past several weeks, due both to the holiday season and weather ranging as low as 55° below zero. Sudbury reported the labour situation well in hand, but elsewhere the outlook was not so favourable. In Arnprior, Bracebridge, Renfrew, Pembroke and Peterborough there was a considerable demand for labour, and the majority of the lumber companies in these areas recorded a decrease in production between 35 per cent and 50 per cent from that of the same period a year ago.

Mining—It was reported that the labour requirements of the base metal mines of the region were on the whole, being adequately met. At Sudbury and Timmins the supply of labour suitable for underground mine work was coming in slowly, with some improvement, but a larger supply would be required to bring smelter operations nearer capacity production, and it had been suggested that men laid off from other industries, and capable of doing underground work, should be referred to these operations. At Kirkland Lake a few experienced miners were required for underground shaft sinking in the cobalt and silver mines, and the gold mines required 200 experienced miners and 300 beginners immediately.

Manufacturing — The manufacturing field presented no pressing difficulties from an employment point of view, except in the textile factories, where an acute lack of labour was curtailing essential production. Orders for semi-skilled and unskilled workers had fallen off steadily, with the one notable exception of foundry labour.

In Guelph a large textile plant had cancelled an expected layoff of 200 female workers, scheduled for December 15: their previous reduction of staff had been of assistance to other textile plants currently short of workers, but power sewing machine operators and general factory workers were still needed.

Layoffs in varying degrees had taken place in other industrial centres throughout the region,—such as Niagara Falls, Owen Sound, Stratford and Wallaceburg—but to counterbalance such staff reductions, Kingston and Kitchener, Port Colborne and New Toronto, were still reporting heavy demands for skilled and unskilled workers to step up important production schedules.

Toronto apparently had no major manpower difficulties, the chief need being for skilled mechanics such as toolmakers, lathe hands, and draughtsmen: auto mechanics were also much in demand, as were radio and woodworkers in low priorities, and skilled and unskilled men for the printing trade.

Construction—Most of the construction projects in the Ontario region were nearing completion, and with the over-all slowing down, there was very slight call for building tradesmen and construction labour. The demand for unskilled labour had also fallen off. At Midland skilled tradesmen were still required for the steel shipbuilding industry, and construction labourers and carpenters were urgently needed at New Toronto, where the supply was very scarce, and all available men were placed as rapidly as possible. Structural steel workers were also needed for the work of repairing lake freighters for the 1944 season, but with these few exceptions the construction season was practically at an end in Ontario.

Prairie Region

Agriculture—In spite of the advancing season, agriculture continued to make a steady—though not heavy—demand on the labour market in the prairie provinces. Farm helpers, particularly choremen, were in general demand, while in Saskatchewan and Alberta dairy men and ranch hands were also required, but were unavailable. Domestic help

for farmhouses was equally lacking, with high wages offering no inducement.

Logging—A serious situation still prevailed in the logging industry throughout the region, owing to the over-all shortage of bushmen. Slight relief had been afforded in some sections through the excellent work of the Farm Help Service in sending agricultural workers into the logging and pulpwood camps, and also through the aid given by members of the Canadian Forestry Corps, but on the whole the production of pulpwood would be greatly reduced, and in the lakehead district some small operators would be forced to suspend operations. In the Port Arthur area alone 5,000 bushmen were still needed, and at Fort Frances unfilled orders were high.

In Northern Manitoba the shortage of bushmen continued to be heavy, as most of the available manpower had gone into the base metal mines, which had filled their vacancies early. The situation in Northern Alberta, not so acute, was being met by the recruiting of farmers and Japanese.

Mining—Mining operations in the Saskatchewan coal fields were progressing smoothly, and all disputes seemed to have been satisfactorily settled. The Alberta fields were working again, also, (with the exception of several small local strikes in the Edmonton area) and there was a plentiful supply of unskilled labour on hand, but a big demand for certified miners in all districts. Some experienced agricultural workers were returning for the Winter months, and a good number of soldier coal miners were taking on their former jobs again, but the lack of housing accommodation was proving a serious drawback in many towns.

The base metal mines of northern Ontario had had to revise their estimates of labour requirements, and their new orders for miners would call for the minimum of workers required to maintain ore reserves and keep the mines operating without loss. With this object in view, the Port Arthur office was giving them all possible assistance in securing their estimated requirements.

Manufacturing—The manufacturing industry in the prairie region was, as a whole, in a better position than formerly as regards its labour supply, with an alleviation of earlier shortages. Packing plants and flour mills were running on full time schedules, while in Lethbridge and Winnipeg the termination of the seasonal run of the sugar factories had released a considerable number of workers to other essential industries.

There was, however, a persisting lack of experienced machine operators for the garment factories in Edmonton, and in the Winnipeg district war industries reported an acute shortage of qualified mechanics, auto mechanics and sheet metal workers. In the pulp and paper operations in the lakehead region women were now steadily employed in the place of men, and Wartime Housing had just completed the construction of a dormitory to house some 1,250 women and girls employed in the expanding aircraft plant at Fort William.

Construction—All through the region activity in the construction industry had practically come to a standstill, with major projects well on the way to completion. The only new construction presently under way consisted of projects such as the building of a new wing to the Deer Lodge Hospital, the erection of a number of four-room cottages in Regina and similar minor projects. With the close-up of the construction season, there was a surplus of carpenters and bricklayers in the region, who could not be placed again in this industry until the opening of the Spring building program, and consequently would in all probability go to lumber camps or essential industry.

At Fort Frances, the Hydro Electric Power Company had completed a new transmission line on November 28: a number of men (mostly regular Hydro employees) were retained to clean up the right-of-way and do similar work, but a large number of those released had found employment in woods industries.

Pacific Region

Agriculture—While the agricultural season was at an end, the shortage of workers continued in the dairying areas of the region, with no appreciable assistance afforded by agricultural helpers seeking off-seasonal employment. On Vancouver Island this scarcity of labour was particularly acute.

Logging—In the logging industry many orders for workers in the coastal areas (including Duncan, Nanaimo and Vancouver) had been cancelled, or merely suspended, in preparation for the annual shutdown of camps during the Christmas and New Year season. The date of renewal of operations was in some cases indefinite,—dependent on weather conditions, availability of labour and (in the case of the sawmills) the supply of logs.

In the interior, efforts were being made to supply long-standing labour shortages by recruiting Japanese, and the canvassing of members of the Canadian Forestry Corps. Some agricultural workers were reported to be taking employment in the logging camps, but the numbers as yet were small, and the movement of members of the C.F.C. to the industry had slackened off during the transfer of their dispersed centre from Camrose to Vancouver.

Mining—The base metal mines were still calling for labour: Nelson was in great need of experienced muckers and Cranbrook reported that while the Kimberley mine had

benefited by the appeal to agriculturists to take off-seasonal employment in that industry, there was still a great lack of necessary labour. Housing for married men was scarce, but there was ample bunk-house accommodation for others. At Prince George, the two large mercury mines of the district had full crews and production was normal. The labour requirements of all other small mines in the area were also filled, and orders for gold miners had not been acted upon owing to the urgent demand of more essential industries.

Manufacturing—In the manufacturing field, there was a repetition of the layoffs in other parts of the Dominion. New Westminster reported continued decreasing of the staffs of engineering and metal manufacturing plants, and in Victoria one of the largest shipyards continued a gradual reduction of personnel, who were being absorbed by another major shipyard. There was still a demand for good mechanics, and the engaging of unskilled labour was contingent on the number of skilled mechanics procured.

In Vancouver the shipbuilding industry was still experiencing a shortage of electricians, sheet metal workers, pipe and steam fitters, as well as labourers and helpers. The demand for electricians had been remedied to some small degree through the employment of soldier-electricians, and further assistance from this source was expected. The demands for mechanics in Vancouver plants had increased slightly, with the result that men not fully qualified were being taken on. There was also a call for second and third class engineers for out-of-town jobs, and fourth class for Vancouver proper. The needs of local foundries had fallen off, however, and for the first time in many months a slight surplus of moulders, coremakers and chippers was noted.

At Prince George several of the larger sawmills had completed the season's cut and closed down for the Winter, but some of the smaller mills were desirous of commencing operations, and had placed more than 100 orders, for which applicants were not available.

Construction—There was a marked easing of the labour situation in construction throughout the Pacific region. In Victoria the usual temporary shutdown due to weather conditions was in progress, and the only shortage recorded was for construction labourers, who were not procurable. The National Housing Registry reported that 860 families in Victoria were awaiting suitable accommodation, and an early improvement of this situation was expected through the Government's conversion scheme.

At Prince Rupert the labour situation had eased markedly, and orders for Wartime Housing and naval construction work had been filled in sufficient number to relieve the previous grave shortage which had been handicapping the progress of important projects. Work on the Prince Rupert-Cedarvale Highway had subsided for the Winter: section No. 1 at the west end of the road would continue work, but only maintenance and machinery repair crews would be retained on the other six sections. Vancouver, usually beset with construction labour difficulties, reported a marked improvement in the man-power situation, with orders for all types of workers filled without much trouble.

Throughout the Dominion

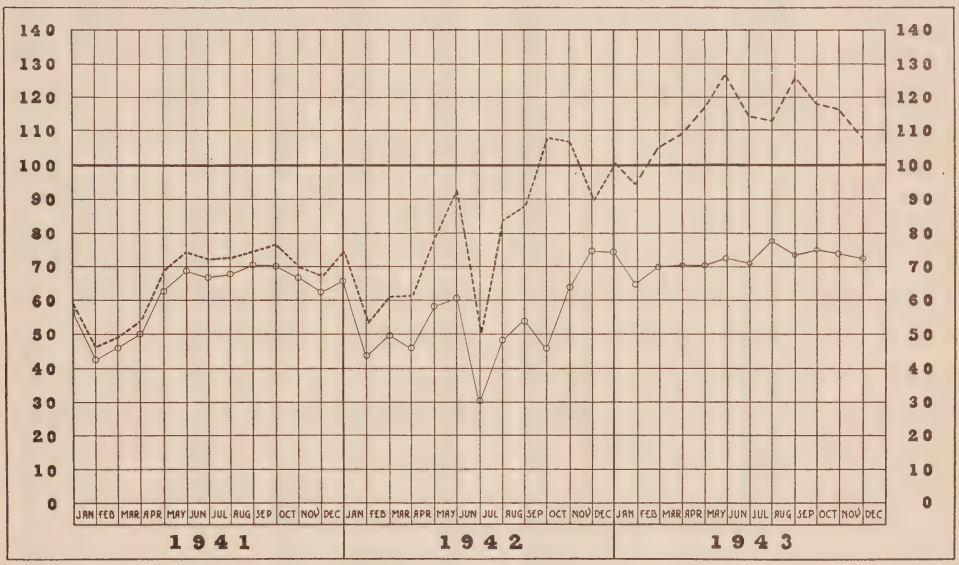
Transportation—There was a continuing demand for crew and maintenance workers on the railways, and snow shovelling gangs would also be in demand. The close of navigation on the Great Lakes and on the St. Lawrence had laid up a large number of ships, and the crews thus released were being paid off and referred to bush work or other essential industries, for employment until the opening of Spring navigation.

Services—The situation was static, with domestic help in as constant demand as ever, but the seasonal requirements for Christmas helpers well satisfied.

Applications for Employment, Vacancies and Placements, November, 1943

REPORTS received from Employment and Selective Service Offices during the five-week period October 29, to December 2, 1943, showed an increase of 1·4 per cent in business transacted when compared with the previous period of four weeks duration ending October 28, but a loss of 22 per cent when compared with the month of November, 1942, this computation being based on the average number of daily placements.

The accompanying chart shows the trend of employment since January, 1941, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at Employment and Selective Service Offices throughout Canada. It will be seen from the graph that the curves of vacancies and placements in relation to applications followed downward courses, the ratio of vacancies to each 100 applications being 107·7 during the five weeks ending December 2, in contrast with 115·9 during the preceding four weeks ending October 28, and 88·6 during the month of November, 1942. The



ratio of placements to each 100 applications during the period under review was 72·4 compared with 73·7 for the four weeks October 1, to October 28, 1943, and 74·3 during November of the previous year.

The average number of vacancies reported daily by employers to the offices throughout Canada during the five weeks October 29, to December 2, 1943, was 9,385 as compared with 9,798 during the preceding four weeks and with 9,649 in November a year ago.

lar employment were 184,872 of which 114,510 were of males and 70,362 of females, while placements in casual work totalled 4,538. The number of vacancies reported by employers were 186,910 for males and 94,626 for females, a total of 281,536, while applications for work numbered 261,309, of which 158,031 were from males and 103,278 from females. Reports for the previous period October 1, to October 28, 1943, showed 225,354 positions available, 194,306 applications made and 143,230 place-

POSITIONS OFFERED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications———— Vacancies - - - - - - - - - Placements—o—o—o—o—o—o

The average number of applications for employment received daily by the offices during the five weeks ending December 2, was 8,710 in contrast with 8,448 in the four weeks ending October 28, and with 10,886 during November a year ago.

The average number of placements made daily by the offices during the period October 29, to December 2, was 6,314 of which 6,163 were in regular employment and 151 in work of one week's duration or less, as compared with a total daily average of 6,227 during the previous period ending October 28, 1943. Placements in November a year ago averaged 8,091 daily, consisting of 7,897 in regular and 194 in casual employment.

During the five weeks ending December 2, 1943, the offices referred 262,410 persons to employment and effected a total of 189,410 placements; of these, the placements in regu-

ments effected, while in the month of November, 1942, there were recorded 241,204 vacancies, 272,138 applications for work and 202,259 placements in regular and casual employment.

The following table gives the placements effected by the Offices, each year, from January, 1933, to date:—

Year	Placements		
	Regular	Casual	Totals
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450
1937	275,300	114,236	389,536
1938	256,134	126,161	382,295
1939	242,962	141,920	384,882
1940	320,090	155,016	475,106
1941	316,168	191,595	507,763
1942	809 983	85,638	895,621
1943 (48 weeks)	1,779,956	50,051	1,830,007

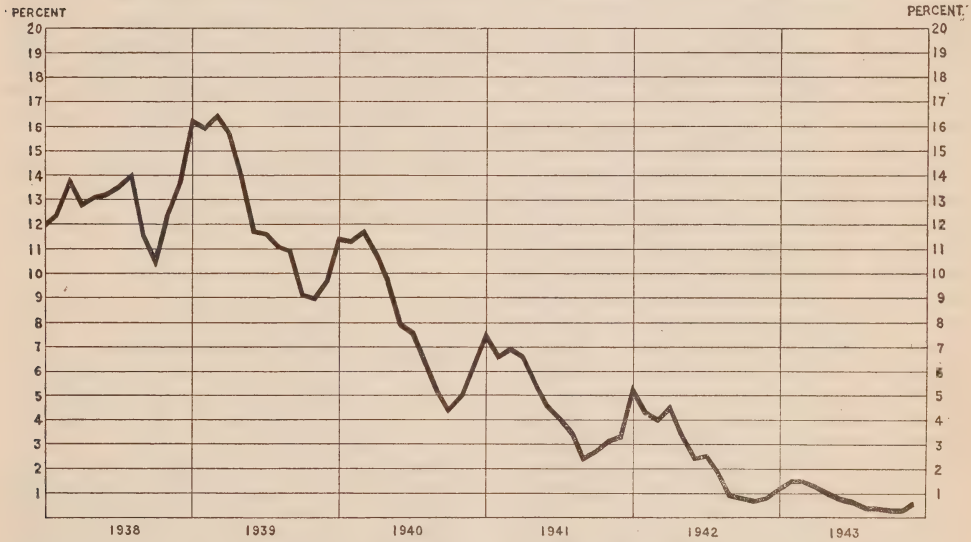
Unemployment in Trade Unions at the Close of November, 1943



UNEMPLOYMENT in the following report has reference to involuntary idleness, due to economic causes. Persons who are without work, on account of sickness, a strike, or a lockout, or who are engaged at work outside their own trades, are not considered as unemployed. As reports from unions making returns vary from month to month with consequent variations in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only to the organizations reporting.

Returns were tabulated in November from 2,359 local trade union organizations. These had a combined membership of 483,933 persons of whom 2,674, or a percentage of ·6 were listed as unemployed, in comparison with percentages of ·3 in October and ·8 in November a year ago. The slight recession which occurred in November was due to a large extent to the moderate contractions in work afforded union members in the manufacturing division and in the building and construction trades. In the former group, the decline in activity was due largely, to some slowing up in the demand for certain classes of war supplies, while in the latter case, it was due, as is usual in the latter months of the year, to the seasonal conditions affecting members in these trades. These contractions in available work were offset to some extent by the slightly better situation indicated by union members in the service division; in the remaining groups, the few variations that were manifested were insignificant.

The unemployment percentages for the provinces appear in Table I. As will be observed therein, these ranged from ·2 in British Columbia to 2·9 in Nova Scotia. As compared with the situation in October, slightly better conditions were apparent for union members in British Columbia, while in New Brunswick and Manitoba the percentages remained unchanged. Slightly less work was apparent in Quebec, Ontario and Alberta, while in Saskatchewan there was a moderate employment recession. In Nova Scotia a rather substantial contraction occurred, which was due to the curtailment of certain classes of war production. In comparison with conditions in November, a year ago, appreciable betterments were reflected in returns received from union members in New Brunswick, Quebec, Manitoba and Alberta, while in Ontario and British Columbia employment levels were slightly higher. On the other hand, in Saskatchewan there was a slight decrease in available work. Owing to the decline, as already noted, in the production of certain classes of war supplies, there was also, as was seen in the previous comparison, a rather noteworthy employment recession for union members in Nova Scotia.

A separate compilation is made each month, of unemployment among trade union members in the largest city in each province with the exception of Prince Edward Island. At the close of November, the percentages of members shown as without work in these centres ranged from less than 1 per cent in

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADE UNIONS

Saint John to ·6 per cent in Montreal and Edmonton. In comparison with the situation in October, minor improvements were observed in Halifax and Vancouver, while the unemployment percentage for Winnipeg remained unchanged. On the other hand slightly lower employment levels were indicated in Saint John, Montreal, Toronto, Regina and Edmonton. As compared with conditions in November, 1942, noteworthy improvement was manifested in Saint John and Halifax, while in Winnipeg, Edmonton and Vancouver, the employment levels were slightly higher. The percentage of union members without work in Montreal remained unchanged, while in Toronto and Regina slight employment contractions were indicated.

The accompanying chart illustrates the trend of unemployment from January, 1938 to date. The point of the curve in November was at a slightly higher level than in the previous month, thus reflecting a slight reduction in work. In comparison with the situation in November, a year ago, the level of the curve was slightly lower, thus indicating a minor employment increase over that period.

For the manufacturing industries, 863 reports were tabulated, having a total membership of 290,330 persons, of whom 1,195, or a percentage of ·4 were without work; this was identical with that shown in November, a year ago; the percentage for this group for October was ·2. In comparison with the previous month a slight betterment was in evidence among woodworkers and for union members in the animal products group, in which are included butchers, leather and fur workers. Among unclassified manufacturing members, there was an appreciable expansion in activity to full employment and it was noted also, for union members in the non-ferrous metals division in which are covered such trades or occupations as metal polishers, jewellers and aluminum workers, that a very minor increase in work resulted in all of these members being fully engaged at the close of November. Full employment prevailed at both dates for electric current employees, etc., textile and carpet, hat, cap and glove, rubber, clay, glass and stone and chemical workers: among garment union members whose trade includes both men's and women's clothing workers and among members in the printing trades the percentages of unemployment remained unchanged. On the other hand, union members in the vegetable and mineral products groups indicated very slight reductions in activity, while among those in the iron and steel trades, a moderately lower employment level was apparent; this was due, as pointed out in foregoing comparisons, to the curtailed production in certain war industries. In comparison with the situation in November, 1942, unclassified workers registered a noteworthy employment expansion, while moderately higher employment levels prevailed among paper-makers, union members in the printing trades and in the animal products group. As was noted in the previous comparison, also, employment in the iron and steel group was at a moderately lower level.

Reports were received from 60 unions of coal miners. The total membership in this division was 21,887 persons, of whom 21, or a percentage of ·1 were without work. No one was reported as unemployed at the close of the preceding month, while in November, a year ago, the percentage of those without work was ·4. As in October, all union members were reported as working in Nova Scotia, New Brunswick and British Columbia, while in Alberta there was a slight recession. In comparison with the situation in November, 1942, a fair expansion only, resulted in full employment for Nova Scotia members, while in New Brunswick and British Columbia no one was

reported as without work at either date; in Alberta there was a minor employment decline.

In the metallic ores and non-metallic minerals group, returns were received covering 1,738 and 4,159 members, respectively. No unemployment was reported in either group during the months of October and November, while for November, 1942, reports were received from the non-metallic minerals division, only; these members indicated an unemployment percentage at that time of 1·0.

Unions in the building and construction trade returned 210 reports, having a total membership of 35,217 persons of whom, 760, or a percentage of 2·2 were listed as unemployed, in comparison with percentages of 1·2 in October and 3·2 in November, a year ago. In comparison with conditions at the close of the preceding month, the situation for granite and stonecutters was slightly improved, while bridge and structural iron workers and wood, wire and metal lathers, as in October, did not indicate any unemployment. Among electrical workers and plumbers and steamfitters very slight contractions were apparent, while for painters, decorators and paperhangers, bricklayers, masons and plasterers and unclassified building workers, there were fair declines in available work. The employment level for carpenters and joiners was appreciably lower, as is usual at this time of the year. Among steam shovelmen the percentage of members listed as without work, was considerably higher, but as the membership is small, very few were involved. In comparison with the situation in November, 1942, unclassified building members were much better employed, while for bridge and structural iron workers, bricklayers, masons and plasterers, electrical workers, painters, decorators and paperhangers and plumbers and steamfitters, employment levels were slightly higher. Although the change was very minor, a favourable tendency was reflected likewise in reports received from unions of carpenters and joiners; this organization has the largest membership of any group in the construction trades. On the other hand, among the comparatively small group of steam shovelmen the unemployment percentage was up substantially, but this change had but little effect on the group percentage as a whole.

For the transportation industries, 890 returns were tabulated, having a combined membership of 86,156 persons. Of these, 456, or a percentage of ·5 were without work. This was identical with that registered in October; in November, 1942, the percentage was 1·0. Approximately 80 per cent of the entire group membership is in the steam railway division. The percentage of those without work in this group was up slightly, as was the case, likewise for navigation members; among street and electric railway employees and teamsters and chauffeurs the variations were negligible. As compared with conditions in November, a year ago, the employment level for union members in the steam railway division was appreciably higher; noteworthy improvement was apparent likewise, for members in the comparatively small navigation group, while among street and electric railway employees and teamsters and chauffeurs there were very minor betterments.

Among the union membership in the retail and wholesale trade no unemployment was observed in November; this was true, also, of the previous month and in November a year ago. In the service group from which reports were received covering over 25,000 members and which includes occupations such as civic employees, hotel and restaurant employees, theatre and stage employees, barbers, stationary engineers and firemen and unclassified workers, there was a slightly higher employment level; the unemployment percentage was identical with that shown in November, 1942.

Returns were tabulated from unions of fishermen and lumber workers and loggers, covering total memberships, numbering, respectively 275 and 5,445 persons. As in October and in November a year ago, union members in the latter group did not show any unemployment; while for fishermen full employment prevailed in November, thus reflecting a marked improvement; in the corresponding month, a year ago, the percentage of unemployed members was ·4.

Table I shows by provinces the average percentages of union members, who were unemployed each year from 1932 to 1942, inclusive, and also, the percentage of unemployment for November of each year, from 1932 to 1941, inclusive, and from November, 1942, to date. Table II summarizes the returns in the various groups of industries for the months included in Table I.

Labour Law

Recent Regulations Under Dominion and Provincial Legislation

Seamen—Unemployment Insurance—Pensions in Manitoba—Quebec Forest Workers and Minimum Wages—Electrical Workers and Guides in Saskatchewan

ARRANGEMENTS have been made to facilitate the repatriation of merchant seamen who have been detained by an enemy or neutral country after serving on a Canadian ship, and who may be involved in exchanges of prisoners of war. Two amendments have been made in the Unemployment Insurance Act excepting truckers from the Act and clarifying the exemption of members of the Armed Forces. The special orders issued under the Act excepting specified temporary or part-time employments are also summarized. Other Dominion Orders in Council passed recently are listed below.

In the provincial field, British Columbia has amended the regulation declaring the jewellery trade subject to the Apprenticeship Act. Manitoba has issued regulations to clarify the position of old age and blind pensioners after it signed a Supplementary Agreement with the Dominion Government to provide for a war-time increase in the pensions. Quebec has relaxed certain of its forest regulations because of labour shortages. It has also reduced the assessment on employers for defraying the costs of administering the Minimum Wage Act. The reduction in levy does not apply to timber operators who are now governed by special bylaws relating to payment of the levy. In Saskatchewan the regulations governing the licensing of electrical workers and guides have been revised.

Dominion

Seamen

Seamen who have been detained by enemy or neutral countries after service on Canadian ships have been declared within the "non-immigrant classes" specified in the Immigration Act by Order in Council P.C. 9002 passed November 23 under the War Measures Act. They are, therefore, free to enter Canada notwithstanding the provisions of the Immigration Act. They may hold this status for the duration of the war and six months after, but lose it if they leave Canada during this period. This measure was considered necessary to facilitate the repatriation of seamen who have served on Canadian ships and who may be involved in exchanges of prisoners of war. The Department of Transport will assume responsibility for maintenance and repatriation expenses of such seamen.

In addition, the Order in Council authorizes the extension to such seamen of the provisions of Order in Council P.C. 164/6991 of September 4, 1943 (L.G., 1943, p. 1417) which authorizes free medical treatment for seamen who have served in war zones and who are not eligible for treatment under Part V of the Canada Shipping Act. If any of the repatriated seamen are eligible for disability pension under P.C. 104/3546 of April 30, 1942 (L.G., 1942, p. 691) they may obtain medical treatment and hospital allowances under the terms of P.C. 91 of January 16, 1936. The Department of Pensions and National Health will pay for the medical treatment of such seamen in Canada, and will also bear the cost of any treatment given in the United Kingdom while the seaman is undergoing repatriation provided the treatment has been approved by the Overseas Representative of the Department in the United Kingdom.

Unemployment Insurance Act

Armed Forces. An amendment in Part II of the First Schedule to the Act, which lists excepted employments, was made by Order in Council P.C. 9784 passed December 24 under the War Measures Act. One provision in the original Schedule designated as non-insurable, employment in the Permanent Active Militia, the Royal Canadian Navy, the Royal Canadian Air Force, and the Royal Canadian Mounted Police. The great expansion of the Armed Forces during the war has necessitated a revision of this provision which now excepts all employment as a member of any branch of His Majesty's Naval, Military or Air Forces or the Royal Canadian Mounted Police. In the preamble it is stated that Parliament will be asked to amend the Act to this effect as soon as possible.

Truckers. An amendment in the Contribution Regulations (L.G., Oct., 1943, p. 1414) authorized by Order in Council P.C. 8914 of

November 23 and gazetted December 11 excepts truckers from the Act. A "trucker" is defined as "a person who, for remuneration, contracts for the conveyance of things by means of a motor or horse-drawn vehicle and who is the owner of such vehicle either absolutely, partly or conditionally."

Special Orders. The Unemployment Insurance Commission has power under section (p) of Part II of the First Schedule to the Act to issue special orders declaring any class of employment an employment to which the Act does not apply on the ground that it is ordinarily adopted as subsidiary employment only and not as a principal means of livelihood. To date, 15 special orders have been issued designating the following employments as not insurable (the date of each order and, if not immediately effective, the date on which it became effective, are indicated):

(*a*) Seasonal employment of persons not in possession of an insurance book, in factories for canning or processing food products, when it is known that their employment will be for a period not exceeding 15 weeks in the 12-month period ending March 31 in any year. May 12, 1941; July 1, 1941.

(*b*) Temporary employees engaged in connection with federal, provincial and municipal elections, such as enumerators, poll clerks, returning officers and those engaged in compiling voters' lists, and census enumerators, May 12, 1941; July 1, 1941.

(*c*) Temporary employees engaged in connection with circuses, carnivals, exhibitions, fairs or race meetings, when it is known that the employment will not be for a period exceeding 15 weeks within the 12-month period ending March 31 in any year. This exception does not apply to persons already in possession of an insurance book. May 12, 1941; July 1, 1941.

(*d*) Employment as a janitor or a caretaker where the remuneration of the person employed is solely pecuniary and is less than a daily average of 90 cents. October 6, 1943.

Note: This order supersedes one passed October 2, 1941, which also applied to janitors and caretakers paid no pecuniary remuneration.

(*e*) Temporary employment from December 13 to December 31 (inclusive) of students on vacation from a school, college or university at which such students are in regular daytime attendance during the school term, if such students are not in possession of an insurance book. October 28, 1941.

(*f*) Seasonal employment in apple packing of any person not in possession of an insurance book, if it is known that his employment will be for a period not exceeding 15 weeks in the 12-month period ending March 31 in each year. November 28, 1941.

(*g*) Casual employment of not more than six consecutive days in connection with snow or sleet removal provided that the employer has not in his custody the insurance book of any person so employed or that no person so employed has in his possession an insurance book covering previous employment. January 21, 1942.

(*h*) Employment by any telephone company or system of any person who has never been in possession of an insurance book if the period of employment does not exceed 10 days in any month. March 19, 1942; March 24, 1942.

(*i*) Employment for a period not exceeding six weeks of any person to whom an insurance book has never been issued, in connection with the plebiscite held on April 27, 1942. April 21, 1942.

(*j*) Employment by a surveyor of any person who has never been in possession of an insurance book if the period of employment does not exceed 10 days in any month. November 10, 1942.

(*k*) Employment by a grain elevator company at an elevator of any person who has never been in possession of an insurance book, if the period of employment does not exceed 10 days in any month. February 23, 1943.

(*l*) Employment of any person who is in receipt of fixed annual remuneration not exceeding in value $250 a year. October 6, 1943.

Note: This order supersedes one passed June 10, 1943, applying to employment by a municipal authority of any person who occupies a position the remuneration for which is a fixed annual sum not exceeding in value $250 a year.

(*m*) Employment by an electric power company or system of any person who has never been in possession of an insurance book and whose usual occupation is farming or forestry if the period of employment does not exceed 10 days in any month. June 29, 1943.

(*n*) Employment as a charwoman for less than four hours a day outside the ordinary business hours of the employer. November 3, 1943.

War Measures Act

A new office consolidation of the National Selective Service Civilian Regulations (L.G., 1943, p. 19) with amendments up to December 2 was published in the December 27 issue of Canadian War Orders and Regulations, 1943. P.C. 9743 of December 24 clarifies the relation between the Regulations and the Order in Council (P.C. 946) of February 5, 1943, providing for the control of Japanese persons in Canada (L.G., 1943, p. 390) by stipulating that P.C. 946 does not limit the operation of the Regulations, but in the case of conflicting orders, those under P.C. 946 shall prevail over orders under the Civilian Regulations. P.C. 9440 of December 10, defining the status of refugee immigrants declares them subject to the National Selective Service Civilian Regulations. P.C. 9079 of December 7, prescribes the conditions of work for military personnel employed on railway maintenance work (L.G., Dec., 1943, p. 1616).

The following Orders in Council are summarized in the Manpower section or in the Notes of Current Interest: P.C. 8789,

December 24, amending the National Registration Regulations; P.C. 9919, December 31, amending the National Selective Service Mobilization Regulations (L.G., 1943, p. 153) in regard to the duties of employers of men liable for military service; P.C. 9498, December 14, appointing a Royal Commission to inquire into the welfare of Japanese in settlements in British Columbia administered by the Department of Labour; P.C. 9746, December 21, establishing an Economic Stabilization Information Committee.

Provincial

British Columbia Apprenticeship Act

An amendment in the regulation adding the "jewellery manufacture and repair trade" to the schedule of trades to which this Act applies was gazetted on December 30. The designation now reads: "Jewellery manufacture and repair trade, which, without limiting the generality of the foregoing, includes setting, polishing, plating, carving, and engraving."

Manitoba Old Age and Blind Persons' Pensions Act

Six new regulations under this Act were gazetted December 4 but are effective from September 1, 1943. They relate to the amount of pension payable under the Supplementary Agreement made between the Dominion Government and the Manitoba Government on September 1 to implement the provisions of Dominion Order in Council P.C. 6367 of August 10 (L.G., Sept., 1943, p. 1295). The latter provided for a wartime increase not exceeding $5 a month in old age and blind pensions. The Manitoba Legislature by an Act assented to on March 17, 1943, had also provided for a supplementary allowance of $1.25 a month to pensioners (L.G., May, 1943, p. 699).

The new regulations stipulate that if a pension calculated under the Supplementary Agreement of September 1 is equal to or greater than the former pension including the supplementary allowance of $1.25, no further supplementary allowance will be paid by the Manitoba Government. If a pension calculated under the Supplementary Agreement is less than the former pension including the supplementary allowance, the Manitoba Government will pay an amount sufficient to bring the pension up to the amount received by the pensioner before the Supplementary Agreement was signed. However, if the pension calculated under the Supplementary Agreement decreases due to an improvement in the economic circumstances of the pensioner, he will receive an amount equal to his former pension calculated before the Agreement was signed plus the allowance of $1.25 less the amount by which his circumstances have improved. The regulations also stipulate that a person who becomes pensionable after September 1, the date of the Supplementary Agreement, is to be treated as if he was a pensioner immediately before September 1, provided account is taken of changes occurring in his economic status from time to time.

Quebec Lands and Forests Act

Because of the scarcity of labour in the logging industry, scalers have been authorized by an Order in Council gazetted November 20 to scale four-foot wood by the apparent cord without an assistant provided that the measurement is made with a rule or stick and not with a tape. This relaxation of the Woods and Forests Regulations is to be effective during the current forest-operating season.

Another Order in Council gazetted December 4 relaxes for the current season the Order in Council of last April which required scalers to determine the volume of sawlogs by measuring both ends of each log. The relaxation was considered necessary to enable the industry to become familiar with the proposed new practice of two-end measurement and so as not to aggravate the difficulties of recruiting labour at the present time. It permits operators to continue scaling sawlogs at the small end only, provided they determine the volume of the logs by the application of specified correction factors and calculate the wages of pieceworkers according to the two-end measurement.

Quebec Minimum Wage Act

By-law B-1 Revised. Two amendments in by-law B-1 Revised, which provides for a levy on payrolls to defray the cost of administering the Minimum Wage Act, were gazetted and effective on December 24 (L.G., 1941, pp. 31, 653; 1942, p. 60; 1943, pp. 154, 267, 1034). One amendment further reduces the assessment from one-eighth of one per cent to one-tenth of one per cent. The reduced rate applies to the levy on wages paid after July 1, 1943. All employers whose employees are subject to any minimum wage orders must pay the levy.

The second amendment stipulates that cost-of-living bonuses are not subject to levy. In addition, it repeals the amendment of last June (L.G., July, 1943, p. 1034) which made special arrangements regarding the payment of levy for employers in forest operations, and declares that by-law B-1 does not apply to timber operators who are now governed by the new by-laws B-1-B and B-1-C.

By-laws B-1-B and B-1-C, also gazetted December 24, re-enact the provisions of the repealed amendment of last June regarding the levy on employers in forest operations. For employers in these operations the levy remains at one-eighth of one per cent, and it is expressly stated that employers may not charge any portion of it to their employees. Under by-law B-1-B employers engaged in timber-driving operations must pay by February 10 of each year a levy on wages paid to timber drivers in the preceding calendar year. By-law B-1-C requires employers in other timber operations to pay by June 10 a levy on wages paid in the preceding 12 months from May 1 to April 30.

Additional provisions in the new by-laws are similar to those in by-law B-1. They stipulate that employers must submit with their remittance of the levy, a statement showing the wages paid in the levy period, the amount subject to levy and the amount of levy due. Interest at five per cent per annum must be paid on unpaid assessments more than 15 days overdue. The value of board, lodging and other benefits supplied by the employer, any amounts paid as indemnity in lieu of notice or for holidays, absence through sickness or accident, and living allowances are subject to levy. Cost-of-living bonuses are exempt.

Saskatchewan Electrical Inspection and Licensing Act

A consolidation and revision of the regulations under this Act were gazetted on December 23, replacing regulations issued in 1935 and amendments. They deal with the licensing of electricians, journeymen, electrical contractors and supply houses, and with the inspection of electrical apparatus and work.

Under the Act no one may obtain a contractor's licence unless he holds a journeyman's licence, or employs a licensed journeyman. Journeymen are defined in the Act as persons competent to install, repair or alter electrical apparatus for a contractor without supervision. The regulations stipulate that candidates for a full journeyman's licence must submit proof of completion of apprenticeship of four years (or three years if they have completed an electrical course) and must undergo a written or practical examination, or both on the requirements of the Canadian Electrical Code, the provisions of the Act and the regulations, and any local by-laws which may apply. The examiners will also review the inspector's reports of the work upon which the candidate has been employed. Candidates for a restricted journeyman's licence, which limits the holder to certain types of work, must take a written or practical examination, or both, in the branches of electrical work to which the licence applies, and will also be examined on the legislation if the examiners consider it necessary. A journeyman's licence may be suspended by the Saskatchewan Power Commisison and three suspensions automatically cancel the licence. Causes for suspension include consistently poor work, engaging in the business of, or posing as, an electrical contractor without a contractor's licence, and in the case of a restricted licensed holder, performing work not specified in the licence.

Under the Act all public buildings and business establishments such as educational institutions, mines, factories, etc., must employ licensed electricians to take charge of the operation or maintenance of electrical installations machinery, or other apparatus. The regulations stipulate that candidates for an electrician's licence must pass a written or practical examination, or both, to prove their competency to take charge of electrical installations or machinery. Such a licence may be suspended in the same manner as a journeyman's licence.

The examination fee for a journeyman's or an electrician's licence is $2, and $4 in the event of a re-examination. The licence fee is $1 per annum.

Saskatchewan Game Act

Revised regulations relating to the licensing of guides were also gazetted on December 23, replacing regulations of 1936. They prohibit unlicensed persons from being employed or acting as guides for persons hunting game. If the Game Commissioner considers that an applicant who is a resident of the province is properly qualified, he will register him as a guide. The licence is $5 per annum. Licences expire on December 31. Guides are responsible for extinguishing fires, must report any infractions of the Game Act and may not exercise their rights under a hunting licence while acting as a guide.

Decisions of the Labour Court of Ontario

Union Which Had Been Refused Certification Not Entitled to Make New Application Until After One Year

ON November 27, Mr. Justice McFarland dismissed a second application by the United Electrical Radio and Machine Workers of America to be certified as the collective bargaining agency for the employees of York Arsenals Limited. The first application was dismissed by Mr. Justice Roach on October 1 on the ground that the union had not made out a *prima facie* case to show that it represented a majority of the employees (L.G.,

Dec. 1943. p. 1749). The Union instituted new proceedings because it claimed that it had overcome the numerical inferiority which was one of the reasons for the dismissal of its first application. There was no intervener.

When Mr. Justice Roach heard the first application, the union had only 515 members among the approximately 2,200 employees who were entitled to be represented for purposes of collective bargaining. The union now filed in evidence forms signed by nearly 1,400 employees authorizing the union to act as their collective bargaining agent.

The Court noted that these forms were not applications for membership in the union and imposed no liability on the signatories, not even the payment of dues. It held, therefore, that the change of circumstances which was alleged by the applicant was not established by the evidence.

In any case, it stated that the present proceedings, "if allowed, would constitute an unconscionable result, never contemplated, in my opinion, by the Legislature." The result would be that an applicant could make application after application while the employer, except in case of fraud, was prevented by the statute from taking any action until after a year. The Court considered that the present proceedings were in effect a violation of sec. 15 (2) of the Act which provides that there will be no appeal from a decision of the Court. It therefore ordered that no further proceedings could be taken in the matter until after October 1, 1944, one year after the date of the original decision of Mr. Justice Roach. *United Electrical, Radio and Machine Workers of America v. York Arsenals Limited,* (1943) Ontario Weekly Notes 781.

Employees' Council Certified as Collective Bargaining Agency for Employees of Aluminum Company of Canada Limited, Kingston

A case involving the Aluminum Company of Canada Limited, Kingston Works, was decided by Mr. Justice McFarland on December 9, when he granted the application of the Employees' Council, Aluminum Company of Canada Limited, Kingston Works, to be certified as the collective bargaining agency for the employees of the plant. There were two interveners: the International Association of Machinists, which claimed to represent a group of skilled workers, and the Aluminum Workers of America, which claimed to represent all the employees of the plant.

Organization of the Employees' Council was started in August, 1941, when 105 representatives were elected to committees of the nine departments of the plant. A constitution was adopted on December 15, 1941, after delegates from all departments had visited plants in which similar councils were operating and a report had been made to the 105 representatives. Under the constitution the Employees' Council was composed of the chairmen of the nine departmental committees and the chairman of the Council was elected by a secret vote of the members.

An agreement was signed on December 22, 1941, between the Council and the respondent company by which the latter recognized the Council as the sole bargaining agent of the employees. A draft of the agreement was posted on the notice board before its execution and copies of the agreement as concluded were both posted and circulated. A new agreement was signed on December 8, 1943. Before it was signed it was considered by the Council and all but one of the departmental chairmen signed it. In addition it was submitted to the departmental committees for discussion and the changes were posted. Some objections were made to it before its execution. These were considered by the Council and some of them were accepted.

The Court noted that all the witnesses who were employees, including those called by the interveners, were unanimous in stating that they had no complaint as to the manner in which the Council looked after their interests or as to the wages they were receiving.

The Court felt that there was considerable merit in the contention of the International Association of Machinists that they were peculiarly fitted to represent their group of skilled workers. It attached more importance, however, to the fact that this group was essentially temporary and would become insignificant as soon as the war was over.

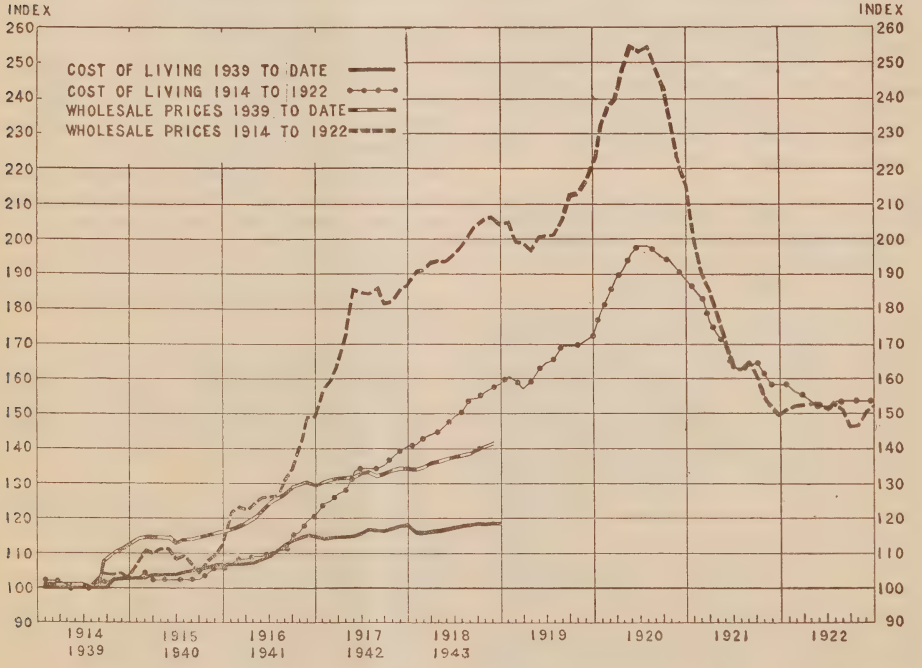
In regard to the application of the Aluminum Workers of America, the Court stated that it

> presents a much less attractive picture. Most of their representatives were active members of the Council up to within a few days of the hearing. They then joined a violent campaign to secure members for the Aluminum Workers of America.

The Court decided that no other conclusion was possible from the evidence than that the Employees' Council represented a substantial majority of the workers and was entitled to be certified. — *Employees Council, Aluminum Company of Canada Ltd., Kingston Works, v. Aluminum Company of Canada Limited, Kingston Works, Dec. 9, 1943.*

Prices

Prices, Retail and Wholesale, in Canada, December, 1943



Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

THE Dominion Bureau of Statistics official cost-of-living index recorded a decline of 0·1 points to 119·3 between November and December, 1943. There was a net rise in this index of 0·5 points during 1943, while the wartime increase has been 18·4 per cent. Weakness in December was due to price declines in the food group coupled with rebates on electricity rates in certain cities. Lower quotations for beef, pork, oranges, turnips and cabbage outweighed increases for butter, eggs and potatoes to lower the food index 0·4 to 132·7. Fuel and lighting moved down 1·4 points to 111·9. Home furnishings and services gained 0·6 points to 118·8 due to advances in furniture and chinaware while a firmer tone for the recreation section of the miscellaneous sub-group was reflected in a gain of 0·3 to 108·6. The two remaining sub-groups were unchanged, clothing at 121·1 and rentals at 111·9. (*See* Table I).

Cost-of-living index movements for eight regional cities recorded minor fluctuations between October and December. A rise of 0·5 points to 119·5 for Saskatoon was the largest change; and there were increases of 0·1 for both Saint John at 118·5, and Edmonton at 116·0. Vancouver was 0·2 points lower at 117·5, while Halifax at 118·1, Montreal at 121·4, and Toronto at 117·4 recorded losses of 0·1 each. Winnipeg was unchanged at 115·4. Net changes for 1943 showed Halifax living costs recording the sharpest gain of 1·9 points, while the only

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1943

BASE: PRICES IN JULY, 1914 AND IN AUGUST, 1939=100

decline was registered by Winnipeg, down 0·2. From August, 1939, to December, 1943, Montreal living costs have shown the highest recorded rise of 21·4 per cent while the Winnipeg increase of 15·4 per cent was the smallest among the eight regional cities. (*See* Table II.)

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a $4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-Living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between $600 and $2,800 in 1938. The average expenditure was $1,413.90, divided as follows: food (31·3 per cent), $443; shelter (19·1 per cent), $269.50; fuel and light (6·4 per cent), $90.50; clothing (11·7 per cent), $165.80; home furnishings (8·9 per cent), $125.70; miscellaneous (22·6 per cent), $319.40.

The last-named group includes health (4·3 per cent), $60.80; personal care (1·7 per cent), $23.90; transportation (5·6 per cent), $79.30; recreation (5·8 per cent), $82.10; life insurance (5·2 per cent), $73.30. Other expenditure not directly represented in the index brought the total family living expenditure to $1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home furnishings, etc., with their weights, was published in the Labour Gazette for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized quarterly in the Labour Gazette under the title, *Price Control in Canada.*

Wholesale Prices

The Dominion Bureau of Statistics general wholesale price index closed 1943 at a seventeen year peak level of 102·5. A small December increase of 0·1 reflected higher authorized prices for imported and domestic bituminous coal, sand, gravel and crushed stone, as well as small increases in the vegetable products group. The non-metallic minerals group moved 1·9 points higher to 102·4 in December, while the vegetable group gained 0·1 to 94·9 due to higher prices for unmanufactured tobacco, rye, potatoes, green

coffee beans, onions and lemons. These outweighed declines in flour and oranges. A sharp seasonal drop in eggs, particularly in central and western Canadian centres was responsible for a decline of 0·1 to 109·6 in animal products, in spite of firmer quotations for live stock, furs, fowl and butter. Chemicals and allied products also eased 0·1 to 100·2 on slightly lower quotations among inorganic chemicals. Compared with December, 1942, the average level of wholesale prices has shown an increase of 5·7 per cent, while the wartime advance amounted to 41·8 per cent. Field and animal products both con-

* For the period 1913 to 1934 the former series on the base 1926=100 was converted to the base 1935-1939=100.

‡ Commodities in the cost-of-living index excluding rents and services.

tributed to the December rise of 0·4 to 104·6 for Canadian farm products. This level represented a gain of 20·1 per cent during the past twelve months and an advance since August, 1939, of 79·1 per cent. A sharp temporary break in grain prices during August, 1939, caused this wartime increase to be about 13 per cent higher than if July, 1939, were taken as the pre-war reference month.

The December increase of 0·4 to 91·7 for field products reflected gains for certain grades of unmanufactured tobacco, rye, potatoes and onions while the advance in animal products from an index level of 125·7 to 126·1 was caused by upturns in live stock and fowl. These outweighed weakness in eggs. (*See* Table V.)

(c) The basis of these figures is the record of rents collected in the 1941 Census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the change indicated by these reports.

(d) Rents marked (d) are for apartments or flats. Other rent figures are for single houses. Apartment and flat rents have been shown where this type of dwelling is more common than single houses.

TABLE V—INDEX NUMBERS OF WHOLESALE PRICES IN CANADA CALCULATED BY THE DOMINION BUREAU OF STATISTICS†

† The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—Monthly, Prices and Price Indexes (Canada); annually, Prices and Price Indexes (Canada and Other Countries).

* Prior to 1926 the number of commodities was 236; 1926 to 1933 inclusive, 502, and since January, 1934, the number is 567.

Price Movements in Canada and Other Countries

Most of the available records for fourth-quarter wholesale price index numbers showed only small changes. There was a fractional decline between September and November for both the United Kingdom and the United States indexes, the easier tendency in the United States being influenced by lower live-stock prices. However, fourth-quarter strength in Canadian price levels advanced the general wholesale index 1·3 points to 102·5 in December, reflecting increased prices for grains and lumber as well as late recovery in live stock. In other countries, advances were recorded for New Zealand and Argentina, while the Australian level of wholesale prices moved slightly lower.

The December level for United Kingdom living costs at 199 (1914=100) showed an increase of 1 point over September, while a rise of 0·2 points to 124·1 in November (1935-39=100) was recorded in the United States index of living costs. Canadian living costs moved 0.1 points lower to 119.3 in the fourth quarter. In Argentina living costs recorded a moderate increase in the latter half of 1943 following establishment of maximum price regulations in June coupled with an official reduction in rents at the same time. This action had produced a substantial decrease in June and July. Further detail concerning price movements for other countries may be found in Table VI which includes the latest records available.

Deputy Minister—ARTHUR MACNAMARA

Assistant Deputy Minister—V. C. MACDONALD

Editor—HARRY J. WALKER

VOLUME XLIV] FEBRUARY, 1944 [NUMBER 2

Notes of Current Interest

International Labour Conference to be held in United States

An official summons has gone out to the member states of the International Labour Organization to attend a regular session of the International Labour Conference and to be prepared to recommend "present and post-war social policy" to the United Nations. The session will open on April 20, probably in Philadelphia, it was announced.

The Conference is expected to last three to four weeks, and to be attended by delegations from 35 to 40 of the member states. Each national delegation will be tripartite, containing two persons representing Government, one representing employers and one representing labour.

Each member of a delegation will be entitled to be accompanied by six advisers, making a maximum of 28 persons in each delegation.

The decision to convene the conference was taken by the I.L.O.'s Governing Body at a meeting in London in December (L.G., Dec., 1943, p. 1596). The letter of convocation was signed by Edward J. Phelan, who has been Acting Director of the International Labour Office since John G. Winant resigned the directorship early in 1941 to become United States Ambassador to Great Britain.

The International Labour Office, whose working headquarters were moved to Montreal from Geneva, in 1940, is the permanent secretariat of the International Labour Organization.

The agenda of the Conference will comprise seven points. The principal items will be "Recommendations to the United Nations for present and post-war social policy," and "Future policy, program and status of the International Labour Organization."

Commenting on the first of these items, the announcement said that "experience after the war of 1914-1918 shows that Governments will feel the need for defining their social policies, and, unless preliminary international discussion takes place, unco-ordinated and possibly conflicting policies may lead to a dangerous state of confusion."

"The Governing Body therefore considered," it continued, "that the Conference should be asked to proceed immediately to a general examination of social policy, and that the discussions should not be confined to generalities but should deal courageously with the practical problems which are certain to arise and on which Governments are entitled to look to the International Labour Organization for advice and guidance."

The International Labour Office's recommendations to the Conference on this question will cover the following points:

1. "Social objectives of economic policy (more especially the measures required to be taken internationally and nationally to ensure full employment, social security and rising standards of living.)"

2. "The general principles of social policy in its various fields," such as conditions of work, social security, child labour, paid holidays, prevention of accidents, industrial relations, industrial hygiene and labour welfare, which should be applied by I.L.O. members.

3. "The social provisions to be inscribed in any peace settlement or the clauses of a long-term armistice, including measures to be taken

for re-establishing free trade union movements and to ensure to trade union organizations the restitution of confiscated property and funds, and the participation of employers' and workers' organizations in the work of reconstruction in their own countries."

4. "Social policy in the territories of Axis countries occupied by the forces of the United Nations."

It is not proposed that the Conference should aim at the adoption of international conventions or formal I.L.O. "recommendations" on the agenda items covering recommendations to the United Nations and the I.L.O.'s policy and status, but "that it should formulate its conclusions in a series of resolutions," the announcement said.

The other items on the agenda will be: The organization of employment in the transition from war to peace; Social security: principles, and problems arising out of the war; Minimum standards of social policy in dependent territories; Reports on the application of Conventions; and Director's report. The communication said the Office would propose formal "recommendations" on the first three of these points, and, in addition, would suggest an international convention dealing with the pension rights of displaced persons in Europe.

Apprenticeship training plan established by Dominion Government

A plan intended to develop apprenticeship in Canada has recently been established by the Dominion Government. An order in council of January 21 (P.C. 8993) authorizes the Department of Labour to extend financial assistance to the provincial governments in order to stimulate apprenticeship training.

Calling attention to the importance of apprenticeship as a means of providing post-war training to members of the armed forces and to munitions workers, the order provides that Dominion assistance to any province shall be subject to the province observing certain specified conditions. These include the passing of an apprenticeship act, where such an act is not already in effect, which must comply with certain standards laid down in the order.

A detailed account of the order in council appears on page 206 of this issue.

House of Commons Committee on Social Insurance re-appointed

A select committee of the House of Commons has again been appointed to study social security planning in Canada. Its membership is substantially the same as that of the parliamentary committee which examined the same problems in 1943 under the chairmanship of the Honourable Cyrus Macmillan.

The 1943 committee considered briefs from a number of organizations, including certain labour groups. At its first meeting it had laid before it the *Report on Social Security for Canada* prepared by Dr. Leonard C. Marsh and the report, *Health Insurance,* containing a draft bill prepared by the Advisory Committee on Health Insurance, under the chairmanship of Dr. J. S. Heagerty. In its report to the House (L.G., July, 1943, p. 1082) it approved in principle the health insurance bill and made recommendations for further study of social security problems.

The committee as re-appointed on February 4 on motion of the Prime Minister, is instructed:

> To examine and report on a national plan of social insurance which will constitute a charter of social security for the whole of Canada, and to that end,
>
> To examine and study the existing social insurance legislation of the parliament of Canada and of the several provincial legislatures; social insurance policies of other countries; the most practicable measures of social insurance for Canada, including health insurance, and the steps which will be required to effect their inclusion in a national plan; the constitutional and financial adjustments which will be required for the achievement of a nation-wide plan of social security; and other related matters.

Advisory committee on teaching profession

Mr. Leo Guindon, of Montreal, has been appointed to the advisory committee on the employment of teachers during the war, according to an announcement made recently by the Honourable Humphrey Mitchell, Minister of Labour.

The committee was established recently to advise the Minister on the effective use of the teaching profession's limited personnel (L.G., Dec., 1943, p. 1615). Because there has been a threatened shortage, teachers now require a special permit from National Selective Service in order to leave the profession.

Mr. Arthur MacNamara, Director of National Selective Service, is chairman of the committee. Other members include Miss Beryl Truax of Montreal; Dr. C. N. Crutchfield of Shawinigan Falls; R. E. Shaul of Edmonton; Frank Patten of Ottawa; and O. V. B. Miller of Montreal.

Employment and industrial statistics

The table below shows the latest statistics available reflecting industrial conditions in Canada.

The Dominion Bureau of Statistics index of industrial employment was 190·6 at December 1, 1943, the highest point recorded as compared with 188·7 in the preceding month, 186·5 at December 1, 1942, and 122·7 at December 1, 1939. Data were tabulated from 14,161 employers with a total working force of 1,916,688. The total weekly payroll for this working force was $60,541,888. Average per capita earnings at $31.59 per week at December 1 were practically unchanged from the average of the previous

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† Week ended January 27, 1944.

(1) Base, 1926=100. (2) Figures are for the end of the preceding month. (3) Base, June, 1941=100. (4) Base, 1935-1939=100. (5) Adjusted, where necessary, for seasonal variation. (6) Notes in the hands of the public. (7) Figures for four weeks ended January 29, 1944, and corresponding previous periods. (8) MacLean's Building Review.

month which was the highest in the payroll record dating from June 1, 1941. The index number of payrolls has risen 6·5 per cent between December 1, 1942 and December 1, 1943, while the employment index has risen 2·2 per cent in the same period.

The greatest advance at December 1, was recorded in logging but the increase in mining was also substantial while smaller advances were recorded also in manufacturing and in transportation. The increase in the manufacturing group, more than 80 per cent since December 1939, has been much greater than that recorded by any other group. The mining and logging groups were at a lower level in December 1943 than in December 1939.

The index of the physical volume of business indicating activity in mining, manufacturing construction and in the output of electric power, as well as in the distribution of goods advanced from 242·9 for November 1943, to 248·8 for December. Substantial decline was recorded in mineral production as compared with the previous month but the other principal groups advanced.

Business activity was at a higher level during 1943 than at any previous time. The business index averaged 16·7 per cent higher during 1943 than for 1942.

Manufacturing production was 20·6 per cent higher in the same comparison, output of electric power 10 per cent higher and mineral production 30·1 per cent higher while the value of construction contracts declined 26·8 per cent. In the manufacturing group, flour production advanced 19·3 per cent in 1943 as compared with 1942, hog slaughterings 15·8 per cent, production of creamery butter 9·6 per cent and coke production 8·4 per cent while cheese production declined 20·7 per cent, the consumption of raw cotton 10·9 per cent, newsprint production 6·1 per cent, pig iron production 10·5 per cent. In external trade the value of exports increased 25·8 per cent in the same comparison and of imports 5·5 per cent. The volume of railway freight was 11·9 per cent greater in 1943 than in 1942.

Majority and Minority Reports of National War Labour Board tabled

The Report of the National War Labour Board, signed by the Chairman, the Hon. Mr. Justice C. P. McTague, and by Mr. Leon Lalande, employers' representative, together with a Minority Report, signed by Mr. J. L. Cohen, former employees' representative, were tabled in the House of Commons on January 28, 1944.

The complete text of the reports is being issued as a supplement to this month's LABOUR GAZETTE.

The reports arose out of an inquiry undertaken by the Board into labour relations and wage conditions in Canada. Public hearings were held by the Board in Ottawa between April 15 and June 17, 1943, during the course of which a considerable number of representations were made by labour and business organizations and by various other interests.

The reports were transmitted to the Minister of Labour during August, and were "carefully studied by the Government in considering modifications of its labour policy", according to a statement made by the Prime Minister on December 4 (L.G., Dec., 1943, p. 1597).

A revised Wartime Wages Control Order was issued by the Government on December 9 (L.G., Dec., 1943, p. 1602). Elsewhere in this month's GAZETTE appears the text of a Wartime Labour Relations Order, passed on February 17.

Regional Advisory Boards under National Selective Service

Regional Selective Service Advisory Boards, designed to facilitate the regional operations of National Selective Service, have been established by a recent order in council (P.C. 512, Jan. 25, 1944).

The present order provides Boards for British Columbia, the Prairie Provinces, Ontario, and Quebec. A fifth Board will be set up later in the Maritime area.

Each of the Advisory Boards will be organized under the chairmanship of the Regional Director of Selective Service. Other members will include representatives of the regional Mobilization Board, Unemployment Insurance Commission, organized labour, Department of Munitions and Supply, and Wartime Prices and Trade Board. It is expected that representatives of the Department of National Defence and agriculture will be added later.

Mr. Arthur MacNamara, Director of National Selective Service, commented on the order as follows: "The Boards have been inaugurated for the purpose of bringing into the open National Selective Service problems as they may bear on each particular region. Each Board will have authority to take required action within the limits of existing regulations, and may make recommendations to Ottawa regarding Selective Service policies and procedures in general.

"It is felt that the Boards will assure the carrying out of Selective Service Regulations in a manner suited to the needs of each part of the country."

The functions of the Regional Advisory Boards will be supplementary to those of the National Selective Service Advisory Board, which consists of representatives of organized labour, employers, veterans, agriculture, and

Government Departments and agencies. The National Board meets at Ottawa regularly to advise the Director of National Selective Service with reference to the utilization of manpower in the prosecution of the war and the administration and enforcement of Selective Service regulations.

Cost of living index declines

The Dominion Bureau of Statistics cost of living index declined from 119·3 for December 1, 1943 to 119·0 for January 3, 1944. Group indexes for for foods and home furnishings and services moved lower while those for fuel and lighting and miscellaneous items advanced. The food index fell from 132·7 for December to 131·5 for January as sharp declines in egg prices outweighed scattered increases for butter, meats, and fresh vegetables. The home furnishings and services index dropped from 118·8 to 118·4 due to a decrease in the furniture section. Higher coal prices advanced the fuel and lighting index from 111·9 to 112·7, while increases in health costs raised the miscellaneous index from 108·6 to 108·9. Other groups remained unchanged, rents at 111·9, and clothing at 121·1. After adjustment to the base August, 1939, as 100 the index was 118·1 at January 3.

Industrial Disputes Investigation Act

Four applications for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received during the month of January. Two boards submitted their reports; two boards were established and the constitution of one board was completed during the month. Eight disputes were referred to Industrial Disputes Inquiry Commissioners, while reports were received from commissioners in six cases. Three settlements were effected during the month and three applications were rejected. One application was withdrawn and strike votes requested in two cases.

Administration of fair wages policy

The Honourable Humphrey Mitchell, Minister of Labour, in a statement issued on February 4, called attention to the fact that the revised Wartime Wages Control Order of December 9, 1943, does not provide for a continuance of the administration of the Fair Wages Policy of the Dominion Government by the National and Regional War Labour Boards. When these Boards were first established late in 1941, it had been provided that they would be responsible for the administration of the Fair Wages Policy of the Dominion Government.

Up to the time of its transfer to the War Labour Boards the Dominion Fair Wages Policy had been administered by the Department of Labour since the Department was founded at the beginning of the century. The scope of the policy had been substantially broadened after the beginning of the war. Prior to the war the policy had extended to construction projects, whether carried on under contract or directly by the Dominion, and to contracts for the supplying of materials for the Government. With the outbreak of war all contracts awarded by the Department of Munitions and Supply, whether for Canada or her Allies, became subject to the Fair Wages Policy. Thus Fair Wages Policy was made applicable to shipbuilding and aircraft construction, as well as to supplying of all other materials bought through Munitions and Supply: in fact the policy extends to both main contractors and sub-contractors. Also, the Fair Wages Policy extends to all defence works being carried on by any Department.

While the original principle established for determining fair wages was to make applicable to Government work the rates current in the district, this basic principle has had to be departed from, more particularly during the war, because of the great extension of the application of the policy. Under existing legislation there are also set up fair, minimum standards for beginners, apprentices and unskilled (except on construction) and also, fair rates are fixed where no comparable rates are available in the district. In addition, the practice has developed, as for example in the case of aircraft and shipbuilding, of establishing uniform rates for similar work over a large section of the country.

The Industrial Relations Branch of the Labour Department will now become responsible for fair wages work.

Report on labour legislation in Canada, 1941-1942

Labour laws enacted in Canada in 1941 and 1942 are published in full or in summary form in a Report which has just been issued by the Department of Labour. Both Dominion and provincial legislation is included. The publication is the fourth supplement to Labour Legislation in Canada as existing on December 31, 1937.

As the Quebec statutes were revised in 1941 and the Alberta statutes in 1942, the report presents the labour laws of these provinces as they stood at the beginning of 1943.

Legislation covered by the Report is reviewed in the Introduction under such headings as: trade unions and collective bargaining; industrial disputes, injunctions, conciliation and investigation; wages and hours of labour; workmen's compensation; safety and health;

licensing of workmen; vocational education and apprenticeship; pensions, insurance, and mothers' allowances; housing; wartime labour conditions, and post-war rehabilitation.

The main volume of the series may be obtained from the Department of Labour for one dollar and the supplements for twenty-five cents each.

C. W. Bolton, research expert, passes

The Department of Labour suffered the loss of one of its most outstanding administrative officers in the death of C. W. Bolton on January 27, 1944. Mr. Bolton had been ill for more than a year and was compelled to relinquish his position as chief of labour statistics in September, 1942.

He was born at Wiarton, Ontario, 57 years ago, the son of a Congregationalist Minister, the late Rev. Charles E. Bolton. He was an honour graduate of Queen's University in Political and Economic Science. Following his graduation, he joined the staff of the Federal Department of Labour in 1911 which was then under the ministerial direction of the present Prime Minister, Right Honourable W. L. Mackenzie King. Mr. Bolton's keen interest in economic and social problems, coupled with a well-equipped and enquiring mind, soon brought him recognition as a promising authority on labour and industrial problems.

His research studies found expression in the LABOUR GAZETTE and subsequently he concentrated on the field of labour statistics in which he became a recognized authority, not only in Canada, but in other countries. He was a Canadian pioneer in cost-of-living statistics and developed their compilation and presentation so that they became widely adopted in the settlement of industrial disputes in this country.

In other avenues of labour research, he became an expert and successive Minister and Deputy Ministers of Labour frequently relied on his thorough knowledge and sound judgment. His unremitting and selfless efforts throughout his long period of service with the Department of Labour, doubtless were a contributing factor in the breakdown of his health.

Retirement of Miss H. R. Runions

On the occasion of her recent retirement from the Department of Labour, Miss Hazel R. Runions was made the recipient of an oil painting by Adrian Stokes, presented by the staff of the Department.

The presentation was made to Miss Runions at her home by M. M. Maclean, Director of Industrial Relations and J. S. McCullagh, Assistant Director of Industrial Relations. Hon. Humphrey Mitchell, Minister of Labour, was present at the presentation, and expressed to Miss Runions appreciation for her many years of very faithful and valuable service. The Minister also voiced the very keen regret of the staff on the occasion of her retirement, but said that he was happy to offer hopes on the part of all those connected with the Department, that she might soon be restored to full health.

Miss Runions entered the Labour Department in 1912, later serving as secretary to successive Deputy Ministers of Labour.

Quebec legislation on labour relations

Labour relations in Quebec are the subject of two Bills which have been passed by the Legislature.

The Public Service Employees Disputes Act prohibits strikes or lockouts in connection with municipal or school corporations, public charitable institutions under the Public Charities Act, insane asylums, the provincial civil service, telephone and telegraph operation, railways, tramways, navigation, or electric, gas or water works. Railways within Dominion jurisdiction are excluded.

Except in the civil service, where there is no collective agreement providing for the settlement of disputes, any dispute in these industries is to be settled under the Quebec Trade Disputes Act. The award of a board of arbitration under the Act may be made legally binding for not more than one year.

Provincial and municipal police and civil servants are prohibited from membership in any association for the advancement of their economic, social and moral interests which does not consist solely of persons of one of these classes or which is affiliated with any other association.

The Labour Relations Act requires an employer or employers' association to negotiate with a view to concluding an agreement, with the representatives of one or more associations of which at least 60 per cent of the employees are members. The Labour Relations Board of three members, which is to be established under the Act may determine whether the employer is to bargain with representatives of all his employees or with any particular groups. All questions of representation are to be decided by the Board.

The employer or employers' association must be given eight days' notice of the time and place for negotiations. If the latter are unsuccessful, the Minister of Labour may intervene through the conciliation machinery of his department and under the Quebec Trade Disputes Act.

A collective agreement may not be made for more than one year but it may stipulate that it will continue in effect from year to year unless one party gives written notice at least 30 days and not more than 60 days before the end of the year. In the 30-day interval, a rival association may petition for bargaining rights.

Where there is an association of employees comprising at least 20 per cent of the employees covered by an agreement made by another associations of workers to furnish the Labour to receive a copy of the agreement and to submit to the employer or employers' association, which is a party to the agreement, any complaint concerning a violation of the agreement or of the Act.

Any association may freely enter into a collective agreement but the agreement becomes void if another association is recognized by the Labour Relations Board as the bargaining agent for the employees concerned.

Other provisions of the Act are designed to protect the right of association; to require associations of workers to furnish the Labour Relations Board with their constitutions and by-laws, the amount of fees and assessments, and the names of officers; to outlaw employer-dominated associations and to provide for the settlement of disputes.

A strike or lockout is prohibited: (1) so long as an association of employees has not been recognized as representing the workers concerned and so long as the association has not taken the required proceedings for the making of an agreement and, until 14 days after the Minister has received the report of a board appointed under the Trade Disputes Act; or (2) during the life of an agreement unless the dispute has been referred for settlement in accordance with the agreement or, failing such provision in the agreement, in accordance with the Quebec Trade Disputes Act, and for 14 days after the receipt by the Minister of the report.

Union proposals to Manitoba Legislature

Recommendations for legislation submitted in November to the Manitoba Government by the Provincial Executive of the Trades and Labour Congress and the Railway Transportation Brotherhoods include proposals for a Bill concerning the right to organize, outlawing company-sponsored unions, requiring collective bargaining when the majority of the employees of any employer are organized in a trade union, and providing for a Government tribunal to conduct a secret vote in case of dispute as to the union representing the employees.

The memorandum urges that social and economic measures be taken to eliminate unemployment, hunger, misery, insecurity and war, and pledges labour's assistance in devising plans toward this end. A maximum 40-hour week is advocated. Among the self-liquidating public works suggested as a means of creating productive employment are rural electrification, urban and rural slum clearance, main highways, bridges, waterways, canals, reforestation, rapid electric transportation, hospital and educational institutions. A well regulated system of apprenticeship should be adopted in order to provide adequately for the future needs of industry. It is suggested that the Manitoba Government pass a Postwar Reconstruction Act similar to that in Alberta.

The Dominion Government has established a minimum of 35c. an hour for males employed on Government contracts, and while that is considered too low, it is nevertheless urged that the Manitoba male minimum wage be raised from 25c. to 35c. to agree with the Dominion provision. The memorandum asks the Government to implement immediately the recommendations of their Minimum Wage Board regarding increases in minimum rates.

Safety inspection and the issuing of bulletins on accident prevention and occupational disease hazards should be under the Workmen's Compensation Board.

The memorandum urges the immediate establishment of a sound health insurance scheme including free medical and hospital services, maternity services, rural first-aid posts, and travelling dispensaries to aid rural families. The desirability of a national scheme should be kept in mind.

The Railway Transportation Brotherhoods again ask for amendments in the Highway Traffic Act abolishing unfair competition between commercial motor vehicles and steam railways, preventing duplication of services and improving efficiency and safety in highway transport.

Other proposals include the appointment of a full-time Minister of Labour, amendment of the Old Age Pension Act to permit maximum earnings of $425, and assistance to education by providing free text books and more provincial scholarships. The unions commend the efforts of the Government to have re-opened Dominion-Provincial discussions on the Rowell-Sirois Report, and also the improvements made in old age pensions.

Activities of Ontario Labour Court

A summary of the activities of the Ontario Labour Court from its inception until December 31, 1943, has recently been issued. The Ontario Collective Bargaining Act, 1943, came into effect on April 14 but the Labour Court did not begin to function until June 14

when the Judicature Amendment Act, 1943, under which it was set up, came into operation (L.G., 1943, p. 1302).

Of the 130 cases which came up during the period under review, the Court dealt with 86 in whole or in part, and finally disposed of 69.

All but one of the 130 cases were applications for certification of a collective bargaining agency. These 129 applications involved about 80,000 workers; and up till December 31, 64 agencies had been certified in connection with applications involving 31,000 workers. Seventy-four of the applications were made by agencies affiliated with the Trades and Labour Congress of Canada or the Canadian Congress of Labour, and 32 such agencies were certified in proceedings covering 18,000 workers. Such agencies also obtained majorities in eight cases in which votes were held but which were not disposed of before the end of 1943. Fifty-five applications were made by organizations not affiliated with either of the two Congresses, and 32 of these organizations were certified in cases involving 13,000 workers. No applications were made by employers under the section of the Act which permits an employer to ask the Court to determine which if any collective bargaining agency in his undertaking is entitled to represent the employees.

Votes were held in 33 cases, either by direction of the Court or by consent of the parties. Three types of ballot were used. In five cases a choice was offered between two bargaining agencies, and three of these cases involved jurisdictional disputes between unions affiliated with the two Congresses. In 12 cases the choice was between a named agency and no agency, and in the remaining 16 cases three alternatives were offered: two named agencies and no agency.

Only one case came before the Court in which no application for certification was made. This case, which was dismissed, arose out of a charge of discrimination against employees for trade union activity (L.G., 1943, p. 1303). One other case included a discrimination charge in addition to an application for certification.

Decisions of the Ontario Labour Court are summarized regularly in the *Labour Law* section of the LABOUR GAZETTE.

Canadian Manufacturers' Association and Ontario Collective Bargaining Act

Proposals for the amendment of the Ontario Collective Bargaining Act were agreed to in November by the Industrial Relations Committee of the Canadian Manufacturers' Association according to a report of *Industrial Canada* for December. The suggested amendments are to be presented to the Ontario Government.

The Committee recommends that a collective bargaining agency should be certified by the Labour Court only if the agency receives 60 per cent of the votes of those eligible to vote in the election; that employees should be free to vote only after six months employment by the company; that any group of employees, not only any individual workman, should have the right to present any grievances to the employer; that a collective bargaining agency should not be entitled to make a second application for certification within one year of the refusal by the Court of its first application; that there should be an appeal to the Ontario Court of Appeal from the decisions of the Labour Court on questions of jurisdiction and law; that financial statements of trade unions should be filed with the Provincial Secretary and made accessible to the public; that no work for or attempt to organize a collective bargaining agency should be permitted during the working hours of the employees.

Another amendment suggested would make a change in section 3 (1) of the Act which stipulates that an act done by two or more members of a collective bargaining agency, if done in contemplation or furtherance of a trade dispute, shall not be actionable unless the act would be actionable if done without an agreement or combination. This section, taken from the British Trade Disputes Act, 1906, exempts from the application of the law of civil conspiracy any acts of members of a collective bargaining agency which are done in contemplation or furtherance of a trade dispute. The proposal is to restrict this section of the Ontario Act to acts in connection with "a trade dispute which directly concerns or affects such members". The Industrial Relations Committee states that this amendment would be in line with "the precedent set by the English Trade Disputes Act of 1927 in order to discourage sympathetic strikes".

The English Trade Disputes and Trade Unions Act of 1927 removes the immunities conferred by the 1906 Act in the case of any act done in contemplation or furtherance of a strike or lockout which is illegal under the 1927 Act. All sympathetic or secondary strikes are not made illegal by that Act: only strikes which have any object other than or in addition to the furtherance of a trade dispute within the trade or industry in which the strikers are engaged *and* which are calculated or intended to coerce the Government either directly or by inflicting hardship on the community. Both conditions must be satisfied before the strike is illegal. More-

over, a strike is not to be deemed to be calculated to coerce the Government unless such coercion ought reasonably to be expected as a consequence of it.

C. M.A. and the Quebec Workmen's Compensation Act

The Workmen's Compensation Act and its administration were the subject of a brief presented in November to the Superior Labour Council by the Quebec Division of the Canadian Manufacturers' Association. The proposals submitted covered the subjects of the appointment of Commission personnel, employment of workers outside the province, notice of accident, principal's liability, minimum payment to childless widows, stabilization of the compensation fund, the merit rating system, and workers' rehabilitation.

It is believed that if the Commissioners were appointed for life, or during good behaviour, instead of liable to dismissal by the Lieutenant-Governor in Council, political favouritism would be prevented. Similarly, the appointment of the employees of the Commission should be under the Commissioners' jurisdiction, not that of the Lieutenant-Governor in Council.

Amendments are suggested to make clearer the application of the law in cases where the employee is working outside the province from which he should receive compensation, in order to prevent double assessments and confusion as to the rights of the injured workman.

The Association feels that the employee as well as the employer should have to give notice of the accident within eight days.

In regard to potential liability of the principal when contractors and subcontractors are hired, it is considered that the principal should not be responsible for the assessments to which the contractors are liable, but should be required only to notify the Commission of the hiring of such contractors. If the principal fails to give this notification, his liability should be limited to the amount of the contractor's assessment in connection with the work actually performed for the principal.

The Association believes that the Act should be changed so that the minimum monthly payment to a childless widow will be $40, regardless of whether this is more than two-thirds of the monthly earnings of the worker concerned. Previously the payment was $40 or two-thirds of the earnings, whichever was less.

Emphasis is placed on keeping the Accident Fund stabilized. One method suggested is that the Commission might reinsure with casualty companies for any compensation payments it may be obliged to make in excess of a specified amount. Another means would be for the Province to contribute the annual $100,000 permitted by the Act. In addition, greater attention to accident prevention work would reduce the demands on the fund. This could be achieved partly through closer co-operation between the Workmen's Compensation Commission and the factory inspectorate.

The experiment with a merit rating system is commended and the establishment of such a system advocated. The efficient employer would then no longer bear the burden of an employer in the same industry with a high accident rate.

More attention should be given to rehabilitating partially disabled workers.

U.S. Tenth National Conference on Labour Legislation

The tenth National Conference on Labour Legislation was called in December by the United States Secretary of Labour. The conference included representatives from both the Federal and State Labour Departments and trade union delegates appointed from more than thirty States to represent the Governors. Among the motions adopted was a recommendation that the Department of Labour call a conference of the State Labour Commissioners with the War and Navy Departments, the Maritime Commission and other interested agencies, in order to reach agreement concerning the methods to be adopted for restoring peacetime standards regarding hours of labour.

As measures contributing to the elimination of labour problems in the period of transition from war to peace and after the war, the members urged that plans be made for the revision of State child-labour laws to achieve a basic 16-year minimum age, a maximum 8-hour day and 40-hour week for young persons under 18, prohibition of night work for this age-group, and a minimum age of 18 years for hazardous occupations. Moreover, it was unanimously recognized that there was need for the immediate preparation of a training and educational program to enable young people to compensate for their premature withdrawal from school during the wartime period. The Conference reaffirmed its endorsation of the pre-war system of apprenticeship advocated by the Federal Committee on Apprenticeship. This committee formulates and promotes in co-operation with States, employers and workers the labour standards necessary to safeguard apprentices and to encourage an apprenticeship system in appropriate trades.

In the field of health and safety, the Conference urged the Federal Labour Department to make more effective its measures for detecting, preventing and controlling many new health hazards, and to disseminate the resulting information. They advocated the immediate enactment of H.R. 2800, a Bill to provide federal aid enabling State Labour Departments to increase their safety inspection staffs and establish safe, healthful, working conditions in industry. The establishment of joint labour-management health and safety committees was also strongly urged. A fuller use of the "rule-making" power conferred on some State Labour Departments, whereby safety codes having the force of law may be promulgated for various industries, was recommended to curb the rising number of industrial accidents and diseases. The policy was condemned of letting out work to be done at home, either as a wartime expedient or a peacetime method of production.

Finally, the conference asked the Department of Labour to continue and expand its information service, so that the public might learn the value of sound, progressive labour legislation, and the necessity of taking steps towards the restoration of pre-war labour standards.

Publications of U.S. Division of Labour Standards

The following three bulletins have been issued recently by the Division of Labour Standards of the United States Department of Labour: "Wage Payment and Wage Collection Laws" (No. 58), "Preparing a Steward's Manual" (No. 59), and "Labour Offices in the United States and Canada" (No. 64).

In transmitting "Wage Payment and Wage Collection Laws" to the Secretary of Labour, the Director of the Division states:

> Every year the United States Department of Labour receives thousands of letters from people unable to collect the wages that they have earned, and they do not know where to turn for help. Even to-day, when jobs are plentiful, workers are victimized by fly-by night employers who are financially irresponsible, and cannot or do not meet their pay rolls regularly.

The bulletin was prepared, therefore, to make available information on existing legislation on the subject and to compare this legislation with recommended standards. The main provisions of the State laws are summarized, principally in tabular form, and a draft model law recommended by the Third National Conference on Labour Legislation and the International Association of Government Labour Officials is printed in full.

"Preparing a Steward's Manual" is in a sense complementary to an earlier Bulletin, "Settling Plant Grievances" (L.G., 1943, p. 1464). Shop stewards and grievance committee-men form the connecting link between workers, union and the management. Various unions have, therefore, undertaken to train their plant representatives in their important duties, and one of the most useful expedients used is the Steward's Manual. In the present bulletin, the Division of Labour Standards has attempted to provide union officials with guidance in drawing up such a manual. Its suggestions are based on a study of a number of manuals already in use and on information provided by union officers and representatives of management.

"Labour Offices in the United States and in Canada" is a directory of federal, state and provincial labour offices and officers. It replaces a directory issued in 1941 by the Bureau of Labour Statistics and is a supplement to the Division's Bulletin 49, "Outline of State Agencies Administering Labour Laws."

Children in bowling alleys

The employment of children in bowling alleys, the Children's Bureau of the U.S. Department of Labour points out in a recent article, is generally an undesirable practice during war as well as peace. The late night work, which it often entails, prevents essential sleep, results in poor health, and hampers school work. It is also noted that pinboys are exposed to a considerable accident risk. In Wisconsin in 1942, 14 per cent of the industrial injuries to minors under 18 happened in bowling alleys. Working late at night may also involve moral hazards for juveniles, the report suggests. It is considered that children need protection from indiscriminate employment of this kind. Nineteen states have established a higher minimum age for this type of work than for general employment in shops and factories. Generally, as evidenced by the laws of 20 States, this minimum has been 16 years. In 1935, however, the International Association of Government officials recommended 18 as a minimum age for bowling-alley employment. In 35 States night work after 8 p.m. is prohibited for those under 16.

The policy of the War Manpower Commission emphasizes the importance of protecting the education and health of younger persons under 18, giving them the fullest possible opportunity consistent with the war effort to complete their education. Together with the Office of Education and the Children's Bureau, they urge that children of 14 and 15 be not employed after 7 p.m., and that the combined hours of work and school should not exceed eight a day, with hours of work limited to three on school days.

Union expels "wildcat" strikers

Seventy-two members of the United Rubber Workers of America (CIO) were recently expelled from union membership for taking part in "wildcat" strikes, unauthorized by the union. In making an announcement to this effect Sherman Dalrymple, president of the union, warned that no "wildcat" strikes would be tolerated by the union and that expulsions would be continued if necessary. The president of the company at which the strikes occurred stated that the seventy-two men would also be dismissed by the company. Both statements came as part of a co-operative drive by the union and the company management to outlaw unauthorized work stoppages.

A decision of the Circuit Court of Appeals made in Chicago during December is also of interest in connection with the matter of "wildcat" strikes. This decision was to the effect that the section of the Wagner Labour Relations Act prohibiting anti-union discrimination does not apply to "wildcat" strikes. The court ruled that a company, in refusing to rehire workers who had participated in an unauthorized strike, is not discriminating against the union by discouraging union membership as is prohibited by the Wagner Act, because in the opinion of the court "the striking employees were not acting as members of the union, the strike was not authorized by or approved by the union, and was not used to further any purpose of the union."

Co-operation between public libraries and trade unions

A special service given by the Boston Public Library to local trade unions is described in the December issue of the *American Federationist*, official publication of the American Federation of Labor. About two years ago the Boston library instituted its plan, the work of which is divided into three parts.

The first part consists of a service to union officials, who are kept informed of books and pamphlets related to their union and industry by means of exhibits, published lists, displays, letters, and personal visits to union headquarters.

Secondly, the library publicizes technical books to aid workers in improving mechanical skills. One of the methods of encouraging the use of these books is to prepare lists of books, with the help of union officials, the lists being then distributed to the union members.

The library also places deposits of books at various union headquarters. Deposits consist of twenty-five to fifty books and are changed every five or six weeks. The office secretary issues and keeps records of the books and also takes registrations for library cards. In addition to technical books, biographies and works on history, books on current events and labour problems and also good fiction are included.

The article states that several cities besides Boston have inaugurated such library services, including Milwaukee, Cleveland and Chicago. The idea is considered to be a potentially important aspect of adult education. However, tangible results are declared to be likely to accumulate by degrees rather than rapidly; and those interested in bringing about greater co-operation between public libraries and trade unions are advised that "habits of decades are not changed overnight and a sudden mass rush to read good books will not take place and should not be expected".

(Mention was made in the November LABOUR GAZETTE, p. 1461, of the mobile library operated by the Boilermakers' and Iron Shipbuilders' Union in Vancouver.)

Labour seeks post-war action in Australia

According to news despatches received from Australia late in January, the federal executive of the Labour Party had decided to ask Prime Minister Curtin to proceed immediately with preparations to carry out the Labour Party's post-war program.

The program includes objectives:

1. To ensure a high and rising standard of living.

2. Introduction of a 40-hour working week within a half-year after the war.

3. Universal annual 14 days' vacation.

4. Special health and sickness benefits.

The executive asked that the government appoint a special minister over a new department of post-war planning and construction to replace the present ministry of post-war reconstruction.

In addition the executive approve the fifth principle of the Atlantic Charter providing for the fullest collaboration of nations in the economic field with the object of obtaining improved labour standards for all.

The executive decided to send two delegates to the Dominion Labour Conference in London to support the policy agreed upon with the New Zealand Labour Party.

Optimum hours and rest periods in Australia

The Australian Department of Labour and National Service has published a statement giving the weekly hours and break periods which it considers will give the highest output over a period of time. These conclusions were based on the observations

made by production engineers in Australia and were found to be supported by investigations made in Britain and the United States.

It is pointed out that the National Security (Hours of Work) Regulations, restricting weekly hours of work to 56 (L.G. 1942, p. 1373), were designed to limit excessive overtime, and did not purport to be the most efficient hours for continuous working. Similarly, the maximum of 104 hours in a fortnight recommended by the Department in 1943 for the employment of women, was a maximum for all industries and not necessarily the optimum number for particular industries (L.G. 1943, p. 464).

As regards the hours of young persons under 18, the study notes that "the fact that they are employed with men and women who are working longer hours is not considered sufficient reason for permitting juveniles to work more than 44 hours per week." It is suggested that, if necessary, part-time labour should be employed to allow rosters which will ensure that juveniles shall not work beyond this length of time.

Since the optimum number of hours depends on the type of work, the statement divides industrial employment for adults into five separate classes. First, for heavy manual labour, such as navvying, maximum output, the Department considers, will result from a work-week of from 44 to 46 hours, after which fatigue will diminish weekly production. Second, non-automatic machine-work requiring some physical exertion will produce best results in a 48-hour week. Third, for work requiring constant attention but little muscular exertion (semi-automatic and some automatic), a week of from 48 to 52 hours, depending on the degree of concentration necessary, will give the highest output. Fourth, work calling for only intermittent attention and no physical exertion, has an optimum week of 52 hours for women and 56 hours for men. The fifth class, predominantly mental work, calls for a week of 40-48 hours' duration depending on the monotony and concentration involved.

The Australian Department considers that women's hours need not differ from men's, except that women should not work regularly for more than 52 hours a week.

A rest-pause of 5-10 minutes in each part of the shift will improve the production of both men and women. In effect, the statement notes, the adoption of a regular practice of rest-pauses "is a systematizing and making more effective of unofficial rest periods." Food trolleys are recommended for the first break, and tea trolleys for both periods.

Personnel and welfare officers in Australia

A Personnel and Industrial Welfare Officers' Association has recently been formed in Australia. The objects of the Association are to encourage study of the problems of workers in order to promote their welfare and efficiency in industry, to disseminate information relating to these problems, and to emphasize the importance of human values in industry. In addition, it will safeguard the interests of personnel and welfare officers and encourage the use of improved methods in this field.

Membership is open to persons actively engaged in personnel and welfare work and to those who have completed a training course in it. The Industrial Welfare Division of the Commonwealth Department of Labour and National Service has instituted training courses for welfare officers to meet the urgent needs of war industry. Persons undergoing training may be student members of the Association. Those who render distinguished service to it may be made honorary members and persons who assist it financially, associate members.

Branches of the Association now exist in Victoria, New South Wales and South Australia. The Victorian group publishes an Information Bulletin and is planning a public display of arrangements and appliances for promoting the health, safety and welfare of industrial workers.

Holidays with pay in New Zealand

Five days' holidays with pay from December 27-31 was ordered for practically all New Zealand's industrial workers who were not entitled to holidays with pay under the terms of their employment and, except in the case of workers in any freezing works, who had been employed in the same industry or class of employment for three months. If for any reason a holiday at that time was not practicable from the employer's point of view, a minimum rest period of five working days at ordinary pay must be given within six months. Where a worker had moved from one employer to another in the same industry or class of employment, the five-days pay had to be borne proportionately by the employers concerned.

Improved labour laws in the British Colonies

The definite program for improvement in labour conditions in the British Colonies which was undertaken by the Colonial Office before the war is being continued although retarded in some respects by war conditions. The recom-

mendations made in February, 1940, by the West Indian Royal Commission are being put into effect and similar changes made in other colonies.

The Commission recommended laws to promote collective bargaining by protecting trade unions from actions for damages arising out of strikes and legalizing peaceful picketing. It recommended, too, that trade unions should be required to register with the Government and to have their accounts audited. In the interval before trade unions could function adequately it was proposed that in each country labour officers or departments assisted by advisory boards of employees and workers should intervene to improve conditions wherever possible. Other recommendations covered minimum wage regulations, establishment of joint councils in civil services, factory inspection, workmen's compensation based on the Canadian systems, and welfare schemes for the sugar industry.

Before the war a Labour Adviser was appointed and a Social Services Department created in the Colonial Office. Colonial administrative officers have been given courses in labour problems in London or in a colony to which officers from adjacent territories could easily come. A Colonial labour Advisory Committee was set up in 1942 to advise on labour questions. Three members of the committee were chosen because of their familiarity with the International Labour Organization and its work, the British Government representative on the governing body of the International Labour Office and the British employers' and workers' representatives.

"Obsolete and inadequate legislation" is being replaced by "laws framed on more modern lines" and these supplemented by new legislation where this is needed, according to a report by the Colonial Office. The report refers particularly to trade union legislation, the application to the Colonies of International Labour Conventions and the preparation of a model Workmen's Compensation Ordinance for East and West Africa.

The Colonial Development and Welfare Act, 1940, stipulates that the financial assistance to colonies made possible by the Act may be granted only on certain conditions. The Secretary of State for the Colonies must satisfy himself before grants are made to any colony that its laws provide reasonable facilities for the establishment and activities of trade unions, for the payment of fair wages and for the prohibition of the employment of children under 14 on the works to which the money is to be applied.

Most of the colonies have now separate Labour Departments, in many cases staffed by officers familiar with the territory and the language, in other cases appointments by officers seconded from the British Ministry of Labour and National Service. In 1942, six experts, trade unionists from the United Kingdom, were assigned as labour officers in different colonies.

Legislation to encourage trade unions and collective bargaining is now in effect in 33 colonies. These laws are taken from English statutes with some modifications. One difference is that trade unions under the colonial legislation are required to register with the Government. Other provisions declare trade unions not unlawful merely because they are in restraint of trade, prohibit actions against trade unions for tort, remove liability for interfering with another person's business by any act done in contemplation or furtherance of a trade dispute, permit peaceful picketing and redefine conspiracy in relation to trade disputes, as it is limited by the Trade Disputes Act, 1906, of the United Kingdom.

Health of children in occupied Europe

The International Labour Office has issued a publication concerning the health of children in Occupied Europe. It is based on information gathered from a large variety of sources, and is necessarily limited by the difficulty of collecting precise, reliable facts. However, it is a preliminary survey of conditions and their consequences, knowledge which is vital for plans for post-war reconstruction in these countries. Malnutrition and undernourishment have resulted in a general deficiency evidenced in the widespread increase in disease and the rapid rise both in the infant mortality rate, and the general death rate of adults and children. A growing shortage of fuel, clothing, and medical supplies, combined with a lack of transport facilities has aggravated the situation. Apart from physical effects, the deterioration of living standards has a demoralizing effect, especially on children. Depopulation in these countries is proceeding on a scale which threatens their powers of recovery. The study considers the steps which have already been taken to remedy these conditions both now and later. It is pointed out that the problem, with its need for international co-operation, will prove to be a testing ground for future international democracy.

Holidays with pay for merchant seamen

An article outlining the conditions regarding holidays with pay in the merchant navies of Belgium, Great Britain, the Netherlands and Norway, and comparing these conditions with the terms of the I.L.O. Holidays with Pay (Sea) Convention, 1936 (No. 54),

is published in the *International Labour Review* for December, 1943. This article is the second instalment of a comprehensive survey of the conditions of service of seamen of the principal maritime countries, which the I.L.O. is preparing at the request of the Joint Maritime Commission. The first article, which was published in July, 1943, dealt with wages and hours of work in the four countries covered in the present article (L.G., 1943, p. 1133).

Holidays with pay are granted in all four countries under the terms of collective agreements of national scope. The amount of annual leave which is granted at present is as follows: in Belgium, 18 days a year or one day per 20 days on articles for certified officers, and 12 days a year or one day per 30 days on articles for ratings in Great Britain, two and one-half days for officers and two days for ratings for each completed month on articles; in the Netherlands, 21 week days for chief engineers and first mates, 14 weekdays for second engineers and second mates, and 12 weekdays for other officers and ratings; and in Norway, two weeks a year or four weeks after two years' service or seven weeks after three years' service but three weeks in every third year, for officers and stewards only. The pay granted to seamen on holiday in Belgium is the basic pay and war bonus (plus seniority pay in the case of officers) and in Norway it is the basic pay with seniority pay but without the war bonus. No subsistence allowance is granted in either of these countries. In Great Britain and the Netherlands the normal pay and a daily meal allowance is granted but the war bonus is excluded. In the Netherlands a supplementary allowance is also paid. Under the Convention, at least 12 working days a year are to be granted to officers and radio operators and at least nine days to other crew members, with the usual remuneration, including a suitable subsistence allowance, being paid.

Social security in various countries

The Inter-American Committee on Social Security, which was established by the Inter-American Conference on Social Security (L.G., 1942, p. 1285) has published its second, third and fourth Provisional Bulletins, which may be obtained from the International Labour Office at Montreal. Provisional Bulletin No. 1 (L.G., 1943, p. 428) outlined the principal developments during the preceding two years in the social security field in the Americas, and included a tabular summary of the legislation in effect on January 1, 1943. Bulletin No. 3 contains a summary of developments since that date, and in Bulletin No. 4 there is a tabular summary of new legislation and plans for comprehensive social security in Australia, Chile, Great Britain, Mexico, New Zealand and the United States.

Bulletin No. 2 is devoted entirely to social security plans in the United States. It contains an analysis of the Seventh Annual Report of the Social Security Board, the Report of the National Resources Planning Board on Security, Work and Relief Policies (1942) and the bill introduced by Senator Wagner on June 3, 1943.

In addition to an article on the comprehensive Mexican Social Security Act by an American expert who has assisted in implementing the legislation, and a summary of family allowances schemes in the Americas and elsewhere, the fourth Bulletin contains a useful survey of policies and plans regarding medical care in the British Commonwealth. Considerable attention is also given to the views of private associations. The general conclusion is that

> The desire to safeguard and to improve the health of the people is shared without exception by all concerned, and the essential unity of all approaches to health is realized. It is generally realized that, if health is to be common property, health services, and, in particular, medical care must be made available to every member of the community irrespective of his economic and social circumstances . . . . Opinions differ upon the best means of achieving these aims; both health insurance and public medical care services have their sponsors, and the merits of various methods of remunerating doctors are still in debate. Whatever solutions may eventually be adopted for these problems in the different countries, the important conclusion may already be drawn . . . . that the introduction of a national health service, comprehensive both in scope and in content, is no longer a matter of conjecture, but only a matter of time.

Bulletin No. 3 is largely concerned with the work and aims of the Inter-American Conference and Committee. Supplementary information on these matters appears in Bulletin No. 4 and presumably will be added to, as necessary, in subsequent bulletins.

Swedish unions and accident prevention

Trade unions in Sweden have adopted a scheme for their participation in accident prevention work. A new committee set up by the Swedish National Federation of Trade Unions acts as a central agency for collecting information on accident insurance, industrial health, safety and other matters for the protection of labour. It serves as an advisory body on draft legislation submitted to the Federation. In addition to working for more effective labour inspection, the committee assists in organizing safety groups within industries.

Labour Relations

Wartime Labour Relations Order

Measure Provides for Compulsory Collective Bargaining, Settlement of Disputes and Establishment of Wartime Labour Relations Board

A DOMINION-WIDE measure to provide for compulsory collective bargaining between employers and employees in war industry and procedure for the settlement of industrial disputes was tabled in the House of Commons recently by the Honourable Humphrey Mitchell, Minister of Labour. The measure is in the form of an order in council, to be known as the Wartime Labour Relations Order (P.C. 1003, Feb. 17, 1944, passed under the authority of the War Measures Act).

Recommendations for a measure of this kind were made by the National War Labour Board in its report to the Government. (See p. 124). Following receipt of these recommendations, copies of the report were forwarded to the provincial governments and a three-day conference between the Dominion and Provincial Ministers of Labour and their officers was held in Ottawa in November last at which these recommendations and the further proposals submitted by the Dominion Department of Labour arising therefrom were discussed.

Subsequently, and in accordance with the arrangements arrived at at the conference, a draft of the proposed Labour Relations Regulations was sent out to the provinces, and the national trade union organizations and the major employers' organizations with a request for a full expression of the views and suggestions of such parties in reference to the same.

The present regulations represent the final result following from the various steps so taken to obtain the considered views of those most closely interested in and familiar with the subject matter of the regulations.

Summary of Regulations

The regulations will be administered by a Board to be known as the Wartime Labour Relations Board to consist of a Chairman, a Vice-Chairman and not more than eight other members.

The regulations apply to the following classes of employers and their employees:

Firstly, employers in industries of a National or interprovincial character which are ordinarily within Dominion jurisdiction and including crown companies engaged in the handling or manufacture of war supplies;

Secondly, employers in war industries as such industries are described in the regulations or subsequently added to by the Governor-in-Council as the result of later experience or changed wartime conditions;

Thirdly, all other industry within a province where such province by appropriate legislative action brings the same within the scope of the regulations.

In other words the Dominion Government has under these regulations extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field, to the extent considered necessary to adequately cover employer and employees in war industry but without attempting to include other industry which has not a direct bearing on war production.

In so far as these latter industries are concerned, each province may make its own decision as to whether or not they shall be brought under the regulations.

Provision is made for an agreement between the Dominion and any province to set up suitable provincial administrative agencies to deal locally and promptly with matters of a local nature. The Dominion Board established under the regulations will, however, be responsible for the formulation of general policy and regulations to ensure necessary uniformity in the application of the regulations whether administered through the Board itself or through provincial agencies.

Provision for Compulsory Collective Bargaining

The provisions for compulsory collective bargaining and settlement of disputes include the following:

(i) A procedure is established for the election of bargaining representatives by a

majority vote of employees and for the certification of such representatives by the Board;

(ii) Compulsory collective bargaining may then be initiated by either the employer or the bargaining representatives of the employees on notice to the other party and the parties are thereupon required to negotiate with each other in good faith to complete a collective agreement;

(iii) In event an agreement cannot be reached without outside assistance, conciliation services are provided initially by the use of a Conciliation Officer and subsequently, by the appointment of a Conciliation Board. Until bargaining representatives have been appointed and during the prescribed process of negotiation for collective agreement, strikes by employees are prohibited and, in like manner, lockouts by employers are prohibited during the period of negotiation. No provision has been provided for the imposition of a compulsory agreement by the Board binding upon the parties in event that no agreement is arrived at between them.

(iv) Negotiations for the renewal of an agreement may be initiated by notice by either party within the sixty-day period prior to the expiry thereof, and following upon such notice the parties must negotiate in good faith with each other for the renewal of the agreement.

(v) Where a collective agreement has been entered into, new bargaining representatives may not be elected until after ten months have elapsed.

Grievance Procedure and Settlement of Disputes

The provision made for the settlement of grievances and disputes is designed to place upon the employers and employees concerned the joint responsibility for the settlement thereof by their own action rather than by the imposition of a settlement by an outside agency.

In the first place the parties must provide in every collective agreement entered into hereafter for a procedure for the final settlement of grievances arising out of the application or violation of the terms of the agreement without stoppage of work, and in any instance where this is not so provided the Board is required to establish an appropriate procedure for this purpose. Resort to strikes or lockouts is accordingly unnecessary and is forbidden during the term of a collective agreement.

Where there is no collective agreement in effect and a dispute arises in respect of any change in existing conditions of employment proposed by an employer, a sixty-day delay is provided to enable the employees to elect bargaining representatives and for the initiation of collective bargaining proceedings.

Unfair Practices

Unfair practices on the part of employers and employees and trade unions or employees' organizations are defined and prohibited and penalties provided for failure to observe such prohibitions.

The prohibitions against employers include a prohibition against employers seeking to dominate or interfere with trade unions or employees' organizations or contributing financial support to them; against refusing to employ or discriminating against members of trade unions or employees' organizations; and against the dismissal of an employee for belonging to a trade union or employees' organization or exercising his rights as a member or officer thereof.

The prohibitions against trade unions and employees' organizations include a prohibition against the use of coercion or intimidation to join a trade union or employees' organization; against activities in working hours at the place of employment to persuade an employee to join a trade union or employees' organization, except with the consent of the employer; and from supporting, encouraging or engaging in a slowdown or other activities designed to restrict or limit production.

The Industrial Disputes Investigation Act is to be of no effect while the Wartime Labour Relations Order is in force, except as to matters pending. Certain orders in council relating to matters covered by the new order are revoked or suspended.

Text of Wartime Labour Relations Order

P.C. 1003

AT THE GOVERNMENT HOUSE
AT OTTAWA

THURSDAY, the 17th day of February, 1944.

PRESENT:

HIS EXCELLENCY
THE GOVERNOR GENERAL IN COUNCIL:

Whereas it is deemed to be in the public interest, especially during the war period and more particularly in industries essential to the prosecution of the war, that employers and employees collaborate for the advancement of the enterprises in which they are engaged;

That employers and employees should freely discuss matters of mutual interest with each other;

That differences between employers and employees should be settled by peaceful means; and

That both employers and employees should be free to organize for the conduct of negotiations

between them and that a procedure should be established for such negotiations;

And whereas it is therefore deemed necessary, by reason of the war, for the security, defence, peace, order and welfare of Canada and for the effective prosecution of the war, that regulations be made in respect of such matters.

Now, therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour and under the authority of the War Measures Act, chapter 206 of the Revised Statutes of Canada, 1927, is pleased to make the regulations hereto attached and they are hereby made and established accordingly.

A. D. P. HEENEY,
Clerk of the Privy Council.

The Honourable
the Minister of Labour.

Short Title

1. These regulations may be cited as the Wartime Labour Relations Regulations.

Interpretation

2. (1) In these regulations unless the context otherwise requires,

(*a*) "appropriate War Labour Board" means, in connection with any matter the National War Labour Board or the Regional War Labour Board that has jurisdiction in the matter under the Wartime Wages Control Order, 1943;

(*b*) "Board" means the Wartime Labour Relations Board established by these regulations;

(*c*) "certified bargaining representative" means a bargaining representative certified by the Board under these regulations;

(*d*) "collective agreement" means an agreement in writing between an employer or an employers' organization on the one hand and a trade union or an employees' organization on the other hand containing provisions with reference to rates of pay, hours of work or other working conditions;

(*e*) "Conciliation Board" means a Board appointed by the Minister under section fourteen;

(*f*) "employee" means a person employed by an employer to do skilled or unskilled manual, clerical or technical work; but does not include

(i) a person employed in a confidential capacity or having authority to employ or discharge employees; or

(ii) a person employed in domestic service, agriculture, horticulture, hunting or trapping;

(*g*) "employer" means a person employing more than one employee and includes

(i) the National Harbours Board; and

(ii) any other body incorporated to act as an agent of His Majesty in right of Canada except any such body whose employees are entitled to a cost of living bonus under the order made by the Governor in Council on the twenty-sixth day of August, nineteen hundred and forty-one, for the payment of a cost of living bonus to employees of the Government of Canada (P.C. 6702), as amended;

but does not include His Majesty or any person or corporation acting for or on behalf or as an agent of His Majesty except as hereinbefore expressly provided.

(*h*) "employers' organization" means an organization of employers formed to regulate relations between employers and employees;

(*i*) "employees' organization" means an organization of employees formed to regulate relations between employers and employees;

(*j*) "lockout" includes the closing of a place of employment, a suspension of work or a refusal by an employer to continue to employ a number of his employees, done to compel his employees, or to aid another employer to compel his employees, to accept terms of employment;

(*k*) "Minister" means the Minister of Labour for Canada;

(*l*) "prescribed" means prescribed by the Board;

(*m*) "strike" or "to go on strike" includes the cessation of work by a body of employees acting in combination or a concerted refusal or a refusal under a common understanding of a number of employees to continue to work for an employer, done to compel their employer, or to aid other employees to compel their employer, to accept terms of employment;

(*n*) "trade union" means a provincial, national or international employees' organization, or a local branch chartered by, and in good standing with, such an organization;

(*o*) a reference to a section by number only is a reference to the section in these regulations bearing that number and a reference to a subsection by number only is a reference to the subsection bearing that number in the section where the reference occurs;

(*p*) words importing the masculine gender include corporations, trade unions, employees' organizations and employers' organizations as well as females.

2. (2) No employee shall cease to be such within the meaning of these regulations by reason only of his ceasing to work as the result of a lockout, strike or his wrongful dismissal.

Application

3. (1) These regulations apply in the case of employees

(*a*) who are employed upon or in connection with a work, undertaking or business that is ordinarily within the legislative authority of Parliament, including, but not so as to restrict the generality of the foregoing,

(i) works, undertakings or businesses operated or carried on for or in connection with navigation and shipping, whether inland or maritime;

(ii) lines of steam or other ships, railways, canals, telegraphs and other works and undertakings connecting any province with any other or others of the provinces, or extending beyond the limits of the province;

(iii) lines of steamships between a province and any British or foreign country;

(iv) ferries between any province and any British or foreign country, or between two provinces; and

(v) such works as, although wholly situate within the province, have been or may be declared by the Parliament of Canada to be for the general advantage of Canada, or for the advantage of two or more of the provinces;

(*b*) who are employed upon or in connection with a work, undertaking or business that is essential to the efficient prosecution of the war; or

(*c*) whose relations with their employers in matters covered by these regulations are ordinarily within the exclusive legislative jurisdiction of a provincial legislature to regulate and to whom these regulations have been applied by the provincial legislature in respect of their relations with their employers;

and to the employers of all such employees in their relations with such employees and to trade unions, employees' organizations and employers' organizations composed of such employees or employers.

(2) For the purposes of this section, the employees employed in a work, undertaking or business described in Schedule A to these regulations, and no others, shall be deemed to be employed in connection with a work, undertaking or business that is essential to the efficient prosecution of the war.

(3) Schedule A to these regulations may be amended, either by the addition or deletion of a class of employees, by an order made by the Governor General in Council.

(4) If a provincial legislature applies these regulations to any employees as provided for in paragraph (*c*) of subsection one, every person on whom duties are imposed and in whom powers are vested by these regulations shall perform and exercise such duties and powers with reference to such employees and their employers and trade unions, employees' organizations, and employers' organizations composed of such employees and employers in all respects as in the case of employees mentioned in paragraphs (*a*) and (*b*) of subsection one and their employers and employees' organizations and trade unions and employers' organizations composed of such employees and employers.

Rights of Employees and Employers

4. (1) Every employee shall have the right to be a member of a trade union or employees' organization and to participate in the lawful activities thereof.

(2) Every employer shall have the right to be a member of an employers' organization and to participate in the lawful activities thereof.

(3) Where bargaining representatives have been certified under section eight, the bargaining representatives or the employees' employer may, in accordance with the procedure hereinafter set out, enter into negotiations with a view to the completion of a collective agreement between the employer concerned on the one hand and the trade union or employees' organization on the other hand.

Certification of Bargaining Representatives

5. (1) The employees of any employer may elect bargaining representatives by a majority vote of the employees affected.

(2) If the majority of the employees affected are members of one trade union, that trade union may elect or appoint its officers or other persons as bargaining representatives on behalf of all the employees affected; for the purpose of this section, an employee shall be deemed to be a member of the trade union if he has in writing requested the trade union to elect or appoint bargaining representatives on his behalf.

(3) Where more than one employer and their employees desire to negotiate a collective agreement, the employees of such employers may elect bargaining representatives by a majority vote of the employees affected of each employer, or, if the majority of the employees affected of each employer are members of one trade union that trade union may elect or appoint its officers or other persons as bargaining representatives on behalf of all the employees affected.

(4) If in accordance with established trade union practice the majority of a group of employees who belong to a craft by reason of which they are distinguishable from the employees as a whole, are separately organized into a trade union pertaining to the craft, such trade union may elect or appoint its officers or other persons as bargaining representatives on behalf of the employees belonging to that craft. Where any group claims and is entitled to the rights conferred by this subsection, the employees comprising the craft shall not be entitled to vote for any of the purposes of collective bargaining with that employer, except when the collective bargaining is in respect only of the craft to which they belong; nor shall they in any manner be taken into account in the computation of a majority in respect of any matter regarding which they are not entitled to vote.

(5) Two or more trade unions may, by agreement, join in electing bargaining representatives on terms consistent with these Regulations.

6. When bargaining representatives have been elected or appointed, application may be made to the Board by or on behalf of such representatives for their certification as the bargaining representatives of the employees affected.

7. Upon such application the Board shall by an examination of records, by a vote or otherwise, satisfy itself that an election or appointment of bargaining representatives was regularly and properly made, and in the case of a trade union, that the trade union acted with the authority of the majority of the employees affected as prescribed by subsection two of section five, and that the unit of employees concerned is one which is appropriate for collective bargaining; and if the Board is not so satisfied, it shall reject the application.

8. (1) Where the Board is satisfied that the bargaining representatives have been duly elected or appointed, it shall certify them as bargaining representatives and shall specify the unit of employees on whose behalf the representatives so certified are authorized to act, and a collective agreement negotiated by such representatives shall be binding on every employee in the specified unit of employees.

(2) When bargaining representatives have been certified by the Board, the Board shall notify the applicants and the employer concerned of the certification.

9. At any time after the expiry of ten months of the term of a collective agreement, whether entered into before or after the effective date of these Regulations, the employees affected may elect new bargaining representatives in the manner provided in section five and application may be made to the Board by or on behalf of such bargaining representatives for their certi-

fication. Upon receipt of such application the Board shall deal with the same as in the case of an initial application for certification under the regulations. If on such application the Board certifies new bargaining representatives, they shall be substituted for the previous bargaining representatives of the employees affected as a party to the agreement in question, and as such may give notice of the termination thereof as provided for in the agreement or under these Regulations.

Negotiation of Collective Agreement

10. (1) When bargaining representatives have been certified under these regulations they may give the employer concerned, or the employer concerned may give the bargaining representatives, ten clear days' notice requiring that he or they, as the case may be, enter into negotiations with a view to the completion of a collective agreement.

(2) The parties shall negotiate in good faith with one another and make every reasonable effort to conclude a collective agreement.

(3) At the request of the bargaining representatives they may be accompanied during the negotiations by officers or agents of the trade union or employees' organization concerned.

(4) No collective agreement containing wage provisions shall be executed insofar as it involves any change in existing wage rates or other wage provisions until the appropriate War Labour Board has approved any such change, but it may nevertheless be executed as to the other provisions before such approval is received.

(5) Every party to a collective agreement and every employee upon whom a collective agreement is made binding by these regulations shall do everything he is, by the collective agreement, required to do and shall abstain from doing anything he is, by the collective agreement, required not to do.

11. If negotiations for an agreement have continued for thirty days and either party to the negotiations believes that an agreement will not be completed in a reasonable time, it may so advise the Board indicating the difficulties encountered and may ask the Board to intervene with a view to the completion of an agreement.

12. (1) Upon receipt of advice under section eleven, the Board shall refer the matter to the Minister, who shall, within three days instruct a conciliation officer to confer with the parties and attempt to effect an agreement.

(2) A conciliation officer who has been instructed to confer with the parties under subsection one of this section, shall, within fourteen days of receiving his instructions, or within such longer period as the Minister may allow, report to the Minister setting out in full:—

(*a*) the matters, if any, on which the parties cannot agree and his recommendations with regard thereto;

(*b*) the terms, if any, upon which the parties have agreed; and

(*c*) whether, in his view, an agreement might be facilitated by appointment of a Conciliation Board.

13. (1) If a conciliation officer who has been instructed to confer with the parties recommends the appointment of a Conciliation Board, the Minister shall forthwith appoint a Conciliation Board consisting of three members appointed by the Minister after consultation with the parties as required by section thirty.

(2) A Conciliation Board appointed under this section shall, upon its appointment, endeavour to effect an agreement between the parties on the matters on which they have not agreed and, in any event, shall report the result of its endeavours and its findings and recommendations to the Minister within fourteen days of the appointment of the chairman thereof, or within such longer period as may be agreed upon by the parties or as may be allowed by the Minister.

14. If a Conciliation Board's report to the Minister shows that it has been unable to effect an agreement between the parties, the Minister shall cause a copy thereof to be sent forthwith to the parties and to the Board, and he may publish it in such manner as he thinks fit.

Duration and Renewal of Agreements

15. No collective agreement shall be made for a term of less than one year, but where the term of an agreement is more than one year, the agreement shall contain or be deemed to contain a provision for the termination thereof at any time after one year on two months' notice by either party thereto.

16. Either party to a collective agreement may, on ten clear days' notice, require the other party to enter into negotiations for the renewal of the agreement within the period of two months prior to the expiry date, and both parties shall thereupon enter into such negotiations in good faith and make every reasonable effort to secure such a renewal.

Grievance Procedure

17. Where an employee alleges that there has been a misinterpretation or a violation of a collective agreement, the employee shall submit the same for consideration and final settlement in accordance with the procedure established by the collective agreement, if any, or the procedure established by the Board for such case, and the employee and his employer shall do such things as are required of them by the procedure and such things as are required of them by the terms of the settlement.

18. (1) Every collective agreement made after these regulations come into force shall contain a provision establishing a procedure for final settlement, without stoppage of work, on the application of either party, of differences concerning its interpretation or violation.

(2) Where a collective agreement does not provide an appropriate procedure for consideration and settlement of disputes concerning its interpretation or violation thereof, the Board shall, upon application, by order, establish such a procedure.

Unfair Practices

19. (1) No employer shall dominate or interfere with the formation or administration of a trade union or employees' organization or contribute financial or other support to it; but an employer may, notwithstanding the foregoing, permit an employee or representative of a trade union or an employees' organization to confer with him during working hours or to attend to the business of the organization or union during working hours without deduction of time so occupied in the computation of the time worked for the employer and without deduction of wages in respect thereof.

(2) No employer or employers' organization, and no person acting on behalf of same shall

(*a*) refuse to employ any person because the person is a member of a trade union or an employees' organization;

(*b*) impose any condition in the contract of employment seeking to restrain an employee from exercising his rights under these regulations; or

(*c*) seek by intimidation, by dismissal or threat of dismissal, by any other kind of threat, by the impositon of a pecuniary or other penalty, or by any other means whatsoever, to compel an employee to abstain from becoming or continuing to be a member or officer or representative of a trade union or an employees' organization, or from exercising his lawful rights;

but nothing in these regulations shall be interpreted to affect, otherwise than as expressly stated, the right of an employer to suspend, transfer, lay off, or discharge employees for appropriate and sufficient cause.

20. (1) No person shall, with a view to compelling or influencing a person to join a trade union or employees' organization, use coercion or intimidation of any kind, but this subsection shall not be construed to prohibit the inclusion of any provision in a collective agreement.

(2) Except with the consent of the employer, no trade union or employees' organization, and no person authorized by the union or employees' organization to act on its behalf, shall attempt, at the employee's place of employment during his working hours, to persuade an employee to join the trade union or employees' organization.

(3) No trade union or employees' organization and no person acting on its behalf shall support, encourage, condone or engage in a "slowdown" or other activity designed to restrict or limit production; but this provision shall not be interpereted to limit a trade union's legal right to strike and a thing required by a provision in a collective agreement for the safety or health of the employees shall be deemed not to be a "slowdown" or designed to restrict or limit production.

(4) No trade union or employees' organization, and no person acting on its behalf, shall participate in, or in any way interfere with, the formation or administration of an employers' organization.

Strikes and Lockouts

21. (1) No employee shall go on strike until

(*a*) bargaining representatives have been elected or appointed for the employees affected; and

(*b*) an attempt has been made to effect an agreement under sections eleven and twelve, and fourteen days have elapsed since the Conciliation Board reported to the Minister.

(2) Where an application has been made under these regulations for the certification of bargaining representatives, the employer or the employees affected shall not declare or cause a lockout of the employees until an attempt has been made to effect an agreement under sections eleven and twelve, and fourteen days have elapsed since the Conciliation Board reported to the Minister.

(3) No employer who is a party to a collective agreement shall declare or cause a lockout and no employee bound thereby shall go on strike during the term of the collective agreement.

(4) Where a dispute has arisen by reason of a change in the existing terms of employment proposed by the employer, the employer shall not, without the consent of the employees affected, make such change effective until a period of two months has elapsed from the date when the employer notified the employees of such proposed change.

(5) Nothing in these regulations shall be interpreted to prohibit the suspension or discontinuance of an industry or of the working of any persons therein for a cause not constituting a lockout or a strike.

Information

22. (1) Each of the parties to a collective agreement shall forthwith upon its execution file one copy with the Board.

(2) The Board may require any employers' organization or trade union or local branch thereof, or an employees' organization affected by any application for certification of bargaining representatives, or affected by an existing collective agreement, to file with the Board:

(*a*) a statutory declaration stating the names and addresses of its officers; or

(*b*) a copy of its constitution and by-laws.

(3) Every employers' organization, trade union and employees' organization shall furnish to its members within three months of the end of its fiscal year a statement of its income and expenditures, and if required by the Board shall file a copy thereof with the Board for its information.

ADMINISTRATION

Wartime Labour Relations Board

23. There shall be a Board which shall be known as the Wartime Labour Relations Board and shall consist of a chairman, vice-chairman, and not more than eight other members.

24. (1) The members of the Board shall be appointed by the Governor in Council and shall hold office during pleasure.

(2) The head office of the Board shall be in Ottawa.

(3) A majority of the members of the Board shall constitute a quorum and in the absence of the chairman the vice-chairman shall act as chairman.

(4) A decision of the majority of the members of the Board present and constituting a quorum shall be the decision of the Board, and in the event of a tie the chairman or acting chairman shall have a casting vote.

(5) The Board and each member thereof shall have the powers of a Commissioner under Part I of the Inquiries Act.

(6) The Board and each member thereof may receive and accept such evidence and information on oath, affidavit or otherwise as in its or his discretion it or he may deem fit and proper whether admissible as evidence in a court of law or not.

(7) The Board shall determine its own procedure but shall in every case give an opportunity to all interested parties to present evidence and make representations.

(8) Each member of the Board shall, before acting as such, take and subscribe before the Clerk of the Privy Council and shall file in the office of the said clerk an oath of office in the following form:—

"I do solemnly swear that I will faithfully, truly and impartially to the best of my judgment, skill and ability, execute and perform the office of member of the Wartime Labour Relations Board and will not, except in the discharge of my duties, disclose to any person any of the evidence or other matter brought before the said Board. So help me God."

25. (1) If a question arises under these Regulations as to whether:

(*a*) a person is an employer or employee;
(*b*) the unit of employees appropriate for collective bargaining is the employer unit, craft unit, plant unit or a subdivision thereof;
(*c*) an organization of employees or employers is a trade union, employees' organization or employers' organization;
(*d*) an agreement is a collective agreement;
(*e*) an employer, or certified bargaining representatives of employees, is negotiating in good faith;

the Board shall decide the question and its decision shall be final and conclusive for all the purposes of these Regulations.

(2) If a question set out in subsection one arises in any legal proceedings, the Justice or Justices of the Peace, Magistrate, Judge or Court before whom it arises shall, if the question has not been decided by the Board, refer the question to the Board and defer further proceedings until the Board's decision is received.

(3) Any document purporting to contain or to be a copy of any regulation, direction, or order of the Board and purporting to be signed by a member of the Board or by an officer thereof shall be accepted by any court as evidence of the regulation, direction, or order therein contained or of which it purports to be a copy.

26. (1) The Board may, by order, delegate to any person, board or association all or any part of its jurisdiction relating to any particular matter.

(2) The Board may, by order, revoke any delegation made under this section and thereupon the jurisdiction so delegated shall revest in the Board.

27. (1) The Board may, with the approval of the Minister, make such regulations as may be necessary to enable it to discharge the duties imposed upon it by these regulations and to provide for the supervision and control of its officers, clerks and employees.

(2) The Board may prescribe anything, which, under these regulations, is to be prescribed.

(3) The Board, with the approval of the Minister, may appoint an executive committee to exercise its powers subject to such directions or conditions as the Board may specify.

28. (1) The members of the Board shall be paid such salaries as may be fixed by the Governor in Council and such expenses as may be incurred by them in the discharge of their duties.

(2) The Board may appoint an officer to be the Chief Executive Officer of the Board who shall be paid such salary as may be fixed by the Governor in Council.

(3) The Department of Labour shall furnish such technical and clerical assistance to the Board, as may be possible, and the Board may with the approval of the Governor in Council, employ such other officers and employees as may be necessary for the conduct of its business and may fix their remuneration.

Conciliation Officers and Boards

29. When he instructs a conciliation officer under section twelve, the Minister shall forthwith notify the parties thereof.

30. (1) Before appointing a Conciliation Board under section thirteen, the Minister shall by notice require each of the parties to the negotiations to recommend one person to be a member of the Conciliation Board within seven days of receipt of the notice; and the Minister shall, at the expiration of the said period, appoint two members, in his opinion, representative of the different points of view involved, after considering the recommendations, if any, received within the said period.

(2) The two members of the Conciliation Board appointed pursuant to subsection one shall, within five days of the day on which the last of them is appointed, recommend a third person to be a member and chairman of the Conciliation Board; and the Minister shall, on the expiration of the said period, appoint a person to be a third member and chairman of the Conciliation Board after considering the recommendation if received within the said period.

(3) No person

(*a*) who has any pecuniary interest in the matters referred to the Board; or
(*b*) who is acting, or has, within a period of six months preceding the date of his appointment, acted in the capacity of solicitor, legal adviser, counsel or paid agent of either of the parties;

shall act as a member of a Conciliation Board.

(4) When the Conciliation Board has been appointed, the Minister shall forthwith deliver to it a statement of the matters referred to it.

(5) Upon a person ceasing to be a member of a Conciliation Board before it has completed its work, the Minister shall appoint a member in his place in the same manner as the person who ceased to be a member was appointed.

31. (1) A Conciliation Board and each member thereof shall have the powers of a Commissioner under Part I of the Inquiries Act.

(2) A Conciliation Board and each member thereof may receive and accept such evidence and information on oath, affidavit or otherwise as in its or his discretion it or he may deem fit and proper whether admissible in evidence in a court of law or not.

(3) Each member of a Conciliation Board shall, before acting as such, take and subscribe before a person authorized to administer an oath or affirmation, and file with the Minister, an oath or affirmation in the following form:

"I do solemnly swear (affirm) that I will faithfully, truly and impartially to the best of my knowledge, skill and ability, execute and perform the office of member of the Conciliation Board appointed to.....and will not, except in the discharge of my duties, disclose to any person any of the evidence or other matter brought before the said Board. So help me God."

(4) The chairman may fix the time and place of sittings of a Conciliation Board after consultation with the other members of the Board; and he shall notify the parties as to the time and place so fixed.

(5) A Conciliation Board may determine its own procedure, but shall give full opportunity to all parties to present evidence and make representations.

(6) The chairman and one other member of a Conciliation Board shall be a quorum but, in

the absence of a member, the others shall not proceed unless he has been given reasonable notice of the sitting.

(7) The decision of a majority of the members present at a sitting of a Conciliation Board shall be the decision of the Conciliation Board and in the event of a tie, the chairman shall have a casting vote.

(8) The report of the majority of its members shall be that of the Conciliation Board.

(9) After a Conciliation Board has made its report, the Minister may direct the Conciliation Board to reconsider and amplify or clarify any part thereof.

(10) After a Conciliation Board has made its report, the Minister shall send a copy thereof to the employer or employers' organization and to the trade union or employees' organization.

32. The Minister may provide a Conciliation Board with a secretary, stenographer, and such clerical or other assistance as to the Minister seems necessary for the performance of its duties.

33. Every person who is summoned by a Conciliation Board or a member thereof and duly attends as a witness shall be entitled to an allowance for expenses determined in accordance with the scale for the time being in force with respect to witnesses in civil suits in the superior courts in the province where the inquiry is being conducted, and in any event, he shall be entitled to not less than four dollars per day.

34. A Conciliation Board, or a member thereof, and, on being authorized in writing by the Conciliation Board, any other person, may, without any other warrant than this section, at any time, enter a building, mine, mine-workings, ship, vessel, factory, workshop, place, or premises of any kind wherein or in respect of which an industry is carried on, or work is being or has been done or commenced, or any matter or thing is taking place or has taken place, concerning the matters referred to the Conciliation Board, and may inspect and view any work, material, machinery, appliance or article therein, and interrogate any persons in or upon any such place, matter or thing hereinbefore mentioned; and no person shall hinder or obstruct the Board or any person authorized as aforesaid in the exercise of a power conferred by this section or refuse to answer an interrogation made as aforesaid.

35. (1) The members of a Conciliation Board shall be remunerated for their services as follows:—

To a member other than the chairman, an allowance of five dollars a day for not more than three days during which he is engaged in considering the recommendation of a person to be the third member of the Board;

To each member of the Board, including the chairman, an allowance at the rate of twenty dollars for each day he is present when the Board sits and for each day necessarily spent travelling from his place of residence to a meeting of the Board and returning therefrom.

(2) Each member of a Conciliation Board is entitled to his actual necessary travelling expenses for each day that he spends in travelling from his place of residence to a meeting of the Board and returning therefrom.

(3) All expenses of a Conciliation Board, including expenses for transportation incurred by the members thereof or by persons engaged, under its orders, in making investigations under these regulations, salaries of employees and agents, and fees and mileage to witnesses, shall be allowed and paid upon the presentation of itemized vouchers therefor, approved by the chairman of the Board and forwarded by the chairman to the Minister.

(4) The chairman shall forward to the Minister a detailed certified statement of the sittings of the Board, and of the members present at each sitting.

General

36. (1) The Minister may appoint or constitute administrative officers or agencies in any province and delegate to them such of his powers under these regulations as in his opinion is necessary for their proper administration.

(2) The Minister may with the approval of the Governor in Council, enter into an agreement with the government of any province to provide for the administration within that province of these regulations or any part thereof and such agreement may provide

(*a*) the manner in which the Minister shall exercise the powers conferred on him by subsection one in respect of matters in that province;

(*b*) for the transfer to the government of the province or some person or persons specified by the government of the province, of all or any part of the jurisdiction in respect of matters within that province conferred on the Board by these regulations, and for a procedure whereby an appeal may be had to the National Board from a decision made in the exercise of the jurisdiction so conferred; and

(*c*) for reimbursement of the province in respect of expenses so incurred.

37. (1) The Minister may determine the salaries, fees and expenses to be paid to persons performing services under these regulations except where otherwise provided.

(2) The administrative expenses of the Board, other than the salaries and usual travelling expenses of departmental employees, shall be paid out of the War Appropriation.

Enforcement

38. Every person, trade union or employers' or employees' organization to whom an order is issued or who is required to do or abstain from doing anything by or pursuant to these regulations shall obey such order or do or abstain from doing such thing as required.

39. For the purpose of these regulations and of any proceedings taken thereunder, any notice or other communication sent through His Majesty's mails shall be presumed, unless the contrary is proved, to have been received by the addressee in the ordinary course of mail.

40. Every employer who declares or causes a lockout contrary to these regulations is guilty of an offence and liable upon summary conviction to a fine of not more than five hundred dollars for each day or part of a day that the lockout exists.

41. (1) Every employee who goes on strike contrary to these regulations is guilty of an offence and liable upon summary conviction to a fine of not more than twenty dollars for each day or part of a day that he is on strike.

(2) Every trade union and every other employees' organization that authorizes a strike contrary to these regulations is guilty of an offence and liable on summary conviction to a

fine of not more than two hundred dollars for each day or part of a day that the strike continues.

42. Every person, trade union, employees' organization or employers' organization who contravenes any of the provisions of these regulations is guilty of an offence, and unless some penalty is expressly provided by these regulations for such contravention, liable on summary conviction, if an individual, to a penalty of not more than one hundred dollars, and if a corporation, employers' organization, employees' organization or trade union, to a penalty of not more than five hundred dollars.

43. Every person is guilty of an indictable offence and liable to a fine not exceeding five thousand dollars, and not less than five hundred dollars or to imprisonment for a term not exceeding five years and not less than six months, or to both such fine and such imprisonment, who corruptly

(*a*) makes any offer, proposal, gift, loan or promise, or gives or offers any compensation or consideration, directly or indirectly, to a person concerned in the administration or enforcement of these regulations or having or expected to have any duties to perform thereunder, for the purpose of influencing such person in the performance of his duties; or

(*b*) being a person concerned in the administration or enforcement of these regulations or having or expected to have any duties to perform thereunder, accepts or agrees to accept or allows to be accepted by any person under his control or for his benefit any such offer, proposal, gift, loan, promise, compensation or consideration.

44. (1) Every person is a party to and guilty of an offence under these regulations who

(*a*) actually commits it;

(*b*) does an act for the purpose of aiding any person to commit the offence;

(*c*) abets any person in commission of the offence; or

(*d*) counsels or procures any person to commit the offence.

(2) If an employers' organization, corporation, trade union or employees' organization is guilty of an offence under these regulations, any officer of the employers' organization, corporation, trade union or employees' organization who assented to the commission of the offence is a party to and guilty of the offence.

45. No prosecution for an offence under these regulations shall be instituted except by or with the consent of the Board, evidenced by a certificate signed by or on behalf of the chairman of the Board, and in exercising its discretion as to whether any such consent should be granted, the Board may take into consideration disciplinary measures that have been taken by an employers' organization or a trade union or employees' organization against the accused.

46. The Minister may, notwithstanding any other provision in these regulations, instruct a conciliation officer to investigate any situation which in his opinion may be detrimental to the effective utilization of labour in the war effort.

Miscellaneous

47. No proceeding under these regulations shall be deemed invalid by reason of any defect of form or any technical irregularity.

48. (1) The Industrial Disputes Investigation Act shall, except as to matters pending when these regulations come into force, be of no effect while this order is in force.

(2) The following Orders in Council are hereby revoked:

(*a*) The Order in Council made on the seventh day of November, nineteen hundred and thirty-nine, extending the application of the Industrial Disputes Investigation Act (P.C. 3495) as amended; and

(*b*) The Order in Council made on the first day of December, nineteen hundred and forty-two, permitting employees of Crown companies to be members of trade unions (P.C. 10802).

(3) The following Orders in Council extending or varying the wartime application of the Industrial Disputes Investigation Act are hereby suspended to the extent that they are inconsistent with these regulations but shall otherwise remain in effect:—

(*a*) The Order in Council made on the sixth day of June, nineteen hundred and forty-one (P.C. 4020) as amended; and

(*b*) The Order in Council made on the sixteenth day of September, nineteen hundred and forty-one (P.C. 7307) as amended.

49. These regulations shall come into force on a day to be fixed by the Governor in Council.

SCHEDULE A

1. A work or undertaking engaged in mining or smelting operations;
2. A work, undertaking or business engaged in manufacturing or assembling aircraft parts;
3. A work, undertaking or business engaged in manufacturing or assembling tanks or universal carriers;
4. A work, undertaking or business engaged in manufacturing or assembling automobile or truck parts;
5. A work, undertaking or business engaged in smelting or refining aluminum;
6. A work, undertaking or business engaged in refining or producing oil or petroleum products;
7. A work, undertaking or business engaged in producing or processing natural or synthetic rubber;
8. A work, undertaking or business engaged in manufacturing chemicals for war purposes;
9. A work, undertaking or business engaged in producing or manufacturing steel for war industry or war purposes;
10. A work, undertaking or business engaged in building or construction or demolition projects under a contract or subcontract, intended for the use of His Majesty in right of Canada, including the construction, erection, repair, improvement or extension of buildings, aerodromes, harbours, dock yards, roads, defence fortifications, or other naval, military or air force works;
11. A work, undertaking or business engaged in shipbuilding, including shipbuilding accessories;
12. A work, undertaking or business engaged in the production of machinery, arms, shells, ammunition, explosives, implements of war, or naval, military or air stores;
13. A work, undertaking or business engaged in transportation or communication;
14. Public Service utilities, including gas, electric, water and power works, telegraph and telephone lines.

Labour-Management Committees In Canadian War Industries

Provision made for Establishment Under Industrial Production Co-operation Board

THE establishment by Order in Council of an Industrial Production Co-operation Board to promote and encourage the formation of labour-management committees in war industries was announced on January 21 in a joint statement by the Hon. Humphrey Mitchell, Minister of Labour, and the Hon. C. D. Howe, Minister of Munitions and Supply.

H. Carl Goldenberg, Director-General of Economics, Department of Munitions and Supply, is appointed Chairman; and the members are M. M. Maclean, Director of Industrial Relations, Department of Labour; H. J. Carmichael, Co-ordinator of Production and Chairman of the Production Board, Department of Munitions and Supply; and Paul Goulet, Associate Director of National Selective Service, Department of Labour.

The Board is to be assisted in the performance of its duties by an Advisory Committee of representatives of labour organizations and employer associations, which is provided for in the Order in Council. The members of the Advisory Committee are: Pat Conroy, Secretary of the Canadian Congress of Labour; Percy R. Bengough, President of the Trades and Labour Congress of Canada; J. A. Parent, General Organizer of the Canadian and Catholic Confederation of Labour; Willis George, representative of the Canadian Manufacturers' Association; J. Clark Reilly, Secretary-Manager of the Canadian Construction Association; Colonel J. A. W. LaBelle, representing employers; and D. B. Chant, Secretary-Engineer of the Ontario Pulp and Paper Manufacturers' Safety Association.

The Ministers referred to the establishment of the Board as a further step in the Government's program to give active encouragement to employers and employees in the creation of joint production committees, which have already proved successful in stimulating production and promoting industrial co-operation in Canada, the United States, and Great Britain. As long ago as 1942, Prime Minister Mackenzie King, in addressing a convention of the American Federation of Labour being held in Toronto, had strongly advocated labour-management committees for every industry, in order to give joint control in industrial relations. At that time he indicated that the Government was solidly backing all employers and employees in promoting such projects. Shortly afterwards a preliminary committee to promote the establishment of these production committees throughout industry, was set up. The formation of the Board now announced, along with the assisting committee representing labour and management, grows out of the work of the preliminary committee carried on during the last several months.

In addition the Order in Council setting up the Board now lays down certain general principles for its guidance in the formation of production committees. The committees are to be composed of representatives from labour and management directly engaged in production in the plant where the committee operates. The number of labour representatives, to be chosen in a democratic manner, is to be at least equal to the number of management representatives. Committees are advisory and consultative only, and not executive. They are to concern themselves exclusively with problems of production, while problems relating to wages, working conditions, and similar matters, including grievances, are to be left to the appropriate collective bargaining procedure.

Text of Order

The text of Order in Council P.C. 162 setting up the Industrial Production Cooperation Board is as follows:

Whereas it is the policy of the Government to give active encouragement and assistance to employers and their employees in the formation of labour-management production committees in war industries;

And whereas the experience of industries in which labour-management production committees are functioning has demonstrated that they serve to stimulate production and to promote industrial co-operation;

And whereas it is deemed desirable to improve the facilities for encouraging and assisting in the formation of labour-management production committees;

Now, therefore, His Excellency the Governor General in Council, on the recommendation of the Minister of Labour and the Minister of Munitions and Supply, is pleased to order and doth hereby order as follows,—

There shall be an Industrial Production Co-operation Board composed of H. Carl Goldenberg of the Department of Munitions and Supply as Chairman; M. M. Maclean and Paul Goulet, of the Department of Labour; and H. J. Carmichael of the Department of Munitions and Supply, to be assisted in the performance of its duty by an Advisory Committee which shall be composed of the members of the Advisory Committee which has hitherto advised the Interdepartmental Committee on Labour-Management Production Committees, and such other members as the Board may designate, from time to time, with the concurrence of the Minister of Labour and the Minister of Munitions and Supply.

It shall be the duty of the Industrial Production Co-operation Board to promote and encourage the formation of labour-management production committees in war industries in accordance with the following principles:

(i) The purpose of Labour-Management Production Committees should be to examine and consider means to improve and increase production.

(ii) The Committees should be composed of representatives from labour and management directly engaged in production in the particular units or plants in which each Committee functions. The number of representatives of labour should be at least equal to the number of representatives of management. The representatives of labour should be chosen in a democratic manner, preferably from the various departments or natural divisions of a unit or plant, rather than from the entire working force.

(iii) The Committees should be advisory and consultative. Management should examine carefully all recommendations of labour representatives and, in cases where recommendations are not acceptable, should provide adequate explanations. Similarly, the representatives of labour should examine carefully all recommendations endorsed by the Committee and adopted by management.

(iv) The Committees should concern themselves exclusively with problems of production, and should leave problems relating to wages, working conditions and similar matters, including grievances, to the appropriate collective bargaining procedure.

Relations between Employers and Employed in Saskatchewan

Commission on Bill on Collective Bargaining and Settlement of Disputes

LEGISLATION concerning the right of employees to organize and bargain collectively and provision for the settlement of labour disputes was the subject of an inquiry by Commissioners appointed in June last by the Government of Saskatchewan. Chief Justice Martin and Mr. Justice H. Y. MacDonald, of the Saskatchewan Court of Appeal, were the Commissioners. Mr. A. N. Reid, Professor of Economics in the University of Saskatchewan acted as technical adviser and Mr. George Stephen as secretary of the Commission.

The inquiry arose out of a private member's Bill presented to the Legislature last session respecting the right of employees to organize and providing for the conciliation and investigation of disputes, which was referred to the Standing Committee of the Legislature on Law Amendments. The Committee recommended an inquiry into the principles underlying the Bill and a report to the next session of the Legislative Assembly.

Summary of Proposed Legislation

The Bill as introduced was much like the Industrial Conciliation and Arbitration Act of British Columbia as it was amended in 1943. It required an employer to enter into negotiations with representatives elected by a majority vote of the employees affected but where a majority of the employees affected were members of a trade union, the trade union was to have the right to bargain, through its officers or other persons elected by the union, on behalf of all the employees. The Minister of Labour was given power to satisfy himself that representatives were properly elected and that a trade union claiming bargaining rights had as members a majority of the employees affected. Refusal of the employer or the bargaining representatives to negotiate or delay in entering into negotiations for more than 21 days after notification by the Minister was an offence.

Other sections provided for the settlement of disputes between employers and employed. These provisions were largely similar to the provisions of the Dominion Industrial Disputes Investigation Act. The Saskatchewan Bill, however, like the British Columbia Act, provided for preliminary investigation by a conciliation commissioner, and then, failing settlement within 14 days, for investigation by a board of arbitration. While the word "arbitration" is used, it might be noted that the Bill did not provide for what is usually regarded as arbitration. The board is a board of investigation and its report is in the nature of recommendations to the parties. They might be accepted or rejected. A strike or lockout, however, was illegal from the time an application was made for the appointment of a conciliation commissioner until 14 days after the date fixed for the taking of a vote on the question of the acceptance or rejection of the report. The Minister must be notified of the acceptance or rejection of the recommendations not later than 14 days after he had transmitted copies of it to the parties.

At the present time, Saskatchewan has a Freedom of Trade Union Association Act and a statute enabling the application in the province of the Dominion Industrial Disputes Investigation Act. Both these acts would be repealed by Bill 51.

The former statute passed in 1940 was based on a draft Bill of the Trades and Labour Congress. It declares the right of employees

to organize in a trade union and to bargain collectively with their employer or employers through the officers of the union. Offences under the Act include the insertion by an employer of a clause in a contract of employment whereby he seeks to restrain an employee from exercising his rights under the Act, or the seeking by any person, by intimidation, threat of dismissal, or by actual dismissal or by any other threat, to compel any one to join or refrain from joining a trade union. Nothing in this latter provision, it is stipulated, shall prevent a trade union from making or continuing a closed or union-shop agreement. Trade unions are required to file with the Minister of Labour copies of their constitutions and by-laws and annually a list of their officers and the number of their members. These provisions were included in Bill 51.

Comparison with Legislation Elsewhere

The report of the Commission traces the development of legislation in other provinces from the enactment of the Industrial Conciliation and Arbitration Act of British Columbia in December, 1937, to the Ontario Collective Bargaining Act, 1943. The United States National Labour Relations Act and the Labour Relations Acts of certain of the American States are also reviewed. An interesting part of the report is the outline of the development of law and practice in relation to trade unions and collective bargaining in Great Britain. A study was also made of the situation in Australia and New Zealand.

In summarizing the legislative provisions in Great Britain, the Commission notes the conditions under which a strike is illegal under the Trade Disputes and Trade Unions Act, 1927. There appears to be, however, a misunderstanding of this section of the Act. Two conditions are necessary to make a strike or lockout illegal, both of which must be satisfied before the stoppage of work is unlawful. Any strike or lockout is illegal if it has any object other than, or in addition to, the furtherance of a trade dispute within the trade or industry in which the workers are employed *and* if it is designed or calculated to coerce the Government either directly or by inflicting hardship on the community. A strike by workers in one industry with workers in another industry is not illegal under the statute even if it has an object other than to bring pressure to bear on the employer, unless it is calculated to coerce the Government. Further, a strike is not to be deemed to be calculated to coerce the Government unless such coercion ought reasonably to be expected as a consequence of it.

The Saskatchewan commissioners find that

> "the problem of industrial disputes appears to have lessened in Great Britain as a result of the growth of labour organizations and the acceptance of employers of the principle of collective bargaining. General recognition of trade unions as bargaining agents has eliminated the cause of strikes which still prevails to some extent in both Canada and the United States and the growth of strong labour organizations has made possible the development of effective employer-employee machinery for the settlement of disputes which arise. Under these conditions the Government has not found it necessary to use coercive measures. Employers are under no legal obligation to bargain collective and agreements are negotiated freely although there is some indirect pressure exerted by reason of the Government's power to appoint the trade boards. The Trade Boards Act, 1909, empowers the Minister of Labour to establish trade boards composed of representatives of employers, employees and the public to determine minimum standards of wages and hours in industry where in his opinion 'no adequate machinery exists for the effective regulations throughout the trade and that accordingly having regard to the rates of wages prevailing in the trade or any part of the trade it is expedient that the Act should apply to that trade'." [1918 amendment.]

Opinions of Witnesses

Witnesses appearing before the Commission included representatives of various branches of organized labour, the Saskatchewan branch of the Canadian Manufacturers' Association, local employers' associations, mine operators and others.

The Legislative Committee of the six railway brotherhoods stated that the railway unions preferred the voluntary system of collective bargaining which had been in effect on the railways for many years, but since some employers were unwilling to negotiate with unions, the

> brotherhoods are in agreement with the organizations of the labour movement who have asked that the principles of collective bargaining be established by legislation.

The Railway Association of Canada, representing both the Canadian Pacific and Canadian National Railways, also referred to the successful practice of collective bargaining. The Association considered a compulsory measure would create difficulties rather than remove them. Jurisdictional matters as between the Dominion and the Provinces were referred to. Fear was expressed that

> a complicated situation would arise if under provincial legislation collective bargaining groups representing employees of any particular class are appointed in different provinces and the request is made that if Bill 51 is to become law, the Act should in specific terms be declared not to be applicable to the Dominion railway companies, their workers and their undertakings and their employees.

The Commission made no recommendations for changes in the parts of the Bill dealing with the settlement of disputes. It appeared to them to be

> generally agreed that these provisions provide a period for 'cooling-off' and for a reasonable consideration of the matters at issue and that this must result in the settlement of many disputes which fall within the jurisdiction of Industrial Disputes Investigation Act (Canada) and we are of the opinion that if the procedure set out in Bill 51 is followed in disputes which fell within the jurisdiction of the Province, there will be resulting advantage to both labour and industry. Moreover, during the period required for carrying out the procedure of conciliation, the public—an important third party in every labour dispute—will become acquainted with the matters at issue and will be able to estimate the merits of the respective parties. Furthermore, the machinery provided for the selection of bargaining representatives will aid in the settlement of jurisdictional disputes.

As regards the provisions concerning freedom of association and collective bargaining the Commission recommended some simplification in certain definitions and the insertion of a definition of "collective agreement" to indicate that the agreement must be in writing. A collective agreement was defined as

> an agreement in writing between employer or employers and the bargaining representatives of the employees setting forth the terms and conditions of employment.

Coverage of Proposed Act

Representations were made on behalf of companies operating retail lumber yards, small sawmills, etc., and the Saskatchewan Hotelkeepers' Association that small businesses and small hotels should be excluded from the Bill. The Commissioners believed that in these cases there would be great difficulty in organizing unions and the application of the Act to these classes would not create any problem. They therefore declined to exclude these classes and also refused to exclude persons employed in shops in small towns.

On the other hand, the Commission considered that employees who hold positions of trust with the right to supervise, hire and discharge others should not be regarded as employees under the Act:

> As the Bill is intended to regulate the relations between employers on the one hand and employees on the other it does seem that employees who are engaged to see carried out by other employees the wishes of the employer should be regarded as an executive arm of the employer rather than as employees for the purposes of the Bill.

They accepted, too, the arguments of certain professional associations that their members should not be subject to the Act.

The Commissioners considered that the definition of a trade union was too narrow.

> and should be broadened to include independent unions . . . . Employees, however, have the matter of organization in their own hands and if they are not satisfied with an existing union they can organize another, either an independent one or one affiliated with a national or international organization. To deny employees the right to have an independent union appears to be a negation of the right for which labour contends, namely, the right of every worker to join the union of his choice.

They suggested the following definition:

> "'Trade union' means any association of employees formed for the purpose in whole or in part of dealing with employers concerning grievances, rates of pay, hours of employment or conditions of work: and 'organization' when used in relation to employees shall have the same meaning, and when used in relation to employers means any association of employers formed for the purpose of regulating the relations between employers and employees."

To the section providing that bargaining representatives may be elected by a majority vote or may be the officers of a trade union if the majority of the employees are members of a trade union, the Commissioners suggested the addition of a proviso taken from the United States National Labour Relations Act: "Provided that any individual employee or group of employees shall have the right at any time to present grievances to their employer." The provision as to majority rule was approved as one which appears in many statutes and is of the same nature as that prevailing in the political world.

Compulsory Collective Bargaining

With the question of compelling the employer to enter into negotiations, the Commissioners deal at some length. They found it difficult, however, to come to any conclusion as to the probable value of this central provision of the Bill in view of all the factors involved. On the situation in Great Britain they remarked:

> Those who oppose compulsion point to the voluntary system in Great Britain where the relations between employers and employees are as harmonious as in any country in the world; the situation there however is largely due to the liberal attitude of employers to trade unions and also to the fact that labour organizations there have usually been fortunate in their leadership.

Further:

> It may well be doubted whether compulsion will result in satisfactory labour relations; harmonious relationship between employers and employees can be founded and maintained only on mutual confidence, good will and tolerance; on the one hand employers must be prepared to recognize the right of employees

to organize and must be willing at all times to meet the representatives of the employees and to sympathetically hear their grievances; and on the other hand labour must inform itself of the problems and difficulties of employers and not make demands which are economically unsound.

No change was recommended, however, in this section of the Bill. Since both the majority and minority reports of the National War Labour Board had recommended compulsory collective bargaining and since it had been announced that the Dominion Government proposed to apply this principle to war industries at least, for the sake of uniformity it was considered better that compulsory bargaining should be provided for by the provincial legislature in respect of industries remaining within provincial jurisdiction.

In section 5 (11) of the Bill a change was recommended in order that an application could be made to the Minister for cancellation of bargaining rights at the end of the year instead of at the end of six months.

Incorporation of Trade Unions

An interesting section of the Commission's report reviews the history of the attitude of trade unions on this continent to the proposal that unions should be incorporated. The opposition of unions to incorporation dates from the Taff Vale judgment of the House of Lords in 1901 in which it was held that a registered union might be sued and its funds attached to satisfy the damages. It might be noted that shortly after this decision in Britain an award of damages and an injunction in the same terms was granted in British Columbia against the Rossland Miners' Union. The result in British Columbia was the Trade Unions Act, 1902, and in Britain the Trade Disputes Act, 1906. The latter forbids any court entertaining an action against a trade union in respect of tortious acts alleged to have been committed by or on behalf of the union.

On the whole the Commissioners were of the opinion

> that the incorporation of unions would not benefit employers nor would it be the undesirable thing which labour fears. Moreover, we do not think incorporation should be forced by legislative enactment because such a course would amount to selecting trade unions from among voluntary organizations for discriminatory treatment and it would accomplish little in increasing the financial or other responsibility of the unions and would constitute the needless antagonizing of labour organizations. As time passes, circumstances may warrant legislation restricting the activities of unions but the remedy in our opinion is to be found rather in regulation than incorporation.

It might be interpolated here that the legislation which is gradually being put into effect in the British Colonies (*see* p. 132 of this issue), in order to encourage trade unionism and collective bargaining includes the provision of the Trade Disputes Act, 1906, noted above. As regards the registration of trade unions in Canada, the Dominion Trade Unions Act (R.S.C., 1906, Chap. 125) which was enacted in 1872 and modelled on the English Trade Union Act, 1871, provides for the voluntary registration of unions but very few have registered.

Financial Statements by Unions

Concerning the argument that unions should be required to file with the Government financial statements, the Saskatchewan Commissioners were unable to see

> that the finances of a union concern anyone but the members of the union who should be informed as to the disposition of funds which are acquired from their contributions.

They recomended that the Bill should require every trade union to hold an annual meeting for the election of officers of which ten days' notice should be given to the members. An audited statement of the receipts and expenditures of the preceding year should then be presented to the members. For failure to comply with these provisions a union might have its bargaining rights cancelled.

Another provision suggested would remove the disability at common law of trade unions whose purposes are deemed to be in restraint of trade. The suggested section is taken from the Dominion Trade Unions Act:

> The purpose of a trade union shall not by reason merely that they are in restraint of trade, be unlawful so as to render void or voidable any agreement or trust.

Another clause recommended was one from the Ontario Collective Bargaining Act which stipulates that the provisions of the Dominion Reinstatement in Civil Employment Act, 1942, shall apply in the province notwithstanding the termination of the war and notwithstanding the repeal of the Act by the Dominion Parliament.

Closed Shop and Check-off

As regards the "closed shop", which the draft Bill permitted, the Commission reviewed the information at their disposal and concluded that no change should be made in the Bill in this respect. They considered, however, that

> with the passing of time and with industrial growth in the Province, it will become necessary to regulate such agreements.

In the same way the Commissioners viewed the development of the check-off system by which an employer deducts union membership dues from wages. They recommended that no agreement providing for the check-off should be valid with respect to any employee unless written authority for the deduction had been given by the employee.

Reconstruction

IMPORTANT material containing recommendations for post-war reconstruction in Canada was tabled in the House of Commons late in January, when two official committees submitted their reports.

One of these committees, the Special Committee on Reconstruction and Re-establishment, was composed of members of the House of Commons; the other, the Advisory Committee on Reconstruction, was made up of representatives appointed by the Government from various fields including business, labour, agriculture, science and education, under the chairmanship of Dr. F. Cyril James.

Both of these reports are summarized in the following section. Among the recommendations common to both are that a governmental body be set up to study Canada's resources and prepare a program of development projects.

The House of Commons Committee was on February 4 re-appointed for the 1944 session of Parliament, with continued authority to "study and report upon the general problems of reconstruction and re-establishment which may arise at the termination of the present war." The membership of the Committee remains unchanged.

Report of House of Commons Committee on Reconstruction

Recommendations Deal with Maintenance of Full Employment and Development of Natural Resources

PROPOSALS for maintaining employment in post-war Canada and for developing the country's natural resources are contained in a report[1] tabled in the House of Commons on January 26 by a Special Committee of the House on Reconstruction and Re-establishment. (A previous interim report by this Committee was reviewed in the LABOUR GAZETTE for July, 1943, p. 906. Appointed in March, 1943, the Committee consists of 35 Members of Parliament representing several political parties.)

The Committee gives its opinion that "it is well within the power of governments and industry to maintain full employment for all Canadians during the period of transition from war to peace-time activities." It urges that every member of the armed forces and the merchant navy be assured "that Parliament and Government will be prepared to do what lies within their power to prevent any recurrence of mass unemployment in Canada."

A survey of Canada's natural resources is again recommended; with the object of taking an inventory of development projects based upon them. This would provide information for the Dominion and provinces concerning the usefulness and the financing of each suggested project, and the employment that would be provided. Such a survey, which would include housing requirements, should be undertaken by a body set up under ministerial responsibility, the Committee considers.

In all works financed wholly or in part by the Federal Government, employment preference should be given to members of the armed forces and the merchant navy possessing the necessary qualifications, the Committee states. This preference should extend to industries from which materials and supplies are purchased for use in such works. Where possible such preference should also be granted by the Employment Service of Canada.

Maritime Provinces.—The report contains a number of recommendations aimed at improving the economic life of the people of the Maritime Provinces. These include: development of the fishing industry; rural electrification; extension of cold storage facilities; application of the Prairie Farm Rehabilitation Act to Maritime farmers; forest conservation; assistance in marketing coal; and the introduction of additional secondary industries.

Transportation.—The distance of many farming communities and of much secondary industry from domestic markets and the sea boards makes the questions of transportation and of freight rates "vitally important", the Committee declares.

Construction of an all-season Trans-Canada highway is recommended. This highway should be connected by good roads with the United States highway system, with all national and provincial parks, with the Alaska Highway, and with other strategic points.

Direct railway connection between the Pacific Coast and the Peace River country is urged; also double tracking and other improvements to the Canadian National Railway

[1] Published in full in No. 37, Minutes of Proceedings, Special Committee on Reconstruction and Re-establishment.

in the Maritimes. The committee asks for more constant and reliable communication between Prince Edward Island and the mainland. It suggests improving transportation across the Strait of Canso by the construction of a causeway or some other means.

Agriculture.—The Committee considers that "much must be done for agriculture if we are to make the land a proper place for war-weary veterans to spend the balance of their lives." A study of markets, the improvement of production through chemical research, the improvement of the relationship between agriculture and secondary industry, and the establishment of small industries in farming communities should all be encouraged by governmental action. The idea of a floor under prices of farm products is approved; and rural electrification is considered an important means of improving the social and economic life of the farming population. New credit facilities should be provided, either through extension of the credit union system or otherwise, it is proposed.

Co-operative Movement.—The Committee recommends "that every possible assistance be given to the co-operative movement, both to consumers and to producers, and that this assistance include help in the marketing of production."

Other Recommendations.—The coal and petroleum industry, reforestation and aforestation, irrigation and the development of water power in the Prairies, and elimination of grade crossings, are among other topics discussed in the report.

Finally it is recommended that the House of Commons re-establish its Committee on Reconstruction and Re-establishment during the coming session.

Proposals of Advisory Committee on Reconstruction

Report of Committee Tabled in House of Commons

THE final report of the Advisory Committee on Reconstruction was tabled in the House of Commons on January 28, and has been printed.[1]

Under the chairmanship of Dr. F. Cyril James this Committee carried on its studies of post-war problems for a period of over two years. Its members, in addition to Dr. James, included Messrs. P. R. Bengough, D. G. McKenzie, J. S. McClean, Arthur Surveyer and Dr. R. C. Wallace. Dr. L. C. Marsh served as Research Adviser to the Committee. The report was transmitted to the Government on September 24, and the Committee was subsequently disbanded, its functions being transferred to the Economic Advisory Committee, (L.G., Nov., 1943, p. 1467).

In addition to the main report of the Committee, which is summarized below, the reports of subcommittees dealing with certain specific post-war problems were also tabled in the House. These subcommittees were appointed to study agricultural policy, conservation and development of natural resources, publicly financed construction projects, housing and community planning, post-war employment opportunities, and post-war problems of women.

Work carried on under the auspices of the Committee also includes about twenty studies and factual reports, some of which are still in progress. These deal with a wide range of subjects and embody the results of research work by specially commissioned authorities in the various fields. A brief outline of their contents and recommendations appears as an appendix to the main report.

Summary of Report

RECONSTRUCTION policy should be directed towards five major objectives in the period following the close of the war, according to the report of the Advisory Committee on Reconstruction. These are as follows:

(1) Peace-time employment as speedily as possible for all men and women who are able and anxious to work;

(2) Production of an adequate supply of goods and services for purchasers at home and abroad; with materials being made available for essential goods before luxuries;

(3) Freedom from want for those who are unable to obtain employment through no fault of their own; protection of the children of Canada against malnutrition and against inadequate educational opportunities;

(4) Provision by the Government with a minimum of delay for free functioning of markets, domestic and foreign;

---

[1] *Report of Advisory Committee on Reconstruction*, King's Printer, Ottawa, 25 cents.

(5) The Government's monetary policy, price control and rationing policies to be modified from time to time during the transition period in a fashion designed to prevent inflation.

In order to achieve these five aims the Committee believes that certain specific responsibilities should be accepted by industry, labour, and government; and the report outlines the respective roles which it considers should be played by these groups.

Effect of the War on the Canadian Economy

In making plans to achieve post-war objectives, the Committee believes that consideration must be given to changes that have been brought about by war conditions in the Canadian economy. These changes, in the Committee's opinion, augur well for the country's prosperity in the immediate post-war future.

(1) Canada will have the equipment to produce more goods than ever before;

(2) There will be a larger labour force available, including more skilled workers;

(3) There will be a pent-up demand for goods.

(4) Industries, wage earners and farmers have all improved their financial position, so that money will be available for investment and for spending.

Role of Private Enterprise

The first responsibility of private enterprise as regards post-war reconstruction is to undertake detailed and specific plans for reconversion to peacetime production, according to the report.

Each individual enterprise should specify the goods it intends to produce after the war and make an analysis of where and how they are to be sold. It should consider the length of the period before production of civilian goods can begin, decide what equipment and raw materials will be needed, and what substitutes can be used in case of shortages. Selling prices should be estimated; and the enterprise must work out methods of financing its reconversion and its purchase of new equipment. Finally it is important that advance plans be made by each enterprise as to the employment opportunities it can provide for skilled and unskilled labour, both during the period of reconversion and after reconversion has been completed.

In addition to this type of planning by each individual enterprise, an effort must be made to co-ordinate the post-war plans of various enterprises operating in the same field, either by industry itself, acting co-operatively, or through some government agency.

Small businesses (such as retail stores and small plants) have particular problems in financing and in planning for stable production, the Committee feels, and should be encouraged to study them co-operatively in each city. The Committee emphasizes that changes may be necessary in Canada's existing financial machinery in order to ensure that small enterprises will be able to obtain the funds necessary for such equipment and plant as they are able to use with efficiency and profit.

Meaning of "Full Employment"

The phrase "full employment" in the Committee's view does not mean that every individual in Canada must be continuously employed. Except on such occasions when national emergency demands the mobilization of every individual, there will be many who do not desire employment. This group would include many married women, many older people retiring on pension, and increasing numbers of young persons in search of a better education. Another group, consisting of seasonal workers, will follow a succession of employments during the course of a normal year.

"The advocacy of policies designed to maintain full employment", the report states, "implies no more than a determined effort to eliminate that mass unemployment which has, in the past, been a distressing corollary of the cyclical fluctuations in business activity, and the existence of a small amount of temporary unemployment is perfectly consonant with the attainment of such an ideal."

An important section of the report outlines the economic policies necessary if business depressions and economic cycles are to be avoided. The Committee considers that a decisive cause of business cycles in the past has been the wide fluctuations that have taken place from one period of years to another in "capital formation" (that is, in the purchase of machinery, equipment and raw materials with a view to using such goods in the production of other goods and services). The amount of money spent on capital formation has varied from a high to a low proportion of the national income with resulting fluctuations in employment. A major factor in avoiding depressions in the future would be for both business and government to undertake long-range planning in order to maintain a more even flow of capital formation from year to year.

Accordingly every business enterprise is held to be responsible for developing a flexible long-range program of capital expenditure; with plans being made well in advance for such expansion and changes in machinery and equip-

ment as will become necessary over a period of years. These projects must be ready to be undertaken at short notice so that they can be put into effect promptly by individual firms in periods when the country's aggregate capital formation shows a tendency to decline. Tax policy and the facilities of credit institutions should be organized so as to facilitate this program, in the Committee's opinion. The Committee points out also that certain Government projects may be arranged so as to assist the program by coming into effect when capital formation lags.

"Public Investment" Projects

The counterpart of the report's recommendation for long-term planning by business is its advocacy of a program of "public investment", that is, a program of Dominion, provincial and municipal government projects designed to enrich the social and economic resources of the country and to act as an employment stabilizer.

"Make-work" projects designed solely to provide employment and likely to be wasteful and inefficient are specifically rejected by the Committee. Each of the projects to be undertaken would contribute to the nation's future; and in planning the projects careful consideration would be given to the precise nature of the benefits to be derived.[1] For instance, in the words of the report, "power dams and railway construction may earn a direct revenue from the facilities created; the building of roads and bridges tends to augment the income of the community from taxes and to increase its efficiency; the erection of schools, hospitals and museums preserves the health and increases the skills of the people."

The Committee recommends that master plans be prepared by the appropriate authorities for every town and rural community throughout the country: and that regional planning boards be established to handle problems of a wider scope. To co-ordinate policy throughout the whole of Canada a National Development Board is proposed, which would make preliminary studies on its own account or in co-operation with provincial and local authorities; and would guarantee that all projects were studied in sufficient detail and analysed by the same criteria.

The report recommends that all governmental bodies in Canada study the machinery of "cyclical budgeting". Under this policy a government makes a regular annual appropriation to meet its normal expenditures; and in addition makes a separate appropriation to be saved up in times of business activity and spent on public investment projects when depression threatens.

Public investment projects are divided into two groups by the Committee: (1) those projects that are of urgent importance to the community; and (2) projects not of urgent importance, which can be postponed until convenient.

The first group, which includes maintenance and improvement of the transportation system, certain urgent conservation projects, and low-cost housing, should be put into operation as soon as possible after the war, regardless of whether or not the projects compete with private business for labour and materials.

Projects in the second group should be carefully blue-printed so as to be ready to be put into execution at a few days' notice. These projects would be for use whenever a period of depression or unemployment threatened. This action would take up the slack of employment until private business was able to resume full productivity.

Conservation of Natural Resources

The importance of conservation programs in providing employment and in enlarging the national income of the Dominion is stressed by the Committee.

The following are some of the Committee's suggestions in this respect:

(1) The fact that all resources are interrelated, should be kept in mind when their use and development is considered. The best method of development is on the basis of regional planning; and the logical method of defining regional areas is to divide them into watershed areas where possible.

(2) Comprehensive aerial surveys of the whole Dominion are urgently needed.

(3) Systematic prospecting for new mineral resources should be undertaken, in large measure under government auspices. Taxation regulations should be revised to make mining more attractive for private capital.

(4) A large corps of returned men and others (at least 15,000) must be trained in protection of forest resources.

(5) Research should be carried on in the uses of wood and in uses for waste products of the lumbering and pulp industries.

(6) Flood control, water power, and irrigation projects should be developed; projects for the St. Lawrence, Saskatchewan, St. Mary's and Milk rivers are specifically mentioned.

(7) Rural electrification would "do more than any other single factor, except equitable

[1] A series of criteria for evaluating projects is given in the Report of the Sub-Committee on Construction Projects.

prices for farm products, to stabilize farm life in Canada."

(8) Effective policies to conserve wild life should be developed.

(9) Programs to develop a large tourist trade in Canada should be encouraged: these would include creation of more parks, better roads and housing facilities in vacation lands, including simple hostel accommodation for those of low income.

Governmental Responsibility

Fiscal Policy.—Elimination of the excess profits tax and a reduction of the corporation profits tax are both recommended, in order that the profit motive may be invoked as an additional force in hastening reconversion. Manipulation of the latter tax is suggested as a means of stimulating or curbing private investment at any given period, and thus maintaining an even flow of capital formation.

Consumer sales taxes are considered to be "of doubtful merit" in view of the efficiency of the personal income tax as a means of securing revenue.

Commodity Controls.—Various controls have been used in wartime, including raw material priorities, price control and rationing. These have served to direct materials and labour in accordance with war needs, and have acted as a brake on inflation. These controls, the Committee feels, should be removed as soon as possible after the war, but not before the economic situation permits. In the case of raw materials, priorities may be abandoned as soon as substantial supplies become available. In the case of foodstuffs and clothing, controls may have to be retained for a longer period, particularly if supplies are to be made available for the rehabilitation of Europe and Asia.

Machinery for Re-employment.—To facilitate the prompt re-employment of those now in the armed forces or war industry, the Committee recommends that the efficiency of the Government employment offices be developed to the point where they can assume responsibility for a complete coverage of the employment opportunities that are available at any given time.

Counselling and vocational training should be afforded returned men; and in addition to employment preference in the public service, priority should be given to ex-service men by employment offices in referring them to employers for vacancies for which they are qualified.[1]

[1]A detailed review of placement and training facilities required for civilian occupational adjustment is included in the report of the Subcommittee on Employment Opportunities.

Responsibility of Business to Labour

"Private business enterprises must, to a greater extent than heretofore, recognize the fact that labour has a tremendous and important stake in the national economy of this Dominion," the report declares. The following responsibilities of business to its employees are specified by the Committee:

(1) Every business enterprise must recognize the clear responsibility for planning its operations in a manner that will provide continuous employment at steady wages for an appropriate number of workers.

(2) Management must maintain wages at as high a level as possible in the light of prices, costs of materials, and a reasonable profit. Attention should be concentrated on the annual income of the worker rather than the hourly rate of the weekly wage; plans involving profit sharing, holidays with pay, and retirement allowances may constitute an important part of this income.

(3) Business must accept the fact that labour and management are partners in a common enterprise. This implies more than an attitude of justice, even of generosity, on the part of one partner. Partnership implies co-operation and frank discussion of common problems. Labour-management committees should be set up within each enterprise.[2]

(4) Recognition must be given to the right of workers in each plant or industry to organize in the union of their choice and to bargain collectively with their employer.

Responsibility of Organized Labour

Among the types of temporary unemployment which the Committee feels cannot be completely abolished, is unemployment caused by the fact that in the course of time various individual firms may fail through inefficient management or other causes; and that particular trades and particular industries may decline as a result of changes in public taste or of changes in technology. Any effort by labour to preserve unsound firms or obsolete industries would be harmful to the health of the national economy, the Committee declares.

Labour has a responsibility to recognize this basic fact and to consider individual problems of wage and employment adjustments in the light of the broad interests of the country as a whole, the report states. For example, "no useful result can be secured by policies that attempt to prevent the discharge of workers from munition factories". There

[2]The report of the Subcommittee on Employment Opportunities recommends that these should take an active part in considering post-war adjustment policies.

will be a "tremendous transfer of labour" at the end of hostilities; and trade unions must bear a considerable responsibility in aiding its successful achievement.

A further responsibility rests upon organized labour in regard to the admission of individuals to certain peacetime trades. Although the spirit of craftsmanship must be maintained, it is nevertheless considered essential that each union make sure that its rules and regulations do not constitute an unnecessary barrier to the employment of individuals (including thousands now in the armed forces and in war work) who are fully competent to undertake the work but have acquired their skills by methods not covered by union regulations.

In regard to wages and salaries, it is pointed out that "the attainment of economic equilibrium after the war" will require changes in the wage scales of specific industries. Present wage scales and overtime payments, particularly in munitions plants, may prove too high for private industry in the immediate post-war period.

The ideal of partnership between labour and management, which is emphasized by the Committee, "places upon the shoulders of organized labour the responsibility to consider each case not as an isolated controversy but as part of a comprehensive problem that involves all workers and indeed all Canadians", the report declares.

Social Security and Welfare

The Committee reiterates the need for comprehensive programs of social security, public health and education as of basic importance in planning for reconstruction, particularly in relation to the re-employment problems of the transition period. It is pointed out that a social insurance program should not be considered as something complete in itself; it should be part of a broad welfare program for the improvement of the human resources of the nation. Moreover, its various benefits need to be paralleled by a system of vocational training, placement service and job transference facilities. And finally, social insurance would be unworkable if conditions of mass unemployment were allowed to develop.

In addition to their role in improving the welfare of the nation, it is emphasized that social security benefits can be most useful in stabilizing the country's economy. Contributions received from the insured population tend to reduce spending during periods of full employment, and thus reduce the tendency to inflation. During periods of adjustment, on the other hand, unemployment insurance benefits and pensions help to maintain the level of spending power when it might otherwise decline. The views accepted of the Committee on the general subject of social security have already been published in the *Report on Social Security for Canada* by Dr. L. C. Marsh (L.G., April, 1943, p. 429).

Other Spheres of Policy

An outline is given of Canada's situation as regards international reconstruction, in which the country's full participation is declared to be vital.

Various recommendations are also made dealing with the special problems of agriculture which cannot be described in the present brief summary.

The Committee expresses itself as "strongly impressed with the need for co-ordination of policy and procedure" among the several governmental authorities in the Dominion. It urges the calling of a Dominion-provincial conference to settle matters related to the distribution of financial revenue and to the legal framework of the British North America Act.

Finally the Committee recommends the appointment of a Minister of Reconstruction Planning to assume responsibility for the further planning that lies ahead.

Manpower

Lay-off Procedure in War Industry

Program Devised to Deal with Lay-offs Necessitated by Changes in War Production

A PROCEDURE for dealing with lay-offs in war and related industries has been determined by National Selective Service, according to a statement by the Honourable C. D. Howe, Minister of Munitions and Supply, made in the House of Commons on February 2.

Documents tabled by the Minister give information as to this procedure. These also indicated that lay-offs have been and will be necessitated from time to time in Canadian war industries by changes in the war production program. The pattern of the war is constantly changing, resulting in changing demands for various types of war equipment. As a result, instructions are from time to time issued to war contractors to curtail production on certain stores and to stop production entirely on others.

The Department of Munitions and Supply is co-operating by accepting responsibility for giving National Selective Service advance notice and accurate information regarding labour to be released by prime contractors as a result of production changes. This will be done in all cases involving a lay-off of 50 or more workers in order that National Selective Service may be able to:

(*a*) obtain the maximum number of men eligible for the armed forces,
(*b*) procure by transfer, workers with particular skills urgently needed for other high priority industry, and
(*c*) place released employees in other jobs with a minimum of disruption or dislocation.

It is pointed out that practically all lay-offs will be in industries of A and B labour priority. According to National Selective Service Regulations[1] employers in these industries may not release employees without the written permission of a selective service officer.

A circular letter to war contractors from Mr. Arthur MacNamara, Director of National Selective Service, (tabled by the Minister) outlines the procedure to be followed by employers in collaboration with local employment and selective service offices in reassigning workers to be laid off. The letter, dated January 19, 1944, is as follows:

Information for War Contractors in Connection with "Lay-offs"

You are no doubt already aware that essential changes in Canada's war production program necessitate certain "layoffs." National Selective Service is most anxious in such cases to reassign employees promptly and with the least inconvenience to all concerned.

Definite instructions have been given to all offices of National Selective Service to co-operate fully with employers and to follow the procedure which is briefly outlined herein.

As you know, your establishment has been classified as a "designated establishment" under National Selective Service Civilian Regulations and consequently you may not terminate the employment of any male employee without the permission in writing of a selective service officer. Therefore, the closest possible co-operation will be necessary in working out arrangements between yourselves and the local employment and selective service office.

Before giving any general or individual notice you are therefore required to discuss the matter with the manager of your nearest employment and selective service office. He will be ready to render immediate assistance in working out the details of the "lay-off."

The procedure to be followed in reassigning labour due to "lay-offs" will be as follows:

1. Owing to the needs of the army for a large number of men each month, the first step must be to release those men suitable for the armed forces. If an industrial mobilization survey has been completed for your establishment a representative of Selective Service will provide you with a copy of the survey plan and discuss with you the status of each employee on deferment with a view to making arrangements with the divisional registrar to call up such men for military training, unless there is very good reason why such men should not be called at this time. If no industrial mobilization survey has been made, you will be asked by the National Selective Service

[1] P.C. 246, Jan. 17, 1943, as amended by P.C. 6625, Sept. 1, 1943 (L.G. Oct., 1943, p. 1333).

officer to provide a list of all persons in your employ presently on deferment, also a list showing all other male employees within the age groups and of the marital status designated under mobilization regulations.

2. The next step to be taken should be to reduce working hours to 48 hours per week, or to the normal working hours per week for the industry if less than 48.

3. Where it is necessary to lay off persons in addition to those on deferment, it is the intention that they should be laid off generally in the following order, subject of course to seniority rights where an establishment is covered by a collective bargaining agreement, or subject to the conditions of any other employer-employee contract:

(*a*) Workers with agricultural experience, particularly in dairy farming or stock raising.
(*b*) Workers whose services could be utilized in other essential industries in the vicinity of your establishment.
(*c*) Workers whose services could be utilized by outside essential industries and who could be moved to such.
(*d*) Younger workers without family obligations.
(*e*) Married women if their husbands are supporting them.
(*f*) Older men and women if the foregoing classes have been exhausted.

4. Wherever possible arrangements will be made to have national selective service officers interview at the plant the workers who are to be laid off and direct referrals to new jobs will be made when possible. This will enable National Selective Service to handle the situation in a more orderly manner and to offer new employment with as little lost time and inconvenience as possible.

Your co-operation in assisting our officers in dealing with this difficult situation will be much appreciated.

A. MacNamara,
Director of National Selective Service.

Necessity of Orderly Procedure Emphasized

Instructions issued by National Selective Service to employment offices emphasize in the following terms the necessity of lay-offs being carried out according to the prescribed procedure:

> The officer detailed to communicate with the employer concerned will arrange for an orderly lay-off in the light of the general manpower situation at the particular time. He must courteously point out to the employer that we are definitely interested in who is, or who is not, to be laid off. It is not our intention that the least desirable or least efficient workers will be those to be laid off but rather, first, those persons available for the army, and, second, other persons who can be moved to the advantage of, or with the least disturbance to the general labour situation. The demands for the army are continuing demands, and must have a definite priority, unless the persons available have exceptional skills which are greatly in demand by high priority industry, for example, tool makers, journeymen machinists, journeymen electricians, etc., should be transferred rather than be called up.
>
> It should be mentioned that a percentage of the men who are on deferment and who will be called by the military authorities, will not be accepted by them and may later be available for re-employment. If such men return to employment additional men on deferment, if available, must be given notices of separation.

Responsibility of War Contractors

A letter to war contractors from Mr. G. K. Sheils, Deputy Minister of Munitions and Supply, was also tabled by the Minister. This letter outlines pre-lay-off procedure to be adopted by war contractors to the department. When definite instructions are received either to stop production or to reduce production rates, or when outstanding orders are reduced, war contractors are requested, if lay-offs appear imminent, to take the following action:

> (a) Communicate immediately with the local selective service officer as no lay-off may take place without that officer's consent.
> (*b*) Supply the selective service officer with the names and addresses of all sub-contractors affected by the production change.
> (*c*) Advise the above noted sub-contractors and suppliers and request them to communicate with their local selective service officer if lay-offs are to occur.
> (*d*) Consult with your labour-management committee or the plant representatives of your employees before notices of separation are given and advise them, as far as is consistent with security, of the reasons for the production change and ask them to inform the other employees.

"Please note," the letter continues, "that, except in so far as necessary to carry out the above instructions, any and all advices regarding production changes are confidential as between this Department and your company . . .

"When a contract is about to run out and no renewal appears to be likely and such completion of contract will result in labour being laid off in the near future, it is requested that you give your local selective service officer ample notice of the said lay-off to enable him to make his necessary arrangements, also that you advise the sub-contractors and suppliers concerned and request them to communicate with their local selective service officer as contemplated in paragraph (*c*) above."

The Minister stated, in reply to a question, that officials of labour organizations were consulted in connection with lay-offs.

Reinstatement in Former Employment of Workers Transferred by National Selective Service

CIVILIAN workers who have been required by National Selective Service to change their occupation for more important war jobs have a right to reinstatement in their former employment when their services are no longer required in war work, according to an order in council recently announced by the Honourable Humphrey Mitchell, Minister of Labour.

National Selective Service Regulations had already provided for reinstatement in former employment after a single change to more important work. The new order (P.C. 486, Jan. 25, 1944) amends the Regulations by providing for the reinstatement of a man in his regular employment, regardless of how many changes of employers he may have been required to make by Selective Service after leaving his first regular employer.

Workers transferred by Selective Service are entitled under the Regulations to the same rights as members of the Armed Forces under the provisions of the Reinstatement in Civil Employment Act. This Act, which became law in July, 1942, requires employers of persons accepted for certain war services to reinstate such persons in employment at the termination of their service. As far as practicable this must be done under conditions not less favourable than would have applied had the persons remained in their employment (L. G., 1942, p. 920).

The subject of reinstatement is dealt with in Section 213 of National Selective Service Civilian Regulations. As amended, this section now reads as follows:—

1. Where a Selective Service Officer directs or requests an employed person to accept other employment under this part and notifies the employed person's employer that such direction or request is made pursuant to these regulations and the employed person thereupon accepts such employment, the provisions of The Reinstatement in Civil Employment Act, 1942, shall apply *mutatis mutandis* to the reinstatement of such person upon the termination of the employment which he has been directed or requested to accept.

2. Where a person terminates the employment of another person pursuant to an order made under these regulations, the provisions of The Reinstatement in Civil Employment Act, 1942, shall apply *mutatis mutandis* to the reinstatement of the person whose employment has been terminated when the Minister certifies that such person is no longer required for other work.

3. Where an employee, who has become entitled to reinstatement in his original employment by virtue of the provisions of this Section, is or has been directed or requested by a Selective Service Officer to accept employment other than his original employment under this Part, such employee shall, upon the termination of the employment which he has been or may hereafter be directed or requested to accept, have the same right to reinstatement in his original employment as that to which he was entitled upon the termination of the first employment which he was directed or requested to accept.

4. For the purposes of Sub-section (3) of this Section "original employment" shall mean the employment in which the employee was employed at the time he received and accepted his first direction or request from a Selective Service Officer to accept other employment under this Part.

Coal Miners' Exemption from Military Service Continued

COAL miners throughout Canada have been exempt from military call-up under the terms of an order in council of May 17, 1943 (L.G., June, 1943, p. 739). A new order in council, announced recently by the Honourable Humphrey Mitchell, Minister of Labour, extends from February 1 until August 1, 1944 the period for which this exemption applies. During this period also, coal miners will not be accepted for voluntary enlistment in any branch of the Armed Forces without a permit to enlist from a Selective Service Officer.

The order applies to every person who as his sole or main occupation is engaged or employed as a coal mine worker; and to every person directed to employment as a coal mine worker pursuant to National Selective Service Civilian Regulations. Every such person is "deemed to have been granted a postponement order until the first day of August, 1944, pursuant to the National Selective Service Mobilization Regulations."

The order (P.C. 121, Jan. 10, 1944) amends section 210 A of National Selective Service Civilian Regulations.

(In the LABOUR GAZETTE for January, p. 10, appeared a statement on the labour supply situation in the coal mining industry.)

Physicians for Emergency Medical Boards

An order in council of January 26 (P.C. 34/510) authorizes the Minister of Labour to appoint four physicians to supervise emergency Medical Boards established for the examination of men under the Mobilization Regulations. Two of these physicians are to have their headquarters at Ottawa, one at Halifax, and one at Toronto. Under the order local physicians may also be employed from time to time as required to complete Medical Boards.

Decisions of the National War Labour Board

RECENTLY the National War Labour Board has issued decisions in the following cases:

Great Lakes Power Company, (Sault Ste. Marie, Ont.), and Canadian Electrical Trades Union, Branch No. 3.

Ford Motor Company of Canada Limited, and Local 200, U.A.W.—C.I.O.

Canadian International Paper Company, Limited, (Temiskaming, Que.), and International Brotherhood of Pulp, Sulphite and Paper Mill Workers.

Terreau and Racine Limited, (Quebec, P.Q.), and International Moulders and Foundry Workers' Union, Local No. 74.

Aluminum Company of Canada Limited, and Syndicate of La Tuque Aluminum Employees, C.T.C.C., and International Union of Aluminum Workers of La Tuque, A.F. of L.

Canadian Aircraft Instruments and Accessories, Limited.

Western Dominion Coal Mines Limited, and Saskatchewan Coal Miners' Union, Local No. 1.

North Shore Lumber Corporation Limited, (North Vancouver, B.C.), and its employees.

Burns and Company, Limited, (Calgary, Alta.), and Packing Plant Employees' Federal Union No. 105.

The Abitibi Power and Paper Company; the Great Lakes Paper Company; the Spruce Falls Power and Paper Company; the Provincial Paper Company; and the International Brotherhood of Paper Makers and International Brotherhood of Pulp, Sulphite and Paper Mill Workers.

Burns and Company, Limited, (Winnipeg, Man.), and United Packinghouse Workers of America, Local 224.

Famous Players Canadian Corporation, Limited, and B. C. Projectionists Society.

L. M. Bell Limited, Bell Busses Limited, and Canadian Brotherhood of Railway Employees and other Transport Workers.

Re: Great Lakes Power Company, Limited (Sault Ste. Marie, Ontario) and Canadian Electrical Trades Union, Branch No. 3

Reasons for Decision

This is an appeal from a decision of the Regional Board for Ontario concerning vacations with pay.

The application was for approval of the following schedule:

ALL DAY MEN WHO WORK SIX DAYS A WEEK WITH TIME AND A HALF FOR SUNDAYS

After	one	year	of	employment	2	days	holidays
"	two	years	"	"	4	"	"
"	four	"	"	"	6	"	"
"	six	"	"	"	9	"	"
"	eight	"	"	"	11	"	"
"	ten	"	"	"	12	"	"

ALL OPERATORS AND HELPERS IN THE SAULT PLANT WHO WORK SIX DAYS A WEEK

After	one	year	of	employment	2	days	holidays
"	two	years	"	"	4	"	"
"	four	"	"	"	6	"	"
"	six	"	"	"	8	"	"
"	eight	"	"	"	9	"	"
"	ten	"	"	"	10	"	"

The Regional Board refused to approve the plan submitted, but gave authority to grant one week's vacation under the terms of Decision Bulletin No, 17.[1]

The proposal is that only employees who have at least 6 years' service shall receive more than one week's vacation. On the basis of the reasons for the Board's decisions in the following cases: Provincial Transport Company, October 6, 1943 and Colonial Weaving Company, October 12, 1943, we are of opinion that the vacation plan submitted in the original application should be authorized.

A survey of paid vacation plans in the field of public utilities indicates that the plan proposed is a reasonable one when considered on a comparative basis.

Except as to the length of the vacation periods presently approved, the conditions stated in Bulletin No. 17 will apply.

The appeal is allowed.

January 5, 1944.

[1] *See* L.G., Dec. 1943, p. 1635.

Re: Ford Motor Company of Canada Limited and Local 200, U.A.W.—C.I.O

Reasons for Decision

(Oral Decision)

This question of vacations with pay seems to have developed into a somewhat confused one, with some of the Regional Boards. Some of the Boards apparently take the position that it is not within their power to issue a direction, rather than an authorization.

This Board, as originally constituted, did give considerable thought to the matter, and as a result there was developed Directive Bulletin, D.B. 17[1], as it is called. The basic idea behind that bulletin was that where vacations with pay had not been enjoyed prior to November 15, 1941, vacations during war time should be limited to one week, which is, of course, in accord with the Winston Churchill statement which we quoted in the Maintenance of Way decision, a railway case[2]. However, D.B. 17 only specifically authorized an application by the employer, or a joint application by the employer and the union. It did not contemplate an application on the part of employees alone being granted. The Board, as presently constituted, in the case of Division 4, another railway case, laid down the principle that it was not fair that employees should not have the same right to make an application, and develop reasons, as the result of which the privilege could be granted. That decision plainly contemplated that it was within the power, not only of this Board, but of the Regional Boards, to make a direction, if they felt the circumstances warranted it.

The general principles that we have followed on this Board are to be found in the two cases which I have already mentioned, Division 4, and the Maintenance of Way cases. That means that as far as war production workers are concerned, we have, generally speaking, approved the idea of a vacation with pay, and in case some other custom did not provide a reasonable comparison, we have limited it to one week's vacation with pay.

We do not follow the principle that D.B. 17 is a rigid formula, but we do take the position that its contents provide a basis upon which the company and the union should negotiate, and unless there is something in the agreement at which they arrive that is directly repugnant in general principle, it has been our policy to approve any agreement arrived at. It is to be observed, of course, that back of bulletin D.B. 17 is the idea that there are some conditions which should be observed before the worker becomes entitled to a vacation with pay, aimed at cutting the rate of absenteeism, as far as can be done, related up to this subject.

We all feel in this case that the appeal should be allowed, and that the authorization of the Ontario Regional Board should take the form of a direction that there should be one week's vacation with pay, generally speaking on the basic principles that are to be found in D.B. 17 and subject to collective bargaining between the company and the union to arrive at an agreement within those principles. As far as the bargaining process is concerned in order to arrive at a plan that will be acceptable to both parties, we take it for granted that the parties will negotiate to the end that there will be the least possible disturbance in production conditions, which may mean in this case, that a staggered plan of some kind may be the way to work it out. We leave that to the company and the union. When a conclusion has been arrived at, you may both submit any plan for approval of this Board.

Now, with respect to some of the matters that are referred to in the letter of the company of December 23, 1943, we deem it unnecessary to have anything stated in the order that it is limited to the duration of the war, because we take the position that any directives that are made by the Board, as a Board constituted under the War Measures Act to deal with wages and conditions of work under wartime conditions, with the proclamation of peace cease to be effective, and all of the questions involved then become a matter of collective bargaining between the company and the union. We therefore feel it is unnecessary to incorporate anything in the direction itself to that effect.

Accordingly the appeal will be allowed, and the parties may present a plan in due course for approval, when we will deal with it again.

January 7, 1944.

Re: Canadian International Paper Company, Limited, Temiskaming, Quebec, and International Brotherhood of Pulp, Sulphite and Paper Mill Workers

Reasons for Decision

This is an appeal from a decision of the Regional War Labour Board for Quebec dated February 25, 1943, refusing increases in the basic wage rate.

Evidently there was some considerable confusion and delay before the Quebec Board, and the Finding and Direction of that Board while dated February 25, 1943 was finally issued in revised form on March 6, 1943. Some steps toward appeal were taken but nothing definite was done before this Board till July 24, 1943, when leave to appeal was granted. The parties then proceeded to complete their submissions but at their request the matter was kept off the list for hearing until November 10, 1943.

A hearing of the appeal then took place when it became evident that the Union was in the process of launching new proceedings before the Quebec Regional Board for wage increases at a number of Quebec mills including the one in question here at Temiskaming. As a matter of fact the new proceedings had been launched on October 5, 1943 more than a month before the hearing of the appeal took place. We retained the matter pending the Quebec Regional Board dealing with the new application. We were concerned that there should be no duplication of process but at the same time did not consider that the appeal should be dismissed until we were sure that the new application would be dealt with in the usual way by the Quebec Board.

It now appears that the parties received official notification of the Quebec Board's decision on the 10th of this month although the Finding and Direction is dated December 22, 1943. Our information is that the new decision grants increases but that certain features will be the subject matter of a further appeal.

In the circumstances we feel that to keep alive the decison appealed from in this case would be only encouraging a duplication of process. It must be taken that the Union having elected to make a new application in effect and for all practical purposes has abandoned the old. Accordingly, the appeal will be dismissed.

January 12, 1944.

Re: Terreau and Racine Limited (Quebec, P.Q.) and International Moulders and Foundry Workers Union, Local No. 74

Reasons for Decision

This appeal is from a decision of the Quebec Regional Board refusing the Union's application for increase of cost-of-living bonus to the full amount. The Company is now paying the mandatory bonus.

The Regional Board proceeded on the assumption that the Union had by paragraph 3 of the collective agreement between the parties dated April 8, 1943, contracted itself out of the right to make the application. The clause reads as follows:

". . .les parties . . . consentent mutuellement à accepter les conditions suivantes:

3. De faire une demande conjointe au comité Régional en Temps de Guerre à Québec, pour le réajustement des taux de salaire et du boni de vie chère, tel que décrété par la loi et convenu mutuellement entre le Bureau de Direction de ladite Compagnie et les membres de l'union 'International Moulders Workers of North America', employés de ladite Compagnie".

Or, to quote Mr. Menary's version:

"That it is also agreed we are prepared to join with the Committee of employees in making a joint request to the Regional War Labour Board of Quebec for such adjustment in wage rates or cost-of-living bonuses as in accordance with the law as may be mutually agreed upon between the Management of the Company above mentioned and a Committee of its employees, members of the International Moulders and Foundry Workers' Union".

On this preliminary question, our decision was given orally at the hearing. To repeat what was then said, we are of the opinion that clause 3 of the agreement cannot be considered in the way the Regional Board has apparently considered it. It has not the effect of depriving the employees of their right to apply for an increased bonus under the law. To do that, a clear intention must be expressed in words leaving no room for doubt. What the clause here says is merely that the parties agree to make a joint application in respect of adjustments mutually agreed upon. In our view, the wording is not sufficient to bar the Union from making an application without the concurrence of the employer.

With respect to the application itself, our jurisdiction is stated in Section 34 (3) of P.C. 5963. We must establish comparisons within the industry. The Union indicates several of the larger foundries in Montreal, Hull and Three Rivers where full cost-of-living bonus is being paid. On the other hand, the Company argues that the proper comparison is with the smaller foundries in the Quebec City area.

We have examined the matter under both submissions and also as to wage rates and bonus combined, and we have come to the conclusion that the bonus here should be $2.50 weekly, plus the 35 cent increase generally ordered by the Board from November 15, 1943.

The increase will be effective from the date of the Regional Board's decison, namely September 17, 1943.

The appeal is therefore allowed to the extent indicated.

January 12, 1944.

Re: Aluminum Company of Canada Limited and Syndicate of La Tuque Aluminum Employees, C.T.C.C., and International Union of Aluminum Workers of La Tuque, A.F. of L.

Reasons for Decision

This is an appeal by the Company from a Finding and Direction of the Quebec Regional War Labour Board dated May 25, 1943 ordering increases in wages at the Company's plant at La Tuque. The Finding and Direction had the general overall effect of bringing wages at La Tuque to the general level prevailing at the Company's Arvida plant, although in the case of some classifications there were exceptions.

At the time of making the application, the A.F. of L. Union was not a party to the proceedings. The application was launched by the Syndicate. Subsequently, and before the appeal was heard, the A.F. of L. Union succeeded in obtaining the Collective Labour Agreement after a vote had been taken. The A.F. of L. Union then made application to be made a party to the appeal proceedings and its application was granted.

When argument was completed, the Board was left in some doubt as to whether the method of comparison adopted by the Regional Board was the proper one to employ in the circumstances. Accordingly, we appointed Professor Cameron of Queen's University as referee to make a survey of comparative working conditions at the Company's plants in Quebec and report to the Board. Dr. Cameron's report has been received. We now proceed to dispose of the matter.

The Company operates five plants in the Province of Quebec. The oldest is at Shawinigan Falls, opened about forty years ago. The Arvida plant was opened in 1926, the La Tuque plant in December 1942, the Beauharnois plant in January, 1943 and the plant at Isle Maligne late in 1943.

It is obvious that, in the evolution of wage rates at the various Company plants, Shawinigan Falls came first. No doubt the Company in building up its wage structure there was influenced to a large degree by prevailing rates at other industrial plants in the district. In Arvida the Company long before the war established wage scales on a somewhat higher level than those at Shawinigan Falls. Apparently the Company initiated this policy on the conviction that cost of living was higher at Arvida than in other communities in Quebec and that the district lacked many advantages obtaining in Shawinigan Falls. Whether the differential so established exactly compensated Arvida employees for the disadvantages is not important. The important principle is that it was a condition accepted by the Company and its employees alike. As late as October, 1941, according to the unanimous report of a Board of Conciliation headed by the Honourable Mr. Justice Savard, the Syndicates very strongly contended that cost of living was higher at Arvida than elsewhere in Quebec.

When the La Tuque plant was ready to be opened late in 1942, the Company submitted its proposed wage rates to the Regional Board which gave its approval on the basis of comparison with the rates prevailing at Shawinigan Falls. Similarly, on December 15, 1942, the Regional Board approved a scale of wages for the Beauharnois plant based on wage scales at La Tuque. On March 16, 1943 the Board directed increases at Arvida without indicating what particular comparison it was using as the yardstick. Certainly it could not have been making a comparison with wages paid in other Aluminum plants in Quebec Province. This direction had the effect of increasing the Arvida differential over the other plants. The Company naturally made application for increases at Shawinigan Falls, La Tuque and Beauharnois to restore the former differential which had prevailed between those plants and Arvida. The Regional Board approved the increase asked for at La Tuque and Beauharnois on a temporary basis because it had knowledge that employees at La Tuque were making an application for still further increases. The increases at Shawinigan Falls were approved without any restrictions or implied conditions evidently because the application was a joint one bearing the signatures of both management and labour. The findings and directions in these cases quite plainly indicated that the Regional Board was now for the first time using Arvida wages as the norm of comparison. Then on May 25, 1943, the Board dealt with the application now under appeal and granted the increases on the basis that "the proposed wage rates are in line with those paid by the Company at Arvida for the same occupational classifications, with a few exceptions only."

It seems quite clear that, in the course of its dealings with Aluminum wage demands, the Regional Board quite properly up to December of 1942 used Shawinigan Falls' rates as the norm of comparison. Whether consciously or not it appears to have undertaken a process of following a circle which can have no end. No doubt it has been subjected to great pressure. It could possibly be only the long arm of coincidence but the demands at Arvida and La Tuque made through the Syndicates correspond closely in point of time with acute jurisdictional difficulties with the A. F. of L. Unions. That together with a good deal of pressure by the Board on the Company to make joint applications suggests a kindly and sympathetic attitude but one somewhat inconsistent with the primary objective of stabilizing wages and wages prima facie not unduly low at that. It must be discernible to the Regional Boards as it is to us that jurisdictional union difficulties are not infrequently accompanied by applications for wage increases and that employers sometimes use the same process as a brake against union organizing activity. The Order in Council makes no provision for quiet or co-operative acquiescence. The Boards are required by Section 25, read literally, to use a norm of comparison which prevailed at November 15, 1941.

Professor Cameron's able report satisfies us that the differential prevailing at Arvida over the other Aluminum plants remains as justified today as formerly when it was acceptable and taken for granted by the Company, the Syndicates and the Regional Board as well.

Accordingly, we feel we must allow the appeal and set aside the direction of May 25, 1943. Before parting with the matter we recommend to the Company that it revise its group production bonus plan now in effect at Arvida so that each shift and each potroom will have its group bonus calculated independently. Further we recommend as well that the Company extend such revised group production bonus plan to all its Quebec plants as soon as possible. This will no doubt receive the approval of the Regional Board when applied for.

Re: Canadian Aircraft Instruments and Accessories Limited

Reasons for Decision

This is an appeal from a decision of the Ontario Regional War Labour Board dated October 25, 1943 by which the Board declined to authorize a wage rate in excess of $300.00 per month for the occupational classification of Personnel Manager of the Company. The Regional Board further declared the employee to be under the Wages Order and not under the Salaries Order.

In cases of this kind Section 13 (2) of P.C. 5963 contains the governing principle involved. It reads as follows:

> "An employee receiving a salary or wages (excluding cost-of-living bonus) at a rate of $250 or more a month shall be deemed, for the purposes of this Order, to be above the rank of foreman or comparable rank, unless the nature of his duties and responsibilities or his relationship to other employees indicates clearly that he is not above the said rank."

Applying the Section to the facts of this case it is clear that, since the employee in question is in receipt of $300.00 monthly, he must be presumed to be above the rank of foreman unless the evidence clearly indicates that he is not above that rank. All of the evidence received by the Board was offered by the Company and without a doubt it indicates that the gentleman in question performs duties of a kind and character which place him above the rank of foreman. In the words of the Section, the nature of the duties certainly do not indicate *clearly* that he is *not* above the rank of foreman.

Accordingly, the appeal should be allowed and the finding of the Regional Board set aside thus leaving the Company the right of making application under the Salaries Order if it so desires.

January 13, 1944.

Re: Western Dominion Coal Mines Limited and Saskatchewan Coal Miners Union, Local No. 1

Reasons for Decision

This is an application for increased wage rates, overtime pay and vacations with pay.

On the matter of increased wage rates, we have decided to grant them to the full extent necessary to bring them up to the highest rates prevailing in the Saskatchewan coal mine area but not above. We are taking care as well to see that the new authorized rates will maintain present differentials as between classifications on the property. The new rates will be set in detail in the formal finding and direction.

The application for overtime is also granted and will be dealt with in the finding and direction. We shall assume that any questions of details or differences are capable of being negotiated between the Union and the Company.

On the question of vacations with pay, we feel that we cannot accede to this request. Vacation with pay are not enjoyed in the other coal mines in Saskatchewan. In a very recent case before us they were not even applied for. The reason no doubt, and the same condition applied in this case, is that the operation is seasonal. Actual mining is carried on for some nine months of the year. We have dealt with the same question in the case re: Brotherhood of Railway Clerks, etc., and Canadian National Railways and Canadian Pacific Railway Company (L.G., 1943, p. 1488).

There will be finding and direction accordingly.

January 14, 1944.

Re: North Shore Lumber Corporation Limited (North Vancouver, B.C.) and its Employees

Reasons for Decision

This appeal is from a decision of the Regional Board for British Columbia refusing approval of a collective production bonus plan in a sawmill operation.

The appeal is to be decided under the terms of P.C. 5963 (The Wartime Wages Control Order). The Regional Board felt that there was no authority conferred by that Order to permit authorization. We are of the view that section 29 is sufficiently broad in scope to embrace a plan of this kind.

The plan proposes an hourly 5 cent premium to all hands for every 1,000 board feet produced in excess of a basic hourly production of 10,000 board feet. Subject to maintenance of quality (20 per cent clear; 85 per cent on order and 15 per cent over-run) certain key men are to receive an additional 5 cent hourly premium.

We do not propose to approve wage increases camouflaged as production bonuses. However, incentive wages in industries producing essential war materials are desirable when based upon a proper minimum standard of output. They must also tend toward a reduction of cost per unit produced. The Board has the company's submission that both requirements are satisfied by the terms of their proposal, and we are relying upon that assurance.

The plan outlined in the Company's letter of June 17, 1943, to the Regional Board should be authorized with the exception of the automatic increase in the bonus designed to compensate for continuous work. The approval will be for a period of six months, and the Company must then submit a statement of its operations under the plan to enable the Regional Board to ascertain whether they measure up to the principles and standard of quality stated above.

Consequently, the appeal is allowed.

January 14, 1944.

Re: Burns & Company, Limited (Calgary, Alberta) and Packing Plant Employees' Federal Union No. 105

Reasons for Decision

This is an appeal from a decision of the Regional Board for Alberta on a question of retroactivity.

The employees of the Company's Edmonton plant obtained a 5 cent general wage increase effective from May 1, 1943, on an application by local 78 of the appellant union. The Calgary local then made its application for the same increase on September 14, 1943, asking that it also be made effective from May 1, 1943. The Regional Board granted the increase effective from the date of application.

As a general rule wage increases date from the time application is made to a War Labour Board for approval or direction. Retroactivity to a prior date is a matter of discretion to be decided upon the special circumstances of each case. While we are reluctant to interfere with the decision of a Regional Board on a matter of this kind, we are rather inclined to the view that the effective date (May 1, 1943) given by the parties to their collective agreement is material to the issue in this particular case. Wage increases were involved in the negotiations and it was understood that the Union would make the application for approval. The Union's explanation of the delay is a reasonable one. It says that it was under the impression the Edmonton application would automatically result in a decision for the Calgary plant. The Edmonton decision was rendered on August 28, 1943.

Under these circumstances, we think the employees of both plants should be placed on the same footing and the increase to the Calgary employees should be made effective from May 1, 1943.

The appeal is therefore allowed.

January 14, 1944.

Re: The Abitibi Power and Paper Company, the Great Lakes Paper Company, the Spruce Falls Power and Paper Compay, and the Provincial Paper Company and the International Brotherhood of Paper Makers and Internatioal Brotherhood of Pulp, Sulphite and Paper Mill Workers

Reasons for Decision

This is an appeal from a decision of the Ontario Regional Board declining an authorization to increase the cost of living bonus from $3.23 to the full amount.

Under P.C. 5963, the power of War Labour Boards to so adjust a cost of living bonus is derived from section 34 (3). The adjustment can be made when it is found that the normal application of the provisions of the order with respect to calculation of the bonus has created for some employees of an industry an unfair situation in comparison with other employees in the same industry. (See decision in Dominion Fire Brick and Clay Products Limited September 24, 1943 reported in the LABOUR GAZETTE, 1943, p. 1352).

We are informed that the companies concerned in this appeal are paying the bonus which is practically uniform throughout the pulp and paper industry in the province of Ontario. There does not appear to be the inequality or unfairness, as between the various plants of the industry, which would permit the exercise of the discretion conferred by the Order in Council. Under these circumstances, the Regional Board had no alternative but to refuse the application and we must affirm their decision.

January 19, 1944.

Re: Burns and Company, Limited (Winnipeg, Manitoba) and United Packinghouse Workers of America, Local 224

Reasons for Decision

This is an appeal from the Manitoba Regional Board on a matter involving an off-shift premium. Leave to appeal was granted by the Regional Board.

The parties had submitted for approval the following provision of their agreement dated October 1, 1943:

> "Employees other than a shift engineer, fireman, temperature man, watchman or livestock receivers, who start on a shift any time between 4 p.m. and 3 a.m. inclusive, shall receive an additional 5c for each hour worked on the shift. The 5c premium shall be cancelled when an employee is transferred from a shift commencing between 4 p.m. and 3 a.m. to any other shift which does not commence during such period."

Instead of approving the clause, the Regional Board authorized the inauguration of a 5 cent hourly premium for time worked between the hours of 7 p.m. and 7 a.m.

The matter is before us solely in respect to the restriction placed upon the agreement arrived at. As to the principles involved under P.C. 5963 in the establishment of a night shift differential, there is no appeal taken.

The decision of the Regional Board was perhaps based upon the opinion expressed by this Board on the Ford Motor reference (LABOUR GAZETTE, 1943, p. 585). We have since pointed out how unwieldly this formula may become under practical application (L.G., 1943, p. 1342); and in the Dominion Tar and Chemical Company decision (L.G., 1943, p. 1490) we have perhaps broadened the view originally expressed in the Ford case.

We therefore feel that the appeal should be allowed and that a finding and direction should issue giving approval to the clause drafted by the Union and the Company effective from October 1, 1943, subject, however, to a provision that the off-shift premium is not to be included in any base rate when an overtime rate is being paid.

January 21, 1944.

Re: Famous Players Canadian Corporation Limited and B.C. Projectionists Society

Reasons for Decision

(*Oral Decision*)

This is an appeal from a direction and finding of the Regional War Labour Board for British Columbia, in which two weeks' vacation with pay was granted to the projectionists in the employ of Famous Players Canadian Corporation.

This subject of vacations with pay is one on which we have said a good deal in a number of written judgments, and perhaps it might be well to review the subject to some extent at this time.

The Board, which preceded this Board as presently constituted, made rather an extensive study of the propriety of granting vacations with pay during wartime as a new

condition, having in mind the general government policy in wartime, and the control of prices and wages and so on. As a result of their survey they developed the document to which Senator Farris has had reference, D. B. No. 17,[1] which rather laid down the principle that there can be no fundamental objection to granting vacations with pay as a new condition, provided certain limitations were placed upon the length of the vacation, and the qualifications required for workers to be entitled to the vacation. D. B. No. 17 restricted the granting of vacations to cases where the employer asked for it, or where it was a matter of a joint application. It did not leave the way open to the employee to make the application on his own, without the concurrence of the employer.

This Board, as reconstituted, in the case of Division 4 laid down that D. B. No. 17 was not to be taken as an absolute rule, but should be used as the basic indication of the policy in respect to granting vacations with pay as a new condition in wartime. Further the Board also laid down the principle that it was not necessary that the worker have the concurrence of the employer in making an application; in other words he was at liberty to make it himself, to any of the Boards.

We have dealt with the question in a number of cases in which we have changed the time granted for vacations with pay, where it had been a condition of work before the wartime policy came into effect. There have been cases where companies, even prior to the war, had the principle initiated and wished to give greater length of vacations to some of their employees who had been in the employ of the company for a long time. To them we have acceded on more than one occasion, in cases where vacations with pay were a condition by collective agreement before the initiation of the wartime policy.

We have dealt with it again in the Maintenance of Way Employees case, another railway case, and in that case we adopted the philosophy as to the desirability of vacations with pay in wartime, and incidentally too, as to the length of vacations as laid down by Prime Minister Churchill. On numerous occasions this Board has indicated its approval of the condition of work during wartime.

However, generally speaking, we have adhered to the policy under wartime conditions that where a vacation with pay was initiated as a new condition, it should be limited to one week's vacation, and roughly comply with the general terms of D. B. No. 17. We have departed from the principle that D. B. No. 17 is the be-all and end-all of things in connection with vacations with pay and we have left it generally as the basis upon which we asked the parties to agree.

In another recent case involving the Dominion Coal Company, the Arcadia Coal Company and Old Sidney Collieries, and United Mine Workers of America District No. 26, we pointed out that this was a general wartime policy that was being followed, and that to grant more than one week's vacation with pay in wartime, as a new condition, to certain classes of workers would work out unfairly in relation to others; that in the case of a worker who is in a wartime industry, strictly speaking, and who on application or by agreement receives during wartime only one week's vacation with pay, it would be unfair to grant another class, as a new condition of work, a longer vacation.

Having all these principles in mind as they bear on the lot of workers generally in the period of the war, we are all of the opinion that the appeal in this case must be allowed to the extent that the vacation with pay period will be reduced from two weeks to one week, and we, of course, will leave it to the company and the union to negotiate any plan in general accord with D. B. No. 17.

January 27, 1944.

Re: L. N. Bell Limited and Bell Buses Limited and Canadian Brotherhood of Railway Employees and other Transport Workers

Reasons for Decision

(*Oral Decision*)

In this case an application was made to the Regional War Labour Board for leave to appeal, which the Regional Board declined. The matter is now before us in the form of an application for leave to appeal.

At this hearing all questions that would be involved in an appeal, if leave were granted, were argued.

We are all of the opinion that the appellant has not made out a case for any relief being given to him on appeal.

After all, the Regional Board is familiar with local conditions and comparisons bearing on the various questions with which they have had to deal. The appellant has made no case, as we see it, to show that the Regional Board has acted wrongly in principle in connection with any of the matters.

Consequently we refuse leave to appeal, which is tantamount to saying that the appeal is dismissed. January 26, 1944.

[1] L.G., Dec., 1943, p. 1635.

Finding and Direction of National War Labour Board Covering Shipbuilding and Repairs Yards in St. Lawrence and Great Lakes Area

THE National War Labour Board has issued its decision on a number of applications involving various shipyards engaged in the shipbuilding and repairing industry in the St. Lawrence and Great Lakes Area. At least 20,000 employees are estimated to be covered.

The Board had announced on July 30, 1943, that the general wage structure in all of the eastern shipyards was under survey and careful consideration (L.G., August, 1943, p. 1137). The following Finding and Direction is the outcome of the survey.

In the matter of the Wartime Wages Control Order, P.C. 5963, and

In the matter of various applications, made jointly or separately, by employers engaged in the shipbuilding and repairing industry in the Provinces of Ontario and Quebec, and by various local unions affiliated with The Trades and Labour Congress of Canada and The Canadian Congress of Labour respectively, as well as by independent committees, representing employees of such employers, to increase basic wage rates of occupational classifications employed in the industry, and in the case of some shipyards to adjust certain working conditions.

Finding and Direction

The National War Labour Board, in its initial investigation of the above mentioned applications, having found such a variation in basic wage rates and working conditions applicable to substantially similar occupational classifications in the various shipyards, some of such rates and conditions evidently having been made effective without authority as required under the provisions of the Wartime Wages and Cost of Living Bonus Order P.C. 8253 and the Wartime Wages Control Order P.C. 5963, the Board decided that before Findings and Directions could properly be given on the various applications, it was necessary to direct that a survey be undertaken to ascertain the actual wage rates paid and working conditions prevailing generally in the shipyards in Ontario and Quebec. The survey mentioned having been completed, and the Board's officers having met with representatives of employers and with representatives of local organizations of employees respectively concerned in the various applications, and the Board having consulted with representatives of certain employers and with General Officers of Unions affiliated with The Trades and Labour Congress of Canada and The Canadian Congress of Labour respectively, and the Board having found that:

(*a*) in view of the importance of the shipbuilding and ship repairing industry at the present time, the Board must deal with the applications before it on the basis of the conditions created by the war emergency, however the industry may be affected by post-war developments;

(*b*) the survey confirms that existing scales of basic wage rates for substantially similar occupational classifications vary as between different Companies engaged in the industry, and even within the same Company's operations rates vary as between different journeyman classifications which call for equivalent skill and experience for efficient performance of work;

(*c*) certain of the shipbuilding and repairing Companies concerned, by practice established prior to November 15, 1941, the effective date of the Wartime Wages and Cost of Living Bonus Order P.C. 8253, and other Companies by plans adopted subsequent thereto, have in effect incentive wage payment plans and systems of contract work which apparently result in inequalities in compensation between occupational classifications employed under such wage incentive and contract arrangements and similar occupational classifications employed in the industry on basis of time rates;

(*d*) conditions governing employment of apprentices, helper apprentices or improvers, and learners or beginners, vary as between different yards, and it is desirable that there should be general uniformity of conditions in the industry applicable to employment in such occupational classifications;

(*e*) it must be recognized that work in the industry, for most of the occupational classifications engaged in it, is required to be performed in the open, subject to inclemencies of weather adversely effecting continuity of employment, a condition not involved for substantially similar occupational classifications working in shops in other industries;

(*f*) in the circumstances it would be fair and reasonable that basic wage rates for occupational classifications employed in respective shipyards in the shipbuilding and ship repairing industry in the Provinces of Ontario and Quebec be adjusted to basic wage rates as listed in Schedule I attached hereto, subject to certain qualifications;

the National War Labour Board, therefore, having regard to the considerations mentioned, with effect from dates as may be specified by the Board in its Findings and Directions to those concerned, directs that Companies operating shipyards in the Provinces of Ontario and Quebec, engaged in constructing, outfitting, remodelling or repairing, vessels of any size built of steel, and minesweepers built of wood, to pay to such occupational classifications as are employed in their shipyards basic wage rates as set forth in Schedule I attached hereto and forming part hereof for the zone as may be declared by the Board to be applicable to them, subject to the following qualifications:

(1) in any case in which a higher basic wage rate for an occupational classification than as provided for by Schedule I was established by collective agreement prior

to November 15, 1941, the effective date of the Wartime Wages and Cost of Living Bonus Order P.C. 8253, or provided for by collective agreement subsequently entered into with the approval of a War Labour Board, such higher basic wage rate shall not be reduced during the term of such collective agreement except as may be otherwise mutually arranged between the parties concerned to bring the conditions of agreement into conformity with Schedule I;

(2) in any case in which an authorized higher basic wage rate for an occupational classification than as provided for by Schedule I is now being paid to any employee not covered by collective agreement (not inconsistent with the provisions of the Wartime Wages and Cost of Living Bonus Order P.C. 8253 and the Wartime Wages Control Order P.C. 5963), such basic wage rate shall continue to be paid to such employee until transferred to another occupational classification or until his separation from the service of the employer concerned, or until otherwise directed by the National War Labour Board;

(3) in any case in which an unauthorized higher basic wage rate for an occupational classification than as provided for by Schedule I is being paid to an employee in such occupational classification such basic wage rate shall only be increased to the extent necessary to bring the combined rate equal to the rate established by Schedule I plus cost of living bonus merged pursuant to the provisions of the Wartime Wages Control Order 1943 (P.C. 9384);

(4) in determining basic wage rate for a new employee, or in making adjustment of basic wage rate of a present employee transferred from one occupational classification to another, subject to the provisions of Clauses (1) and (2) hereof, basic wage rate as provided for by Schedule I for the occupational classification in which the employee is to be engaged shall be paid according to his trade ability and experience qualifications as set forth in the Occupational Definition contained in Part II of Schedule I;

(5) the provisions of any helper apprentice or improvership plan established in conformity with the Supplement dated February 12, 1942, to Order in Council P.C. 629, dated January 26, 1942, or in accordance with the terms of any collective agreement made prior to November 15, 1941, the effective date of the Wartime Wages and Cost of Living Bonus Order P.C. 8253, or subsequently entered into with the approval of a War Labour Board, are to be maintained and continued in effect, provided that in any case in which a helper apprentice or improver under any such plan has been or may be advanced to the basic wage rate as heretofore established for a journeyman in his trade he shall not be further advanced to the basic wage rate for such journeyman classification as provided for by Schedule I until he has completed the term of service as provided in Part III of Schedule I to qualify for advancement to the journeyman rate;

(6) the conditions of any existing incentive wage payment plans or systems of contract work, shall be maintained and continued in effect without change affecting rate of compensation, pending review of all such plans by a Committee to be established by the National War Labour Board, which committee shall include an officer of the Board, a representative of the Department of Munitions and Supply, two representatives of the Companies concerned, and one representative each of The Trades and Labour Congress of Canada and of The Canadian Congress of Labour.

Working conditions affecting compensation as established under collective agreement or by practice at November 15, 1941, or as subsequently established with approval of a War Labour Board, are to be continued in effect, and may not be changed except upon application to and approval by the National War Labour Board, pursuant to the provisions of the Wartime Wages Control Order, 1943 (P.C. 9384).

R. H. NEILSON,
Chief Executive Officer,
National War Labour Board.

Ottawa, Ontario,
January 5, 1944.

Incorporation of Cost-of-Living Bonus into Wage Rates

National War Labour Board Memorandum of Procedures

THE National War Labour Board has issued a memorandum of procedures for the incorporation of cost-of-living bonus into wage rates in accordance with the provisions of the Wartime Wages Control Order, P.C. 9384 (L.G., Dec. 1943, p. 1602).

Under the provisions of the Order every employer is required (in a manner prescribed in the rules set out in a schedule attached to the Order in Council) to establish basic wage rates for his employees by including in existing authorized basic wage rates the amount of existing authorized cost-of-living bonus. The amount to be added to basic wage rates in the case of hourly rated employees is to be arrived at by dividing the amount of the authorized bonus by the number of normal working hours in each week; if it is a daily rate by adding the proportion of the daily amount of the bonus; if it is a weekly rate by adding the amount of the bonus; and if it is a monthly rate by multiplying the amount of the weekly bonus by four and one-third.

In clarification of the provisions of this section of the Order, the Board's memorandum is as follows:—

Memorandum of Board

Employers in Canada subject to the provisions of the Wartime Wages Control Order, 1943, are required to establish for each occupational classification not above the rank of foreman, a single rate or a range of rates as prescribed by the rules set out in Schedule "A" of that Order, which single rate or range is to be made effective *for the first payroll period commencing* on or after February 15, 1944.

It is recognized that wage schedules, wage payment plans, normal hours of work, and amounts of cost-of-living bonus, and certain other terms and conditions of employment are not uniform throughout industry, and the provisions of Schedule "A" will entail minor adjustments of fractional wage rates and, in some cases, will affect employees' earnings, and consequently labour costs.

The provisions of Schedule "A" are definite regarding the manner in which wage rates paid on a time basis are to be adjusted, but for the other bases of compensation no specific formulae are provided because of the large number of variables. For the latter, compliance with the general provisions of Sections 5 and 6 of the Schedule is required.

The provisions of Schedule "A" shall be interpreted to mean that the adjusted rates will apply to the terms and conditions of employment to which present wage rates apply, for example, if the present rate applies to overtime, either at straight time or at punitive or premium rate, the adjusted rate shall similarly apply to overtime.

Schedule "A" of the Wartime Wages Control Order, 1943, reads as follows:

Schedule "A"

Rules for Establishment of Rates or Ranges of Rates

1. In these rules unless the context otherwise requires words and expressions have the same meaning as in Part II of the Order and a reference to a rule by number means such rule in this Schedule.

Establishment of Wage Rates

Time Rates

Single Time Rates

2. (1) Where there is a previous authorized single time rate payable for an occupational classification, the employer shall establish a single time rate for the classification in the place of such rate by adding to the previous authorized single rate.

(*a*) if it is an hourly rate—the amount arrived at by dividing the amount of previous authorized bonus by the number of normal working hours in each week:

(*b*) if it is a daily rate—the proportionate daily amount of the previous authorized bonus;

(*c*) if it is a weekly rate—the amount of the previous authorized bonus;

(*d*) if it is a monthly rate—the amount arrived at by multiplying the previous authorized bonus by four and one-third;

(2) A rate established in accordance with paragraph (1) of this rule shall be established at the nearest cent unless by established practice the employer's wage rates are fixed at the nearest half cent in which case it shall be established at the nearest half cent.

Ranges of Time Rates

3. Where there is a previous authorized range of time rates for any occupational classification, the employer shall establish a range of time rates for the classification in the place of such range, by adding to the highest and the lowest rate in the previous authorized range, the amount which would be added to each such rate under rule 2 if each such rate were a single time rate.

Authorized Bonuses in Different Amounts

4. Where an employer pays previous authorized bonuses of different amounts to employees in any one occupational classification.

(a) if the previous authorized rates for the classification is a single time rate—the employer shall establish a range of time rates for the classification in the place of such single rate, the lowest rate in the range to be established by adding the lowest amount of previous authorized bonus to the previous authorized single rate and the highest rate in the range to be established by adding the highest amount of previous authorized bonus to the previous authorized single rate;

(*b*) if there is a previous authorized range of time rates—the employer shall establish a range of time rates for the classi-

fication in the place of such range, the lowest rate of the range to be established by adding the lowest authorized bonus to the lowest rate in the previous authorized range and the highest rate in the range to be established by adding the highest authorized bonus to the highest rate in the previous authorized range.

in the matter prescribed in rule 2 as if each such rate were a single time rate.

Incentive Rates

5. Where there is a previous authorized single incentive rate or a previous authorized range of incentive rates for an occupational classification the employer shall establish a single incentive rate or range of incentive rates for the classification by incorporating into the previous authorized single rate or the rates in the previous authorized range the previous authorized bonus in such manner as will

(*a*) result in the employees therein continuing to receive as wages for equal service performed during the normal working hours substantially the same amount of compensation as they would have received if the payment to them of the previous authorized rate or range and previous authorized bonus had been continued, and

(*b*) not result in an appreciable increase in the employer's labour cost of production per unit represented by payment of the previous authorized rate or range and the previous authorized bonus to employees therein.

Combined Rates

6. Where there is a previous authorized single incentive rate or range of incentive rates and a previous authorized single time rate or range of time rates for any occupational classification,

(*a*) where the said rates or ranges are payable in the alternative to employees in the classification and are not payable simultaneously in respect of the same work done, the employer shall establish rates or ranges for the classification in the place of such rates or ranges by incorporating the previous authorized bonus into each such rate or the rates in each such range in accordance with the foregoing rules as if such rate or range were a separate rate or range to which the relevant foregoing rules were applicable,

(*b*) in any case other than that set out in paragraph (*a*) the employer shall establish rates or ranges in the place of such rates or ranges in accordance with rule 5 as if it was applicable in respect of both such rates or ranges.

Schedule "A" requires first the revision of the wage schedule as such, and in addition the adjustment of wage rates for the individual employees involved. Such adjusted wage rates must be within the limits of the revised schedule so established.

PART I. ADJUSTMENT OF WAGE SCHEDULE

(1) *Single Time Rate.*

In the case of hourly wage rates, the amounts of authorized cost of living bonus now being paid to employees in an occupational classification are to be incorporated into the wage rates of such occupational classification by the addition to the authorized wage rate of an amount which is the result of dividing the authorized weekly cost of living bonus by the number of working hours presently used for the purpose of computing cost of living bonus and as prescribed pursuant to the provisions of the Wartime Wages Control Order, P.C. 5963. Where the amount is a fraction it shall be to the nearest cent or half cent depending upon the employer's established practice. If the calculation of the hourly equivalent of the cost of living bonus results exactly in a half cent the next highest cent shall be used (except where wage rates are customarily stated in half cent amounts).

A similar procedure is to be followed in respect of daily rates, with the exception that the method of arriving at the daily amount of cost of living bonus shall be the division of the authorized weekly cost of living bonus by the number of working days presently used for the purpose of computing the cost of living bonus.

In the case of weekly wage rates, the revised rate will be the sum of the authorized weekly cost of living bonus and the authorized weekly wage rate.

In the case of monthly wage rates, the amount of authorized weekly cost of living bonus should be multiplied by 4-1/3 and the resulting amount added to the authorized monthly wage rate.

(2) *Ranges of Time Rates.*

Where there is an authorized range of time rates for an occupational classification (subject to the adjustment of individual employees' rates in accordance with the provisions of Part II of this Memorandum), that range should be revised by adding to the lowest rate and to the highest rate of any such range the amount of cost of living bonus which would be required to be added to each such rate if it had been a single time rate. This will produce a new and higher range of rates.

(3) *Authorized Bonuses in Different Amounts*

(*a*) In all cases of single rates where different amounts of authorized cost-of-living bonus are being paid as a result of the application of the provisions of the Wartime Wages Control Order, P.C. 5963, a range of wage rates will result and shall be established as part of the revised wage schedule;

(*b*) In all cases of existing ranges of rates where different amounts of authorized cost of living bonus are being paid as a result of the application of the provisions of the Wartime Wages Control Order, P.C. 5963, a revised range shall be established by adding the least amount of authorized cost of living bonus to the lowest rate of the present range and the greatest amount of authorized cost-of-living bonus to the highest rate of the present range.

PART II. ADJUSTMENT OF INDIVIDUAL EMPLOYEES RATES

The wage rates of individual employees are required to be adjusted in the same manner as is provided for in the revision of single time rates in connection with the wage schedule, namely, by adding to their particular time rates that amount of authorized cost of living bonus presently being paid to such individual employees pursuant to the regulations provided for in the Wartime Wages Control Order, P.C. 5963.

Part III. Adjustment of Wage Incentive Rates

The intent of Section 5 of Schedule "A" is to *incorporate* the previous authorized cost of living bonus *into* the rate or rates in such manner as will produce the objective results prescribed in Section 5 (*a*) and (*b*) of Schedule "A".

Section 5 (*a*) is intended to mean that insofar as it is practicable to do so, adjustments shall be made so that total earnings of an individual employee, for normal working hours, will be exactly the same after the adjustment as before, but it is recognized there will be many cases in which such end result cannot be attained, having regard to the purpose of Schedule "A", and consequently some leeway is provided by the wording "substantially the same."

In consequence of Section 5 (*a*) and generally, because rates follow time worked and/or production, it is recognized in 5 (*b*) that unit labour costs will in some cases be increased. Employers are expected to hold this increase to an absolute minimum having regard to the practical application of the provisions of Schedule "A".

Schedule "A" provides that the cost of living bonus shall lose its identity, as such, by being incorporated into the rates and rate structure. It shall not be interpreted to mean that the cost of living bonus currently paid may be retained as a separate amount with, for example, the name dropped or changed; it should actually be incorporated into the rates.

Any plan, method or procedure which complies with the above requirements is within the limitations of Schedule "A". Schedule "A" recognizes that there is no one ideal method that will meet the situation in all companies due to the many different wage incentive plans in use, and due to many variations in the determining of production standards.

Adjustments provided for in Schedule "A" will slightly affect intra company wage differentials. This is true with respect to time rates and is true also with incentive rates. Generally uniform basic incentive margins will not be maintained for the reason that the cost of living bonus which is to be added throughout the wage scale is "virtually" a flat amount in an establishment.

It should be clearly understood that there will be some incentive workers who will receive greater aggregate earnings after the adjustment, and some incentive workers who will receive less than heretofore. Were this not so, in effect it would mean the schedule contemplated pegging the level of efficiency by unduly penalizing efficient workers, and unduly subsidizing inefficient workers, which would not be equitable to either employees or employers.

Since no plan or method of incorporating the cost of living bonus into the rates which meets the objective requirements of Section 5 (*a*) and (*b*) of Schedule "A" is excluded, no specific formulae were provided in the schedule nor is it intended to provide any now.

Incentive wage payment plans, generally, may be classified into three main pattern groups or some combination of them:

(*a*) Straight piece work;
(*b*) Standard time plans;
(*c*) Efficiency bonus and multiple piece rate plans.

A fundamental point which is recognized in most incentive plans is that somewhere above the time rate or job rate there is established an objective earnings rate or level, such as piece work base rate, expected earnings, basing point, etc. This point includes the basic incentive margin and represents the level of earnings a good average worker will earn, but exceptional workers will earn a greater amount and below average workers will earn less than objective earnings.

By incorporating the amount of the authorized cost of living bonus into incentive rates on the basis of objective level there will in most cases be provided greater equity, having regard to employees and employers. Such procedure in the majority of cases will comply with the intent of Schedule "A".

Where no uniform basic incentive margin is used in an incentive wage plan, the level at which the cost-of-living bonus shall be incorporated into the rates may be determined by averaging the level of efficiency of employees in an occupation classification, department or establishment.

Where certain minimum wage rates are guaranteed to employees, such rates should be adjusted by adding the applicable amount of authorized cost of living bonus.

Where men, and women and/or youths under twenty-one years of age, are employed on the same job at the same piece rate which results in earnings of less than $25 per week; the piece rate should be adjusted on the basis of the cost-of-living bonus paid to the men; any other procedure would result in two separate piece rates for the same job and deny the principle of equal pay for equal results.

Many jobs or operations which are paid for at separate rates under an incentive plan do not require a full week's work; consequently an employee's work week may be made up of a series of such jobs. Each such incentive rate for each job should be adjusted as though it represented a full time job.

Many incentive rates are expressed in amounts of three or more decimal points. It is not intended that such incentive rates shall be adjusted to the nearest cent or half cent as is provided for in the case of time rates.

Where under an incentive wage plan combination rates exist, such as a flat amount plus a rate based on volume or value of results, the amount of the authorized cost-of-living bonus should be added to the flat amount by considering such rate as a time rate and by following the procedure prescribed for adjustment of time rates.

R. H. Neilson,
Chief Executive Officer,
National War Labour Board.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with Recent Proceedings under the Industrial Disputes Investigation Act, Conciliation Work of the Department of Labour, and Strikes and Lockouts in Canada, Great Britain and other countries.

Recent Proceedings under the Industrial Disputes Investigation Act.—This article gives an account of all applications for Boards of Conciliation and Investigation, and the disposition of these applications. In cases where Boards are established, the LABOUR GAZETTE publishes in due course the full text of their reports, as submitted to the Minister of Labour.

Since the outbreak of war and the extension of the Industrial Disputes Investigation Act to cover disputes in war industries, the number of applications for Boards of Conciliation and Investigation has greatly increased. In recent months the majority of applications for Boards have been referred to Industrial Disputes Inquiry Commissioners for preliminary investigation, to determine whether the circumstances warrant the establishment of a Board. Reports of Commissioners appointed under the Act are summarized in this article.

Disputes which concern wage demands come under the jurisdiction of the National and Regional War Labour Boards.

Conciliation Work of the Department of Labour.—Conciliation proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purposes of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, and war work, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

Strikes and Lockouts.—The latest information concerning strikes and lockouts in Canada is published monthly in tabular form, with a summary appearing once a year. The summary of strikes and lockouts in Canada and other countries during 1942 appeared in the LABOUR GAZETTE for July, 1943.

The latest available information as to strikes and lockouts in Great Britain and other countries appears from month to month.

Recent Proceedings under the Industrial Disputes Investigation Act

DURING the month of January two Boards of Conciliation and Investigation submitted their reports in connection with the following disputes:—

(1) Between the Dominion Rubber Company, Limited, St. Jerome, P.Q., and its employees, members of Local No. 144, St. Jerome Rubber Workers' Federal Union (T. & L.C.).

(2) Between the Goodyear Tire and Rubber Company of Canada, Limited, Bowmanville, Ont., and its employees members of Local 189, United Rubber Workers of America.

Applications Received

During the month of January, four applications* for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation

* By P.C. 9384, the National and Regional War Labour Boards are specially charged with the duty of adjudicating wage demands. Therefore all applications for the establishment of Boards of Conciliation and Investigation in which wages are the sole cause of the dispute are removed from the ambit of the Industrial Disputes Investigation Act and the applicants are referred to their respective War Labour Board.

Act were received in the Department of Labour, as follows:

(1) From employees of the Aluminum Company of Canada, Limited (Kingston Works), Kingston, Ont., members of Local 54, International Association of Machinists and Local 43, International Union of Aluminum Workers of America. The dispute which developed out of a request of the applicant employees for union recognition and the negotiation of a collective labour agreement, was said to affect 2,978 employees.

(2) From employees of the Dominion Oilcloth and Linoleum Company, Limited, Montreal, P.Q., members of Local 677, Plastic and Linoleum Workers (A.F. of L.). The dispute, which concerns union recognition and the negotiation of a collective labour agreement, was said to affect 400 employees. On January 21, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

(3) From employees of the Dominion Engineering Works, Limited, Longueuil and Lachine, P.Q., members of Lodges 1660 and 1596, International Association of Machinists. The dispute which arose out of the request of the applicant unions for the inclusion in the renewal agreement of certain clauses dealing with classification and arbitration, was said to affect 2,900 employees. Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized on January 21, as Industrial Disputes Inquiry Commissioner to investigate the dispute. On January 27, the Commissioner reported that he had been unable to bring about a mutually satisfactory settlement of the dispute and recommended that a Board of Conciliation and Investigation be established. Accordingly, a Board was established and Mr. George Smith, Verdun, P.Q., was appointed a member on the nomination of the employees. At the end of the month the nomination of the employing company was awaited.

(4) From employees of the Canadian Pacific Railway Company, Toronto, Ont., (Royal York and Union Station Ticket Offices), members of Division 267, Canadian Brotherhood of Railway Employees and Other Transport Workers. The dispute, which was said to affect 52 employees, concerns the negotiation of a collective labour agreement. On January 29, Mr. J. P. Nicol, Industrial Relations Officer, Toronto, Ont., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

Boards Established

On January 20, a Board of Conciliation and Investigation was established to deal with a dispute between the Johnson Wire Works, Limited, Montreal, P.Q., and its employees, members of Lodge 1758, International Association of Machinists (L.G. January 1944, p. 46). Mr. Bernard Rose, K.C., Montreal, P.Q., who had been authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute, reported that an amicable settlement could not be reached and recommended that a Board of Conciliation and Investigation be established. At the end of the month Messrs. D. A. Paterson and Paul Fournier, both of Montreal, P.Q., had been appointed on the nomination of the employer and employees respectively and were conferring with a view to making a joint recommendation of a person to act as third member and chairman of the Board.

Board Fully Constituted

The Board of Conciliation and Investigation established on December 3, to deal with a dispute between the Dominion Rubber Company, Limited, Kitchener, Ont., and its employees, members of Local 80, United Rubber Workers of America (L.G. Dec. 1943, p. 1651) was fully constituted on January 4. The personnel of the Board is as follows: Honourable Mr. Justice J. G. Gillanders, Osgoode Hall, Toronto, Ont., chairman, appointed on the joint recommendation of the other two members of the Board; Messrs. Walter J. McGibbon, Waterloo, Ont., and F. Andrew Brewin, Toronto, Ont., appointed on the nomination of the employer and employees respectively.

Other Disputes Referred to Industrial Disputes Inquiry Commissioner

An application for the establishment of a Board of Conciliation and Investigation was received on December 27, 1943, from employees of Asbestos Corporation, Limited, Vimy Ridge, P.Q., members of Local No. 1, Canadian Union of Asbestos Workers (C.C.L.) (L. G. Jan. 1944, p. 46). On January 10, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

On December 27, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to investigate a dispute between Johnson's Company, Thetford Mines, P.Q., and its employees, members of Local 6, Canadian Union of Asbestos Workers (C.C.L.) (L.G. Jan. 1944, p. 46).

An application for the establishment of a Board of Conciliation and Investigation was received from employees of Asbestos Corporation, Limited, Black Lake, P.Q., members of Local 2, Canadian Union of Asbestos Workers (C.C.L.) (L.G. Jan. 1944, p. 46). On January 10, Mr. Bernard Rose, K.C., Montreal, P.Q.,

was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute.

On December 27, Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized as Industrial Disputes Inquiry Commissioner to investigate a dispute between the Bell Asbestos Mines, Limited, Thetford Mines, P.Q., and its employees, members of Local 5, Canadian Union of Asbestos Workers (C.C.L.) (L.G. Jan. 1944, p. 46). On January 30, the Commissioner advised the Department that he had obtained the consent of the company and the applicant union to the holding of a representation vote to determine the agency the employees desired to represent them in negotiations with the company and arrangements were being proceeded with by the Department to conduct this vote.

Other Reports of Industrial Disputes Inquiry Commissioners

On December 14, Honourable Mr. Justice Oscar L. Boulanger, Superior Court of Quebec, Quebec, P.Q., was appointed an Industrial Disputes Inquiry Commissioner to investigate a dispute between the Aluminum Company of Canada, Limited, Shawinigan Falls, P.Q., and its employees, members of the International Union of Aluminum Workers (L.G. Jan. 1944, p. 47). The Commissioner reported on January 3, 1944, that the union controlled an important group of the employees but was unable to state definitely whether that group was a majority of the employees of the company. However he considered the dispute was a matter for investigation by a Board of Conciliation and Investigation and recommended that a Board be established.

In accordance with the policy of the department, to establish whether or not an applicant organization represents the majority of the employees concerned before a Board is established, an Industrial Disputes Inquiry Commission was set up to investigate the union membership of the employees of the company at Shawinigan Falls. At the end of the month, Mr. Cyprien Miron had been nominated by the Quebec Department of Labour as chairman of the commission and Mr. Paul Fournier, Montreal, P.Q., had been nominated by the International Union of Aluminum Workers as their representative. The formal appointment of the Commission was pending at the end of the month as the nomination of a representative of the National Catholic Syndicate of Aluminum Workers had not been received.

A report was received on January 7, from Mr. Bernard Rose, K.C., who had been authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute between the Legare Foundry, Sherbrooke, P.Q., and its employees, members of Local 2525, United Steelworkers of America (L.G., Jan. 1944, p. 46). The Commissioner recommended against the establishment of a Board of Conciliation and Investigation in view of the fact that the company was not engaged in war work and consequently the dispute did not come within the provisions of the Industrial Disputes Investigation Act as extended by Order in Council P.C. 3495.

On January 3, Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., was authorized as Industrial Disputes Inquiry Commissioner to investigate a dispute between the Cumberland Railway and Coal Company, Springhill, N.S., and certain of its employees (L.G., Jan., 1944, p. 46). The Commissioner in his report of January 22, stated that an investigation of the duties and responsibilities of the employees involved in the application for a board, showed that they could not be considered "employees" as defined in Section 2 (*e*) of the Industrial Disputes Investigation Act, and recommended that a Board be not established. The interested parties were advised accordingly.

Settlements

On January 15, the Department received a copy of an agreement which had been signed between the Office Specialty Manufacturing Company, Limited, Newmarket, Ont., and its employees, members of Local 7, National Union of Furniture Workers (C.C.L.) (L.G., Dec., 1943, p. 1665). The agrement between the company and the union is summarized in the article entitled "Recent Collective Agreements," appearing elsewhere in this issue.

The Department was advised on January 24, that an agreement had been signed between the Collingwood Shipyards, Limited, Collingwood, Ontario, and its employees, members of Local 4, Industrial Union of Marine and Shipbuilding Workers of Canada (C.C.L.) (L.G., Dec., 1943, p. 1653).

On January 22, the Department was also advised by Mr. R. Trepanier, Industrial Relations Officer, Montreal, that following conferences arranged by him between the parties an agreement had been concluded between Ayers, Limited, Lachute Mills, P.Q., and its employees, members of Local 9, United Textile Workers of Canada (L.G., Jan., 1944, p. 48). The agreement between the company and the union is summarized in the article entitled "Recent Collective Agreements" appearing elsewhere in this issue.

Resignation of Board Chairman

On January 10, Honourable Mr. Justice H. A. Robson, Winnipeg, Man., who had been appointed on November 8, as chairman of the Board of Conciliation and Investigation established to deal with a dispute between the Searle Terminals, Limited, Fort William, Ont., and its employees, members of Lodge 650, Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees (L.G., Nov., 1943, p. 1497), adivsed the department that he would have to withdraw as chairman of the Board as he found that this assignment would conflict with his judicial duties. The other two members of the Board were therefore requested to reconfer with a view to making a joint recommendation of another person to be appointed third member and chairman of the Board. At the end of the month the recommendation of the Board members was awaited.

Application Withdrawn

On January 14, at the request of the applicant employees, the application for the establishment of a Board of Conciliation and Investigation to deal with a dispute between the Shawinigan Chemicals, Limited, Shawinigan Falls, P.Q., and its employees, workers in the Carbide Division who had requested Local 357, International Moulders and Foundry Workers' Union of North America to act on their behalf (L.G., Nov., 1943, p. 1496) was withdrawn.

An application was received for the establishment of a Board of Conciliation and Investigation to deal with a dispute between the Saint John Dry Dock and Shipbuilding Company, Limited, East Saint John, N.B., and its employees, members of Local 3, Industrial Union of Marine and Shipbuilding Workers (L.G., Dec., 1943, p. 1649). Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., who was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute, reported that he had conducted an examination of the applicant union's membership records. As the audit of the membership records disclosed that the applicant union did not represent a majority of the employees affected by the dispute, the Commissioner recommended that the application for a Board be denied. The Commissioner's recommendation was concurred in, and the interested parties were advised accordingly.

Applications for Strike Vote

On November 8, 1943, the Department received the majority and minority reports of the Board of Conciliation and Investigation established to deal with a dispute between the West Coast Shipbuilders, Limited, and Hamilton Bridge (Western), Limited, and their employees, members of eight various trade unions (L.G., Dec., 1943, p. 1648.). In November the two companies concerned advised the Minister of Labour that they were prepared to implement the recommendation of the majority report of the Board while the unions rejected the majority report and urged the implementation of the recommendation contained in the minority report. Subsequently a number of proposals and counter proposals were considered by the parties without any agreement being reached on a basis of settlement. On January 27, a request for a strike vote under the provisions of Order in Council P.C. 7307 was received in the Department of Labour from representatives of the eight applicant unions concerned. With a view to the possibility of settling the dispute without recourse to the taking of a strike vote, the Minister of Labour authorized Mr. Justice Richards, Winnipeg, Man., to investigate as Industrial Disputes Inquiry Commissioner.

On January 17, 1944, the Department of Labour received the majority and minority reports of the Board of Conciliation and Investigation established to deal with a dispute between the Dominion Rubber Company, Limited, St. Jerome, P.Q., and its employees, members of Local 144, St. Jerome Rubber Workers Federal Union (T. & L.C.) (*See* page 177, this issue). The union representative advised the Department that his organization would accept the recommendations of the majority report of the Board but the company, while accepting certain provisions in the Board's findings, refused to accept the recommendation with respect to the "maintenance of membership" clause in the proposed agreement. When the company failed to implement the Board's recommendation, the representative of the union involved, requested that a strike vote be taken under the provisions of Order in Council P.C. 7307. Mr. R. Trepanier, Industrial Relations Officer, Montreal, P.Q., was requested to endeavour to arrange a conference between the parties to the dispute with a view to reaching an amicable settlement without recourse to the taking of a strike vote.

Report of Board is Dispute between Dominion Rubber Company, Limited, St. Jerome, P.Q., and its Employees

On January 14, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between the Dominion Rubber Company, Limited, St. Jerome, P.Q., and its employees, members of Local 144, St. Jerome Rubber Workers' Federal Union (T. & L.C.) (L.G., Nov. 1943, page 1498).

The personnel of the Board was as follows: Honourable Mr. Justice Alfred Savard, Montreal, Quebec, chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members; Messrs. Paul Fournier and George B. Foster, K.C., both of Montreal, P.Q., appointed on the nomination of the employees and employer, respectively.

The texts of the report of the Board and the minority report follow:—

Report of Board

In the matter of the Industrial Disputes Investigation Act and the dispute between the Dominion Rubber Co. Limited, St. Jerome, Que., and the Employees, members of the St. Jerome Workers Federal Union No. 144.

To: The Hon. the Minister of Labour, Ottawa, Ontario.

Sir:

The majority of the Board of Conciliation and Investigation which was appointed by you to inquire into the above mentioned dispute has the honour to report and recommend as follows:

The first session of the Board was held in St. Jerome on the 25th of October, 1943, and subsequent sessions were held in St. Jerome on October 28th, November 12th, and in Montreal on November 13th, November 19th, 23rd, 29th, December 29th, 1943, January 4th, 5th, and 7th, 1944.

The employees were represented by Mr. Maxwell P. Swerdlow and the Dominion Rubber Co. Limited by Mr. Paul Smith, K.C., and Mr. Hugh O'Donnell, K.C.

The Board summoned Messrs. Filiatrault, Corbeil, Cyr, E. D. Bertrand, Beauchamp, Odilon Quenneville and Miss Pilon.

The Board also heard Mr. A. Hurtubise, Industrial Engineer, and Mr. McMaster, both executive officials of the Company.

In the brief submitted to the Board by Mr. Swerdlow, it is stated that in August last a vote taken at the plant under the supervision of Mr. Raoul Trepanier, a Conciliation officer of your department, gave the following result:—

Employees eligible to vote, 893; in favour of union representation, 657; for factory council, 101; did not vote, 108; spoiled ballots, 27.

Negotiations were carried on between the Company and the Union, but three issues were reserved for further consideration and arbitration.

These issues were the following:—

1. The matter of increase in wage rates.
2. The union's demand for abolition of the Bedeaux System.
3. The acceptance by the Company of a Closed Shop Agreement.

Increase in Wage Rates

This Board has no jurisdiction to decide on matters relating to wage rates, as under the provisions of P.C. 5963, the question of basic wage rates can be dealt with only by the appropriate War Labour Boards.

Abolition of What is Called the Bedeaux System

The Company contends that the Bedeaux System is not used in its plant, but that it is operating under what is called the "task and bonus" system. According to the Company, this system is well known and favourably recognized in industry, it is a subject of study in many business courses and is being taught at McGill University at the present time.

The system was explained in detail by Mr. McMaster who stated that it works more advantageously in favour of the workers than the Bedeaux system.

Under the Company method, it is straight piece work, after steady production has been reached.

The Company contends that the system works in favour of its employees; on the other hand, the employees contend that the machinery is geared too fast and therefore imposes an excessive strain on the operators.

The facts submitted by the men, in support of this second grievance, were not absolutely accurate as shown by the exhibits filed by Mr. Hurtubise and attached to the memorandum submitted by Mr. H. O'Donnell, K.C. The employees' evidence may have been submitted in absolute good faith, but this Board cannot, with the case as presented, recommend the change asked for.

The Company in its research Department tries to find devices whereby improved

machinery and systems of operations will increase the production. There is no harm in that. However, tests are constantly made; these tests are conducted by outsiders in other plants, and then introduced in the factory at St. Jerome where the employees have had no opportunity to discuss them with the officers of the Company.

The Board feels that, in the future, the rate and speed of production should be discussed with the foreman in charge of the operation before being put into effect, and that an effort should be made to satisfy the foreman, and through him, the employees concerned, that the rate of production set is not beyond their capacity.

The Board further feels that all production tests should be carried out in the actual plant concerned, and facilities given to the foremen and employees to express their views in connection therewith.

Closed Shop Agreement

The third issue is the introduction of the "closed shop" clause in the collective agreement which is to be entered into between the Company and its employees.

Both the Company and the employees stated their reasons for or against the system.

At the first meeting which was held in St. Jerome the Chairman of the Board inquired from Mr. Cyr the reasons why they were asking for the "closed shop" agreement, and how they would be better off if it was in existence. The only answer given was that a substantial majority were members of the Union, had to contribute monthly dues, and without a closed shop agreement those who were not members of the Union would benefit by the same advantages as the paying members, and would have a "free ride".

This was the only reason presented by the men in support of their demand for a closed shop.

As against the closed shop, the Company, through its counsel, Mr. O'Donnell, K.C., submitted that a large percentage of its employees are not in favour of the Union in its request for a closed shop. The true facts are that only 101 out of 893 employees eligible to vote, favoured a shop committee in preference to the Union to handle the labour relations.

The Company stated that it is prepared to recognize the Union as a collective bargaining agent, but it is contrary to its policy to operate any of its units under a closed shop agreement.

The Company is of the opinion that complete freedom of association for its employees should exist, that the employees should have the right to decide whether they shall join the union, refrain from joining a union or continuing membership therein, and also what kind of union they wish to join.

The majority of this Board feels that the Company "excipe du droit d'autrui", and against the system itself, has presented no reason to show why and how it would suffer any prejudice if a clause of closed shop agreement were introduced.

Some employers may think that a closed shop agreement will place them entirely at the mercy of the trade unions, and that such agreement enables their employees to direct the operations of the Company.

We must say that this is not the case of the Company and, as stated above, the only reason why it is against the closed shop agreement is that it may constitute a restriction of the freedom of its employees.

As an authority against the principle of the closed shop, the Company relies on the report of the Royal Commission, consisting of Mr. Justice Prevost and Mr. Justice McDougall, of the Court King's Bench, and Mr. Justice Pratte, of the Superior Court, dated August 25, 1943, who investigated the difficulties in the paper mills in the Lake St. John area. It is to be noted that labour troubles existing at that time in the Lake St. John district were due to the fact that two trade Unions, le Syndicat Catholique and the American Federation of Labor, were both competing for the right to represent the employees of the paper mills as bargaining agents. And no doubt in view of conditions there prevailing, paragraphs 75-77 of the report were dictated and prompted by the rivalry prevailing between the two Unions.

In the present case, there is only one Union involved, and the same conditions do not exist.

As an alternative to this demand for a closed shop agreement, the employees have proposed the clause of "maintenance of membership" whereby any new employee entering the service of the Company would have 45 days to decide whether he would join the Union, and would then have to join if he wanted to remain in the employ of the Company. As to the employees presently working and non-members, they would continue to work and be free to join the Union or not.

The Board has given long and serious consideration and study to this particular point, and the majority is of the opinion that it is in the best interests of the Company, as well of the employees, to recommend, not the closed shop but a maintenance of membership clause by which any new employees of the

Company shall have to join the Union 45 days after entering the service of the Company.

The reasons of the majority of the Board for making this recommendation are the following:

It is immaterial to the Company whether its employees belong to one union or to another, or to no union at all. What they are interested in getting, is the best possible production and the good-will of its employees. It is engaged with them in a joint venture where both bring in their contribution; the Company its capital, and the men their labour; and they are partners, and as such the Company is entitled to a fair return on its capital, and the employees to a salary which will enable them to support their families and which will be proportionate to their contribution to the production and to the profits.

The employees who refuse to join the Union are so moved not for love of freedom or liberty. It was stated to the Board that the employees who refrained from belonging to the Union did so in order to avoid the payment of the monthly contribution, and to quote one of the witnesses: "ils veulent tout avoir et rien payer".

In addition, the closed shop agreement when fairly analyzed has its good points: it is just like a medicine which may have a bad taste at first, but when properly dosed and properly administered, will sooth the pain and cause a great improvement in the health of the patient.

For instance, if in one plant there are two groups of employees, union members and non-union members, there will be friction on each side. Union members paying their dues will be feeling that they are bringing benefit to those who, according to their expression "se laissent traîner les pieds".

The non-union member will be inclined to nag the other camp and make them feel that they are very wise, they have all the advantages and benefits of the Union without contributing to the membership fees. And, in the course of operations, if the shift is composed of union and non-union members, there will be friction and slow production on account of lack of co-operation on both sides. And with that state of affairs, the Union, in order to maintain its membership, will have to be constantly on the alert, will have to keep the pot boiling with new demands and harass the Company with further demands in order to maintain its membership and show its members that they receive value and consideration for their monthly contribution.

In the minds of some employers, the expression "closed shop" is a symbol of Union domination. This is a mistake. An assured status for the Union is not a guarantee of successful Union employers' relations, but it is a prerequisite, and the closed shop or its equivalent, the maintenance of membership, is one way of assuring the status of the Union.

The employer is likely to have more freedom in a shop where the status of the Union is established than in one where its position is more or less precarious. Where the Union is non-secure, it is compelled to attempt to restrict the employer's discretion at every point where he may discriminate against the Union members in favour of non-members. Where the closed shop exists, however, the Union has less at stake in many decisions of management. Hence it is not in a position to insist upon controlling these decisions. This is why more managerial discretion may be permitted in a closed shop than in an open one.

The simplest and most complete protection which the employer can have, is that he be free to hire anyone he sees fit, whether a member of the Union or not, on condition that the worker become a member after serving a probationary period, and that the Union keep its door open on reasonable terms to such person.

As a general rule, there is no necessity for employers conceding a closed shop, except on these terms.

The concession that all regular employees must be members of the Union is so important for the Union, that in return for it, the employer can usually insist that he be free to hire anyone that he sees fit.

The interest of the community requires that Union membership be open to all, and that the closed shop shall not be permitted to create a class of privileged workers who, as a group, control jobs to which other workers have no access, however willing they may be to join the Union. In the long run, the interest of the Unions themselves requires that the closed shop shall not be linked with closed Unions, and that it shall not interfere with the employer's freedom to hire men willing to join, because only on these conditions can the community afford to permit free trade Unions. Any other policy by the Unions would eventually require regulation of the Unions by the Government.

Therefore, the majority of this Board feels that the clause of maintenance of membership will be of mutual benefit to both the Company and its employees if it is given a fair trial for the duration of the agreement.

In return, the officials of the Union have guaranteed that, for the duration of the agreement, they will not strike for any reason whatever.

Furthermore, they will agree that any grievance that might arise shall be submitted to an arbitration committee at the plant, and they will undertake to accept as final the decisions of that committee.

So, the recommendation of the majority of this Board is that the Company and its employees, in the collective agreement which shall be signed, insert the maintenance of membership clause.

It further recommends that any new production system or any change in the actual production system, should be submitted to the foreman and to the employees of the Company, and that a test be made at the plant at St. Jerome, in order that the officials of the Company and the employees who do the work shall have an opportunity to discuss in a friendly way the advantages, the disadvantages, and the difficulties which might result from the change.

Respectfully submitted,
(Sgd.) ALFRED SAVARD,
Chairman
(Sgd.) PAUL FOURNIER,
Member of the Board.

Montreal, January 7, 1944.

Minority Report

In the matter of the Industrial Disputes Investigation Act and the Dispute between The Dominion Rubber Co., Limited, St. Jerome, P.Q.; and Employees, members of the St. Jerome Workers Federal Union No. 144.

To the Honourable the Minister of Labour,
Ottawa, Ont.

Sir:

The undersigned, George B. Foster, being a minority of the Board of Conciliation recommends as follows:

Increase in Wage Rates

I am in accord with the recommendation of the majority of the Board regarding the above mentioned paragraph in its majority report to the effect that this Board has no jurisdiction to decide in matters of wage rates which can only be dealt with by the War Labour Board.

Abolition of What is Called the Bedeaux System

In my opinion there has been no evidence offered to the Board which even remotely indicates that the so-called "Bedeaux" system is used by the Company. The "task & bonus" system of operating is a well-known and favourably recognized method in general use in industry and has, in fact, worked satisfactorily in other plants in the Company. No satisfactory evidence was submitted to indicate that the rate of production was geared too fast for the employees concerned.

Notwithstanding the foregoing, and solely in an endeavour to encourage more amicable relations between employer and employee, I am prepared to join in the recommendations of the majority of the Board to the end that in future changes in the rate and speed of production should be reviewed by the Management and the employees concerned through the foreman in charge of the operation, before being put into effect.

Closed Shop Agreement

I must definitely disagree with the conclusion reached by the majority of the Board regarding the above mentioned matter. My associates do not recommend a "closed shop", but in place thereof substitute a "maintenance of membership" clause by which any new employee of the Company shall be forced to join the Union forty-five days after entering the service of the company. In my opinion this "maintenance of membership" system is analagous to the "closed shop" principle. I can see no real difference, except as it refers to some present employees who do not wish to be Union members. By its terms the Company is placed in the undesirable position of forcing any new employee to join the Union within forty-five days or else be discharged. Our democratic idea of freedom comprises the right of an individual to be free to join or leave at will any religious, social political or other lawful organization. On whatever grounds the majority of this Board may justify the enforcement of Union membership, the fact remains that a fundamental principle of social and business policy has been thus violated.

Possibly as satisfactory a summary of the condemnation of the principle of the "closed shop" (and consequently the "maintenance of membership") as can be found is that enunciated in the recent Report of the Royal Commission, consisting of Mr. Justice Prevost and Mr. Justice McDougall of the Court of King's Bench and Mr. Justice Pratte of the Superior Court, dated August 25th, 1943, regarding labour difficulties in the paper mills in the Lake St. John area. The learned Commissioners, under the heading of "Freedom of Association" said in part:

> "75. No enactment will ensure the smooth operation of collective bargaining unless it admits the right of every workman to belong

to a union of his own choice or to belong to none.

It ought to follow, as a corollary of this right that the employer should be prevented from making any arbitrary distinction or any unjust discrimination between his workmen, respecting working conditions in his plant, by reason of their belonging to one union or to another or to none at all.

The right of the workman to choose for himself the union to which he wishes to belong must be respected in every case; and he must not be hindered in the exercise of that right except for reasons of public policy. No trade union worthy of the name has not fought for recognition of that right at one time or another. So it is a matter for astonishment that some unions, on overcoming a rival, force the members of the latter to join the ranks of the victors, even though such affiliation may be repugnant to their conscience, on pain of loss of employment; and it may well be asked by what aberration or for what avowable purpose workmen are led to deny to their comrades today a right they themselves quite properly fought for yesterday and will struggle to retain tomorrow. It seems to be overlooked, in certain quarters, that democratic principles, to which lip service is paid at convenience, are no authority for the suppression of minorities by majorities—quite the contrary: But since such lapses do occur, the law should intervene to protect the working classes against them."

And, again:

"77. The right of a workman to belong to a union of his own choice implies the right to leave it. He is under no obligation to explain the reasons for his choice to any one . . . . ."

Surely the "maintenance of membership" principle is contrary to the stated policy of our Government as set forth in Order in Council P.C. 2685, June, 1940, which states inter alia:

"Workers in the exercise of their right to organize should use neither coercion nor intimidation of any kind to influence any person to join their alliance."

It is my opinion that all employees of the Company should have the fullest rights to join or not to join any Union as they themselves see fit, and I accordingly cannot join in the majority finding of this Board, which to my mind deprives the employee of a basic and inalienable right. I feel strongly that the position taken by the Company in this regard is fully justified.

Respectfully submitted,

(*Sgd.*) GEORGE B. FOSTER.

Report of Board in Dispute between Goodyear Tire and Rubber Company of Canada, Limited, Bowmanville, Ontario, and its Employees

On January 26, the Minister of Labour received a unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between the Goodyear Tire and Rubber Company of Canada, Limited, and its employees, members of Local 189, United Rubber Workers of America (L. G. Dec., 1943, page 1650.)

The personnel of the Board was as follows: The Honourable Mr. Justice W. D. Roach, Toronto, Ont., chairman, appointed on the joint recommendation of the other two members; Messrs. J. J. Robinette, and F. Andrew Brewin, both of Toronto, Ont., appointed on the nomination of the employer and employees, respectively.

The report of the Board follows:

Report of Board

In the matter of the Industrial Disputes Investigation Act and in the matter of a dispute between Goodyear Tire and Rubber Company of Canada, Limited, Bowmanville, Ontario, and its employees, members of Local 189, *United Rubber Workers of America.*

To: The Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation and Investigation appointed by you, in this matter, hereby submits its report as follows:—

Sittings of the Board were held at Toronto.

The Company was represented by: Messrs. K. E. Kennedy, Secretary; H. M. Nanson; C. E. Shumaker, Personnel Manager; and J. E. W. Cumberland appeared with the consent of the parties as Counsel.

The applicant Union was represented by: Messrs. H. R. Mitchell; N. Allison; K. Ruxton; and J. MacKenzie appeared with the consent of the parties as Counsel.

The Company operates two plants one at Bowmanville, Ontario, and the other at New Toronto, Ontario. The Board's inquiry has been limited to disputes between the Company and its employees at the Bowmanville plant.

At the Bowmanville plant the Company manufactures mechanical rubber goods consisting chiefly of belts and belting, fire and garden hose, tank bogie wheels, and sundry moulded rubber articles.

The Union is a chartered Local of the United Rubber Workers of America, an International Union, affiliated in the United States with the Congress of Industrial Organizations, and in Canada with the Canadian Congress of Labour. Membership in the Local is confined to the

hourly-rated and piece-rated employees of the Company employed in the Bowmanville plant.

It appears that, as the result of the establishment of a Board of Conciliation late in 1940 a collective bargaining agreement was entered into by the Company with its employees as represented by the Employees General Committee. That agreement was dated February 14, 1941. On May 1, 1942, that agreement was revised and renewed for a term expiring in April, 1943.

On May 17, 1943, a vote was taken of all the hourly-rated and piece work employees of the Company to determine whether or not they desired the applicant Union to represent them for collective bargaining purposes. The voting was by secret ballot and the result of the balloting was as follows:—247 employees voted for the Union, 5 voted against it and one ballot was spoiled. Since then the Company has recognized the Union as the collective bargaining agent of its eligible employees.

Commencing on May 28, 1943, the Company began to meet with the bargaining committee of the Union to negotiate a new collective bargaining agreement. These negotiations continued through the months of June and July. Differences arose between the parties as follows:—

The Union sought, (a) "closed shop"; (b) system of voluntary check-off; (c) inclusion of two small groups of employees, (1) the plant police, (2) the laboratory assistants.

The Company would not agree to these proposals.

The provisions of a collective bargaining agreement upon which the parties did agree were embodied in a written agreement and have been governing the relations between the Company and its employees.

The Union then applied under The Industrial Disputes Investigation Act to consider the matters in dispute and this Board was appointed.

During the discussions before this Board it transpired that there was a further matter in dispute, viz., whether or not another small group of employees described as the Production Control employees should be included among those employees covered by the agreement.

Briefs were filed with the Board by each of the parties and where necessary these were supplemented by verbal submissions at the meetings of the Board.

The Board desires to record the most commendable attitude of the parties during the several discussions which took place before it. The parties manifested a spirit of tolerance and a sincere desire to co-operate in an effort to reach a mutually satisfactory agreement.

The Board also desires to record its appreciation for the very great assistance given to it by the parties in the briefs which were filed and the verbal submissions made, and for the co-operation of the parties with the Board.

The Board is happy to report that at the conclusion of the discussions the parties had agreed on all the matters in dispute except the "closed shop."

As a matter of record the parties have filed with the Board a copy of the collective bargaining agreement which embraces all the terms upon which they have agreed leaving in abeyance only the dispute as to the "closed shop." (This agreement was attached to the Board's report as Appendix "A".)

A Board of Conciliation and Investigation similarly constituted was called upon to consider a dispute between the Company and its employees at its New Toronto plant in which one of the items in dispute was the "union shop." A unanimous report of that Board was made under date December 11, 1942, in which that Board unanimously recommended that the agreement between the parties instead of providing for a "union shop" should contain a "maintenance of membership" clause.

Substantially the same submissions have been made to this Board as were advanced to the Board which considered the dispute at the New Toronto plant. They are set forth in that report and it will suffice to say that they are equally applicable to conditions obtaining at both the New Toronto and Bowmanville plant.

This Board unanimously recommends that the agreement between the parties to this dispute instead of providing for a "closed shop" should contain a maintenance of membership provision which would provide substantially as follows:—

(a) That every present employee who is a member of the Union should be given a period of thirty days from the date of the agreement within which to elect in writing to be filed with the Company, either to remain a Union member or to withdraw from the Union. If he elects to retain his membership in the Union then a continuance of his membership shall be a condition precedent to his retaining his employment with the Company.

(b) Every future new employee, including any employee who returns to his employment from the Armed Forces, if he is a member of the Union on the date of his new or resumed employment shall retain his membership in the Union as a condition precedent to his continued employment.

(c) Every employee, whether present or future shall, once he becomes a member of the Union retain his membership in the Union as a condition precedent to his continued employment with the Company.

(d) The obligation of the Company to discharge the employee for failure to retain his membership in the Union shall arise only if in the opinion of the Company such employee could be promptly replaced by an equally well trained and competent employee; such decision by the Company, if the Union so desires, to be subject to appeal to the National Selective Service authorities.

(e) If at any time the number of Company employees, members of the Union, should become 50 per cent or less of the total number of employees eligible for such membership, then the obligation of the Company under this general provision for "maintenance of membership" shall forthwith terminate.

(f) These provisions should be expressly subject to any regulations of National Selective Service that may from time to time be in force.

The Board is of the opinion that the mechanics necessary to the satisfactory application of a maintenance of membership clause as above defined can be supplied by the parties themselves.

At the first meeting at which the Board met with the representatives of the parties the Company raised the preliminary objection that the Board had no jurisdiction to deal with the matters in dispute between it and its employees. The Company in a written submission contended: (a) that the matters in dispute do not fall within the class of disputes to which the statute (sec. 3) applies; and (b) that a condition precedent to the establishment of the Board is the imminence of a strike, and that a strike is not imminent.

The Board is of the opinion that it is precluded from considering the merits of the Company's submissions for two reasons: First: Authority is given by the statute to the Minister of Labour, to establish a Board of Conciliation "if satisfied that the provisions of this Act apply." Every such Board is therefore the creature of the Minister acting under the statute, and the Board should not attempt to review the decision of the Minister who created it. Secondly: The statute, sec. 7 (2) expressly provides that . . . . "when a Board is granted by the Minister, it shall be conclusively deemed to be authorized by and to be in accordance with the provisions of this Act."

All of which is respectfully submitted.

Dated at Toronto, this 22nd day of January, 1944.

(*Sgd.*) W. D. ROACH,
Chairman.
(*Sgd.*) JOHN J. ROBINETTE,
Member.
(*Sgd.*) F. A. BREWIN,
Member.

Conciliation Work of the Industrial Relations Branch During January, 1944

IN January, Officers of the Industrial Relations Branch were called on to deal with 47 new industrial disputes or other situations involving groups of employers and employees, affecting a total of 89 establishments. In the same period 33 disputes involving 46 different establishments, which were in progress prior to January, also received attention at the hands of Departmental Officers. There were 69,023 workpeople involved.

By industries, the disputes and other situations handled by the Branch were classified as follows:—

Mining	15
Manufacturing:	
Animal Foods	4
Metal Products	28
Non-metallic Mineral, chemical products, etc.	3
Shipbuilding	6
Textile Products, etc.	3
Pulp & Paper Products	1
Rubber Products	3
Construction	2
Transportation:	
Steam Railway	7
Water	3
Local and Highway	3
Air	1
Service:	
Public Administration	1
Total	80

Classified as to type of situation, the disputes dealt with by officers of the Industrial Relations Branch were as follows:—

Nature of Dispute:	
Strikes or Lockouts	14
Threatened Strikes	8
Controversies	58
	80
Cause or Object:	
Increase in Wages	8
Increase in Wages and Other Changes	5
Increase in Wages and Recognition of Union	1
Other Causes affecting Wages and Working Conditions	8
Recognition of Union	20
Discharge of Workers for Union Activity or Membership	12
Union Jurisdiction	6
To secure or to maintain Union Wages and Working Conditions	1
Other Union Questions	5
Discharge of Workers (*a*) (*b*)	8
Employment of Particular Persons (*a*)	1
Unclassified	5
	80

(*a*) Other than in connection with Union questions.
(*b*) Including refusal to reinstate.

An analysis of the disposition and settlement of the above cases is given in the following table:—

Disposition:	
Strike averted through mediation	5
Strike terminated through mediation	9
Controversy settled through mediation, arbitration or other departmental action	20
Board of Conciliation applied for	2
Industrial Disputes Inquiry Commissioner appointed under P.C. 4020	2
Agreement signed	1
Other disposition	14
Settlement:	
In favour of employees	12
In favour of employers	16
Compromise	3
Indefinite	8
Settlement not known	8
Method of Settlement:	
Cases in which Conciliation took place	39
Arbitrations	4
Direct Negotiations	8
Administrative Action	3
Representation Votes	9

The 80 situations to which reference is here made were dealt with under the provisions of the Conciliation and Labour Act and were in addition to those described on previous pages which received attention under the Industrial Disputes Investigation Act. In those situations where it was possible to achieve success, the conciliation efforts of the Industrial Relations Officers met with success in 19 cases. Mediation definitely failed in only 4 situations. Six disputes were referred to the National or to Regional War Labour Boards and two were transferred to Provincial authorities. Four disputes were considered to have lapsed during the month while settlements in 31 cases were still pending at the end of the period.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B., and Sydney, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and North Western Ontario; four officers resident in Toronto confine their activities to Ontario, and work in close collaboration with the Provincial Conciliation Service; two officers in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton, N.B. and Sydney, N.S. represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

A summary of some of the disputes dealt with during January, and of union representation votes, appears below:—

Foundry Workers, Vancouver, B.C.—During January, Mr. G. R. Currie, Industrial Relations Officer, resumed his efforts to bring about a mutually satisfactory adjustment of a dispute over the renewal of agreements between seven foundry companies belonging to the Metal Trades Section of the Canadian Manufacturers' Association in Vancouver and their employees as represented by the International Moulders' and Foundry Workers' Union of North America, Local 281, and the Moulders and Foundry Workers' Union (C.C.L.), Local No. 3. Three conferences between representatives of the various parties had been held during October and November, 1943, in the Vancouver offices of the Department of Labour, to discuss the terms of a new contract. Considerable progress was made at that time on practically all items under discussion, but agreement could not be reached upon the request of the unions for closed shop provisions. At another joint conference on January 27 negotiations proceeded with regard to adoption of maintenance of membership instead of a closed shop clause. A deadlock was again reached and at the end of the month it was intimated that the unions might apply for the establishment of a Board of Conciliation and Investigation. Mr. Currie is continuing his efforts to secure a satisfactory settlement without recourse to Board procedure.

Metal Products Workers, Thetford Mines, P.Q.—During December, the Department was asked to investigate charges that certain employees of Lynn MacLeod Metallurgy Limited, Thetford Mines, P.Q., had been dismissed because of union membership and activity. A preliminary investigation conducted by Mr. R. Trepanier, Industrial Relations Officer, Montreal, revealed that 36 employees had been dismissed, of whom 29 were members of a newly organized Steel Foundry Workers' Union (C.C.L.), and that the appointment of an Industrial Disputes Inquiry Commissioner under the provisions of Section 5 of Order in Council P.C. 4020 was warranted. On January 26, the Minister of Labour appointed the Honourable Mr. Justice Oscar L. Boulanger as Commissioner to conduct a formal inquiry. The case was still pending at the end of the month.

Metal Products Workers, Montreal, P.Q.—On December 8, 1943, the Department was asked by Montreal Aircraft Lodge 712, International Association of Machinists, to appoint an Industrial Disputes Inquiry Commissioner to investigate the dismissal of an employee from the Pointe St. Charles plant of Canadian Car and Foundry Limited, Montreal, allegedly on account of union activity and membership. Following a preliminary investigation by Mr. L. Pepin, Industrial Relations Officer, Mont-

real, the Minister of Labour appointed the Honourable Mr. Justice Oscar L. Boulanger as a Commissioner to conduct a formal investigation under Section 5 of P.C. 4020. The report of the Commissioner indicated that the company was able to prove facts which supplied a plausible and reasonable motive for discharging the employee, and that it was not possible to conclude that union activity had been the principal or determining reason for the dismissal.

Refinery Workers, Petrolia, Ontario.—Late in November, 1943, the Department received a joint request from Canadian Oil Companies Limited, Petrolia, Ontario, and a local union of the Canadian Congress of Labour for the appointment of an impartial umpire by the Minister of Labour to arbitrate a dispute involving the interpretation of an agreement between the parties. Mr. Louis Fine, Chief Conciliation Officer for Ontario, was nominated to act as umpire and decided that the company had not exercised any discrimination against the employee in question under the section of the agreement dealing with seniority in connection with promotions within the plant.

Mine Examiners and Mine Workers, Springhill, N.S.—On December 27 at the Cumberland Railway and Coal Company Limited, Springhill, N.S., three mine examiners, members of the Mine Officials Association were suspended for alleged insubordination. Fifty-seven other mine examiners discontinued work in sympathy while 1,500 mine workers, members of District 26, United Mineworkers of America, refused to work until the dispute was adjusted. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., investigated the situation for the Department and held a series of conferences with the parties concerned. Officers of the Mine Officials Association demanded that the three examiners be given work elsewhere in the mine; U.M.W.A. officials stated that their members would not return to work unless the suspended officials were re-employed and Company representatives declared that the employees would not be reinstated or any investigation held until the mines resumed operation. Hon. L. D. Currie, Minister of Mines and Labour for Nova Scotia urged that in view of the seriousness of the coal situation, alternative employment be given the three suspended men and that work be resumed. The Company finally agreed to this request and the three men were given other employment. It also requested investigation into the matter under Section 16 of the Coal Mines Regulation Act. On January 6 the employees began to report for work and by January 7 all had reported and the mines were in full operation.

Foundry Workers, Bowmanville, Ont.—On January 3 the Department received a request from the United Steelworkers of America to investigate the discharge for alleged misconduct of one of their members, secretary of Local 2375, and an employee of the Bowmanville Foundry Co., Bowmanville, Ont. The Union expressed the opinion that the man was discharged for taking part in the negotiating of a new contract with the company. Mr. H. Perkins, Industrial Relations Officer, Toronto, investigated the situation and on January 20 reported that, in his opinion, the employee concerned was dismissed for good and sufficient cause, and there was not sufficient evidence to justify the appointment of a Commissioner under P.C. 4020 as requested by the Union.

Aircraft Workers, Montreal, P.Q.—On December 30 the Department of Labour was notified by Montreal Aircraft Lodge 712, International Association of Machinists that a dispute had arisen between it and Noorduyn Aviation Ltd., over the settlement of some grievances. In accordance with an agreement between the parties, the Minister of Labour was requested to appoint a Chairman for an Arbitration Board before which the matter would be placed. On December 31 the Minister nominated Mr. Bernard Rose, K.C., Montreal. Mr. Rose's report, dated January 22nd, indicated that 31 complaints were submitted to the Arbitration Board, as well as a request for an interpretation in connection with a dispute dealt with on August 23rd, 1943.

Metal Workers, Scarboro, Ont.—On January 3, Mr. H. Perkins, Industrial Relations Officer, Toronto, advised the Department that he had visited Metal Stampings Ltd., Scarboro, Ont., to investigate a dispute concerning a proposed termination of an agreement between the company and Local 35, Aluminum Workers of America. Mr. Perkins reported that he was unsuccessful in his efforts to promote friendlier relations between the union and the company. By the end of the month the situation was still uncertain.

Transport Workers, Windsor, Ont.—A strike by about 19 city pick-up drivers and warehousemen employed by Direct-Winters Transport at Windsor, Ontario, occurred on January 3, 1944. As soon as word of the strike was received Mr. James Hutcheon, of the Conciliation Service of the Ontario Department of Labour, was assigned to the case on the request of the Director of Industrial Relations, Ottawa. He arrived in Windsor that evening and immediately made individual contacts with representatives of the Company and of the employees. The principal object of the employees was to secure from the Company

recognition of their union, the General Truck Drivers' Local Union No. 880, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America of Windsor, as the sole bargaining agency, on behalf of its members, together with closed shop conditions. In this connection the strike might be regarded as the sequel to a strike in March, 1943, when employees of five Windsor transport companies went on strike for four days to secure collective agreements embodying closed shop and check-off provisions. In April, 1943, three companies signed agreements with the Union, each of which included an undertaking that the employer would not recognize any other organization during the life of the agreement. The management of Direct-Winters Transport signed a similar agreement about the same time, but only after striking out the clause relating to sole bargaining rights. Because of this deletion, the Union claimed that no agreement existed and early in December, 1943, presented the Company with new demands for a closed shop contract.

In endeavouring to mediate, Mr. Hutcheon was handicapped because neither the local business agent of the Union nor the available representatives of the Company were empowered to negotiate and make final decisions which would modify their respective positions. On the third day of the strike an international representative of the Union having authority to negotiate on behalf of the strikers arrived in Windsor, and Mr. Hutcheon persuaded the union agents to meet in joint conference on January 6 in spite of the limitations placed on the Company representatives. Negotiations broke down completely when two compromise proposals were rejected by the Company representatives after consultations with their principals in Toronto. Mr. Hutcheon strongly urged the Union representatives to have the employees resume work and have resource to lawful procedure, pointing out that their strike was incompatible with the provisions of the Industrial Disputes Investigation Act. This was unavailing and the Union officials took further steps to prevent members of their organization in the United States from moving freight for an associated American company at Detroit and Buffalo. Shortly afterwards the Department was given reason to apprehend that the International Teamsters' Union might cause the strike to spread to employees of three other Windsor transport companies belonging to the Automotive Transport Association, in an effort to secure wage increases and as a measure of sympathy for the employees of Direct-Winters Transport. Mr. J. P. Nicol, Industrial Relations Officer, Toronto, intervened and arranged direct negotiations between the Union and several of the other common carriers in the area. At the end of the month the Department was informed that the Union would make an *ex parte* application to the National War Labour Board for wage adjustments.

Coal Miners, Fernie, B.C.—The employees of Crow's Nest Pass Coal Co. Ltd. (Michel Mine), Fernie, B.C., members of Local 7292, District 18, United Mine Workers of America ceased work on January 3 in protest against an increase of fifty cents per ton for miners' household coal. Mr. F. E. Harrison, Western Representative of the Department of Labour wired the Union to inform the men that their action was in contravention of their signed agreement and in violation of federal government statutes, and requested that the men be instructed to resume work immediately. The men returned to work on January 4. Later the District officials of the Union were advised by the Fuel Controller that the employer could charge the extra amount for miners' household coal.

Coal Handlers, Stellarton, N.S.—On January 14th 43 coal handlers of the Allan Mine, Acadia Coal Company, Stellarton, N.S., went on strike because of the alleged refusal of the Company to transport coal handlers to the surface on completion of their shift. The men were members of No. 4481, United Mine Workers of America. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., investigated the situation and urged upon the union the necessity for the men to return to work and submit any grievance to the Company in accordance with grievance procedure as set forth in their collective bargaining agreement. The executive of the union was successful in having the employees report for work on January 17 the matter in dispute to be adjusted by the customary grievance procedure.

Paper Makers, Lachute Mills, P.Q.—In the bag department of J. C. Wilson Co. Ltd., Lachute Mills, Quebec, a two-hour strike took place on Friday, January 7, from 10 a.m. to 12 noon. Forty employees, members of the International Brotherhood of Papermakers were involved and the dispute concerned the dismissal of two employees for cause. Mr. Raoul Trepanier, Industrial Relations Officer, Montreal, investigated the situation, but he was unable to persuade the Company to reinstate the dismissed employees. The Union decided not to press the matter further.

Rubber Workers, Hamilton, Ont.—On January 20, 235 employees of the tire building and curing departments of the Firestone Tire and Rubber Co., Hamilton, Ont., stopped work as a demonstration against the refusal of the company to agree to a representation vote of the employees to determine the bargaining agency desired. The union concerned was local 13, United Rubber Workers of America.

All returned to work on January 21. Mr. J. P. Nicol, Industrial Relations Officer, Toronto, investigated and made a check between the membership of the Union and the payroll of the company. This check showed that while the union had a substantial group, they did not have a majority of the employees as members. At the end of the month the matter was still under discussion.

Steelworkers, Trenton, N.S.—On January 20th, 22 crane runners and crane chasers employed by the Eastern Car Co. Ltd., Trenton, N.S. went on strike. The men were members of Local 1231, United Steelworkers of America. Their action affected 279 other employees. The cause of the dispute was disagreement concerning the basis for the establishment of an incentive bonus. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., investigated the situation. At a mass meeting of the Union on January 23rd the employees concerned agreed to return to work pending negotiations with the Company. The last report received by the Department indicates that the Company's offer regarding the incentive bonus was accepted by the union.

On January 15, 223 employees of the Eastern Car Co. Ltd., Trenton, N.S., members of Local 1231, United Steelworkers of America went on strike demanding an increase in the number of employees on the building track crew and an increase in incentive bonus. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, kept in touch with the situation for the Department. On January 16th the employees agreed to return to work on January 17th, the matters in dispute to be adjusted in accordance with the grievance procedure as set forth in the Union agreement.

Union Representation Votes

Metal Miners, Black Lake, P.Q.—During December the Department was requested by the Regional Director of Organization of the Canadian Congress of Labour in Montreal to arrange a representation vote among employees of the Wartime Metals Corporation at its Chromeraine Project at Black Lake, P.Q. The employer is a Crown Company, and when approached with a request to open negotiations for a collective agreement, had asked the organizer to furnish proof that a majority of the employees were members of the union. A vote was conducted on January 28th by joint consent of the parties, under the supervision of Mr. L. Pepin, Industrial Relations Officer, Montreal. Out of 87 eligible voters, a total of 81 cast their ballots. Of these, 61 voted in favour of representation through the Wartime Metals Employees' Union (C.C.L.), while 16 voted against the union. Four ballots were spoiled.

Railway Employees.—By joint consent of the parties, a representation vote was conducted during December and January under the supervision of Mr. Bernard Rose, K.C., of Montreal, among sergeants, patrol sergeants and constables employed by the Canadian National Railways to determine if the employees wished to be represented by a Committee comprised of members of local unions directly affiliated with the Trades and Labour Congress of Canada. Out of 414 employees eligible to vote, 325 cast their ballots in favour of Committee representation while 30 were opposed.

Railway Employees.—During December and January, by joint consent of the parties, the Department supervised the taking of a representation vote among sleeping and parlour car conductors employed by the Canadian Pacific Railway. The vote was taken to determine whether the employees were in favour of bargaining collectively with their employer through representatives of the Order of Railway Conductors, the Brotherhood of Railway Trainmen, or a Committee of Employees, as in the past. There were 142 ballots cast of which 91 were in favour of the Order of Railway Conductors, 50 in favour of the Brotherhood of Railroad Trainmen and one in favour of a Committee of Employees. Mr. Bernard Rose, K.C., of Montreal, acted as Chief Returning Officer.

Railway Employees, Montreal, P.Q.—On January 3 the Department received a request from Division 238 of the Canadian Brotherhood of Railway Employees and Other Transport Workers to take a representation vote among certain classes of employees of the Montreal and Southern Counties Railway. Mr. Raoul Trepanier, Industrial Relations Officer, Montreal, assisted by Mr. Bernard Willson of the Department of Labour, Ottawa, made satisfactory arrangements with both parties, and the vote was taken on February 3. The result of the voting was as follows:—Number of eligible voters—44; number of votes cast—44; number voting favour of committee of employees affiliated with Division 238, Canadian Brotherhood of Railway Employees and Other Transport Workers—41; number voting against committee—3.

Railway Workers, Toronto, Ont.—On December 28, 1943, the Department was requested to conduct a representation vote among the employees of the Canadian National Railways, Regional Auditor's Office, Toronto, members of the Canadian Brotherhood of Railway Employees and Other Transport Workers, Mr. H. Perkins, Industrial Relations Officer

Toronto, conducted the vote on January 17, 1944. The question on the ballot was "Do you wish to be represented by a Committee of Canadian National Railways employees for the purpose of negotiating a schedule covering rates of pay and working conditions?" The results for the Regional Auditors office were as follows: Number of eligible voters—337; total ballots cast—317; number voting "yes"—245; number voting "no"—72; spoiled ballots—0. The results for the Regional Treasurers Office were as follows: Number of eligible voters—22; total ballots cast—21; number voting "yes"—13; number voting "no"—8; spoiled ballots—0.

Packinghouse Workers, Winnipeg, Man.—On January 28 a representation vote was conducted by Mr. H. S. Johnstone, Industrial Relations Officers, Winnipeg, at the Manitoba Sausage Manufacturing Co. Ltd., Winnipeg. The text of the ballot read as follows: "Are you in favour of being represented for the purpose of collective bargaining with the Manitoba Sausage Manufacturing Co. Ltd. by Local 228, United Packinghouse Workers of America?" The official results were as follows: Number of elegible voters—22; number of votes cast—20; number voting "yes"—18; number voting "no"—2; number of spoiled ballots—0.

Allegations of Dismissal for Union Activity Investigated by Department of Labour

THE Minister of Labour, pursuant to Section 5 of P.C. 4020, may direct an Industrial Disputes Inquiry Commission to examine "into any allegation that any person has been discharged or discriminated against for the reason that he is a member of or is working on behalf of a trade union or that any person has been coerced or intimidated to induce him to join a trade union".

The Commission, failing settlement of the matters at issue, reports its finding and recommendations to the Minister of Labour who issues whatever order he deems necessary to give effect to the recommendations. The Order of the Minister is final and binding upon those concerned by it.

It has been the practice of the Department of Labour, on receipt of allegations of intimidation, discrimination or coercion, to initiate a preliminary investigation by an Industrial Relations Officer to ascertain if the facts of the matter justify the formal investigation of a Commission. In a large number of cases the Industrial Relations Officer has been able to effect a voluntary settlement by the employer, thus rendering the appointment of a Commission unnecessary. In many other cases, the preliminary investigation has disclosed that the allegations had either been withdrawn, or were of such a nature that the appointment of a Commission would serve no good purpose.

Printed below is a table showing the results of 64 investigations by Industrial Disputes Inquiry Commissioners under Section 5 of P.C. 4020 during the period July 2, 1941, to December 31, 1943.

RESULTS OF 64 INVESTIGATIONS BY INDUSTRIAL DISPUTES INQUIRY COMMISSIONERS INTO ALLEGATIONS OF DISMISSAL FOR UNION MEMBERSHIP OR ACTIVITY

	1941*	1942	1943	Total
No. of cases investigated by Industrial Disputes Inquiry Commissioners	9	23	32	64
No. of persons involved in cases investigated	81	171	179	431
No. reinstated voluntarily by employer during the investigation, no findings being necessary	27	26†	71	124†
No. receiving monetary settlement and withdrawing charges	1	19	1	21
No. found dismissed for union activity or membership and ordered reinstated with back pay by the Minister of Labour	..	8	21	29
No. found dismissed for just cause	..	14†	21	35†
No. found dismissed or laid off in the ordinary course of business for economic reasons	32	97	36	165
No. found having left employment voluntarily	7	5	21	33
No. found having preferable employment or otherwise not wishing to return	14	3	8	25

* July 2, 1941, to December 31, 1941.

† One employee, dismissed for cause but reinstated voluntarily, is counted in both groups.

Canadian Railway Board of Adjustment No. 1

Summary of Decisions

REPORTS have been received covering the following cases heard by the Canadian Railway Board of Adjustment No. 1. Summaries of earlier decisions appeared in the LABOUR GAZETTE, 1942, pp. 666 and 1130, and the eighth report of the proceedings of the Board covering the period from October 1, 1939, to September 30, 1942, recently issued as Bulletin No. 15.

The Board was established under a voluntary agreement concluded in 1918, between the several railway companies and certain of the railway organizations. It has power to determine all differences arising between the railway companies and the members of any of the six railway brotherhoods "including the interpretation of wage schedules or agreements having due regard to the rights of the several classes of employees and of the railways respectively."

The Board consists of six representatives of the railways and six representatives of labour, one from each of the following Railway Brotherhoods: The Brotherhood of Locomotive Engineers; the Brotherhood of Locomotive Firemen and Enginemen; the Order of Railway Conductors; the Brotherhood of Railroad Trainmen; the Order of Railroad Telegraphers; and the Brotherhood of Maintenance of Way Employees and Railway Shop Labourers.

Case No. 506—Canadian National Railways (Central Region), and the Brotherhood of Railroad Trainmen.

Protest against an appointment.

An additional position of assistant yardmaster having been created in a certain station yard, the Chief Clerk in the yard office was appointed to the position, according to the joint statement of facts in this case.

The employees protested that the provisions of Article 146(a) had not been complied with. They claimed that "full and unprejudiced consideration" had not been given to the qualifications of other yardmen; and that it was mandatory under the terms of the Article to appoint the senior qualified yardman.

The Railway asserted that full and unprejudiced consideration had been given to the senior yardmen; and that the employees' contention that it was mandatory to appoint the senior qualified yardman was "in effect a request for a new rule" and should be denied.

The Board denied the employees' contention.

Case No. 507—Canadian National Railways (Central Region) and Brotherhood of Locomotive Engineers and Brotherhood of Locomotive Firemen and Enginemen.

Claim of an engineer and a fireman for separate trips covering light movement of an engine on a Western Ontario Division and deadheading on an extra engine on the same division.

According to the joint statement of facts, the engineer and fireman were ordered at Sarnia for a straightaway trip at 11 p.m. to deliver an engine light at London. Upon arrival at London they were ordered to return deadhead to Sarnia. This they did on an extra freight train. For this service time-claims were submitted for 113 miles Sarnia to London and 100 miles London to Sarnia. They were compensated as continuous service, Sarnia to London and return to Sarnia.

The employees based their contention on Article 7, Clause A of the wage schedules which defines what shall constitute a day's work and the pay allowed for mileage in excess of the mileage required for a minimum day; as well as the notification of firemen or helpers for either a turnaround or a straightaway trip.

The railway officials claimed that Article 7 (a) did not apply, but that the case should be decided on the interpretation of Article 16 (a) which relates to pay for deadheading. The railway claimed that clause 7 (a), quoted by the employees, is not and never has been considered service under the provisions of either of the schedules in question.

Representatives of the railways and of the employees appeared before the Board and presented additional information in support of their respective contentions.

In a general statement the Board pointed out that the Rules provide that deadheading may be coupled with other service, but as in this instance the crew were not notified when called that they were required for turnaround service, the coupling of the service did not come within the intent of the Rules. The Board in its decision sustained the claim of the employees.

Case No. 508—The Toronto, Hamilton and Buffalo Railway Company and the Brotherhood of Railway Trainmen.

According to the Joint Statement made by the disputants a difference of opinion existed regarding the application of Rule 34 of the wage schedules. Details of the local were provided as follows: " . : . Belt engine was double crewed, the first trick starting at Aberdeen yard at 7.15 a.m. and the second trick starting at Deering yard at 3.15 p.m. and ending at Aberdeen yard at 11.15 p.m. crews changing off at Deering yard. (Distance between Aberdeen and Deering approximately 4½ miles.)"

In their statement of claim the employees quoted relevant portions of Articles 29 and 34 of the wage schedules, as follows: "Article 29-eight hours or less shall constitute a day's work." Article 34—The point for going on or off duty will be governed by local conditions. Instructions will provide that yardmen report at the hump, yard office, engine houses or ready tracks. It is not considered that the place to report will be confined to any definite number of feet, but the designation will indicate a definite and recognized location."

It was the contention of the employees that they should be "reimbursed at punitive yard rates from the time relieved at Deering until return to Aberdeen for the first assignment, and from Aberdeen to Deering for the second crew,

and that these assignments should go on and off duty at Aberdeen yard."

The Railway in its argument stressed Article 18 (a) of Supplement 16 to General Order No. 27 of the U.S. Railroad Administration effective January 1, 1919, which reads as follows: "Provision of existing rules that there shall be a specified point for either going on or coming off duty, or both . . . . but schedules having no such rules shall be modified to provide that yard crews shall have a designated point for going on duty and a designated point for going off duty."

This, taken in conjunction with Article 34, (included in employees' brief, quoted above) the Railway Company claimed, definitely provided "for a designated point for a crew to go on duty and a designated point for going off duty, but do not require that the point will be one and the same." The Company asserted that the return of double-crewed engines to starting point would restrict it in the full use of its motive power and provide a handicap in the handling of traffic. Further, "there is no rule in our schedule that crews start and end their day at the same point."

The Board in its decision stated, that (in its opinion) under Article 34 of the schedule "the point for going on and off duty must be one and the same, unless otherwise mutually agreed." The claim of the employees was therefore sustained to the following extent:

(1) That an adjustment should be made covering time in dispute on a basis of an allowance of 30 minutes at punitive rates for each shift worked.

(2) That unless a mutual agreement is reached to the contrary, in future all yard crews will be given a definite point for going on and off duty.

Case No. 509—The Toronto, Hamilton and Buffalo Railway Company and the Order of Railway Conductors and the Brotherhood of Railroad Trainmen.

Claim of improper payment.

This case concerned a conductor and crew, assigned to passenger trains operating from Hamilton to Buffalo and return, who were called on one occasion at Buffalo to handle a passenger extra to Hamilton leaving earlier than their regular train to Hamilton. The crew were paid one day at passenger rates plus overtime of regular assignment.

The employees contended that the crew should be paid 100 miles at through freight rates in accordance with Article 10, which states in part: "Special passenger trains, work train, construction, snow plough, circus or wrecking trains will be paid at through freight rates"; in addition to their minimum day of 150 miles passenger.

The railway in its reply stated that "in general railway practice it is not unusual for regular crews to leave the terminal on sections of trains in advance of scheduled leaving time of their regular train as occurred in this case." Reference was made also to an opinion in a number of cases referred to the Board in 1923, to the effect that such cases should "be disposed of on the basis of the crew being paid the same as if the train were operated on time table."

The Board sustained the claim of the employees.

Case No. 510—The Toronto, Hamilton and Buffalo Railway Company and the Order of Railway Conductors and the Brotherhood of Railway Trainmen.

Claim of improper payment.

This case concerned a conductor and crew, regularly assigned to a way freight, who were called upon to make a special trip involving the handling of passengers in addition to their regular assignment. The crew were paid at way freight rates for the entire service.

According to the employees' contention, the crew should have been paid 100 miles at through freight rates for their extra service in accordance with Article 10 (as quoted in Case No. 509).

The Company contended that Article 13 (c) determined the method of payment: that crews performing more than one type of road service on one trip were to be paid for the entire service at the highest rate applicable to any class of service performed, with the overtime basis for the rate paid applying for the entire trip. The Company claimed that in paying way freight rates for the entire day they were following the terms of Article 13.

The Board sustained the case of the employees.

Case No. 511—Canadian Pacific Railway Company (Eastern Lines) and Brotherhood of Locomotive Engineers and Brotherhood of Locomotive Firemen and Enginemen.

Disputed claims of an engineer and a fireman for 15 minutes account taking engine to coal chute for coal during the 15 minutes immediately following the 30 minutes preparatory service, at Sudbury, on various dates.

The joint statement of the case indicated that the engineer and the fireman were under orders to come on duty at Sudbury roundhouse at 8.35 p.m. and after performing the usual 30 minutes preparatory service, were required to take their engine to the coal chute on the main line where it was supplied with coal. Claim was made for 15 minutes for such service.

In their statement of claim the employees drew attention to a portion of Article 19 of the wage schedules as follows: "Engines will be supplied with coal, sand and water by engine house staff at terminals . . ." They asserted, therefore, that they had a right to expect their engine to be supplied with coal ready for service. However, they admitted that the shop staff was not authorized to move engines on the main line and, as the coal chute at Sudbury was located on the main line, the engine crew must perform the work which, normally, "would be performed by the hostler and his assistants." They contended that when an engine crew was required to perform the work of other classification, they should be compensated accordingly.

The Company pointed out that the engine crew concerned came on duty at 8.35 p.m. for a train departure at 10 p.m. and was paid on a basis of "30 minutes preparatory time, 40 minutes advance call and balance of 15 minutes was included in road time." The 40 minutes "advance call . . . . represents 10 minutes account coaling engine and 30 minutes advance call to get down to station". The company contended that payment was being made in accordance with Article 2 (d) of the agreement

with the employees, the last paragraph of which provided for extra pay for cases in which engineers were required to perform certain extra duties previous to the time the train was ordered for, or was due to leave. Further, this method of payment had been followed for approximately ten years prior to the dispute.

In addition to the written submissions in the case, representatives of both the railway and the employees presented oral evidence to the Board. The claim of the employees was not sustained.

Case No. 512—Canadian Pacific Railway Company (Eastern Lines) and Brotherhood of Locomotive Engineers and Brotherhood of Locomotive Firemen and Enginemen.

Disputed claim of Engineer and Fireman for time held before departure of train at Sudbury on a specific date.

The employees based their claim on Article 37 and Article 38 of the Engineers' and Firemen's Schedules respectively, as follows: "Engineers and firemen in passenger service delayed two hours or over on their engines at terminals before commencement of trip will be paid for same, at schedule rates, such time to be deducted when computing overtime." In this case the employees asserted that the train was held for two hours and fifteen minutes and the employees claimed that they should receive pay for that time "as initial terminal delay."

The Company in its brief gave detailed and specific reasons why the departure of the train was held up on the occasion under dispute, and based their agreement on Article 2 (d) of the agreement with the employees: "Engineers will appear on duty 45 minutes before time ordered for and will sign appearance book; first 30 minutes to be allowed for getting engine ready," for which they will be paid "at the rate of class of engine and service . . . road time will commence 15 minutes before time ordered for and will end 30 minutes after engine is placed on designated shop track, or is turned over to hostler or inspector . . . ." The Company claimed further, that the delay was for only one hour and 20 minutes and that "Article 37 of the Engineers' agreement was not intended to refer to time properly paid for under the provisions of Article 2 (d)".

Oral evidence was presented by representatives of both sides in the dispute. The claim of the employees was sustained.

Strikes and Lockouts in Canada during January, 1944

DURING the month of January the number of strikes and lockouts in Canada showed an increase of five as compared with the previous month but the number of workers involved and the time loss in man-working days were both considerably lower. Preliminary figures show 26 strikes recorded for January, 1944, as compared with 21 for the previous month and 34 for January, 1943; the workers involved numbered 8,140 in January, 1944, as compared with 36,142 in December, 1943, and 19,857 in January, 1943; and the time loss in man-working days amounted to 23,408 days in January, 1944, 57,227 in December, 1943, and 166,707 in January, 1943.

In the month under review two strikes, one of civic employees (office workers, etc.) at Montreal and the other of coal miners at Springhill, N.S., accounted for more than 70 per cent of the time loss. The large time loss in January, 1943, was due mainly to three strikes of steel mill workers at Sault Ste. Marie, Ont., and Sydney and Trenton, N.S.

Four strikes, involving 3,301 workers, were carried over from December and 22 commenced during January. Of these 26 strikes, 24 were terminated during the month. Five resulted in favour of the workers, eleven in favour of the employers, one was a compromise settlement and seven were indefinite in result work being resumed pending final settlement. There were two strikes, therefore, unterminated at the end of the month, namely: hotel employees at Edmonton, Alta., and truck drivers at Windsor, Ont.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to one dispute of this nature, namely: fur factory workers, Quebec, P.Q., one employer, May 12, 1943.

The following table gives information for January, 1944, December, 1943, and January, 1943:

Date	Number of strikes	Number of workers involved	Time loss in man-working days
*January, 1944	26	8,140	23,408
*December, 1943	21	36,142	57,227
*January, 1943	34	19,857	166,707

* Preliminary figures.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless 10 days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review.

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to secure information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING JANUARY, 1944*

Industry, occupation and locality	Number involved		Time loss in man-working days	Particulars†
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to January, 1944				
MINING—				
Coal miners, Springhill, N.S.	3	1,500	5,750	Commenced December 29, 1943; against suspension of three officials for insubordination; terminated January 6, 1944; conciliation (provincial and federal); (three officials re-employed at other work) compromise.
MANUFACTURING—				
Rubber and Its Products—				
Rubber factory workers (footwear, etc.), Acton Vale, P.Q.	1	75	400	Commenced November 22, 1943; for union recognition and agreement; terminated January 8, 1944; return of workers and replacement; in favour of employer.
SERVICE—				
Public Administration—				
Civic employees (office workers, etc.), Montreal, P.Q.	1	1,700	11,000	Commenced December 21, 1943; for increased wages; terminated January 12, 1944; conciliation (provincial) and reference to arbitration; indefinite.
Business and Personal—				
Hotel employees, Edmonton, Alta.	1	26	500	Commenced October 1, 1943; for payment of wage increases for porters as approved by RWLB‡; unterminated.
Strikes and Lockouts Commencing during January, 1944				
MINING—				
Coal miners and coke oven workers, Michel, B.C.	1	750	1,000	Commenced January 3; against increase of 50c. per ton for miners' household coal; terminated January 4; negotiations; in favour of employer.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the July, 1943, issue, in the review of "Strikes and Lockouts in Canada and Other Countries, 1942." The latter included a table summarizing the principal statistics as to strikes and lockouts since 1919, in the various countries for which such figures are available. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones. An order under the Defence Regulations, effective July 25, 1940, provides for the settlement of disputes and the prevention of strikes and lockouts, as noted in the LABOUR GAZETTE, August, 1940, page 760.

The number of disputes beginning in November was 193, and 9 were still in progress from the previous month, making a total of 202 disputes in progress during the month, in which 90,500 workers were involved. The time loss in November was 365,000 working days.

Of the 193 disputes beginning in November, 34 arose out of demand for increased wages, 69 over other wage questions, 5 over questions as to working hours, 29 over questions respecting the employment of particular classes or persons, 56 over other questions. Final settlements were reached in 157 disputes, of which 32 were settled in favour of employees, 94 in favour of employers and 31 resulted in a compromise; in 29 of other disputes, work was resumed pending negotiations.

New Zealand

The number of disputes reported for the first nine months of the year 1943 was 48, involving 7,491 workers, with a time loss of 9,152 working days.

United States

Preliminary estimates for the year 1943, show 3,750 strikes, with 1,900,000 workers and a time loss of 13,500,000 working days. Sixty-three per cent of this time loss was due to the four coal strikes.

Figures are now available for the three months during which their compilation had been temporarily suspended. On July, 1943, the number of strikes beginning in the month was 375, in which 118,000 workers were involved and the time loss was 690,000 working days for all strikes in progress during a month. Corresponding figures for August are 335 strikes, 105,000 workers and 355,000 man-days time loss; for September, 246 strikes, 67,000 workers and 195,000 man-days time loss.

The number of strikes beginning in December was 325, involving 241,000 workers; the time loss for all disputes in progress during the month was 715,000 working days.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included.

Verbally accepted agreements are so indicated.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Manufacturing: Vegetable Products

PLESSISVILLE, QUEBEC.—LES PRODUCTEURS DE SUCRE D'ERABLE DE QUEBEC (THE MAPLE SUGAR PRODUCERS OF QUEBEC, A CO-OPERATIVE SOCIETY AND LE SYNDICAT CATHOLIQUE INTERPROFESSIONNEL DE PLESSISVILLE (THE CATHOLIC INTERPROFESSIONAL UNION OF PLESSISVILLE).

Agreement to be in effect from January 31, 1944, to January 30, 1945, and thereafter from year to year, subject to notice. The employers recognize the union and will give preference to union members in employment. New permanent employees must join the union.

Hours: from April to September inclusive, 10 per day, 60 per week, with overtime at time and one quarter for first 12 hours overtime in a week and time and one half thereafter; from October to March inclusive, 10 per day, 5 on Saturdays, a 55-hour week, with overtime at time and one quarter for first 5 hours overtime in a week and time and one-half thereafter. Vacaiton: permanent employees to have one week's vacation with pay. Minimum hourly wage rates: mechanics 40 to 50 cents, stationary engineers 35 to 45 cents, truck drivers 35 to 40 cents; workers in charge of receiving, filtration, stores, 35 to 40 cents, permanently employed labourers 30 to 38 cents, temporarily employed labourers 30 to 35 cents, labourers under 18 years 20 to 30 cents. A cost of living bonus is payable. Provision is made for consideration of seniority and for the settlement of grievances.

Manufacturing: Textiles and Clothing

LACHUTE MILLS, QUEBEC.—AYERS LIMITED AND THE UNITED TEXTILE WORKERS OF CANADA, LOCAL NO. 9

Agreement reached following report of Board under the Industrial Disputes Investigation Act and the mediation of an officer of the Department of Labour (p. 175 of this issue). Agreement to be in effect from January 12, 1944, subject to 60 days' notice. The Company recognizes the union as the sole bargaining agency for all employees. Employees are free to join or not join the union. Hours for the day shift are 49½ per week; for night shift 50 per week; which hours may be modified by mutual consent. Overtime is payable for hours over 48 in a week, at time and one half, with the exception of employees of maintenance and repairs department, watchman, chauffeurs and electricians, to whom time and one half is payable only after a 54 hour week. Vacation: the Company agrees to give an annual vacation with pay, the duration and date to be left to the Company's discretion, as for the year 1943. The wage scale is not included in the agreement, but it is provided that employees on the night shift be paid at a rate 10 per cent higher than the basic rates paid at present to the day shift. The full cost of living bonus is paid. Provision is made for settlement of grievances.

CORNWALL, ONTARIO.—COURTAULDS (CANADA) LIMITED AND UNITED TEXTILE WORKERS OF CANADA, LOCAL NO. 3, (RAYON FACTORY WORKERS)

Agreement to be in effect from September 10, 1943, to September 9, 1944, and thereafter from year to year, subject to notice. The Company recognizes the union as the sole agency representing its members. Any permanent male employee who is at the date of this agreement or who later becomes a member must retain his membership and all new male employees must join the union. The Company recommends to its employees that they become union members.

Overtime: all work beyond normal working day and all work on Sundays and holidays is payable at time and one half. Wages: for male workers on 2 shift system, 3 cents per hour over day rates; for male workers on 3-shift system, 7 cents per hour over day rate to be paid. A cost of living bonus is paid. Vacation: one week with pay to employees with one year's service, 3½ days to those with 6 months' service; those with five years' service, 10 days vacation with pay. Seniority and grievance procedure are provided for.

TORONTO, ONTARIO.—THE ASSOCIATION OF MILLINERY MANUFACTURERS AND THE UNITED HATTERS, CAP AND MILLINERY WORKERS' INTERNATIONAL UNION, LOCAL NO. 46.

Agreement to be in effect from February 15, 1944, to February 15, 1945; a conference to be held for the renewal or change of the agreement. Only union members to be employed. If when new workers are required, the union is unable to supply any, others may be employed but must join the union.

Hours: 8 per day, Monday to Friday, a 40-hour week. Overtime is limited to 10 hours in

any week and may only be done during the spring period of four to six weeks and the fall period of four weeks. Overtime is payable at time and one-half. Holidays: employees to have two holidays (Good Friday and Labour Day) with pay. Minimum weekly wage rates: all around blockers $35.60; blockers, straw operators, cutters and fabric operators $32.30; drapers $22.40; trimmers $16.80. (These rates are $1.80 to $3.60 per week higher than in the previous agreement.) A cost of living bonus is provided for. Provision is made for the settlement of disputes.

TORONTO, ONTARIO. — ASSOCIATED CLOTHING MANUFACTURERS AND AMALGAMATED CLOTHING WORKERS OF AMERICA (MEN'S CLOTHING WORKERS).

Agreement to be in effect from May 1, 1943, to April 30, 1946, and is similar to the one previously in effect (L.G., October, 1940, p. 1071). Hours are 44 per week, with overtime at time and one-half and wages rates are on a piecework basis.

Manufacturing: Printing and Publishing

TORONTO, ONTARIO.—TWO DAILY NEWSPAPERS AND THE INTERNATIONAL PRINTING PRESSMEN AND ASSISTANTS' UNION, LOCAL NO. 1.

Agreement to be in effect from June 1, 1943, to May 31, 1944, and thereafter from year to year, subject to notice. Only union members to be employed, if available.

Hours: 8 per day for 5 days, a 40-hour week for day work; 7½ per night, a 37½-hour week, for night work; 7 per night, 5 nights, a 35-hour week, for the lobster shift. If no substitutes available, regular men will work the sixth day at regular rates. Overtime is payable at time and one-half; work on Sundays and holidays (except work on regular issues) is payable at double time. Weekly wage rates for journeymen pressmen: $49 for day work, $50.50 for night shift and $51.50 for lobster shift. Apprentice regulations are included, with weekly wage rates from $13 during first year to $32 during sixth year. Provision is made for the settlement of disputes.

WINNIPEG, MANITOBA.—TWO DAILY NEWSPAPERS AND THE INTERNATIONAL TYPOGRAPHICAL UNION, LOCAL 191.

Agreement to be in effect from October 1, 1943, to September 30, 1944. Only union members to be employed, if available. If none available, others employed must join the union.

Hours: 8 per day on Mondays to Fridays, 6 on Saturday for day work; 7¼ hours to be a night's work; 7 hours the middle shift; five days or nights to constitute a week's work, but if no substitutes available, men will work the sixth day at straight time rates. For work on Sundays and holidays (except for regular night shifts part of which are on Sunday or a holiday) double time. Hourly wage rates: for day work $·9113; for night work $1·0085. Apprentice regulations are included with wage rates from 30 per cent of journeymen's wage during first year to 75 per cent during sixth year. Provision is made for the settlement of disputes.

Manufacturing: Miscellaneous Wood Products

NEWMARKET, ONTARIO.—THE OFFICE SPECIALTY MANUFACTURING COMPANY LIMITED AND THE NATIONAL UNION OF FURNITURE WORKERS, LOCAL NO. 7.

Agreement reached following the report of a board under the Industrial Disputes Investigation Act (see p. 175 of this issue). Agreement to be in effect from December 1, 1943, to November 30, 1944, and thereafter from year to year, subject to notice. The Company recognizes the union as sole collective bargaining agency for employees.

Hours: 8½ per day, 4½ on Saturday, a 47 hour week. Overtime and work on holidays is payable at time and one-half. A rest period of 10 minutes in the morning and 5 minutes in the afternoon is granted. Wage rates are to be later mutually agreed on and will then form part of the agreement. The full cost of living bonus is paid. Vacation: one week's vacation with pay to employees with one year's service. Arrangements are made for seniority rights and for the settlement of disputes.

Manufacturing: Metal Products

MONTREAL, QUEBEC.—R.C.A. VICTOR COMPANY LIMITED AND THEIR HOURLY PAID EMPLOYEES' REPRESENTED BY THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL 1028-B.

Agreement to be in effect from September 12, 1943, to September 11, 1944, or for another year if no notice is given. This agreement is similar to the one previously in effect and published in the LABOUR GAZETTE, October, 1942, pp. 1128 and 1208 with a change in the organization representing the employees and with certain other changes:

Hours: clause 4*a* now reads—"The present regular working week of 48 hours shall be continued". An employee called to work to be paid for at least three hours if no work available when he arrives. Minor changes are made in the clauses *re* classification of employees and settlement of disputes.

TORONTO (LEASIDE) ONTARIO.—SANGAMO COMPANY LTD. AND INTERNATIONAL ASSOCIATION OF MACHINISTS, LOCALS 1755 AND 235.

Agreement to be in effect from November 12, 1943 to November 11, 1944 and thereafter from year to year until notice. The Company recognizes the union as the sole bargaining agency for all eligible employees. Neither the company nor the union will coerce any person on account of membership or non-membership.

Hours: 48 per week for both day and night work. Overtime and all work on Sundays and holidays is payable at time and one-half. Minimum hourly wage rates for certain classes of employees: toolmakers, 99 cents to $1.10; set-up man, floor inspectors (fully experienced), millwrights 72 to 77 cents; stores, groundsman, boiler room hand, 50 to 55 cents; special tests meters and motors, 72 to 77 cents; automatic screw machine operators 61 to 66 cents; beginners 50 to 55 cents. A joint survey of wages to be made and changes considered. Vacation: one week's vacation with pay to all hourly paid employees with one year's service and two weeks after eleven years' service. Seniority rights and grievance procedure are included in the agreement.

TORONTO, ONTARIO.—AMALGAMATED ELECTRIC CORPORATION LTD., AND UNITED ELECTRICAL, RADIO AND MACHINE WORKERS OF AMERICA, LOCAL 514.

Agreement to be in effect from October 18, 1943 to October 17, 1944 or 1945 if no notice given. The Company recognizes the union as the sole collective bargaining agency for its employees. No discrimination to be shown by employer or union on account of union membership or activity or non-membership.

Hours: 8¾ per day, 4½ on Saturday for day shift; 9½ per night, Monday to Thursday, 10 on Friday for night shift. Overtime and work on Sundays and holidays is payable at time and one-half. A 10-minute rest period in each half of working shift. Hourly wage rates: spinner and electric arc welders 50 to 80 cents; assembler, sheet metal worker, production machinist 40 to 80 cents; spot welder, 40 to 60 cents; die setter 58 to 75 cents, punch press operator 40 to 58 cents, press shear operator 40 to 65 cents; painter and buffer 45 to 75 cents, plater finisher 40 to 70 cents; inspector 40 to 85 cents; shipper 40 to 65 cents; sweeper, trucker 45 to 50 cents, tool and die maker 85 cents to $1.10; maintenance electrician 50 to 90 cents; general maintenance (carpenter, pipefitter, etc.) 50 to 80 cents. Employees on night shift to be paid a bonus of 5 per cent of their total weekly earnings. It is the policy of the company to make periodic surveys of community wage levels and to pay at least the average wage rates for comparable occupations. Wage rates will be reviewed jointly every six months and adjustments discussed. Vacation: one week's vacation with pay to employees with one year's service.

Seniority and grievance procedure are included in the agreement.

REGINA, SASKATCHEWAN.—REGINA INDUSTRIES LIMITED AND INTERNATIONAL ASSOCIATION OF MACHINISTS, LOCAL 520

The agreement effective from September 1, 1942, which was summarized in the LABOUR GAZETTE, December, 1942, p. 1482, was amended from January 24, 1944, making some changes in the seniority classes.

Manufacturing: Shipbuilding

LIVERPOOL, N.S. — THOMPSON BROTHERS MACHINERY COMPANY LIMITED, AND INTERNATIONAL BROTHERHOOD OF BOILERMAKERS, IRON SHIPBUILDERS, WELDERS AND HELPERS OF AMERICA, LOCAL 370, AND FIVE OTHER UNIONS (PLUMBERS, MACHINISTS, CARPENTERS, ELECTRICAL WORKERS AND PAINTERS)

Agreement to be in effect from August 12, 1943, to August 12, 1944. The Company recognizes these Unions as the sole bargaining agents for the employees covered by the agreement.

Hours: 8 per day, a 48-hour week. Overtime is payable at time and one-half from 5 p.m. to 12 p.m. and double time from 12 p.m. to 8 a.m.; Work on Sundays and holidays at double time. Hourly wage rates for some classes: pipefitters and plumbers, machinist, patternmaker, welder, chipper and caulker, blacksmith, electrician, boilermaker, riveter 75 and 80 cents; helpers 53 cents; painters 63 and 80 cents, moulders 70 cents; labourer 40 to 45 cents. Grievance procedure is included in the agreement. All matters pertaining to promotion, classification, or reduction in staff shall be decided by the management.

Manufacturing: Non-Metallic Minerals, Chemicals, etc.

CHIPPAWA, ONTARIO.—THE NORTON COMPANY AND UNITED GAS, COKE AND CHEMICAL WORKERS OF AMERICA, LOCAL 154

Agreement to be in effect from May 20, 1943, to May 20, 1944, and thereafter from year to year, subject to notice. All employees who are members are to remain members of the union for the duration of this agreement but new employees are free to join or not to join the union.

Hours: 8¾ per day, 4¼ on Saturdays, a 48-hour week. Overtime and all work on Sundays is payable at time and one-half; double time for work on holidays. Minimum hiring rate for hourly rated employees shall be 60 cents per hour, subject to the approval of the War Labour Board; also subject to this approval, 3 cents per hour extra for work between 4 p.m. and midnight. The full cost-of-living bonus shall be paid to all employees. Vacations: employees with two years' service prior to January 1 of the current year to have one week with pay, increasing each year up to two weeks after 10 years' service. Seniority and grievance procedure are provided for.

Construction: Buildings and Structures

VANCOUVER, B.C.—MASTER LATHERS' ASSOCIATION OF VANCOUVER AND THE WOOD, WIRE AND METAL LATHERS' INTERNATIONAL UNION, LOCAL 207.

Agreement to be in effect from January 8, 1944, indefinitely.

Only union members to be employed and the union agrees to work only for members of the Master Lathers' Association.

Wages: first class journeymen lathers $1 per hour, second class 87½ cents, tie work $1.12½ per hour, plus cost of living bonus. Foremen receive $1 per day more than journeymen. Lathers doing work out of town receive $1 per day extra pay, transportation, travelling time and board and lodging.

Transportation and Public Utilities: Local Transportation

HALIFAX, N.S.—OCEAN VIEW BUS SERVICE AND CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES AND OTHER TRANSPORT WORKERS, DIVISION NO. 235.

Agreement to be in effect from October 6, 1943, to January 6, 1944, and until one month's notice.

Hours: 54-hour week for bus operators; 9-hour day, 54-hour week for garage employees. Overtime is payable at time and one-half. Hourly wage rates: bus operators, 50 to 60 cents, motor mechanics 65 to 75 cents, mechanics' helpers 53 cents, greasemen and servicemen 50 cents, inspectors $35.40 per week. A cost of living bonus is also paid. Vacation: two weeks annually with pay, to employees

with three years' service or more. Employees with more than one year and less than three years' service receive one week's vacation with pay. Grievance procedure is included in the agreement.

HALIFAX, N.S.—CHAS. A. PENDER, LTD. AND CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES AND OTHER TRANSPORT WORKERS, DIVISION NO. 235.

Agreement to be in effect October 28, 1943, to January 28, 1944, and until thirty days' notice. This agreement is similar to the one summarized above for the Ocean View Bus Service with the exception that there is no provision for vacations.

Transportation and Public Utilities: Water Transportation

EASTERN COAST OF CANADA.—PARK STEAMSHIP COMPANY LTD. AND THE CANADIAN SEAMEN'S UNION.

Agreement to be in effect from November 19, 1943, to September 30, 1944, and thereafter from year to year until 30 days' notice. The Company recognizes the union as the bargaining agency for the unlicensed personnel employed.

Hours: for deck department 8 on week days, 4 on Saturdays, when in port. All work performed in excess of 8 hours per day while at sea is payable at 55 cents for carpenters, bosun, chief steward, etc.; 50 cents for ableseamen, oilers, firemen, trimmers, etc., and 30 cents for ordinary seamen, deck boys and galley boys. These rates are subject to the approval of the War Labour Board. Sailors at sea are divided into three watches which are kept on duty continuously. A wage scale forms part of the agreement. It became effective September 1, 1943. Monthly wage rates for some classes: bosun $77.50, ableseamen $70, ordinary seamen $50, chief steward $115, oiler $73, fireman $72.50, trimmer $67.50, first cook $102, second cook $59.50, carpenter $84. There is, in addition, a war risk bonus of $44.50 per month and a cost of living bonus of $18.42 per month. An additional fee of $1.50 per hour is paid to those required to work explosives. Arrangement is made for the settlement of disputes.

Collective Agreement Act, Quebec

Recent Proceedings under the Act

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable to the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the LABOUR GAZETTE, January, 1943, page 86. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

Recent proceedings under the act include the amendment of four agreements and the correction of another, all of which are noted below. Requests for the amendment of agreements for barbers and hairdressers at Montreal and the sheet metal industry at Montreal were published in the *Quebec Official Gazette,* January 22. Requests for the amendment of agreements for men's and boys' hat and cap industry for the Province, shoe manufacturing industry throughout the Province, printing trades at Quebec, plumbers at Three Rivers and barbers and hairdressers at Three Rivers were gazetted January 29. A request for the extension of a new agreement for the lithographic industry at Montreal was gazetted January 15; a request for a new agreement for ornamental iron and bronze workers at Montreal was published in the *Quebec Official Gazette,* January 22; and a request for a new agreement for retail food stores at Quebec was gazetted January 29.

In addition, Orders in Council were published in the *Quebec Official Gazette* during January approving or amending the constitution and by-laws of certain joint committees and others approving the levy of assessment on the parties.

Manufacturing: Pulp, Paper and Paper Products

PAPER BOX (CORRUGATED PAPER) MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated December 24, and gazetted January 8, and corrected in the next issue amends the previous Orders in Council for this industry (L.G., April, 1942, p. 483, Sept., p. 1097; Jan., 1943, p. 88, April, p. 490, Nov., p. 1529). The minimum wage rate for certain classes of female operators with six months experience is raised from 28 to 35 cents.

Construction: Buildings and Structures

BUILDING TRADES, QUEBEC CITY AND DISTRICT

An Order in Council dated January 8, and gazetted January 15, amends the previous Orders in Council for this industry (L.G., August, 1941, p. 1009; Sept., 1942, p. 1097, Oct., p. 1209; Feb., 1943, p. 220) by excluding the county of Laviolette (part of which is in the judicial district of Quebec) from the territorial jurisdiction.

BUILDING TRADES, HULL

An Order in Council dated January 27, and published January 29, amends the previous Orders in Council for this trade (L.G., July, 1938, p. 798, Nov., p. 1300; Mar., 1939, p. 335, Oct., p. 1066, Dec., p. 1280; Feb., 1940, p. 172; Mar., 1941, p. 334, Aug., p. 1012, Dec., p. 1573; Sept., 1942, p. 1097; Mar., 1943, p. 341, May, p. 639) by changing the official name of the Parity Committee to "The Building Trades Joint Committee."

Trade

RETAIL STORES, BAKERIES, HOTELS, ETC., MAGOG

An Order in Council, dated January 27, and gazetted January 29, amends the last Order in Council for this trade (L.G., Aug., 1943, p. 1131) by inserting hardware establishments, as one of those establishments which close on Wednesday at noon. Other references for these workers are L.G., Nov., 1940, p. 1203; Mar., 1941, p. 335; Aug., 1942, p. 978.

Service: Business and Personal

BARBERS AND HAIRDRESSERS, ST. HYACINTHE

An Order in Council, dated December 24, and gazetted January 8, amends the previous Orders in Council (L.G., Oct., 1941, p. 1426; Sept., 1942, p. 1098; April, 1943, p. 490, May, p. 639, Sept., p. 1253) by making a slight change in the hours.

Industrial Standards Acts, Etc.

Schedule of Wages and Hours Recently Approved by Provincial Orders in Council in Saskatchewan and Alberta

IN six provinces—Ontario, Alberta, Nova Scotia, Saskatchewan, New Brunswick and Manitoba—legislation provides that, following a petition from representatives of employers or employees in any (or specified) industries, the provincial Minister charged with the administration of the Act may himself, or through a government official delegated by him, call a conference of representatives of employers and employees. This conference is for the purpose of investigating and considering the conditions of labour in the industry and of negotiating minimum rates of wages and maximum hours of work. A schedule of wages and hours of labour drawn up at such a conference, if the Minister considers that it has been agreed to by a proper and sufficient representation of employers and employees, may on his recommendation be made binding by Order in Council in all the zones designated by the Minister. The Minister may also establish an advisory committee for every zone to which a schedule applies to assist in carrying out the provisions of the Act and the regulations. References to the summaries of these Acts and of amendments to them are given in the LABOUR GAZETTE, October, 1940, page 1077. Schedules of wages and hours recently made binding by Orders in Council under these Acts are summarized below.

Saskatchewan

Service: Business and Personal

BARBERS, MOOSE JAW

An Order in Council, approved October 29, and gazetted November 15, shortens hours by 3 hours a week by providing that shops close at 6 p.m. on Saturdays. This is an amendment to the schedule summarized in the LABOUR GAZETTE, January, 1940, p. 71 and May, 1942, p. 632.

HAIRDRESSERS, ETC., MOOSE JAW

An Order in Council, approved October 29, and gazetted November 15, shortens the hours by 2 hours a week by providing that shops close at 6 p.m. on Saturdays. The weekly hours are now 43 per week. This is an amendment to the schedule summarized in the LABOUR GAZETTE, August, 1941, p. 1015.

Alberta

Service: Business and Personal

BARBERS, MEDICINE HAT

An Order in Council, dated December 23, and gazetted December 31, makes binding the terms of a new schedule for the barbering industry in Medicine Hat. Hours are limited to 10 per day (9 per day for female employees) and 48 hours per week. Minimum wages: for full time work, male employees to receive 60 per cent of takings per week over $23, with a guarantee of $15 per week; for female employees on full time work, 60 per cent of takings over $22, with a guarantee of $14 per week; persons on an hourly basis to receive a minimum of 40 cents per hour. Regulations for apprentices are specified including a minimum wage of 60 per cent of total takings with a guarantee of $8 per week. Minimum charges are set for services.

Trade Union Membership in Britain

TOTALS compiled by the Ministry of Labour and National Service in Great Britain and published in the *Ministry of Labour Gazette* indicate that the membership in trade unions in Great Britain and Northern Ireland at the end of 1942 was approximately 7,781,000. This was an increase of nearly 690,000 or 9·7 per cent as compared with the end of the previous year.

These figures cover the total membership—including members in branches overseas—of all such organizations, so far as known to the Department, whose headquarters are situated in Great Britain or Northern Ireland. Members serving with the Armed Services are also included in the totals. There is some duplication in the total membership since persons who are members of more than one union are counted more than once in the totals. The extent of this duplication is probably about 40,000.

Comparative Membership, 1941 and 1942.—The number of unions in 1942 as compared with 1941 was 976 and 983 respectively. In all, 12 unions with a total membership of 1,700 at the end of 1941 were reported as having been dissolved in 1942; while ten unions with an aggregate membership of 9,100 at the end of 1941 were amalgamated with other unions. On the other hand, 15 new unions were formed in 1942 with an aggregate membership of 7,000. Of the total of 976 unions at the end of 1942, there were 21 with their headquarters in Northern Ireland.

Sex Distribution of Membership.—The number of males at the end of 1942 was 6,113,000, showing an increase of 394,000 or 6·9 per cent as compared with the previous year, and the number of females was 1,668,000, an increase of 294,000 or 21·4 per cent. The largest increase in male membership during 1942 occurred in the unions in the engineering and metal group of industries and in the general labour unions. Female membership showed the largest increase in the general labour unions.

Federation of Trade Unions.—At the end of 1942 the number of federations of trade unions in Great Britain and Northern Ireland was 57 with an approximate gross total membership of 2,974,000. This does not include certain small affiliated unions, which have their head offices overseas. In many instances trade unions or branches of trade unions are affiliated to more than one federation and a large number of trade union members, therefore, are counted more than once in the gross membership. The net federated membership is stated to have been approximately 2,546,000 at the end of 1942, an increase of about 90,000 over 1941. The number of unions which were affiliated to one or more trade union federations in respect of either the whole or a part of their membership was 515 at the end of 1942 as compared with 522 at the end of 1941.

War Emergency Training

Progress of Enrolment—Reduction in Industrial Training—Military Technical Training Facilities to be Diverted to Rehabilitation Training

THE War Emergency Training Program provides the following types of training:—

(1) Pre-employment classes in vocational schools for men and women about to enter war industry;
(2) Part-time classes, principally for the upgrading of persons already employed;
(3) Training in plant schools;
(4) Special classes for foremen and supervisors;
(5) Training of enlisted men as tradesmen for the Army, Navy and R.C.A.F.;
(6) Rehabilitation training for persons discharged from the Armed Forces in the present war and referred for training by the Department of Pensions and National Health;
(7) Assistance to certain categories of university students whose services are needed in connection with the war effort.

War Emergency Training is carried on under agreements made by the Dominion Government with each province. The administration is decentralized with a Regional Director in each province. Training is given in technical schools, special training centres and in industrial plants. The provinces and municipalities supply the shop facilities of the technical schools to the Program free of charge. Provincial Governments also pay certain administrative costs and share with the Dominion in the cost of machinery and equipment purchased. All other costs are paid by the Dominion with funds from the War Appropriation.

Progress of Enrolment

From the beginning of the program up to December 31, 1943, the gross enrolment in all types of projects has been as follows:

Training in Industry	197,839
Army	37,745
Navy	6,712
R.C.A.F.	60,638
Rehabilitation (Discharged persons from the forces)	2,269
Students	5,143
Total	310,346

Industrial Training

December witnessed a very sharp reduction in the enrolment in full-time pre-employment classes, and at the end of the month an all-time low of 1,653 were registered, of whom approximately 75 per cent were in the provinces of Ontario and Quebec. There has been a corresponding reduction in the enrolment in part-time classes and also in the plant schools. Many of the companies operating plant schools have now met their training requirements and the plant schools have been discontinued. The reports for the month indicate a comparatively small number placed in employment. Over two-thirds of these came from the plant schools.

Agricultural Courses

The courses to train men and women in cheese-making, dairying and creamery work have proven most successful and the enrolment has been so heavy that practically all the classes are operating to capacity. Three classes have been held in Ontario and others are in operation in the three Prairie Provinces and in the Province of Quebec.

New classes were started about the beginning of February in the three Prairie Provinces to train persons for egg grading. The trainees are sponsored by prospective employers and the classes are being carried on in co-operation with the Dominion and Provincial Departments of Agriculture. Personnel from the Dominion Department of Agriculture are acting as instructors.

Rehabilitation Training

The enrolment of persons discharged from the forces on December 31 was 456, which represents the highest enrolment up to the present. This type of training is increasing constantly. In order to meet the need, additional field representatives have been taken on in several provinces whose duties include working with the District Rehabilitation Boards in the selection of proper trainees and surveying training opportunities among employers in their respective districts.

Military Classes

From the beginning of January the R.C.A.F. discontinued any new enrolments in the great majority of technical trades in War Emergency Schools, and it is expected that training of this kind will cease entirely about the middle of the year. As training facilities become vacant they will be adapted to rehabilitation training.

The schools for pre-aircrew personnel will continue as usual.

There has also been some reduction in the classes conducted for the Army tradesmen, but the classes for the young soldiers will continue as usual.

The Navy has reduced the enrolment in some of the Ontario naval tradesmen's classes.

A meeting of the Vocational Training Advisory Council was held in Ottawa on February 22 attended by representatives from various provinces. It was followed by the annual conference of the Regional Directors of War Emergency Training. The various aspects of the Training Program for the past year were reviewed, and recommendations are being made to the Minister of Labour in connection with training plans for the post-war period.

Plan for Apprenticeship Training in Canadian Industry

Federal Aid to Provinces Authorized by Order in Council

A Dominion-provincial program to foster the development of apprenticeship training in Canada is made possible under the terms of a recent Order in Council (P.C. 8993, Jan. 21, 1944). The order authorizes the federal Department of Labour to enter into agreements with the provinces and to render financial assistance to approved plans for apprenticeship training.

It is considered that a supervised and well-regulated plan of apprenticeship would constitute the best method of insuring a permanent and adequate supply of skilled tradesmen in Canadian industries, and in the building and construction industry in particular, the order declares.

The value of apprenticeship projects in post-war planning is also emphasized in the order, which states that "apprenticeship is one of the most useful means of providing training to persons discharged from the armed forces and also to many workers from munition plants to fit them for permanent civilian occupation."

Agreements with Provinces Authorized

Apprenticeship training, the order points out, is normally under the constitutional jurisdiction of the provinces, the majority of which at present have no provincial apprenticeship act, while existing provincial acts are operative only in a very limited number of occupations. The present order will enable such provinces as desire to participate to receive financial help from the Dominion Government. Agreements may be made for periods up to ten years.

The planned Dominion assistance is designed to supplement regular industrial apprenticeship training. Apprentices, while working at industrial trades, will be subject to working conditions and wage rates determined by the province, and will be paid by the employer in the usual way.

The agreement with each province will require that where the province has not an apprenticeship act or its equivalent, the provincial government shall undertake to bring about such legislation, to provide for the administration of plans approved under the agreement.

While the Dominion-provincial agreements will provide the basic principles under which apprenticeship training is to receive government aid, a good deal of discretion will be left to the province to settle the details in consultation with trade unions and employers in the various industries.

Definition of "Apprentice"

An apprentice, who may be either a man or woman, is to be defined in the agreements as follows:—

"An apprentice means a person at least 16 years of age who enters into a written agreement with an employer to learn a skilled trade requiring a minimum of 4,000 hours of reasonably continuous employment and which provides a program of practical experience and related technical instruction for such person."

All apprentices in any approved plan are to be registered and to be under provincial supervision.

Apprenticeship may be in trades designated by the act or under a collective agreement between an employer and a trade union or in private plans carried on by industry if such plans are approved by the province and the provincial apprenticeship committee.

Apprenticeship committees would be set up by provinces which participated in the scheme. These committees would be composed of an equal number of employers and workers together with representatives of the provincial Departments of Labour and Education.

Conditions of Apprenticeship

The Dominion order outlines certain standards for apprenticeship plans, dealing with wages, conditions of work, etc. It stipulates that plans must provide for the following, in order to be approved by provinces:—

1. A written indenture with an agreed scale of wages with increases at fixed intervals. Where rates of wages of apprentices have been determined by a collective labour agreement, such rates shall apply provided such rates are not less than the minimum rates which may have been or may be established by law.
2. A definite length of apprenticeship, at least 4,000 hours, with time credits for

any persons with previous experience in the trade or trade training in a vocational school, or with previous trade experience or trade training in the armed services.

3. Provision for the cancellation of an apprenticeship contract for cause.
4. Provision for the transfer of apprentices to another employer for cause.
5. Apprentices may be indentured to an individual employer, an industry, or to any other responsible organization.
6. A probationary period of at least three months.
7. Equal representation of employers and workers on any apprenticeship committee, whether for trades designated under the act or for any plan registered under the act.
8. A definite program with provision for instruction in related technical subjects.
9. The inspection of training by representatives of the province.
10. Periodic trade tests and a final trade examination prior to granting improver's or journeymen's status together with the issuance of a certificate or diploma.
11. The determination of the ratio of apprentices to journeymen by the province after consultation with employers and workers and in accordance with the estimated future requirements of each trade.
12. The minimum age for entry to apprenticeship to be 16 years.

Financial Arrangements

As the scheme is intended to assist both ex-members of the armed forces and civilians, the order makes financial arrangements in regard to both classes. In the case of ex-members of the forces, the Dominion will bear the entire government costs in the case of those whose apprentice training has been approved by the Minister of Pensions and National Health. In the case of civilians, government costs will be shared on a fifty-fifty basis between the Dominion and the provinces. Government costs will cover the salaries of instructors, materials, supplies and hand tools for the part-time and full-time training classes which will be supplementary to the training received by the apprentice at actual work.

For the fiscal year 1944-45 the Dominion fund available for distribution among the provinces is not to exceed $250,000, but for later fiscal years the sum is to be raised to $1,000,000 a year.

Responsibility of Industry

It is emphasized in the order that the establishment and operation of apprenticeship is "primarily the responsibility of industry through employers and trade unions. This order is not to be interpreted as relieving industry of such responsibility but is designed only as a measure of governmental assistance under which all normal rights of employers and trade unions are safeguarded."

In commenting upon the order the Honourable Humphrey Mitchell, Minister of Labour declared: "Government supervision of apprenticeship plans has been on a much smaller scale in Canada than in other other British countries or in other parts of the world. It is important for the welfare of our industry as a whole, that a sufficient number of our young people in the post-war world should be given trade training of various sorts, so that they may be among the most highly skilled workers in the world. The present Order in Council is intended by the Dominion Government as a step in that direction. We know that if suitable trade training is made available to our young people, it will mean a good deal to those who are trained, and also to the future of this country".

While the Dominion for several years gave financial assistance to the provinces to promote the development of technical schools, and in late years, to carry on short courses of occupational training for young people, the new measure is the first Dominion assistance toward development of formal trade apprenticeship.

After pointing out that the Vocational Training Advisory Council had gone carefully over and had approved of the new schemes before the Order in Council was passed, the Minister of Labour added: "This should ensure that the scheme meets with the approval of both the trade unions and employers, as the leading national trade union bodies and employers' organizations have direct representation on the Council."

Activities of the Unemployment Insurance Commission

Increase in Claims for Benefit—Standing of Insurance Fund

THE number of claims for Unemployment Insurance benefit was larger in December than in any previous month. During December, 6,562 claims were filed, compared with 1,475 in October, 2,896 in November of this year and 3,337 in December of last year. The previous high in the number of claims filed in a month was reached in March, 1943, when 5,046 were registered. (*See* Table 2.)

As stated in last month's report, a seasonal rise in the number of claims is expected during the winter months, starting in November and reaching a peak in March. Thus, each province shows an increase in December over November. There is, however, a notable difference in the Eastern as compared with the Western Provinces. The Western Provinces (Manitoba, Saskatchewan, Alberta and British Columbia) recorded about the same number of claims this December as last December, whereas Ontario, Quebec and the Maritimes showed an increase over last December of about 150 per cent. This would indicate that whereas the Western Provinces are experiencing the normal seasonal increase in claims the increase in the Eastern Provinces is due to more than seasonal factors.

A similar increase is evident in the number of persons who signed the live unemployment register in the last six working days of December: 6,216, of whom 4,893 were male and 1,323 female. In the last week of November, 2,436 persons signed the "live register". Each person who is claiming benefit or to whom benefit payments are being made must call at the local office once a week and report on his unemployment during the previous week. By taking a count of those who sign the live unemployment register in a week a figure is obtained which represents all those who are currently claimants (including beneficiaries).

Number of Persons Receiving Benefit—Amount of Benefit Paid

During December, 2,226 persons received benefit, being paid a total of $52,600 for 29,160 unemployed days. This compares with 1,456 persons who received $37,166 for 20,004 days in December, 1942. Thus, in the present month the average duration of the unemployment compensated was 13·1 days as against 13·7 days in December, 1942. The average amount paid per beneficiary was $23.63 in December, 1943, compared with $25.53 in December, 1942, and the average amount paid per compensated day of unemployment was $1.80 in December, 1943, and $1.86 in December, 1942.

Tables 2 to 5 present data respecting the number of claims filed during the month and their disposition, the chief reasons for non-entitlement to benefit, number of beneficiaries, number of days' benefit paid and amount of benefit paid.

Insurance Registration

Reports received from Local Offices of the Unemployment Insurance Commission showed that at February 1, 1944, 135,462 employers with insured employees were registered, and 3,098,032 employees were issued with insurance books.

For Unemployment Insurance purposes, an employer with branch establishments is permitted to register all branches under the same license number or under separate numbers. The total number of employers mentioned above, therefore, includes all establishments registered under separate licence numbers.

Contributions in respect of services in the Armed Forces	48,222 18
Miscellaneous	1,732 22
	$ 51,387 18

Employment and Unemployment

Summary

INFORMATION in this section regarding the employment situation in Canada is based upon reports from the following sources:

The employment situation at the beginning of December, as reported by employers.—The Dominion Bureau of Statistics receives each month reports from firms employing fifteen or more employees. These firms represent practically all industries except agriculture, fishing, hunting and highly specialized business operations.

The Bureau has been receiving these reports for many years; hence, although the figures given show considerably less than the total number of persons employed in Canada, they give a valid picture of the *trend* of employment in Canada over a period of years.

Returns received from 14,161 co-operating firms indicated further increases in employment and payrolls. At the beginning of December, their staffs aggregated 1,916,688 persons, compared with 1,898,118 reported on November 1.

The index number of employment (based on the 1926 average as 100) was 190·6 as compared with 188·7 in the preceding month, and was 4·1 per cent higher than at December 1, 1942.

Information is also embodied in this article concerning payrolls, which is furnished each month by the co-operating firms. The per capita average weekly wage of $31.59 showed a slight decrease from that of $31.60 at the beginning of November, while at December 1, 1942, the figure was $30.06.

Report on employment conditions for January.—A summary of employment conditions for the month of January has been prepared by the Research and Statistics Branch, Department of Labour, on the basis of reports received from Local Employment and Selective Service Offices across Canada. These reports describe employment conditions in the Maritime, Quebec, Ontario, Prairie and Pacific Regions.

Applications for employment; vacancies, and placements, December, 1943.—From the Employment and Selective Service Offices of the Unemployment Insurance Commission come reports showing the number of positions reported as vacant across the Dominion, together with the number of applications for employment and the number of placements effected.

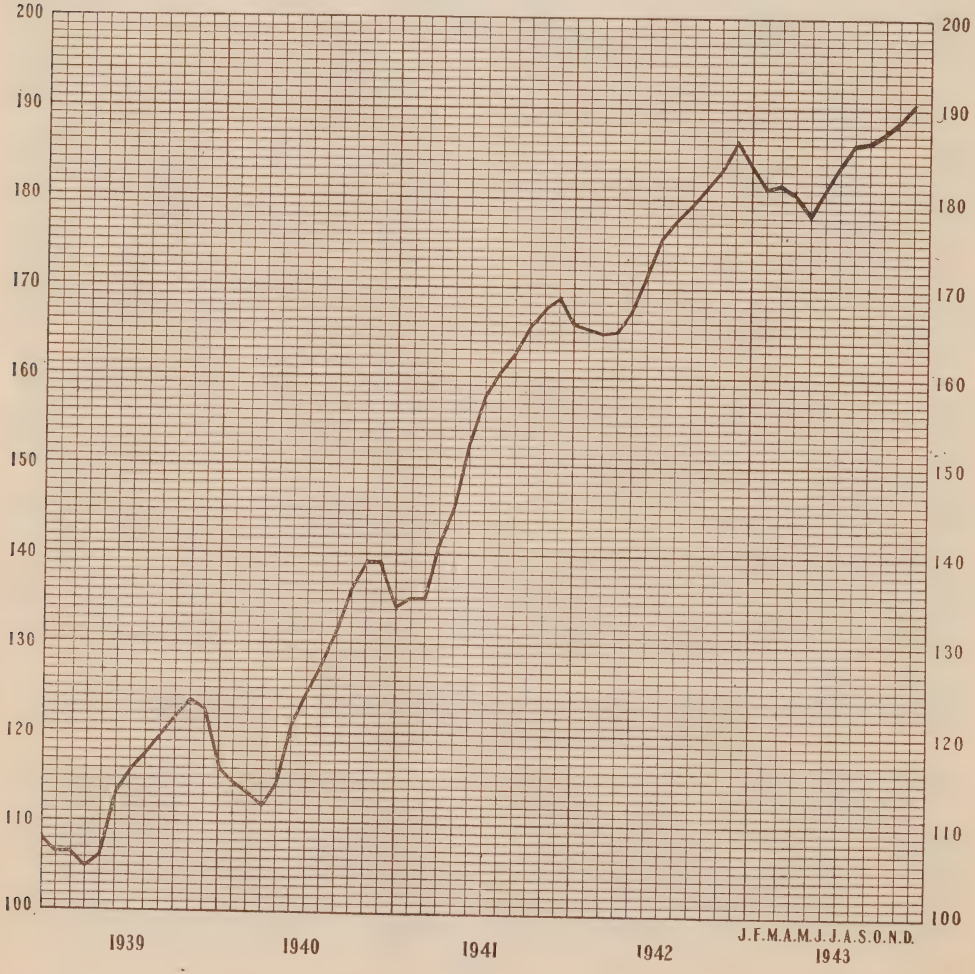
Reports received during the four weeks December 3, to December 30, 1943, showed moderate declines both when compared with the previous period of five weeks duration ending December 2, and with the month of December, 1942, this comparison being based on the average number of placements effected daily during the periods under review. Vacancies during the four week period ending December 30, 1943, numbered 148,618, applications 145,425 and placements in regular and casual employment, 114,019.

Unemployment in Trade Unions.—The Department of Labour receives reports from the local trade unions throughout Canada, showing the number of their members who were unemployed during the period under review.

At the beginning of January, the percentage of unemployment among trade unions was ·8 as compared with percentages of ·6 in December and 1·2 in January, 1943. The January figure was based on returns received from 2,345 labour organizations, having a combined membership of 482,812 persons.

The Employment Situation at the Beginning of December, 1943, as Reported by Employers

INDUSTRIAL employment at the beginning of December showed further expansion, continuing the steadily upward movement indicated from May 1. The increase was the largest reported since the beginning of August, but was neverthless substantially less than that at December 1, 1942; according to pre-war experience, however, it was contra-seasonal in character. The Dominion Bureau of Statistics tabulated data from 14,161 employers with a combined working force of 1,916,688, as compared with 1,898,118 at November 1. The weekly payrolls disbursed aggregated $60,541,888, as compared with $59,979,871 at



the beginning of November. There was thus a rise of one per cent in the number of employees, accompanied by that of 0·9 per cent in the reported weekly earnings. The general per capita average showed an insignificant change, declining from $31.60 at November 1, to $31.59 at the date under review. These two are the highest in the payroll record, dating from June 1, 1941.

The general index number of employment at December 1, 1943, reached a new maximum, at 190·6, as compared with 188·7 in the preceding month, and 186·5 at December 1, 1942. The 1926 average equals 100 in calculating these indexes. Since the increase at the date under review was contrary to the usual seasonal tendency, the seasonally-adjusted index showed a further rise, standing at 186·1, as compared with 180·6 in the preceding report. The general index of employment exceeded by 2·2 per cent that at the beginning of December in 1942, since when the index number of payrolls has risen by 6·5 per cent.

The greatest advance at December 1, 1943, was in logging, which reported an additional 17,267 persons, and in trade, in which the increase amounted to 8,287. The expansion in these industries exceeded the average at December 1. There was also an important gain in employment from November 1 in mining, while smaller advances were indicated in manufacturing and transportation. The slight gain in manufacturing is contra-seasonal; although it repeats the upward movement

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

noted at December 1 in each year since the outbreak of war, it was on a decidedly smaller scale than in the early winter of 1941 or 1942. Within this group, the greatest increases were recorded in animal food and textile factories, while moderate improvement was also shown in rubber, electrical apparatus, iron and steel and some other plants. The advance in iron and steel, like that at November 1, was very much smaller than in almost any other month since the outbreak of war.

For the second month in succession, there was a slight slackening in employment in the production of durable goods as a whole. The decline of some 700 at December 1 follows that of approximately 500 in the preceding month; these two, with the loss at May 1, 1943, and those at January 1, 1940 and 1941, constitute the only interruptions in the steadily upward movement which has characterized this group since August 1, 1939. The contra-seasonal gain of nearly 2,100 persons in the manufacture of non-durable goods at the date under review is particularly interesting, possibly an early indication of a change in the industrial distribution which will assume increasing importance in coming months.

Payrolls

The aggregate payroll of $60,541,888, already mentioned as having been disbursed in weekly salaries and wages at December 1 by the co-operating employers, was 0·9 per cent higher than the amount paid at the beginning of November. The advance continues the generally upward trend shown by payrolls since the institution of such statistics in the spring of 1941. The only exceptions in these months were at the beginning of January in 1942 and 1943, when the observance of the Christmas and New Year's holidays lowered the reported aggregates, and at May 1, 1943, following the Easter holidays. The weekly per capita earnings showed little change at the date under review, averaging $31.59, as compared with $31.60 at November 1; at the beginning of December, 1942, the figure was $30.06, while that at December 1, 1941, was $27.32.

The latest figures include the higher cost-of-living bonus[1] authorized for the first payroll period beginning on or after November 15, 1943. However, in the case of the all-industries average, other factors tended to offset the effect of this increase. Among these may be mentioned the fact that extremely large proportions of the persons added to the numbers in recorded employment at the date under review were reported in logging and trade, in both of which the weekly averages throughout the Dominion were below those in many other industries. In the case of trade, many of the persons taken on at December 1 were no doubt part-time workers.

Including the data received from financial institutions, the latest survey of employment and payrolls shows that the number of persons in recorded employment was 1,981,607, as compared with 1,962,861 at the beginning of November. The amounts received as weekly earnings by these persons were stated as $62,582,595 paid on or about December 1, and $62,014,450 paid on or about November 1. The per capita average for the nine main industries, including finance, was $31.58, as compared with $31.59 at the beginning of November, and $30.08 at December 1, 1942.

Table II summarizes the latest statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas and the eight leading industrial cities, and gives comparisons as at November 1, 1943, and December 1, 1942.

The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100. To facilitate comparisons of the trends of employment and payrolls, the indexes of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100. The table shows that in the period for which data are available, there has been an increase of 24·7 per cent in the number of persons in recorded employment in the eight leading industrial groups, while the weekly earnings of these persons have risen by 53·4 per cent. Including finance, the gain in employment from June 1, 1941, to December 1, 1943, amounted to 23·9 per cent, and that in payrolls to 51·9 per cent.

Between December 1, 1942, and December 1, 1943, there has been an increase in employment in the eight leading industries amounting to 2·2 per cent, accompanied by that of 6½ per cent in the weekly payrolls. The reasons previously given for the much greater rise in the latter than in employment may again be stated:—(1) the growing concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there is a considerable amount of overtime work, (2) the extension of the system of paying a cost-of-living bonus to the majority of workers; the rates at which this

[1] The National War Labour Board issued a General Order on Nov. 3, 1943, authorizing an increase in the cost-of-living bonus commencing with the first payroll period on or after November 15, 1943. In the case of adult male employees, and of other employees receiving weekly wage rates of $25 or more per week, the amount of the weekly increase was to be 35 cents; for male employees less than 21 years of age and female employees, whose weekly wage rates are less than $25 per week, the increase authorized was 1·4 per cent of their weekly wage rates.

allowance has been calculated have been enlarged on more than one occasion since its institution, and (3) the progressive up-grading of employees as they gain experience in their work.

For obvious reasons, the growth in employment and payrolls in manufacturing in the period of observation has greatly exceeded that in the non-manufacturing industries; the index of employment in the former has risen by 37·5 per cent from June 1, 1941, and that of payrolls, by 74 per cent. The weekly earnings of the typical individual engaged in factory work have increased by 28·4 per cent, while the all-industries' average has risen by 25·1 per cent. The factors given above as influencing the all-industries trends operate with greater force in the case of the manufacturing group.

Even more striking than the expansion in the number of workers and the payrolls in manufacturing as a whole in recent months, is that which has taken place in plants producing durable goods, in which the index of employment has risen by 60 per cent, and that of payrolls by 106·4 per cent from June 1, 1941, to the beginning of December, 1943. Despite curtailment in certain lines in the non-durable goods division resulting from shortages of labour and materials, the index number of employment in this group was 16·9 per cent above that indicated at June 1, 1941, while the increases in the payrolls amounted to 40·1 per cent.

In regard to the marked variations shown in the average earnings of workers in the different industrial classes, it must be borne in mind that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or overtime may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in different industries is obviously an exceedingly important factor.

Employment and Payrolls by Industries

Manufacturing.—Activity in manufacturing establishments showed a minor increase at the beginning of December. The gain was slightly smaller than the loss which had been noted

Dec. 1	124·7	153·4	31·59	137·5	174·0	32·84

at November 1; although the latest index, at 231·0, was a little higher than that of 230·8 indicated in the last report, it was fractionally lower than the all-time maximum of 231·3 at October 1, 1943. It was, however, a few points higher than the December 1, 1942, index of 221·7. An advance at December 1 is contrary to the normal seasonal movement according to pre-war standards. However, the trend at that date since the outbreak of hostilities has invariably been favourable; the latest gain was decidedly less than that noted at the beginning of December in either 1942 or 1941, although it exceeded the rise at the same date in 1940 or 1939. The seasonally-adjusted index advanced from 228·8 at November 1, 1943, to 233·6 at December 1.

The working forces of the 7,867 manufacturers furnishing statistics aggregated 1,206,705; as compared with their staffs of 1,205,630 at November 1, there was an increase of 1,075 persons, or 0·1 per cent. The weekly payrolls, at $39,627,213, were higher by $294,143, or 0·7 per cent. The weekly per capita average at December 1 reached a new high, standing at $32.84, as compared with $32.62 at November

[1] This classification comprises the following:—Iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

1, 1943, and $31.17 at December 1, 1942. In 1941, the December 1 average had been $28.15.

The largest advances at the date under review were in animal food and textile plants, which absorbed over 1,400 and 1,000 additional workers, respectively. Rubber, tobacco, chemical, non-ferrous metal, electrical apparatus and clay, glass and stone products also afforded rather more employment. Seasonal curtailment of operations continued to lower employment in vegetable food and lumber factories. Pulp and paper mills were also quieter.

Based on the weekly salaries and wages disbursed by the reporting manufacturers at June 1, 1941, as 100, the index number of payrolls at December 1, 1943, was 174·0, as compared with 172·8 at the beginning of November, 1943, and 159·7 at December 1, 1942. There was thus an increase of nine per cent during the 12 months, which accompanied that of 4·2 per cent in the index number of employment. The reasons for the disparity in the rates of increase in employment and payrolls have already been stated. The increase in the cost-of-living bonus, payable in the first pay period after November 15, 1943, is reflected to some extent in the latest figures for manufacturing. As has previously been pointed out, the upgrading of employees as they acquire experience is of outstanding importance in manufacturing, tending to counteract the effect of the large-scale dilution of labour consequent upon the shortage of workers which has become increasingly acute with the development of the war-effort. The changing industrial distribution of wage-earners in recorded employment has also contributed materially to the relatively greater rise in payrolls, there being a growing proportion of workers in the more highly-paid heavy industries. At December 1, 1943, such industries provided work for 57·5 per cent of all those engaged in manufacturing, exclusive of electric light and power, while at June 1, 1941, the proportion was 49·7 per cent. The effect of this change in distribution is emphasized by the fact that the latest per capita weekly average earnings of persons engaged in these classes stood at $36.12, an amount which was higher by $8.33 than at June 1, 1941,

Note.—The "Relative weight", as given just above, shows the proportion of employees in the indicated area to the total number of all employees reported in Canada by the firms making returns at the date under review.

while in the light manufacturing industries, the December 1 average, standing at $28.28, has risen by $4.98 in the 30 months.

During the period for which statistics of payrolls are available, there have been especially noteworthy increases in the salaries and wages reported in the non-ferrous metal, chemical, iron and steel, miscellaneous manufactured products and electrical apparatus and equipment industries, in all of which the volume of war work has been particularly great. These gains have been associated with important, though relatively smaller advances in employment. In practically every case, the per capita average weekly earnings in the various branches of manufacturing are higher

TABLE IV—INDEX NUMBERS OF EMPLOYMENT BY INDUSTRIES (AVERAGE 1926=100)

(The latest figures are subject to revision)

Industries	[1]Relative Weight	Nov. 1 1943	Oct. 1 1943	Nov. 1 1942

[1]The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

than they were at the same date of 1941 or 1942.

Logging.—Seasonal activity in bush operations resulted in substantial additions to the personnel of logging camps, 542 of which reported 71,911 employees, compared with 54,644 at November 1. The gain of 31·6 per cent was larger than that at December 1, 1942, and also rather exceeded the average indicated at that date over a period of years. The index of employment, at 240·2, was higher by 1·7 per cent than at December 1, 1942, but was otherwise the lowest for December since the outbreak of hostilities. Over the 12 months, there was a rise of 12·3 per cent in the index of weekly payrolls. The salaries and wages reported at the latest date amounted to $1,752,-167, as compared with $1,392,397 at the beginning of November, 1943.

The per capita average earnings were lowered from $25.48 in the last return to $24.37 at the date under review; the decline is associated with the large increase in the number employed. The average at December 1, 1942, was $21.07. In considering the figures of aggregate and per capita earnings in logging, it must be recalled that they do not include the value of board and lodging, frequently a part of the remuneration of workers engaged in bush operations. The high labour turnover in many camps is also an important factor in lowering the reported earnings. These vary to a significant extent, the average in British Columbia being decidedly higher than in any other province.

Mining.—Coal mining was brisker at December 1, 1943, and there were also gains in employment in the extraction of other non-metallic minerals and of metallic ores. The 478 operators whose returns were tabulated had 73,730 employees, 1,250 more than in the preceding month. The index in the mining group at December 1 was 158·1, being 2·8 per cent below that of 162·7 at the same date in 1942. In the 12 months, the index of payrolls has fractionally risen. The salaries and wages disbursed at the beginning of December aggregated $2,755,509, showing an increase of 2·5 per cent over the November 1 payments. As a result of this disparity in employment and payrolls, the per capita weekly earnings were higher, averaging $37.37, as compared with $37.09 in the preceding period of observation. The December 1, 1942, figure had been $35.83.

Communications.—Employment in the telegraph and telephone divisions, showed moderate seasonal reductions which approximated the average in size. A personnel of 27,950 was reported by the employers furnishing data, as compared with 28,121 at November 1. The weekly payrolls were also rather lower, at $844,052, as against $844,945 at November 1. The per capita average rose from $30.05 at that date to $30.20 at the first of December; the December 1, 1942, average had been $29.35. Based on the 1926 average as 100, the latest index of employment was 104·6. This was fractionally higher than that of 104·0 a year earlier, while there was a gain of 3·5 per cent in the index of payrolls in the same comparison.

Transportation.—The trend in transportation was upward at the beginning of December, when 596 firms and branches reported 151,225 employees, or 338 more than at November 1. The increase (contra-seasonal in character), took place in local transportation; there was little change in steam railway operation, while the shipping and stevedoring division was slacker. The index, at 119·7, was the highest for December in any year of the record, being 9·4 per cent above that of 109·4 at December 1, 1942. The payrolls, at $5,417,404, exceeded those of $5,390,262 disbursed in the preceding period of observation. The average per capita weekly earnings rose from $35.72 at November 1, to $35.82 at the date under review. The December 1, 1942, figure had been $35.37.

Construction and Maintenance.—There was seasonal curtailment in this division, in which the decline was decidedly below average for December 1, according to the experience of the years since 1920; it was, however, considerably above the loss at December 1, 1942. Building, highway and railway construction and maintenance reported lessened activity, the greatest contraction being in the first-named. Data were received from 1,568 employers with a force of 161,862 persons, as compared with 170,673 at the beginning of November. The weekly salaries and wages paid by the co-operating contractors amounted to $4,809,930, while the November 1 aggregate had been $5,153,287. Partly as a result of reduced overtime work, there was also a falling off in the per capita average earnings, which stood at $29.72 at December 1, as compared with $30.19 at the beginning of November. The December 1, 1942, figure was $28.25.

The December 1 index for construction, at 128·3, was lower than that of 151·3 at the beginning of December of 1942. This decrease of 15·2 per cent was accompanied by that of 10·8 per cent in the reported payrolls.

Services.—Further seasonal reductions were indicated in the service division; the losses, which were moderate, took place in hotels and restaurants, while in laundries and dry-

cleaning establishments there was a minor gain. Six hundred and fifty-seven employers showed a staff of 44,315 men and women, 665 fewer than at November 1. The shrinkage was rather above average for December 1. The salaries and wages distributed at the date under review amounted to $840,375, as compared with $849,388 in the preceding period of observation.

During the last twelve months, there has been an advance of 8·5 per cent in the number of persons in recorded employment, while the payrolls showed a gain of 11·7 per cent. The per capita averages were $18.96 at December 1, and $18.88 at November 1, 1943; the December 1, 1942, figure had been $18.24. Attention must again be drawn to the fact that in hotels and restaurants, as in logging, many of those employed receive board and lodging as part of their remuneration. The former division constituted some 64 per cent of the total reported in the service division as a whole at the beginning of December.

Trade.—The seasonal increases indicated in trade were substantially above normal for December 1, according to the experience of the years since 1920. The 2,394 employers co-operating in the latest survey had 178,990 persons on their staffs, 8,287 more than at November 1; it is probable that many of these were part-time workers. The payrolls reported at December 1 amounted to $4,495,238, exceeding by 3·9 per cent the sum of $4,328,567 disbursed by the same firms at the beginning of November. This percentage gain was not equal to that in the number of employees, with the result that the per capita average slightly declined, standing at $25.11, as compared with $25.36 in the preceding report; the December 1, 1942, figure had been $24.25.

The index number of employment in trade at December 1 was 170·1, 3·4 per cent above that of 164·5 at the same date in 1942. This gain was accompanied by that of 4·6 per cent in the index of payrolls.

Financial Institutions.—The 757 financial institutions whose returns were tabulated employed a personnel of 64,919, as against 64,743 at November 1. The weekly earnings paid at the date under review amounted to $2,040,707, as compared with $2,034,579 paid on or about November 1. The per capita weekly average was unchanged, at $31.43, as compared with $30.88 at December 1, 1942. The index of employment in financial institutions was higher by 1·5 per cent than at December 1, 1942, while that of payrolls was higher by 3·3 per cent.

Report on Employment Conditions for January, 1944

The following summary of employment conditions for the month of January has been prepared by the Research and Statistics Branch, Department of Labour, on the basis of reports received from Local Employment and Selective Service offices across Canada.

DURING the first month of the new year the outstanding development in labour conditions was the increasing number of lay-offs caused by the completion or reduction of essential war production. To counteract such decrease in employment, other war and essential industries were expanding their programmes, with the net result that the most immediate problem was that of transferring men and women from one industry to another, and frequently from one neighbourhood to another.

The seasonal cessation of construction activity had proved a boon to the hardpressed logging industry, which was absorbing many men who would not be required in construction again until Spring. The base metal mines, also, were benefiting to some extent by the temporary halt in construction.

The recent ruling by which a number of gold mines were temporarily designated as essential industry was resulting in increased activity in this industry, although it was as yet uncertain to what extent this move would benefit the undermanned gold mines.

Maritime Region

Agriculture—As the Winter advanced, the calls for agricultural helpers in the Maritime region became increasingly slight. Many seasonal permits were still being issued for logging and other essential industry, but to the accompaniment of a careful check to assure that men needed for dairy farming were not allowed to leave their home duties for employment elsewhere.

Logging—While the unseasonable lack of snow had resulted in prolonging the timber cutting, it was presently proving a handicap, especially in long-lumber operations in the Maritime region. Men returning from the holidays had to a considerable extent reduced the previously acute labour shortage, but there was a continued dearth of workers in some sections.

Summerside had contributed some 100 men to the operations on the mainland, relieving

to some extent the situation in the St. John area, where smaller operators were still in great need of workers. Moncton and Bathurst had been successful in reducing their needs, though both areas could still use a considerable number of men. Fredericton, New Glasgow and Truro were less fortunate, with a large number of bushmen still in demand. In most parts of the region, operations were carrying on with smaller staffs than customarily.

Mining—Since the termination of the Springhill strike, the coal mines were all operating full time with increased orders for certificated miners. (On the whole employment here was improving, though housing facilities were still a limiting factor). At Inverness production had increased slightly, although since the beginning of the year absenteeism had become more prevalent, and several men had been dismissed as a result.

Soldiers granted leave to work in the mines were returning to the New Glasgow area, thus somewhat alleviating the continuing shortage of certified miners, and at Sydney vacancies were being steadily reduced, with only experienced men needed, and an accompanying marked increase in production was noteworthy.

Manufacturing—In the manufacturing field, the labour situation as a whole was satisfactory. There had been no major lay-offs during the period, and workers separated from their occupation were for the most part being assimilated in other employment. In Trenton the building of railway cars was absorbing a considerable number of employees of the Trenton Steel Works. Many of these workers had already found other jobs. Those released from a clothing factory at Amherst were in less fortunate position, as there is no similar industry in the province, and the surplus women workers would have to accept a lower wage in other work with which they were not familiar.

In the shipbuilding industry throughout the region the manpower story was one of continuingly heavy demands. The Halifax Shipyards, H.M.C. Dockyard and the small ship repair firms of the city were all in urgent need of skilled ship-building workers, with very few suitable applicants for the work, and the Pictou Shipyards required 100 bolters-up and other experienced workers who were not available locally.

Construction—The call for labourers and carpenters in the construction industry continued to show a sharp reduction in most parts of the region, and many of these men were being placed in woods work and food processing plants. Liverpool still required labourers for work on wartime houses, however, and St. Stephen axemen were in demand to clear away bush before the construction of the aerodrome at Pennfield could begin. In St. John construction projects were going forward according to schedule, with bricklayers and masons still scarce, but all other requirements fulfilled.

Quebec Region

Agriculture—Throughout the province agriculture had ceased to become an acute factor in the labour situation, and the majority of those who could be spared from their farms were presently engaged in logging, pulp cutting and ice harvesting.

Logging—In the Quebec region the logging situation showed material improvement, although in some districts operations were still slowed up through the dearth of available manpower. Chicoutimi, Dolbeau, Hull and Chandler reported the situation as satisfactory, but other areas were not so fortunate. Campbell's Bay still required some 950 men for bush work, Shawinigan Falls 800, Val d'Or another 500 pulpwood cutters and Matane 500 woodsmen. At Riviere du Loup, however, any outstanding orders could be filled locally, and labour exit permits were presently being issued to cover the district's quota of 3,500 woodsmen going to the United States for woodcutting employment there.

Mining—The mining industry was making fewer demands on the provincial labour supply during the Winter months. Although the lead and zinc mines were still short of experienced miners and machine operators, the situation had eased recently. The gold mines had obtained 50 per cent of the men needed since the priority was raised and anticipated that the full quota would be procured within the next two weeks. Recruiting for the nickel mines at Sudbury had provided 300 men for that industry during the current month.

Manufacturing—Extensive lay-offs in the war industries were still evident in manufacturing throughout the region. In Montreal, such lay-offs in large plants had affected some 1,000 men and 500 women. The demands of the aircraft industry, however, continued high —although hiring had been reduced, it was proceeding at a steady weekly rate.

In other parts of the province, the largest lay-off was at Quebec, where a uniform company had closed down, involving the dismissal of some 300 women. Lay-offs at the D.I.L. plant at Brownsburg were continuing at the planned rate of about 100 monthly. A few workers, both male and female, had been placed locally and at outside points. The

company's Bouchard plant was the only war industry requiring additional workers, and there some 600 women were needed to fill pressing contracts.

In all parts of the region,—and especially in the large centres—the placement of women separated from their jobs presented less difficulty than that of men. Hospitals, laundries, hotels and garment manufacturing could absorb a large number of the former, while for men the openings were chiefly confined to labouring work, at wage rates substantially lower than those formerly earned.

Primary textile factories reported a slight gain in staff, though in a few places, such as Farnham, the shortage of raw materials for civilian use was slowing up production. Hosiery and knitting mills were also showing signs of increased activity, but experienced operators were still scarce. In the clothing industry, children's wear alone failed to show any improvement in the fulfilment of its labour needs. The children's shoe manufacturing industry also requested by the leather controller to step up production, found itself handicapped by the dearth of skilled operatives.

Construction—The manpower requirements of the construction industry in the region had registered a further sharp decline during the month. Since the middle of December 1,000 men had been laid off at Arvida and Shipshaw, where construction was completed. Of these, 210 had been transferred to other essential construction work, and about 300 had registered insurance claims. A fair number would probably go to the bush this month, and still more to local industry, to replace farmers whose permits would be revoked by March 31.

Ontario Region

Agriculture.—The opening of the year was marked by a notable improvement in agricultural labour supply. The open Fall had enabled farmers to complete ploughing, with the result that Spring should find early work well advanced. A few orders, and some inquiries, about helpers for that season were already coming in to the local offices. While the number had dwindled, many farmers were still going to the bush and to war industry, and would return to their home duties at the end of March.

Logging.—The woods operations in the Ontario region had been favoured by ideal climatic conditions, although a foot of snow now would help the recently commenced sleigh haul. Although the situation in this province, as elsewhere, was easier, an acute shortage of labour still persisted. German prisoners of war have been of material assistance in relieving manpower needs at Kapuskasing and Sault Ste. Marie, but in the latter area approximately 800 more first-class cutters could be used. The Toronto office of NSS reported a heavy demand for bushmen, with one company having a large order offering not only to pay transportation to the job, but also to provide suitable clothing for those not properly equipped. The cutting of logs and pulpwood in the region will continue through the Spring and Summer.

Mining.—There was little change in the labour outlook as far as mining was concerned. The prospects of supplying the base metal mines of the region with workers were practically negligible, and as a result smelter operations were retarded by the lack of ore from the mines.

At Kirkland Lake the gold mines were making a complete survey of the current labour requirements, with a view to benefiting former residents who were expected to return from war jobs, as well as men discharged from the armed forces.

Manufacturing.—In manufacturing, reductions in schedule and curtailment of production at some of the larger plants were causing lay-offs. Off-setting such staff reductions, a number of essential industries still had pressing need of workers—with the result that in Ontario, as in other parts of Canada, the demand for manpower was continuingly uneven.

At Collingwood, the shipbuilding yards were carrying on as usual. After one minor lay-off, earlier in the month, re-employing had commenced and more men would be needed in the near future. The aircraft plants of the region were, for the most part, operating at full capacity, and a number of women who were affected by several lay-offs in Hamilton were being encouraged to accept positions with such essential war projects as the aircraft plant at Malton, where the wage rate was comparable to that which they had been receiving.

As in December, the outstanding and unchanging manpower need in the region was for heavy labour. Brockville and Carleton Place were among those with the most urgent demands, but New Toronto, Kingston, Niagara Falls, Oshawa and the Kitchener-Waterloo area were similarly short of men equal to jobs requiring exceptional physical fitness.

The textile industry, too, was making heavy demands on the region's labour reserve. Dunnville reported that there was a sufficient number of applicants to meet the increased demand for textile workers, and Fergus was utilizing part-time labour to the fullest extent, (as also in the shoe factories of the area) but in Guelph

there was a continuing demand for power machine operators in low priority industries, as well as in other textile companies, with reported low wages as a retarding factor.

Construction.—Practically all construction projects in the region had been completed, with the exception of St. Thomas, where increased construction was under way in the building of additions to plant structure for the R.C.A.F. Bombing and Gunnery School at Fingal, as well as several private companies' projects. The completion of large construction jobs in the Kingston area had released some 200 tradesmen and labourers, and here, as elsewhere, the men laid off were being absorbed into industry.

Prairie Region

Agriculture.—Choremen and dairy farm workers were the only agricultural labourers in demand in the Prairie region, and inquiries for Spring helpers were beginning to come in. It was noteworthy that there had been a substantial increase in the number of registrants for university short courses in dairying, butter and cheese making.

Logging.—The lakehead section of the Prairie region was suffering more than any other from the shortage of bushmen and pulpwood cutters. Unfilled orders still remained high, and unquestionably the production of the pulp and paper industry would be greatly curtailed. Port Arthur reported that, as of January 20, 4,408 men were still required to bring bush crews up to strength, and Fort William's demands, too, continued at a high level.

At Winnipeg the movement of men to the bush was proceeding at a fair rate, and at Fort Frances word had been received that a number of labourers being released from the Steep Rock project in the Atikokan area would be available to the logging and pulp camps from January 26. Arrangements were being made to direct these men to the camps concerned in employing their services. Further west, while there was a persisting demand for bushmen, it was by no means so acute: Edmonton, with most of the larger operators well supplied, still required 800 men, and Edson had been unable to fill its labour needs.

Mining.—The coal mines in the Edmonton area were fairly well caught up on their back orders for workers, and a few of the smaller mines had reverted to part-time work. All strikes had been settled, and the sole labour demand was for certificated miners. At Edson, too, the situation had greatly improved although a slight shortage still prevailed. In the Estevan district coal production had been stepped up to an all-time high in the field's history, and coal conservation measures, together with continued mild weather, had led to the supply being in excess of the demand.

In the base metal mining field, Winnipeg reported that referrals were the best in some time—men were more willing to accept out-of-town employment on account of the shortage of orders for work in the city. Flin Flon made a continuing demand for labourers for underground and plant work in the base metal mines. At Fort Frances the Steep Rock Iron Mines had taken over a further development project in the Atikokan area, and the installation of pumps and clearing of a roadway were the principal activities of the moment.

Manufacturing—The manufacturing industry in the Prairie region was confronted by many changes. Extensive lay-offs were taking place in some sections, while other parts of the country were still in need of men. A shortage of experienced men had developed in the packing plants early in January, but this situation was limited to Edmonton and Saskatoon—elsewhere packing plants and flour mills were fully staffed. At Lethbridge the sugar factories had completed their runs, and the workers (agricultural for the most part) had been absorbed into other employment.

The local aircraft plant at Fort William was still gradually increasing production, and the estimated 1,200 employees who would be needed by July would undoubtedly offset staff reductions in other industries. The largest of these lay-offs to take place during the month was at Regina, where the letting out of 300 employees of the Regina Industries were presently in effect. Single men, as well as married men who were able to leave the city, were for the most part referred to Fort William: the 80 women laid off were also being referred to other employment, but practically no local work was available.

Construction—Activity in construction was at a standstill, chiefly owing to the completion of all major projects in the region. The completion of the Steep Rock Iron Mines construction project at the end of January would affect some 500 men. Commencing January 26, the men were to be released at the rate of about 50 daily, and National Selective Service representatives would be on hand to direct them to other essential industries, and to check up on mobilization regulations insofar as deferments or postponements from military service were concerned.

The labour situation in construction throughout the region presented no serious problem, as the building trades in all sections had experienced a long run of work during the past season and new work would shortly be starting to employ any available skilled tradesmen.

Pacific Region

Agriculture—There were no new developments in the agricultural labour situation in British Columbia. The few calls were for experienced dairy workers, but any available were not sufficiently well qualified.

Logging—Employment in the B.C. coast's logging industry had not yet returned to the pre-holiday level. Uncertainty as to weather conditions had retarded the return to camp of the loggers, and congestion of boat transportation facilities presented a further impediment, with the result of further delay in the reopening of a number of camps. In the Duncan area woods operations had been resumed at Rounds, Lake Cowichan and Meade Creek, but not all camps were running.

In the northern interior, an improvement was reported in the labour supply,—men for the Prince George area were becoming available from agricultural sources, from defence jobs nearing completion, from the increase in transfers-in from the prairies, and also as a result of the curtailment of birch logging operations.

Mining—The majority of the British Columbia coal mines had reached a point where a further supply of certified miners was required before men of only limited experience could be utilized. An additional 100 certified miners and approximately the same number of helpers would put the British Columbia mines up to full strength—helpers were available if the miners could be procured.

The base metal and gold mines of the region were still in great need of experienced miners, muckers and timbermen. Operations at Britannia Beach were calling for upward of a hundred miners, as well as a number of muckers, and the Bridge River and Wells Mines could absorb a similar number. Some progress was being made in supplying a group of gold mines with urgently needed underground labour, but the gold mines of the province might absorb some 2,000 or 3,000 men over the period of a year, should the labour be available.

Manufacturing—At the moment, conditions in the manufacturing industry were almost static, except in the expanding aircraft factories and in the shipbuilding yards. Orders for shipbuilding workers were at low ebb, with several planned lay-offs in progress. Two of these were effected in Vancouver, releasing 300 employees. Planned transfers and withdrawals, co-ordinated with Industrial Mobilization surveys, took care of the situation and provided a quota of men for the army. In Victoria a systematic reduction of working personnel was still in progress in one of the yards, and this, too, was co-ordinated with an Industrial Mobilization survey. In all yards there were still active orders for various tradesmen.

The aircraft industry was calling for unskilled workers, both male and female, and, in Vancouver, for highly skilled machinists. Local sources of supply were satisfying the labour requirements of the various branch plants outside of Vancouver. Subcontracting metal working plants were feeling the effects of the curtailment in primary war contracts, and some were laying off a few employees, but in general, orders for skilled and semi-skilled workers were again on the increase.

A direct result of the shutdown of logging operations had been the further depletion of log reserves for the sawmills. In addition to three mills already idle in the New Westminster area, three more closed down during January, and a total of 650 employees were affected. Another large mill in the Duncan area found a partial suspension of operations necessary for the same reason, and here about 180 employees were involved. In all cases special action was taken to transfer as many as possible to employment elsewhere.

Construction—There was much more activity in construction in the Pacific region than in other parts of the Dominion—open weather permitted the continuance of vitally important wartime projects. Victoria's demand was mainly in connection with houses being erected for Wartime Housing.

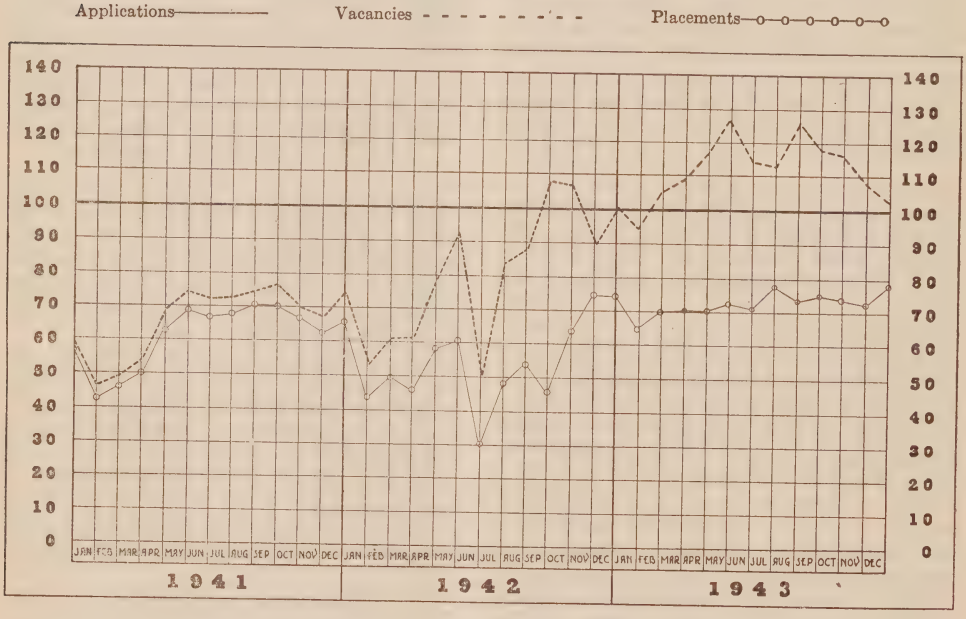
At Courtenay labourers and carpenters were still needed for construction. At Prince George several National Defence projects were nearing completion and skilled workers were gradually being laid off. These would be readily absorbed by other contracts of equal essentiality in the district. There was an acute shortage of labour on all defence jobs, and men to fill the need were unobtainable.

Throughout the Dominion

Transportation—The shortage of railway crew and track maintenance workers persisted in all parts of Canada, but the absence of very heavy snowfall had considerably lessened the annual demand for labourers for snow shovelling, alike for C.N.R., C.P.R., and municipal needs.

Services—The various services were, to some extent, reaping the benefit of lay-offs in essential industries. While the demand for female workers in hospitals, hotels and private homes far exceeded the supply, there was an increased number of referrals to domestic vacancies during the past month which promised additions to the consistently understaffed services.

Applications for Employment, Vacancies and Placements, December, 1943



THE volume of business transacted by the Employment and Selective Service Offices during the four weeks December 3 to December 30, 1943, showed declines of 21·5 per cent and 13·3 per cent respectively in the daily average of placements effected when compared with the previous five-week period October 29 to December 2, and with the month of December, 1942.

The accompanying chart shows the trend of employment since January, 1941, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at Employment and Selective Service Offices throughout Canada. It will be seen from the graph that the trend of the curve of vacancies in relation to applications showed a moderate downward trend while that of placements indicated a slight upward course, the ratio of vacancies to each 100 applications being 102·2 during the four weeks ending December 30, in contrast with 107·7 in the previous five-week period and 101·2 during the month of December, 1942. The ratio of placements to each 100 applications during the period under review was 78·4 compared with 72·4 during the five weeks October 29 to December 2, and 74·2 during December of the previous year.

The average number of vacancies reported daily by employers to the offices throughout Canada during the period under review was 6,462 as compared with 9,385 in the previous period October 29 to December 2, and with 7,797 in December a year ago. The average number of applications registered daily during the four weeks December 2 to December 30, was 6,323, in comparison with 8,710 in the previous five weeks and 7,706 in December, 1942. The average number of placements made daily by the offices for the four weeks ending December 30, was 4,957 of which 4,802 were in regular employment and 155 in work of one week's duration or less, compared with 6,314 during the previous period of five weeks duration. Placements in the month of December of the preceding year averaged 5,722 daily, consisting of 5,514 in regular and 208 in casual employment.

During the four weeks December 2 to December 30, 1943, the Employment and Selective Service Offices referred 139,228 persons to vacancies and effected a total of 114,019

placements. Of these, the placements in regular employment were 110,452, of which 75,337 were of males and 35,115 of females, while placements in casual work totalled 3,567. The number of vacancies reported by employers was 94,986 for males and 53,632 for females, a total of 148,618, while applications for work numbered 145,425, of which 100,701 were from males and 44,724 from females. Reports for the five weeks October 29 to December 2, 1943, showed 281,536 positions available, 261,309 applications made and 189,410 placements.

effected, while in the month of December, 1942, there were recorded 202,708 vacancies, 200,354 applications for work and 148,758 placements in regular and casual employment.

During the year 1943, the offices throughout Canada reported 3,036,600 vacancies, 2,689,622 applications and 1,944,026 placements in regular and casual employment, a gain in placements of 85·4 per cent over the year 1942.

The following table gives the placements effected by the offices, each year, from January, 1933, to date:—

Year	Placements		
	Regular	Casual	Totals
1933	170,576	181,521	352,097
1934	223,564	182,527	406,091
1935	226,345	127,457	353,802
1936	217,931	113,519	331,450

1942	809,983	85,638	895,621
1943	1,890,408	53,618	1,944,026

Quarterly Report of Employment and Selective Service Offices, October to December, 1943

THE work of the Employment and Selective Service Offices of Canada during the quarter October to December, 1943, as indicated by orders received and placements effected, was 8·3 per cent lower in volume under the first comparison and 12·8 per cent less under the second, than during the corresponding quarter of 1942.

From the chart appearing elsewhere in this issue, which accompanies the article on the work of Employment and Selective Service Offices for December, it will be noted that the curve of vacancies in relation to applications showed a downward trend during October, November and December, while that of placements recorded a downward tendency during October and November, but an upward course was reported in December.

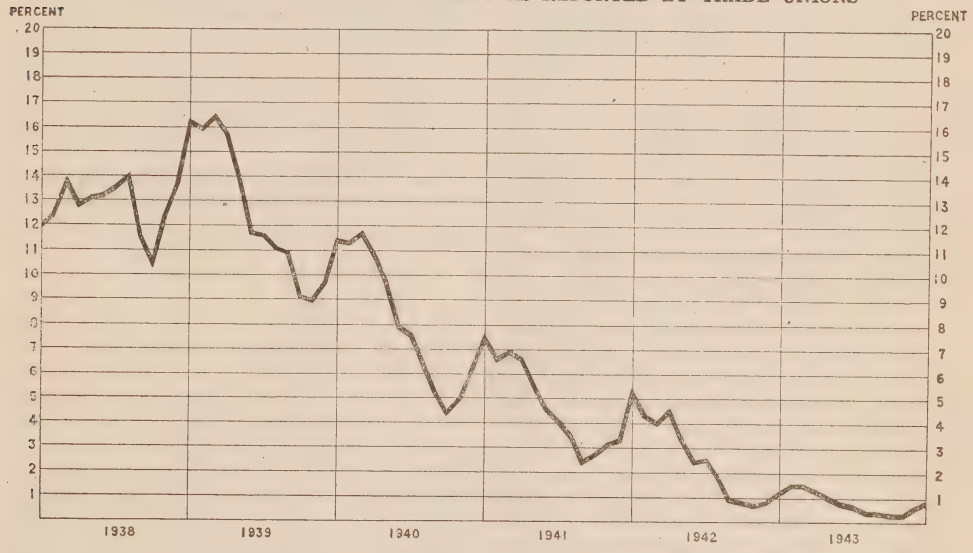
During the period October to December, 1943, there was a ratio of 109 vacancies and 74·3 placements for each 100 applications for employment, as compared with 98.6 vacancies and 70·7 placements during the corresponding quarter of 1942.

The average number of positions offered daily during the quarter under review was 8,625, of applications registered, 7,908, and of placements effected, 5,877, in contrast with a daily average of 9,287 vacancies, 9,417 applications and 6,655 placements in regular and casual employment during the fourth quarter of 1942.

During the three months October to December, 1943, the offices reported that they had referred 599,721 persons to positions and had effected a total of 446,659 placements, of which 435,229 were in regular and 11,430 in casual work. Of the placements in regular employment 271,023 were of males and 164,206 of females, while casual work was found for 3,294 males and 8,136 females. Comparison with the same period in 1942 showed that 512,402 placements were then made, of which 496,173 were in regular and 16,229 in casual work. Applications for employment during the period under review were received from 366,138 males and 234,902 females, a total of 601,040 in contrast with the registration of 725,087 persons during the corresponding period of 1942. Employers notified the offices of 655,508 vacancies, of which 427,707 were for males and 227,801 for females, as compared with 715,030 opportunities for work during the last quarter of 1942.

Unemployment in Trade Unions at the close of December, 1943

UNEMPLOYMENT in the following report has reference to involuntary idleness, due to economic causes. Persons who are without work on account of sickness, a strike, or a lockout, or who are engaged at work outside their own trades are not considered as unemployed. As reports from unions making returns vary from month to month with consequent variations in the membership upon which the percentage of unemployment is based, it should be understood that such figures have reference only, to the organizations reporting.



At the close of December returns were tabulated from 2,345 labour organizations, having a combined membership of 482,812 persons. Of these 3,693, or a percentage of ·8 were listed as without work, in comparison with percentages of ·6 in the preceding month and 1·2 in December, 1942. The slight employment recession from November was due principally to small reductions in available

work for those in groups with large memberships, such as the manufacturing and transportation industries, as well as to a moderate employment decrease for members in the building and construction trades; this latter contraction was due mainly to the usual seasonal conditions. Among union members in other divisions, little or no change was manifested.

The percentage of unemployment in each province is shown in table I. As indicated therein, these ranged from ·3 per cent in New Brunswick to 2·9 in Nova Scotia. In comparison with the previous month conditions in New Brunswick showed a very slight betterment. On the other hand, minor recessions in work were apparent in Quebec and Ontario. Declines in employment to a somewhat greater degree, although these also did not involve many members, were observed in Manitoba, Alberta and British Columbia. The percentage in Nova Scotia and Saskatchewan remained unchanged. In comparison with the situation in December 1942, much better conditions prevailed in New Brunswick and Manitoba while in Quebec, Ontario and Alberta also, employment levels were substantially higher; in Saskatchewan and British Columbia there were minor employment increases only.

A separate compilation is made each month of unemployment among trade union members in the largest city in each province with the exception of Prince Edward Island. At the end of December the percentages of those without work in these centres ranged from no unemployment in Saint John to 1·8 in Halifax. In comparison with the situation in the preceding month, a very slight advance only was necessary to provide full employment for Saint John members, while in Regina also, there was a minor improvement. On the contrary, slight contractions in activity were apparent in Montreal, Toronto, Edmonton and Vancouver, while in Halifax and Winnipeg the employment recessions were more pronounced. In comparison with the situation in December 1942, a moderate increase in available work resulted in full employment for Saint John members. A noteworthy improvement was manifested in Winnipeg while in Montreal, Edmonton, Regina and Vancouver there were betterments of lesser degree. In Toronto a minor employment contraction was apparent, while in Halifax there was a moderate recession.

PERCENTAGE OF UNEMPLOYMENT AS REPORTED BY TRADE UNIONS

The accompanying chart illustrates the trend of unemployment from January, 1938, to date. The curve in January, 1943, was at a slightly higher level than in December, 1942, and remained unchanged in February, thus reflecting in those periods a slight contraction in work. From March to the end of July there was a continued betterment although as the employment levels remained high, the increases were necessarily small. Conditions in August remained unchanged from July, while in September and October the curve was at its lowest point, thus reflecting in those months the highest employment level not only for the months of the year under review, but for those of any year since the report appeared for the

first time as a monthly, for January, 1919; this employment level was higher also, than in any of the quarterly periods from December, 1915, to December, 1918. In November the curve inclined slightly and a further upward trend was observed in December also, due to the usual seasonal declines in employment and to some slowing down in the production of war supplies.

For the manufacturing industries, 869 returns were received indicating a total membership of 289,449 persons, of whom 1,672, or a percentage of ·6 were unemployed, in comparison with percentages of ·4 in November and ·5 in December, 1942. As compared with November conditions, very slight betterment was indicated for union members in the animal products section, which includes such trades or occupations as butchers, meat and fish packers, leather and fur workers; in the mineral products group, a minor advance only, resulted in full employment. Sufficient work was available at both dates for those in the textile and carpet, hat, cap and glove, clay glass and stone and chemical products occupations. For woodworkers and among garment workers, in which division is included both men's and women's clothing workers, conditions remained unchanged. Among union members in the vegetable products group, which covers reports from soft drink workers, etc., cigar and tobacco workers and bakers and confectioners, slightly lower employment levels were apparent; this was true, also, for papermakers, printing and publishing workers, members in the iron and steel group and non-ferrous metal workers; this latter section covers returns from unions of metal polishers, etc., jewellery, aluminum and mine and mill workers. Minor declines in work were observed, likewise, for organizations with much smaller memberships; among these were electric current employees, etc., and unclassified manufacturing workers. In comparison with the situation in December, 1942, a substantially higher employment level prevailed for union members in the animal products group, while noteworthy improvement was observed, likewise, for those in the non-ferrous metals and printing and publishing divisions. Although the membership is comparatively small and not many were involved in the change, conditions appeared much brighter for workers in the unclassified manufacturing group. Full employment was manifested at both dates for members in the mineral products and textile and carpet sub-groups. On the other hand, for those in the vegetable products group, there was a minor employment recession.

Returns were tabulated from 57 unions of coal miners, having a combined membership of 21,823 persons of whom 19, or a percentage of ·1, were without work. This figure was the same as that shown in the previous month and also for December, 1942. As in December, 1942, and in November, 1943, full employment prevailed for members in Nova Scotia, New Brunswick and British Columbia. In Alberta the percentage of those without work stood at ·3; this figure was identical with that recorded in that province on both of the other dates.

In the metallic ores and non-metallic minerals groups of the mining division, returns were received from unions covering 1,723 and 4,104 members respectively. While no unemployment was reported in November, the returns for December for each of these groups indicated a minor recession in activity. Conditions for members in the non-metallic minerals group were moderately better than for December, 1942, while for the metallic ores section no returns were tabulated at that time.

Reports were received from 209 unions in the building and construction trades. The total membership covered in these reports was

35,293 persons, of whom 1,105, or a percentage of 3·1 were without work, in comparison with percentages of 2·2 in November and 5·1 in December, 1942. As compared with the preceding month, a minor increase in work which was sufficient to attain full employment, was noted for electrical workers, while for wood, wire and metal lathers, no unemployment was reported at either date. Among the large membership included in the carpenters joiners unions, employment declined slightly, as is usual at this season. Among smaller groups, such as steam shovel men, bridge and structural iron workers, bricklayers, masons and plasterers, granite and stonecutters, painters, decorators and paperhangers, plumbers and steamfitters and unclassified building workers, there were slight recessions in activity. In comparison with the records for December, 1942, a noteworthy expansion in available work was observed in reports received from unions of bricklayers, masons and plasterers and hod carriers and unclassified building workers; among carpenters and joiners, there was a moderate betterment, while as shown in the previous comparison, no unemployment was indicated by wood, wire and metal lathers. On the other hand, although not many were involved, as the membership is small, a marked employment contraction was apparent for steam shovel men.

For the transportation industries, 875 returns were received covering a total membership of 86,140 persons, of whom 560, or a percentage of ·7, were listed as without employment, in comparison with percentages of ·5 in November and 1·9 in December, 1942. The very slight percentage of unemployment as noted for street and electric railway employees in November remained unchanged, while teamsters and chauffeurs, etc., did not show any members as without work at either date. Among navigation workers, there was a minor contraction in activity, while in the steam railway division, in which is covered approximately 80 per cent of the entire group membership, there was a very slight employment recession. In comparison with conditions in December, 1942, a much better situation was apparent for union members in the steam railway group, while for navigation workers, employment declined slightly; little or no change was apparent in the other occupations.

As in November and in December, 1942, union members in the retail and wholesale trades were fully employed. In the service group is included returns from unions of civic employees as well as those of hotel and restaurant employees, theatre and stage employees, barbers, stationary engineers and firemen and unclassified workers. Reports were received covering over 25,000 of these members. These returns indicated a very slight employment contraction, both as compared with the preceding month and with December, 1942.

Returns were tabulated from fishermen's and lumber workers' and loggers' unions, covering 275 and 5,610 members, respectively. Among the latter no unemployment was noted; this was true, likewise, of the preceding month and for December, 1942. Among the small group of fishermen there was a marked contraction in activity, both as compared with November and with December, 1942; these changes, however, involved very few members.

Table I shows by provinces the average percentage of union members, who were unemployed each year from 1933 to 1943 inclusive, and also the percentage of unemployment for December of each year from 1932 to 1942, inclusive, and from January, 1943, to date. Table II summarizes the returns in the various groups of industries for the months included in table I.

Unemployment in Canada, as Reported by Trade Unions for the Year, 1943

THE Department of Labour receives monthly reports from local trade unions throughout the country, indicating their membership and the number of members unemployed on the last working day of each month, the tabulation of these data furnishing a continuous record of the unemployment situation among organized workers during the year. The average number of locals reported during 1943 was 2,309 with an average membership of 448,157 persons, 0·8 per cent of whom were on an average unemployed. This percentage was the lowest in trade union records since these were prepared on a monthly basis for the first time in January, 1919. The highest percentage of unemployment was shown in January and February, as 1·5 and the lowest in September and October, as ·3. The corresponding percentages in 1942 were 4·5 in March and ·7 in October. From January to the end of July, employment levels were much higher than in the corresponding months of 1942. From August until the end of the year the expansions were not

so pronounced, as conditions in the corresponding months of 1942, likewise, were very good.

Throughout the months of the year 1942, employment levels in the manufacturing industries were very high and in 1943 further marked expansions were noted, especially in the first seven months, as compared with the corresponding periods in the previous year. With the exception of November when the percentage of members without work remained unchanged and in December when the comparison indicated a slight recession, each of the months from August to the end of the year showed betterment, although as the employment levels were very high in the latter months of both periods, the changes in either direction were necessarily small. Much better conditions were observed for union members in the iron and steel industries in the first part of the year but by November and December, sufficient supplies were reported to be on hand in certain lines. This led to some slowing down in production and consequently the employment levels in these months were moderately lower than in the corresponding periods in 1942. The situation for union members in the pulp and paper industry was substantially better from June to the close of the year. In the first five months there were fluctuations but on the whole conditions in this period were slightly better than those of 1942. In the fibres and textiles group in which is included textile and carpet and hat, cap and glove workers, as well as garment workers, which in turn is made up of men's and women's clothing workers, employment levels on the whole, were much higher from January to July, but from August to December, in both 1942 and 1943, the changes were negligible, as very few were reported as idle in either of these periods. In the wood products division there were noteworthy declines in work in January, April and May, while the percentage in June remained identical with that shown in the corresponding month of 1942. In March and in the months from July to the end of the year, conditions in 1943 were better generally, although employment levels for these months were very high in both years; accordingly, these changes were not outstanding. For members in the animal products division the employment level was much higher in practically every month than for the corresponding period in 1942, while in the non-ferrous metals group, although very few members were listed as idle in the months of either year, the tendency was in a favourable direction in every month of 1943 with the exceptions of January, when there was a noteworthy decline, of September when conditions were unchanged and of October when there was a very minor contraction.

With the exception of July, when the unemployment percentage was unchanged, conditions for members in the mining division were better in every month of 1943. The most impressive betterments were shown in the period from January to the end of June. Improvements were manifested in the latter months also, although as employment levels were high in both years, the changes were not quite as outstanding.

In the building and construction trades the percentages of unemployed members ranged between a high of 9·0 in March and a low of 1·0 in September. The corresponding figures in the preceding year were 16·3 in March and 2·2 in October. A month by month comparison with the situation in 1942, disclosed that from January to the end of September, 1943, employment levels were much higher, while during the last three months increases were indicated also, although these were not quite so pronounced.

The situation for union members in the transportation industries as a whole, was much better in practically every month of 1943 than in corresponding periods of the previous year. The percentages of unemployed members ranged between a high of 1·3 in January and February and a low of ·4 in July, whereas in 1942 the corresponding figures were 3·2 in January and ·8 in September and October. Union members in the navigation group were much better employed in practically every month excepting December, when a slight contraction was noted, from the corresponding month in 1942, while for those in the steam railway division, the employment levels were substantially higher in nine of the months, while in the other periods increases were indicated, but these were not exceptional.

The conditions for communication workers were better in every month of the year with the exception of August, when there was a very slight contraction in activity.

Among union members in the retail and wholesale trade a very small percentage of unemployment was noted in January and June of 1942, only, while no lack of work was reflected in the other months; for 1943 full employment prevailed throughout the year.

The service group of occupations covers returns from unions of civic, hotel and restaurant and theatre and stage employees, barbers, stationary engineers and firemen and unclassified workers. With the exceptions of January and February, in which months the employment levels were much higher, and for June and November when the percentages

remained unchanged, there were very minor recessions in available work in each of the other months, in comparison with the situation in the corresponding periods of 1942.

For union members in the fishing industry rather impressive employment expansions were reflected in reports received for January and for the period from March to the close of June. From July to September and also for November, 1942, small unemployment percentages were shown. Full employment was attained in August, September and November, 1943, while in July there was a minor improvement, only. On the other hand, in February a slight contraction in available work was indicated, while in October and December, there were marked employment recessions in comparison with the corresponding periods in the preceding year.

In comparison with the situation in 1942, union members of lumber workers and loggers reported rather noteworthy expansions in available work to full employment in January and for the months of March, April and June, also; in February, there was a moderate employment increase. From July to the close of December, no unemployment was observed in either year.

The percentage of those without work was up slightly from December, 1942, to January, 1943, due mainly to a moderate decline in work for members in building and construction trades and to a slightly lower employment level for those in the manufacturing industries. In the next month the percentage remained unchanged, but from then to the close of July the percentage of those without work declined in each month, thus reflecting continued employment expansion. Seasonal improvements for union members in the building and construction trades and generally better conditions for manufacturing and transportation members were the main factors in these gains. In August the situation remained unchanged from July, but a slight advance in September which was due mainly to increases in available work for coal miners and for members in the building and construction trades resulted in the percentage of those without work dropping to the lowest figure that has ever been attained in these records, which were collected for the first time for December, 1915. Thus in September and in October, when the percentage remained unchanged, the highest employment levels were reached, not only for the periods in the year under review, but for any in the trade union records, or for any of the quarterly dates in the years from December, 1915 to December, 1918. Moderate seasonal employment contractions for building workers and slightly lower employment levels for manufacturing workers were responsible to a large extent for the slight decline in work in November and for the further minor employment contraction as reflected in December.

Tables showing percentages of unemployment among union members by industries and by provinces by months during 1943 and for earlier dates appear in the section on Unemployment in Trade Unions.

Employment in Great Britain and United States

UNEMPLOYMENT in Great Britain showed a further reduction during 1943, according to the British *Ministry of Labour Gazette*. At October 18 the total number of persons registered at Employment Exchanges in the United Kingdom as unemployed (exclusive of nearly 20,000 who had been classified as unsuitable for ordinary employment), was approximately 86,500. The average number on the register during the year 1943 was 93,408, compared with 125,311 during 1942, and 1,308,212 during 1939. During 1932 and 1933 the average had been over two million.

United States.—Figures for December, 1943, show that employment has dropped, as expected, in industries in which the war production program has been cut back, the United States *Monthly Labour Review* reports. Losses have also occurred in other industries.

The trend of employment in most war industries was one of steady and rapid rise during 1941 and 1942, with slowly increasing or generally stable employment in 1943. Some groups have not yet reached this plateau. The electrical machinery and rubber groups, for instance, are still advancing. In aircraft and, to a less extent, in shipbuilding further increases are anticipated, although a number of plants are at peak levels.

The total number of employees in non-agricultural establishments was 38,335,000 in December 1943, 43,000 more than in November, but 607,000 below the level of a year ago. Seasonal changes included an increase of 250,000 in trade and a decrease of over 100,000 in construction. There was a decline of over 100,000 in manufacturing.

Labour Law

Recent Regulations under Dominion and Provincial Legislation

Seamen—Welders in Alberta—Quebec Minimum Wages

A NEW schedule has been made of compensation to seamen for the loss of personal effects, including payments for tools lost by certain classes of seamen on foreign-trade vessels. Canadian merchant seamen and trainees in Manning Pools or Instructional Schools are now eligible for accident compensation under the Government Employees Compensation Act. The one year time-limit for application for merchant seamen pensions may now be extended. Other Dominion Orders in Council passed recently are listed below.

In the provincial field, the provisions for issuing temporary welders' certificates in Alberta have been modified. Certain Quebec Minimum Wage Orders have been renewed, and the assessment on employers in timber driving and forest operations has been reduced.

Dominion

Seamen

Loss of Personal Effects.—The Compensation to Seamen (War Damage to Effects) Regulations and their amendments (L.G. 1943, p. 1418) have been consolidated in a new Order in Council (P.C. 133/510) of January 26, 1944, as a result of representations from the Committee on War Risks Insurance and Bombardment Compensation. The schedule for maximum compensation payable for war damage to personal effects has been somewhat revised. For seamen in foreign trade, specific amounts are payable in case of the loss of tools carried on board by masters, carpenters, joiners, certificated or uncertificated navigating or engineering officers or their apprentices, surgeons and cadets. Proof of the possession of these tools and the owner's or master's consent to their possession must be in the form of a list filed with the official who made the agreement with the crew for the particular voyage. The maximum compensation for clothing and personal effects of seamen in foreign trade has been increased substantially in seven out of the fourteen classes of seamen. A reduction has been made in the compensation to be paid to stewards in charge of departments on home-trade vessels.

Accident Compensation.—By Order in Council P.C. 130/335 of January 19, 1944, Canadian merchant seamen and trainees in Manning Pools or Instructional Schools have been brought under the provisions of the Government Employees' Compensation Act. This Act stipulates that Dominion Government employees, who are caused injury by accidents arising out of and in the course of their employment, or their dependents in the case of death, are entitled to compensation at the rate provided by the law of the province in which the accident occurs.

"Canadian merchant seamen" are to include all those seamen on the strength of Manning Pools except United Kingdom seamen. They are considered to be Government employees while on the premises of a Manning Pool or accommodated elsewhere while members of a Manning Pool, while performing services outside for the purposes of such a Manning Pool, or while being transported to and from a Manning Pool, under the orders of the Director of Merchant Seamen. Trainees are deemed to be Government employees under the Act while in training at Instructional Schools, on ships, at other locations, or in transit, as authorized by the Director.

The compensation is to be computed on the basis of actual weekly wages plus $7 per week for room and board when it is provided free of charge. In cases of permanent disability or death, however, the minimum compensation is to be based on wages and allowances of not less than $12.50 per week, regardless of the provincial minimum compensation.

Pensions.—An Order in Council P.C. 126/9868 of Decemebr 29, 1943, amends P.C. 104/3546 of April 30, 1942 (L.G. 1942, p. 796), which placed a time-limit of one year on the application for pensions. Lack of communication facilities often prevented the disabled person from filing a claim within this time. Similarly, definite death notification did not always arrive soon enough to take action. Thus

the new order gives the Canadian Pension Commission the power, when special application on that behalf is made, to extend the period within which the application must be made.

Other Orders in Council

The following Orders in Council are summarized in the Manpower section of the *Gazette* or elsewhere: P.C. 121, January 10, amending the National Selective Service Civilian Regulations with regard to coal miners' liability for military service; P.C. 162, January 18, setting up an Industrial Production Co-operation Board; P.C. 8993, January 21, authorizing assistance to the provinces for apprenticeship training; P.C. 34/510, January 26, establishing medical boards to examine men under the National Selective Service Mobilization Regulations; P.C. 512, January 28, concerning appointments to Regional Selective Service Advisory Boards; P.C. 486, January 25, amending the National Selective Service Civilian Regulations in regard to reinstatement of transferred employees.

Provincial

Alberta Welding Act

Due to a serious shortage of welders, the regulations regarding temporary licences issued under the Tradesmen's Qualifications Act (L.G., 1939, p. 675) have been relaxed by an order gazetted Dec. 31, 1943. For a period of one year, the total length of employment which a candidate must spend at his trade in order to qualify for a temporary certificate may now be varied. Previously, a specific number of hours was necessary, according to the type of welder's certificate required.

Quebec Minimum Wage Act

Renewals.—The following Orders have been renewed by Orders gazetted February 5, 1944, to be in force until February 1, 1945, unless otherwise specified: Order 8 (Revised) relating to the cotton textile industry (L.G., 1938, p. 625; 1941, p. 31); Order 27 governing the canning industry (L.G., 1940, p. 123); Order 22 (Revised) applying to the manufacture of bricks and building blocks (L.G., 1940, p. 22; Nov., 1941, p. 1383) and Order 25 relating to waste materials in Montreal Island and a 10-mile radius (L.G., 1939, p. 201), to be in force until March 1, 1945.

Levy on Employers.—By-laws B-1-B and B-1-C (L.G., Jan., 1944, p. 108) governing the assessment on employers in timber-driving and in forest operations respectively, have been amended by Orders gazetted Feb. 5, 1944. The levy, imposed to pay the expenses of the Minimum Wage Commission, has been reduced from one-eighth of one per cent of the payroll to one-tenth of one per cent. The modification is to govern the levy on all wages paid from Jan. 1, 1943, in timber driving, and from May 1, 1943, in forest operations.

Recent Legal Decisions Affecting Labour

Alberta Court Holds Seven Days' Notice of Dismissal to be Sufficient

A DECISION on November 16 of The Alberta Supreme Court, Mr. Justice Lunney dissenting, was based on an interpretation of two provisions of the National Selective Service Civilian Regulations, and the Masters and Servants Act of Alberta. The latter statute stipulates that if the employee has been improperly dismissed, the court may direct the employer to pay wages found to be due on this score, not exceeding six months' wages. Section 202 subsec. (1) (a) of the Selective Service Regulations requires an employer to give seven days' notice before dismissing an employee, and subsec. (10) stipulates that "the provisions of this part with respect to the giving of notice of separation shall not supersede any law, statutory or otherwise, requiring a longer notice."

C. W. Twamley was hired by certain construction companies on August 30, at $500 per month. On October 25 he was given a week's notice of separation from employment, and released November 1. He then lodged a complaint under the Masters and Servants Act, claiming wages amounting to $383.00.

The Magistrate held that Twamley had not had reasonable notice in accordance with common law, and ruled therefore, that according to the Masters and Servants Act the plaintiff was entitled to wages unpaid because of improper dismissal. Reasonable notice in this case he held to be two weeks. He, therefore, ordered Twamley paid $134.27, or the difference between two weeks' salary and what Twamley had already received during his week's notice. On appeal by the defendant companies, the District Court upheld this judgment.

The case was appealed to the Supreme Court of Alberta which considered, in Mr.

Justice Ford's words, that there was "in the province no law which gives the right to a month's or any other definite period of notice to terminate a monthly hiring in the absence of a stipulation in the contract of hiring, though there may be in some of the other provinces such a law to which subsection (10) [Selective Service Regulations] would apply." Counsel for the plaintiff had cited three cases showing the common law practice regarding reasonable notice of dismissal. In the first one it had been decided that "as the hiring was a monthly one, a month's wages . . . was the utmost which could properly be allowed." In the second one the ruling had been similar, that "if entitled to notice, it could not, as appears, have been more than one month's notice." The last case cited pointed out that less than a month might be reasonable notice in the case of a monthly hiring. However, Mr. Justice Ford reasoned from these cases that the only law to which subsection (10) could possibly apply, namely common law, did not fix any definite notice, and therefore it could not be said that a longer notice than seven days was required by any law of the province. In his view, "the regulations have substituted for the indeterminate and speculative idea of what is reasonable, which depends, like all questions of fact, upon the finding of a Judge or Jury in any particular case, the control of the proper selective service officer, both as to the giving of a notice of separation and, within the limit prescribed, as to its length . . . To give effect to the respondent's contention . . . would render nugatory the provisions of the regulation giving the selective service officer authority to permit the termination of employment. It cannot be assumed that, in respect of such an important piece of necessary regulation in time of war, the framers of the regulations have set up a control only to wipe it out entirely with respect to all hirings terminable on reasonable notice." The court decided that the argument on behalf of the respondent was thus based upon a misconception, and the case was not one to which the Masters and Servants Act applied, since there was no evidence of improper dismissal. Therefore, in the decision, the appeal with costs was allowed, and the order of the magistrate and of the District Court Judge set aside. *Twamley v. Metcalfe Construction Co. et al.* (1944) Western Weekly Reports 54.

B.C. Court Upholds Validity of Election of Union Officers held at Special Meeting after Regular Elections Voided

The British Columbia Court of Appeal on November 2, 1943, rendered judgment on two appeals from decisions in cases arising out of a dispute within the Boilermakers' and Shipbuilders' Union of Canada, Local No. 1, and between that union and the Canadian Congress of Labour. The first appeal, which was from a decision that an election of officers held in February, 1943, was illegal, was allowed. The lower court, in declaring the election invalid, had ordered the then officers to make an accounting of the funds to the former officers. The second appeal arose out of the fact that the local union had applied unsuccessfully to have the order amended by substituting itself for the former officers as the party to whom the accounting should be made. This appeal was dismissed with costs.

The difficulties in the local union became acute after the annual elections of December 14-19, 1942, at which most of the 1942 officers were defeated. On December 28, the president of the Canadian Congress of Labour with which the local was affiliated, appointed the vice-president and the regional director of the Congress as administrator of the local with power to appoint an administration board. On December 31, the administrator ruled all offices of the local vacant and appointed a board. A few days later an injunction was obtained from the British Columbia Supreme Court restraining the newly-elected executive from carrying on in office. By consent judgments of the same Court dated February 2, 1943, the December elections were voided but the appointment of the administration board was also held invalid.

Meantime, the Executive Council of the Canadian Congress had appointed a commission of inquiry with full power to make and enforce decisions. On January 25, the commission suspended the charter of the local and proposed to reorganize the workers by setting up "local unions on a strictly industrial basis in each yard."

At a regular meeting of the local on February 4, 1943, it was decided to hold a special meeting on February 12 to consider the advisability of electing officers for 1943. At this meeting it was agreed to have a nomination meeting on February 22 and an election on February 23. Unsigned notices setting forth the time, place and purpose of the meetings were then posted. Most of the candidates elected in December were re-elected.

Certain members of the 1942 executives who had been defeated in December (plaintiffs) brought action for a declaration that the February election was void, for a return of equipment and for an accounting of union money allegedly collected by the defendants. Mr. Justice Sydney Smith allowed their claims in a judgment rendered on March 20, (1943) 2 Western Weekly Reports 35. His reasons were, first, that under a by-law governing the

local union an election may be held only at the regular December meeting, and second, that the notice given for the February nomination and election was not sufficient to meet the requirements of another by-law regarding special meetings. At the same time, Mr. Justice Smith held that the suspension of the local union by the investigating commission was invalid because under the constitution of the Canadian Congress of Labour a charter may be suspended only for non-payment of the capitation fee unless the Executive Council itself sits as a trial tribunal and the local has an opportunity to be represented.

No further action was taken on this last finding, but the officers elected in February (defendants) appealed the decision that their election was invalid. With Chief Justice McDonald dissenting, the Appeal Court allowed their appeal.

Mr. Justice Robertson, speaking for the majority, stated that the provision of the by-laws for holding elections in December was directory only and not imperative. It was unreasonable, he believed, to hold that if an election was not held in December the local would be without officers for a year.

Regarding the sufficiency of notice, he observed that the union members, numbering about 13,000, were employed in several shipyards. "In these circumstances, the best way of giving notice of a meeting to the members was by posting notices, convening such a meeting, in conspicuous places in the shipyards." The evidence showed that this had been done. While the notices were unsigned, the members knew that there were no officers and they therefore would not expect signed notices.

As regards another objection that the by-laws premitted a special meeting to be called only by the president or secretary-treasurer at the request of five members, the Court took the view that in the absence of officers the management of the local was in the hands of the members, and the members at their regular meeting had a right to call a special meeting, notwithstanding the lack of an express provision to this effect.

Chief Justice McDonald agreed substantially with the majority except in regard to the sufficiency of the notice of the special meetings. The defendants, he stated, had merely shown in cross-examination that the plaintiffs and their witnesses had seen the notices only in yards in which they worked, a fact which was "perfectly consistent with these notices being quite inconspicuous" even in those yards. The Chief Justice also laid some stress on the fact that notices were unsigned. "The members had a right to know who was acting, and were entitled to something more than anonymous communications which might have been posted by some practical joker or some busybody, perhaps outside the union."

The Court was unanimous in dismissing the appeal for the substitution of the local union for the defendants as the party to whom the accounting ordered by Mr. Justice Smith should be made. After the February election was held invalid by Mr. Justice Smith, a new election was held on April 15, 1943, and most of the defendants were again elected. It was therefore claimed that the accounting should not be made to the plaintiffs who were no longer officers or even members of the union. Mr. Justice Robertson assumed for the purposes of the judgment only that the union was a legal entity with the right to bring action, but he nevertheless held that "a judgment duly pronounced as the Court intended and duly entered cannot be set aside except on appeal . . . and it cannot be amended except where there has been a slip in drawing it up and where there has been an error in expressing the manifest intention of the Court." Chief Justice McDonald discussed at length the status of the local union. He found that "it produced no evidence whatever of its status, and on that ground alone I would hold that its motion was rightly dismissed." *Stephen et al. v. Stewart et al.* (1943) 3 Western Weekly Reports 580.

British Docks Regulations require Signaller for Crane to be Present throughout Operations

A dock worker's appeal from a decision of the Liverpool Court of Passage which dismissed his action for damages was allowed by the Court of Appeal in England on September 29. The case was reported in the Ministry of Labour Gazette for November.

The docker had been injured when he was struck by a sling while engaged in unloading a ship. He alleged breached of the section in the docks regulations, made under the authority of the Factories Act, which stipulates that "when cargo is being loaded or unloaded by a fall at a hatchway, a signaller shall be employed, and where more than one fall is being worked at a hatchway a separate signaller shall be employed to attend to each fall." The employer had engaged a signaller whose duty it was to inform the craneman when the "stool" or platform on to which the docker unloaded each sling was cleared and ready for another sling load. At the time of the accident, however, the signaller was away having some refreshment and the sling arrived before the "stool" was ready.

The lower Court held that the employer had complied with the regulation by "the mere employment" of a signaller on the day of the

accident for the operation in question, but the Appeal Court considered that this was too narrow a construction of the regulation. It was of the opinion that the true construction was that a signaller was not merely to be engaged but that he should be actually at work during the whole process, and if he was not there the respondents had failed to discharge their duty under the Regulation. *Ashworth v. McQuink and Co. Ltd.*, Court of Appeal, September 29, 1943.

English Court holds Builders of Submarine, not Subcontractors, Liable for Accident

The King's Bench of the High Court of Justice in England awarded damages to two widows of men lost in the submarine "Thetis" for negligence on the part of the builders, Cammell Laird and Co., Ltd., in not inspecting the vessel before it was launched, and thus discovering that the test cocks were blocked with paint. Another action by the same widows against the subcontractors who had done the painting, Wailes Dove Bitumastic Co. Ltd., was dismissed.

A torpedo tube had been painted in such a way that its test cock had become blocked with paint and no water could pass from it. The result was that the tube was thought to be empty when it was actually full of water. Consequently, on the diving trials the submarine struck the bottom and 99 men perished.

The Court held that although the careless painting of the torpedo tube had led directly to the death of the plaintiffs' husbands, yet the Bitumastic Company were not under any liability to the two men. The Company was not brought into any proximity with the deceased for there was sufficient time for the defect to be observed before the vessel was put in use.

Dealing with the action against Cammell Lairds, the Court noted that under their contract to build the ship for the Admiralty, the firm was charged with the responsibility of seeing that she was fit to go to sea. There had been ample opportunity and an engineering staff fully qualified to ensure that the painting by the subcontractors had left the safety devices in good order. The failure of the company to exercise this care had exposed the crew to unusual danger. The Court ruled that each of the plaintiffs had succeeded in establishing liability on the part of Cammell Lairds for the loss of the wage-earner on whom she depended. Judgment was therefore entered for the plaintiffs against this company. *Duncan v. Cammell Laird & Co. Ltd., Craven v. same. Duncan v. Wailes Dove Bitumastic Ltd., Craven v. same.* High Court of Justice, King's Bench Division, September 29-30, October 1, 21, 22, 1943.

Appeal Court Upholds Lower Court's Interpretation of "Trade Dispute" in British Conditions of Employment and National Arbitration Order

The meaning of "trade dispute" according to the definition given in the Conditions of Employment and National Arbitration Order of July 18, 1940 (L.G. 1940, p. 760) was the point at issue in a recent case before the English Court of Appeal, reported in the British "Ministry of Labour Gazette" for December, 1943. The Order provides that the Minister of Labour may refer to the National Arbitration Tribunal a trade dispute or "dispute or difference between employers and workmen, or between workmen and workmen connected with the employment or non-employment or the terms of the employment or with the conditions of labour of any person." The Tribunal is appointed from panels representing employers, workers, and the general public.

The dispute in question arose between the Keable Press Ltd., publishers of the "Daily Worker" and the National Association of Operative Printers and Assistants, following the refusal of the Company to re-employ a member of the union when the ban on the paper was lifted and publication resumed. Acting on the instruction of a union officer, a number of the employees refused to begin work until Howard, the employee in question, was reinstated. The Company then agreed to take him on provisionally, pending negotiations. The failure of later negotiations resulted in Howard's discharge and the union reported the dispute to the Minister.

The dispute was then referred by the Minister to the National Arbitration Tribunal where the Company argued that, since the dispute was not between the employer and his workman but between the union and the employer, it was not a trade dispute within the meaning of the Order. As the Tribunal had no power to decide this question, the proceedings were adjourned so that the Company could apply for an Order of Prohibition preventing the Tribunal from dealing with the case. This application was refused by the Divisional Court on the ground that the evidence showed that a trade dispute existed. (L.G. Aug. 1943, p. 1178.)

The Company then took the case to the Court of Appeal. The Court pointed out that it had been sworn in evidence that the union had been acting on behalf of its members and with their approval in insisting on Howard's reinstatement. In addition, when the men came out on strike they showed that they were backing up the union in its demands and adopting the action of the union as their own. Consequently the court dismissed the appeal, ruling that there was a dispute between the

employer and his workmen and therefore a "trade dispute" within the meaning of the Order. *The King v. the National Arbitration Tribunal. Ex parte The Keable Press Ltd.* Court of Appeal, October 29 and November 1, 1943.

Decisions of the Labour Court of Ontario

Votes Ordered among Employees of Two Companies

Service Stations Equipment Company, Toronto

On January 8, Mr. Justice McFarland ordered a vote among the employees of the two Toronto plants of the Service Stations Equipment Company Limited to determine (1) if they wished to be represented by a collective bargaining agency, and (2) if so, whether they wished to be represented by a local of the United Steelworkers of America which had made the original application for certification or by the Employees Association of the Toronto Plants of the Canadian John Wood Manufacturing Company Limited and Service Stations Equipment Company Limited which had intervened.

Organization of the intervening association was begun sometime before August, 1943, and on October 31 it made an agreement with the defendant company. The terms of the agreement were made known to the employees before it was executed, but no effort was made to determine which organization the employees wished to have to represent them.

The applicant argued that the agreement was of no effect because it was concluded after the present proceedings were instituted (September 11, 1943) and, on the other hand, the intervener claimed that the proceedings themselves were invalid because they were instituted after negotiations were already under way for the conclusion of the agreement. The Court rejected both arguments. The first, it stated, would permit a union to interrupt any negotiations merely by filing an application for certification, while the second would permit an intervener to hold up proceedings before the Court merely by entering into an agreement.

The applicant also claimed that the intervener was improperly influenced by the company in that it had received financial assistance and its agents had been granted the privilege, which had been denied to the applicant's agents, of soliciting members during working hours. The intervener submitted that the applicant had no members in good standing because there was no evidence that anyone had paid the admission fee which is required by its constitution. The Court did not consider that the first allegation was sustained by the evidence, and it dismissed the second point as not "sufficiently important to influence the proceedings."

Its conclusion was:

> The fact is that there are two bodies in these plants, each claiming certification and each having a certain following. According to the evidence no proper vote has been taken and in my opinion such a vote should be taken.

Local 3062, United Steelworkers of America v *Service Stations Equipment Company Limited, et al* (1944) Ontario Weekly Notes 64.

Hamilton Works, Steel Company of Canada

On January 10, Mr. Justice MacKay ordered a vote to be taken among the hourly and production employees at the Hamilton works of the Steel Company of Canada. A local of the United Steelworkers of America had applied for certification as the collective bargaining agency for these workers and an organization called the Independent Steelworkers Association had intervened.

For some years there had been a works council in the plant, composed of eleven members elected by the employees and eleven nominated by the company. Any matter on which there was a tie vote was referred to the president of the company for decision.

At the election of employee representatives held in November, 1942, eight of the 11 representatives returned were members of the applicant union. On January 17, 1943, the union asked the management for recognition. A few days later a resolution was submitted to the works council recommending that the company and the applicant union join in an application for an immediate vote to determine a collective bargaining agency. The employee representatives voted for the resolution but the employer representatives voted against it. It was submitted to the president of the company, who decided against it. Shortly afterwards nine of the eleven elected members resigned.

In the November election, 1,616 employees, or about one-third of those eligible to vote, voted for candidates who were members of the union. At the time of the hearing 1,360 membership cards had been issued by the union and the paid-up membership was 259. The Court held that this evidence was sufficient to entitle the applicant to a vote. Membership in a union was not a conclusive indication of the desire of the employees to be represented by that union and the Act spoke only of representation, not of membership.

The applicant union argued that the intervening association was merely a continuation of the former employee representation plan and therefore could not be considered a collective bargaining agency. The judge found no evidence that the company attempted to interfere with the association's decisions or acts to the detriment of the employees. He was not prepared to say whether the intervener was or was not a collective bargaining agency within the meaning of the Act but he considered that the matter could be most satisfactorily settled if its name was placed on the secret ballot and the employees were able to express their wishes without fear of discrimination. *Local 1005, United Steelworkers of America* v *Steel Company of Canada Ltd. et al,* (1944) Ontario Weekly Notes 72.

Union Violating Order Against Electioneering Refused Certification

On January 6, Mr. Justice Greene refused to certify a local of the United Automobile, Aircraft and Agricultural Implement Workers of America as the collective bargaining agency of the office employees of the Ford Motor Company of Canada, on the ground that it had violated an injunction he had issued prohibiting electioneering and organizing activity pending the taking of a vote.

At the direction of the Court, a vote had been taken on November 15 to determine if the employees wished to be represented by the applicant union or by the Formocan Employees' Association which had intervened in the case. The union had received 355 votes as against 327 for the Formocan Association. The Court discovered, however, that on October 28 the union had issued a publication called "Ford Staff", and "if the publication of this document and the distribution of it was not electioneering in the sense of an invitation to the employees to support the Applicant Union, and also somewhat of an attack on the opposing Union, the Intervener, then I have lost my power to understand English."

The Court also refused to certify the intervener because it had not obtained a majority of the votes. No disposition was made of the case for the time being. *Local 240, United Automobile, Aircraft and Agricultural Implement Workers of America* v *Ford Motor Company of Canada Ltd., et al,* Jan. 6, 1944.

Labour and Industry in New Zealand

COPIES of the New Zealand Official Year Book for the year ending September 30, 1943, reached Canada early in January. Included in the wide range of subjects covered is the following information regarding industrial conditions.

Wage Legislation

Since 1918, when the War Legislation and Statute Amendment Act came into effect, wages are regulated in accordance with the movements in the cost of living. At that time "the lag between prices and wage rates was partially eliminated, and consequently sharp increases took place." Reductions followed during the depression years. In 1932, the Industrial Conciliation and Arbitration Amendment Act made provision for the review of existing wage awards. But as some classes of workers, notably farm workers and railway employees, were not covered by awards, a few suffered further wage reductions. Various adjustments were made during the succeeding eight years and in 1940 the Rates of Wages Emergency Regulations were applied by a Court of Arbitration and "an increase of 5 per cent in all rates of remuneration in awards, industrial agreements, and apprenticeship orders as from the 12th of August, 1940" was decided upon.

Industrial and Trade Unions

There were 267 industrial unions of employers with an aggregate membership of 11,802 at the close of 1941. This was an increase of 172 per cent over the 1935 total. The number of industrial unions of workers at December 31, 1941 was 419, with a total membership of 231,049. The large membership was attributed in part to the Act of 1936, "which provided for compulsory union membership on the part of workers subject to an award or industrial agreement". There was a slight reduction in membership in 1940 and 1941 "consequent on the prosecution of the war."

Industrial Disputes

The number of workers involved in industrial disputes for 1939, 1940 and 1941 were 15,682, 10,475 and 15,261, with working days lost for the same years, 53,801, 28,097 and 26,237 respectively. These figures indicate the brief duration of labour difficulties.

Prices and Price Control

Activities of Wartime Prices and Trade Board

Report to Parliament Describes Activities of Board in Holding Price Ceiling and in Ensuring Supplies of Civilian Goods

THE work of the Wartime Prices and Trade Board in holding the price ceiling and obtaining and distributing supplies of civilian goods is described in a recent Report to Parliament. This is the second Report to Parliament, and covers the period from April 1, 1943 to December 31, 1943, the first Report having reviewed the activities of the Board from the beginning in September, 1939 to March 31, 1943.

A feature of the Report is the story of how supplies of essential civilian goods are obtained and distributed. As the introductory review section points out, "all the pricing policies of the Board are in a very real sense in the interest of supply.... but in many cases the maintenance of adequate supplies needs many more direct measures". After many steps have been taken to get the materials and labour, and the goods are produced, "the arrangement for their fair distribution may raise a whole set of new problems". The types of measures used to "get the goods" and to distribute them are described in the chapters on Supply Policy and Distribution Policy respectively, and specific examples will be found in the various chapters on Foods, Apparel, Wood and Paper Products, and Metal Consumer Goods.

The major price problems during the nine months are discussed under two main heads: rising costs at various stages of production and distribution; and the pricing of goods not on the market during the basic period. In some cases the high costs described in the previous Report have fallen, e.g., ocean freight rates and war risk insurance. Other factors, however, such as the difficulties in obtaining materials, labour and transportation, and higher labour costs and higher farm prices, have created serious pressures on the price ceiling. The general principles followed in dealing with these problems are described in the chapter on Price Policy and specific examples will again be found in the chapters discussing different commodities.

Other chapters in the Report cover Rentals, Consumer Credit, and Enforcement. The final chapter reviews price movements from August, 1939 to December, 1943. The general wholesale index, as shown in the tables, increased 41·8 per cent since August, 1939, but only 5·6 per cent during the nine-month period, and 11·9 per cent since the basic period of the price ceiling. Canadian farm prices rose 14·6 per cent during the nine-month period, but the food group rose only 3·9 per cent. As pointed out in the introductory review section, the higher returns received by farmers for their products would have substantially increased the cost of living without the use of such measures as subsidies and Government purchasing. The cost of living index stood at 118·4 (August, 1939=100) on December, 1943, an increase of 2·1 points taking place between March and December, 1943. The final section in the chapter explains the dominating influence of changes in food prices on changes in general living costs during the war.

A great deal of organizing is necessary to ensure that essential needs are satisfied and that the best use is made of materials, goods and services in short supply. For example, to obtain the necessary raw materials from abroad requires negotiations with the Combined Boards in Washington which allocate United Nations' supplies and with Government agencies in the United Kingdom or the United States, or both. This involves the presentation of Canada's complete production and requirements picture. The materials, once allocated, may have to be bulk purchased, and then arrangements made for shipping space. Having got the materials to Canada, they must be divided, together with Canadian materials if they are produced domestically, according to the needs of the armed forces and the civilian population. Arrangements are then made for allocating materials to the various manufacturers, obtaining labour priorities where necessary, and eliminating wastage of materials and labour. In some cases "production directives" or informal controls of a similar nature are required.

Procedures for Obtaining Supplies

All the various procedures for obtaining supplies are described under three main headings in the chapter on Supply Policy: "Obtain-

ing essential imports"; "Allocating supplies between military and civilian needs"; and "Using available civilian supplies to best advantage". In the section on Imports it is revealed that Administrators of the Board serve as the Canadian members of some of the committees of the Combined Production and Resources Board in Washington (e.g. textiles, hides, leather and footwear, farm implements), and represent Canadian interests in the allocation of the more essential civilian goods. Through the medium of the Joint Materials Co-ordinating Committee (Canada-United States) Canadian supplies and requirements are submitted to the Combined Raw Materials Board. Since late in 1943, Canadian representatives have sat as members of the commodity sub-committees of the Combined Food Boards, a situation which was recently formalized by the addition of Canada as a full member of the Board.

Also, through the Canadian Division of the War Production Board in Washington, supplies of raw materials and civilian goods produced in the United States are allocated to Canada. The Washington Branch of the Wartime Prices and Trade Board maintains close and continuous contact with the Canadian Division War Production Board and thereby ensures that statements of Canadian requirements are presented directly to divisional requirements committees dealing with various commodities. Also, the Board maintains contacts in the United Kingdom with the Board of Trade and the Ministry of Supply and obtains allocation of British supplies required by Canada.

As explained in the Report, an allocation of supplies does not guarantee that the quotas will be imported. In the case of woven cotton fabrics from the United States, for example, it was necessary to arrange for certain priority assistance designed to ensure that the quota was filled and not exceeded. In many cases bulk purchases are the means of implementing international allocations of supplies. For example, all raw wool and practically all imports of woollen yarns for civilian purposes are bulk purchased by the Canadian Wool Board, and the Wartime Food Corporation has been reorganized for the bulk purchase of fresh fruits and vegetables. Most commodities are bulk purchased by the Commodity Prices Stabilization Corporation; it assumes all risks, and is responsible for obtaining the necessary shipping space which is allocated by the Shipping Priorities Committee.

Allocating Supplies to Military and Civilian Uses

Having got the materials, various procedures have been established for allocating productive resources and supplies between the military and civilian sectors of the Canadian economy. For example, the National Textile and Leather Requirements Committee which was formed in May, 1943, allocates available supplies of textiles and leather between the armed services, the civilian population and requirements under the Mutual Aid program. The Food Requirements Committee considers all major questions of policy connected with food production and supply in Canada and with the supply of Canadian foodstuffs to other nations.

In the case of metals, lumber and other raw materials controlled by the Department of Munitions and Supply, administrators of the Board have, in most cases, applied directly to the controller concerned for allocations of materials. As the supply of certain metals has eased, production programs have been arranged by the Board to ensure supplies of certain essential civilian goods; materials and plant facilities are allocated by the Wartime Industries Control Board. To ensure the best use of civilian supplies, materials may be allocated, formally or informally, to the different manufacturers; non-essential uses of materials and non-essential manufacturing operations eliminated through various simplification and conservation measures; and production directives issued when necessary.

Civilian Distribution

After every feasible effort has been made to increase supply, there will still be shortages, due to the large war needs and to the increased demand from civilians. Some control of distribution is necessary "to ensure that goods in short supply are distributed on as fair a basis as possible". The various measures described in the chapter on Distribution Policy have been designed to see "that highly essential needs are given priority, that supplies are not consumed at or near the point of production to the detriment of other areas, that discrimination between large and small distributors and different kinds of distributors does not develop within the trade, and that consumers are provided with a fair share of essential goods with the least shopping inconvenience".

To meet the problem of distributing goods equitably among retailers and regions the Board has adopted the "policy of equitable distribution." When fair distribution throughout the trade fails to achieve fair distribution among consumers, the policy may be supplemented by consumer rationing. The rationing of meats, "preserves", evaporated milk, and canned vegetables is described in some detail.

Price Policy

The chapter on "Price Policy" considers the problems of production, imports and distribution to the extent that they can be met by price policy. In dealing with the two major problems—rising costs, and the pricing of goods not on the market during the basic period—the Board has continued to adhere to the basic period principle. In brief, the policy is to distribute whenever possible the increased costs among the various sections of the trade, and also to achieve the maximum degree of economy by eliminating unnecessary manufacturing and distributive practices. When this has been done, and if continued production or importation is considered necessary, relief may be given by the payment of subsidy, by Government bulk purchasing, by the remission of import duties and—in very limited cases—by price increases. As explained in the previous Report, "the real beneficiary of the subsidy is the consumer, but since it would be an impossible administrative task to pay a subsidy directly to the consumer, the actual payment is made to producers or dealers on condition that they maintain supplies and carry out the policy of the price ceiling". New developments in subsidy policy are described in the chapter.

The Board has laid down principles and procedure for fixing the maximum price of goods coming on the market which were not available during the basic period. Following a brief description of the procedure, the chapter outlines the steps taken by the Board to maintain as far as possible the supply of established goods, established trade descriptions, and the price-quality relationships of the basic period.

Other price problems, principally in the field of primary products, are described more fully in the chapters on Food, and Wood and Paper Products. In the case of primary products where there has been a confused price situation, sometimes aggravated by rising costs, "it has been desirable to replace individual ceilings by standard maximum prices and controlled markups in order to obtain a more clearly definable and enforceable price structure" (e.g. meats, pulpwood). Seasonal price increases have been permitted by the Board in the case of certain foods to cover the extra cost of storage and loss through shrinkage during the off-season period (e.g. potatoes).

The commodity chapters—foods, fuel, apparel, etc.—serve to illustrate the problems of price, supply and distribution in concrete situations. In the case of meats, for example, increased civilian demand and the requirements of Britain led to meat rationing. A more specific and effective system of price control was developed, a system which largely overcame many of the problems which had proven so intractable in the earlier stages of the price ceiling. Meat rationing, however, intensified the problems of price control for unrationed meats and meat substitutes. The section on lumber in the Wood and Paper Products chapter illustrates the price and supply problems arising from increasing raw material costs in the industries using lumber. Various measures were taken to cope with shortages of raw material and the considerable pressure on costs in lumbering, pulpwood and industries based on them. The chapter on Apparel illustrates the great organizing work involved in obtaining necessary materials from abroad and of pricing the new lines coming on the market.

Additional information is provided in the appendices and charts. Of considerable importance are the figures given for subsidies paid from December 1, 1941, to December 31, 1943, by the Commodity Prices Stabilization Corporation, and for net trading losses of the Corporation and other associated companies on commodity operations during the same period. Administrative expenditures of the Board are shown, and index numbers of wholesale prices and the cost of living in the two wars. The charts show changes in wholesale prices and in the cost of living in various periods.

Prices, Retail and Wholesale, in Canada, January, 1944

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

THE Dominion Bureau of Statistics cost-of-living index dropped 0·3 points to 119·0 between December 1 and January 3, (1935-39= 100). This reduced the wartime increase from 18·4 per cent to 18·1 per cent. The food index moved 1·2 points lower to 131·5, due to sharp declines in egg prices, which overbalanced small gains for butter, meats and fresh vegetables. There was a decline of 0·4 to 118·4 in the home-furnishings and services index, contributed by the furniture section. Fuel and lighting moved up 0·8 points to 112·7 because of higher coal prices, while an advance in health costs was responsible for a gain of 0·3 to 108·9 in the

miscellaneous series. Two groups, rentals at 111·9 and clothing at 121·1, continued unchanged. (*See* Table I.)

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a $4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1943

BASE: PRICES IN JULY, 1914 AND IN AUGUST, 1939=100

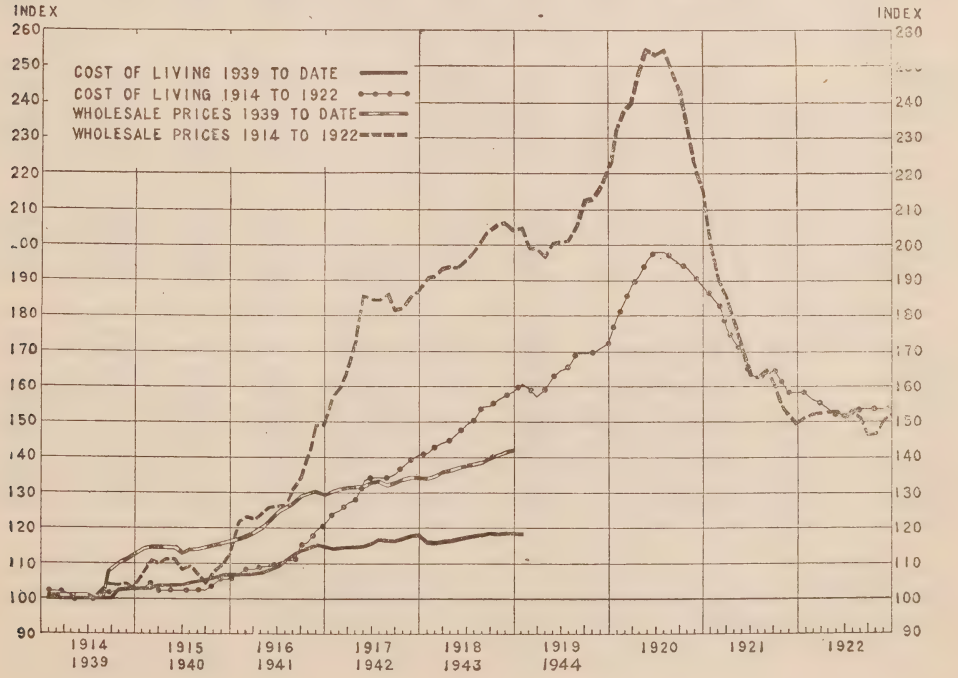

TABLE I—DOMINION BUREAU OF STATISTICS INDEX NUMBERS OF THE COST OF LIVING IN CANADA

PRICES AS AT THE BEGINNING OF EACH MONTH

—	Adjusted to base 100·0 for August 1939	On base of average prices in 1935–39 as 100*							Retail Prices Index (Commodities only)‡
		Total	Food	Rent	Fuel and Light	Clothing	Home Furnishings and Services	Miscellaneous	
1913		79·7	88·3	74·3	76·9	88·0	70·3		
1914		80·0	91·9	72·1	75·4	88·9	70·3

* Descriptions and units of sale apply to January, 1944, prices.
† Nominal price.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-Living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between $600 and $2,800 in 1938. The average expenditure was $1,413.90, divided as follows: food (31·3 per cent), $443; shelter (19·1 per cent), $269.50; fuel and light (6·4 per cent), $90.50; clothing (11·7 per cent), $165.80; home furnishings (8·9 per cent), $125.70; miscellaneous (22·6 per cent), $319.40.

The last-named group includes health (4·3 per cent), $60.80; personal care (1·7 per cent), $23.90; transportation (5·6 per cent), $79.30; recreation (5·8 per cent), $82.10; life insurance (5·2 per cent), $73.30. Other expenditure not directly represented in the index brought the total family living expenditure to $1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home furnishings, etc., with their weights, was published in the Labour Gazette for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the Labour Gazette under the title, *Price Control in Canada.*

(c) The basis of these figures is the record of rents collected in the 1941 Census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the change indicated by these reports.

(d) Rents marked (d) are for apartments or flats. Other rent figures are for single houses. Apartment and flat rents have been shown where this type of dwelling is more common than single houses.

† The Dominion Bureau of Statistics issues reports on prices with comprehensive figures as follows:—monthly, Prices and Price Indexes (Canada); annually, Prices and Price Indexes (Canada and Other Countries)

* Prior to 1926 number of commodities was 236; 1926 to 1933 inclusive, 502, and since January, 1934, the number is 567.

Wholesale Prices

Strength in vegetable products, iron and steel and non-metallic minerals balanced weakness in animal products and chemicals and allied products to hold the general wholesale price index unchanged in January at 102·5 (1926=100). Firmer quotations for rye and potatoes were sufficient to advance the vegetable series 0·2 points to 95·1, while a rise from 115·8 to 116·0 for iron and steel products was due to higher freight rates for steel sheets. The group index for non-metallic minerals moved 0·6 points higher to 102·9, due to relatively sharp increases in Nova Scotia coal and coke which outweighed a decline in cement at Winnipeg. Continued seasonal weakness in eggs was almost entirely responsible for a drop of 1·3 points to 108·3 in animal products despite scattered increases for live stock, meats and poultry and milk and its products. Chemicals and allied products declined 0·1 to 100·1, due to a reduction in inorganic chemicals.

The Canadian farm products price index moved 0·6 points below the December, 1943, wartime peak to 104·0 in January. A drop of 2·3 points to 123·8 for animal products reflected sharp seasonal weakness for eggs. Field products were firmer, moving up 0·4 to 92·1, due to gains for potatoes, onions and hay.

Fatal Industrial Accidents in Canada During the Fourth Quarter of 1943

DURING the fourth quarter of 1943 there were 295 fatal industrial accidents, including deaths from industrial diseases, reported by workmen's compensation boards, etc. This compares with 355 fatal accidents in the fourth quarter of 1942. Of the 295 fatalities in the period under review, 115 occurred in October, 96 in November and 84 in December. Fatal accidents during each year are recorded by quarterly periods in the issues of the LABOUR GAZETTE for May, August and November of that year, and in February of the following year.

The supplementary lists of accidents not reported in time for inclusion in the reports covering the periods in which they occurred, contain 33 fatalities for the first three quarters of 1943 and five fatalities for 1942.

In this series of reports, it is customary to record industrial accidents under the dates of their occurrence, and fatal industrial diseases under the dates on which they prove fatal.

Information concerning accidents was received from the provincial Workmen's Compensation Boards, the Board of Transport Commissioners, certain other official sources, as well as from the correspondents of the LABOUR GAZETTE and newspaper reports classified by groups of industries, the fatalities occurring during the fourth quarter of 1943 were as follows: agriculture, 22; logging, 34; fishing and trapping, 8; mining, non-ferrous smelting and quarrying, 55; manufacturing, 51; construction, 25; electricity, gas, and water production and supply, 3; transportation and public utilities, 63; trade, 17; service, 17.

Of the mining accidents, 22 were in "metalliferous mining", 24 in "coal mining", seven in "non-metallic mineral mining and quarrying, n.e.s.", and two in "structural materials".

Of the accidents in manufacturing, four were in "vegetable foods, drink and tobacco", one in "animal foods", two in "leather, fur and products", one in "rubber products", seven in "saw and planing mill products", one in "wood products", four in "pulp, paper and paper products", one in "printing and publishing", 15 in "iron, steel and products", two in "non-ferrous metal products", three in "non-metallic mineral products", four in "chemical and allied products", five in "shipbuilding", and one in "miscellaneous products".

In construction there were 10 fatalities in "buildings and structures", 11 in "highway and bridge", and four in "miscellaneous".

In transportation and public utilities, there were 32 fatalities in "steam railways", 18 in "water transportation", one in "air transportation", and 12 in "local and highway transportation".

In trade there were seven fatalities in "wholesale", and 10 in "retail" trade.

Of the fatalities in service, eight were in "public administration", one in "recreational", one in "laundering, dyeing and cleaning", one in "custom and repair", five in "personal, domestic and business", and one in "professional".

There was no serious disaster resulting in the loss of a large number of lives during the period under review. Accidents involving the loss of two or more lives were as follows:

At Glace Bay, N.S., on October 2, five coal miners were killed when they fell from a lift down a 500-foot shaft. Another two coal miners lost their lives at Coleman, Alberta, when trapped in a mine cave-in on October 18.

Near Cochrane, Ont., on December 11, two labourers engaged in logging, were killed by an explosion in an oil house while taking gasoline from a drum.

On October 17, two fishermen were drowned near Thornbury, Ont., when their boat capsized. Another two fishermen were drowned when a motorboat overturned in a storm, off Yarmouth, N.S., on December 1.

As a result of a fire following an explosion in a candy factory, in Toronto, on December 22, two workers died of burns. At Sydney, N.S., on November 13, two ironworkers were crushed under a loading crane when it collapsed while being repaired. Following an explosion in a fireworks plant at Cooksville, Ont., on December 30, two workers died of burns.

Two labourers, on highway and bridge construction, were drowned at Kispiox, B.C., on November 15.

When a train struck a track motor, near Unity, Sask., on October 2, two trackmen were killed. Two railway labourers lost their lives, at Aurora, Ont., on October 8, when struck by the steel arm of a crane. Three seamen were drowned near Canso, N.S., on October 7, when a schooner was wrecked on a reef during a storm. Two men were

drowned when swept off a sandsucker into the harbour at Cobourg, Ont., on November 29.

Supplementary Lists of Accidents

A supplementary list of accidents occurring during the first three-quarters of 1943 has been compiled which contains 33 fatalities of which five were in logging, three in mining, non-ferrous smelting and quarrying, 10 in manufacturing, four in construction, nine in transportation and public utilities, one in trade and one in service. Two of these accidents occurred in January, two in March, three in April, four in May, two in June, six in July, five in August, and nine in September.

A further supplementary list of accidents occurring in 1942 has been made. This includes five fatalities of which two were in mining, non-ferrous smelting and quarrying, one in manufacturing, one in construction and one in transportation and public utilities. One of these accidents occurred in March, one in August, one in September, one in October and one in December.

Importance of Personnel Management in Utilization of Manpower

Address by Mr. A. MacNamara, Deputy Minister of Labour

IN a speech given before Royal Canadian Air Force personnel at Rockcliffe on February 16, Mr. Arthur MacNamara, Deputy Minister of Labour, and Director of National Selective Service, reviewed the importance of personnel management in the utilization of the nation's manpower. The text of Mr. MacNamara's speech is as follows:

One direct effect of modern war has been a keener realization of the important part to be played by personnel administrators in assisting in the maximum utilization of the nation's manpower and helping to guide it to the place it must assume in the war effort, both in the armed forces and among civilians on the home front.

This was found to be true during the first Great War. It was then that the foundation was laid for personnel administration as we know it today on this continent.

Its growth was rapid during the last war. In common with all new movements which grow too quickly and become too widely known without being understood, its functions and its place in the industrial organization structure were not understood very clearly for some time. As a result, charlatans and many different kinds of quacks entered the field and attempted to capitalize on the popularity of the new movement. They caused much harm among employers and others with whom they became associated, and seriously retarded its development.

Fortunately, however, a comparatively small number of the more competent and experienced men continued to function, and chiefly through their efforts, industrial management gradually became convinced of the valuable contribution that systematic and centralized personnel administration could make to industry.

Its development came much more rapidly in the United States than it did in Great Britain or in Canada. There are several reasons for this. Firstly, the industrial operations in the former are more widely scattered geographically, and uniformity of policies and practices is desirable when comparing production and costs. Secondly, there are more large employers of labour.

However, both in Great Britain and in Canada, the field was growing slowly and steadily on a firm foundation, particularly here as we came out of the depths of the depression in 1933. Its development was usually to be found among the larger Canadian companies and in Canadian branches of American corporations.

Development in Great Britain

On the outbreak of the present war, then, we find that in the past two decades personnel administration had become firmly rooted and established in American industry. In Great Britain, where it takes more of a welfare form, it was growing steadily but still not widely accepted. In Canada, the field was somewhat restricted due to the comparatively small number of large employers and the lack of any large number of multiple plants under one ownership in which personnel management is more badly needed. Notwithstanding natural handicaps to its growth, the field of personnel administration had become definitely and firmly established in the two central, industrial provinces of Ontario and Quebec well before 1939.

The war, however, has speeded up its development as it has many other fields of management and production.

Early in 1941, it became obvious to those who were most closely in touch with conditions in Great Britain, that greater emphasis had to be placed on improving the relationship existing between management and worker if maximum results on the industrial front were to be achieved. A scale of production never previously conceived just had to be secured in Britain in those dark, fearful months which followed the sudden collapse of France.

The British Government turned to personnel administration as one of the most valuable tools not already being used to maximum capacity.

Ernest Bevin, the Minister of Labour and National Service, who was formerly General Secretary of the Transport and General Workers' Union, stated in the British House of Commons:

"In the layout of our war effort sufficient attention was not paid to the personnel problem...The longer the war goes on, the more necessary it becomes to pay greater regard to this personnel side of industry. The absence of a proper understanding of the problem has been one of our greatest handicaps in this great struggle. Hence my additional plea for the personnel manager, who should be specially trained to have an equal position in industry with other members of the executive. Indeed, I am sure—and I would emphasize this—that our post-war position will be materially helped and the future prospects of British industry enhanced by a full appreciation of this important fact."

Later in 1941, the British Government arranged for financial assistance to be given for the training of selected persons in personnel management.

Two years later, in October, 1943, after being able to judge the effect of the personnel training program, and of the value of a sound, practical application to Britain's production problems, Mr. Bevin made the following statement during a debate in the House:

"I have insisted upon personnel management which, I believe, if persisted in now and maintained after the end of the war, and given a proper executive place in industry, will be one of the saviours of British industry, now and in the future."

Situation in Canada

So much for the situation in Britain. The same can be said for Canada. The Canadian Government, also recognizing the contribution that this phase of management could make to the war effort, followed the lead of Great Britain, and since early in 1942, the Department of Labour of Canada has sponsored and financially aided practical, short courses in this field. Seven universities, from coast to coast, have co-operated in conducting twenty such courses. The instructors have been drawn chiefly from the most experienced personnel managers in all parts of Canada and from the United States.

The Canadian Government has given leadership and encouragement to the expansion of sound personnel management but has refrained —and I think most wisely—from the use of compulsion. The result has been an unprecedented increase in both the number and effectiveness—and it is the practical results which count—of industrial personnel departments.

Intervention by the State can only go a very short way in promoting better personnel administration. Theoretically, the State could impose on all firms of a certain size the duty of creating a definite personnel organiza-

tion but not only could this not be expected to achieve the same material results as a voluntarily established organization, but it would lack what is even more important, the spirit by which the organization should be animated.

Force is necessary at times. However, in the field of industrial relations sugar is oftimes more efficacious than vinegar. The most satisfactory results, in the final analysis, will be secured when employers voluntarily demonstrate an orderly improvement in employee relations on their own initiative. They must learn that more can be gained by peaceful methods than by force, and teach this philosophy to their employees by precept and example. The personnel manager is the salesman. He must sell this approach both to management and the line organization, and to the employees and their representatives.

Maintaining Industrial Relations

Personnel administration in all types of organizations can be divided, with some slight overlapping, into two chief parts which are very definitely inter-related. Unless these two parts are balanced, relations between management and worker are unstable, and much discord, discontent, friction, and waste result.

First, management has certain requirements of workers which must be met if the business is to continue to function successfully.

Second, the workers as individuals have certain requirements which must be met by management before the interest and full cooperation of the employees can be secured.

In peacetime, there exists in many companies a definite emphasis on the former, meeting management's requirements of workers, and all too often very little attention is paid by management to meeting the individual needs of workers. The effects of such policies permit minor troubles to develop into major problems. These are at all times expensive, whether or not they are clearly understood, particularly in the larger companies.

All workers from the lowest to the highest have many things they desire of life, and money, although important and necessary, cannot buy some of these things. Management also has requirements of workers which money cannot buy.

Employee interest, goodwill, or morale—call it what you will—cannot be bought. It must be earned. It cannot be secured by group treatment, in my opinion, unless and until the groundwork has been developed in individuals.

The personnel manager has a definite function to develop a contented, adequate, loyal, and co-operative working force. Many managements today are a long way from their workers, and their knowledge of workers, their needs and their wants. The personnel manager's duty is to bridge this gap and to ensure that both ends of the bridge are built on firm foundations.

An effective two-way channel of communication between management and worker is vitally necessary and invaluable. A co-operative approach by both parties is of far greater importance than any particular form of employee organization.

In Great Britain, personnel administration has developed most along lines that we in Canada know as "Welfare Work". With their well-established trade unions and collective bargaining process, it was probably found that it was in working conditions and associations not covered in a union agreement, that the greatest need for improvement lay.

Whatever may be the reason, personnel administration in Canada follows the American conception of this function much more closely than that of Great Britain. Welfare work is a term which is not very well accepted by Canadian industry and workers. It smacks too much of paternalism, which has been found to be most distasteful to Canadian workers.

Our people do not want to be babied. They value their independence and are inclined to resent even the slightest suspicion of offered aid, unless they ask for it, or they feel they are entitled to it as a matter of right. They may seek guidance, and very often do, but they reserve the right to make their own decisions, to act upon them, and to stand the consequences of any error in judgment.

Major Functions

Personnel administration in Canada is commonly grouped into six major functions: Employment, Training, Wage and Salary Administration, Union and Labour Negotiations, Medical and Safety measures, and Employee Services and Social Security. Under each of these major categories there are many subdivisions, according to the needs of the business.

The personnel manager, in addition to supervising each of these divisions, acts as a consultant to management and the heads of the line or operating organization. He is a staff official. As such he must keep in touch with legislation in this field. He must keep abreast of the latest developments in other companies, and have sufficient initiative and judgment to recognize what would be of value in his company. He needs to know other personnel men in his industry, and before

recommending a new policy, be in a position to check his recommendation with the established policy of other companies in his area. He must have a knowledge of the tools and techniques required in each of the functions he supervises. Above all, he must know his company, its policies, its problems, and its personalities.

As an adviser, he carries little or no authority. If he does carry authority, he should always function without recourse to it. He must remember that top line officials have developed many prerogatives of which they are inordinately proud. He must never forget that they depend upon the loyalty of their subordinates, and some are quick to resent the slightest loss of prerogatives or even a suspicion of the breeding of disloyalty among their staff. Working, as he does, across all company lines of authority, the personnel manager and members of his staff cannot be too careful in developing their relationships within the established company organization structure. True, he has access to the executive head of the enterprise, but it should be used very sparingly. He is expected to develop and maintain a satisfactory working relationship with all line organization and other staff heads. Frequently, his value to the company will be judged solely on that basis.

There is a strong tendency on the part of some personnel managers to become so involved in routine, programs and techniques that they lose touch with the supervisory and employee groups.

The greatest contribution they can make in a company is in developing in management a conviction that employees are human beings who respond to the people and the conditions which surround them. They must keep to the fore the fact that every person has certain aptitudes and abilities, ambitions and desires, likes and dislikes, all of which must be considered.

The personnel manager, in order to develop a better spirit of co-operation, is required to give management a better understanding of the individual employees who comprise the company's workers.

He cannot do so if he permits himself to become so entangled in routine as to be no closer in touch with the employees and what they are thinking, than is management itself.

It becomes necessary for him, therefore, to develop and maintain a close, working contact with various groups of employees, both in their working and off-duty hours, and to get to know as many employees as possible as individuals.

It has been frequently pointed out that demands for high wages ofttimes arise from weak employee relations, poor working conditions, lack of understanding and appreciation, and poor leadership. These come from a failure to give due regard to the human factor, which condition is dependent in turn upon a personal interest and understanding of the individual.

It is the responsibility of the personnel manager to develop sound policies, which, when uniformly applied by supervisors throughout the employee group, will provide a basis for friendly and mutual understanding of each other's legitimate interests. Good relations between employer and employee are fundamentally human relations. In a company of any size they must be developed. Seldom do they spring up by chance.

In Post-War Period

Now what of the future? What will be the position of personnel administration in the post-war years? On most points I hesitate to prophesy. On this question it seems quite safe to forecast that this field in Canada has only just commenced to be developed.

The experience during the war years has caused many managements to seriously consider their employee policies for the first time.

Because the effects of mediocre or poor employee relations do not show directly in the balance sheet, some employers have been slow to realize the valuable contribution systematic personnel administration can make.

The war has brought home to us, as perhaps nothing else could, that our employee-employer relations were not always all they should and could be.

Many employers, some of necessity, have developed a greater regard for personnel administration, and the consequent demand for qualified personnel managers has been difficult to satisfy. Most of these companies may be expected to maintain this interest.

When the heavy clouds which now hang over us break, and the sun shines once more on a world at peace, we shall be confronted with many new and difficult problems. Those in our armed forces and in industry, all those whose help has made our ultimate victory possible, are most deserving of all the gratitude that a grateful nation can bestow.

I feel most confident that in the field of personnel administration we have an agency which can and will make a major contribution in smoothing out many of the difficulties to be faced by individuals in the changeover from a war to a peacetime economy, and also in guiding them to a richer and fuller destiny in the years of opportunity that lie ahead.

THE LABOUR GAZETTE

VOLUME XLIV] MARCH, 1944 [NUMBER 3

Notes of Current Interest

Decrease in fatal accidents in Canada

The number of fatal industrial accidents in Canada during 1943 showed a decline from the preceding year and was in fact the smallest since 1940, according to an analysis prepared annually in the Department of Labour.

The following figures show the number of fatal accidents in the last five years:

1939	1,070
1940	1,208
1941	1,553
1942	1,457
1943 (preliminary)	1,412

The annual summary of industrial accidents in Canada, giving further details of fatal and non-fatal accidents classified as to industries, causes, provinces and months, appears elsewhere in this issue.

Manufacturing industries of Canada, 1941

The annual report of the Dominion Bureau of Statistics entitled *The Manufacturing Industries of Canada* covering the year 1941 has recently been published. The report contains a detailed analysis of manufacturing in the Dominion, with a quantity of statistics dealing with the value and volume of production classified as to industrial groups, individual industries, geographical location, etc. Data on employment and earnings are also included.

An historical summary shows that in 1941, although Canada's war effort had not yet reached its peak, production of manufactured goods had nevertheless reached the highest dollar value in history. The gross value of products was over six billion dollars, compared with pre-war highs of 3·9 billion in 1929 and 3·6 billion in 1937. The lowest levels in the period between the two wars were in 1932 and 1933, when the gross value of products declined to less than two billion dollars.

Employment in manufacturing also exceeded previous levels during 1941, with just under a million persons being employed in manufacturing industry. Previous highs were in 1929 and 1937, when some 660,000 persons found employment in manufacturing; while in 1932 and 1933 figures below 470,000 were recorded.

Salaries and wages exceeded $1,250 million dollars in 1941, compared with $777 million in 1929, $721 million in 1937, $473 million in 1932 and $436 million in 1933.

The report contains 142 pages, and is available from the King's Printer, Ottawa, at a cost of fifty cents per copy.

Vocational guidance to persons entering science and engineering

The three national engineering and scientific institutes which sponsored the Wartime Bureau of Technical Personnel in the Department of Labour, have undertaken to organize committees of counsellors across Canada to provide vocational guidance to pupils, and advice in regard to scientific and engineering courses to parents and secondary school staffs. The three national institutes

are the Engineering Institute of Canada, the Canadian Institute of Chemistry and the Canadian Institute of Mining and Metallurgy.

Even before the war the three associations had devoted some attention to the question of giving vocational guidance, particularly to young men who might have in mind entering on a university course in science or engineering. With the development in wartime of very specific needs for certain types of training, the work of vocational guidance has become much more important. The counsellors will be able to advise young people from their practical experience in the profession, after assessing the aptitude of the prospective candidate for any course he may have in mind.

As far as feasible, committees of counsellors will be set up in leading urban centres.

The counsellors, whose services will be given voluntarily, will correlate their work with national needs at the present time, and with existing Selective Service Regulations. In commenting upon the establishment of the Counsellors, the Minister of Labour, Hon. Humphrey Mitchell, said: "Vocational guidance is extremely important to young people at the time they are choosing their life work. In the past, we in Canada have paid somewhat less attention to guidance than has been the rule in other countries. Vocational guidance is even more important in connection with scientific and engineering courses in view of the extended training which must precede entry into those fields. The three professional bodies which sponsored the Wartime Bureau of Technical Personnel, in undertaking to set up these Committees of Counsellors, are performing a further and very much worthwhile public service. It is always heartening to see busy men so willing to donate part of their time and energy to a public service of this kind."

The National Committee set up by the Institutes to supervise the counsellor work, consists of: H. F. Bennett, London, from the Engineering Institute of Canada; Bernard Collitt, Montreal, from the Canadian Institute of Chemistry; and G. C. Monture, Ottawa, from the Canadian Institute of Mining and Metallurgy. Local committees have already set to work in some centres.

Cost of living index declines fractionally

The Dominion Bureau of Statistics cost of living index declined from 119·0 for January 3, to 118·9 for February 1, 1944. This further decrease was again due to foods, with fuel and light, clothing and miscellaneous items all recording small advances. The food index fell from 131·5 for January to 130·9 for February, as increases for fresh vegetables only partially offset further declines in egg prices. Changes in other food prices were very slight. Higher coal prices in eastern Canada advanced the fuel and lighting index from 112·7 to 113·0. Small changes in women's wear and piece goods increased the clothing index from 121·1 to 121·3, while the miscellaneous group advanced from 108·9 to 109·1, due to a rise in the health maintenance section and to an increase in the periodicals index. Rentals remained at 111·9 and homefurnishings and services at 118·4.

Continuing demand for technical personnel

The demand for technical personnel in Canadian industry continues at a high level, according to the Wartime Bureau of Technical Personnel, which reports that the number of inquiries received from employers during January was the largest since November, 1942.

While the completion of some of the major phases of the country's war construction program has resulted in an easing of certain aspects of the situation, other requirements remain acute; and the Bureau still has to concentrate on meeting the more critical needs with the limited numbers that are, or that become, available from time to time. This necessitates a close scrutiny of relative priorities and every effort is made to supplement the general priority information available to the Department with specific knowledge of the urgency of various demands.

Last September, a rough survey of technical personnel registered with the Bureau was begun with the object of ascertaining the number of those registered and classified as technical persons and of securing an estimate of the numbers of those trained and experienced in the various branches of pure and applied science. The survey itself has now been completed and the total of technical persons registered is approximately 31,000.

Industrial Disputes Investigation Act

Seven applications for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received during the month of February. Three boards submitted their reports; the constitution of three boards and a commission was completed during the month. Seven disputes were referred to Industrial Disputes Inquiry Commissioners, while the settlement of four disputes was reported, agreement having been reached between the parties. One application was rejected and another withdrawn. Applications for four strike votes following board procedure were received.

Employment and industrial statistics

The table below shows the latest statistics available reflecting industrial conditions in Canada.

Pronounced contraction at January 1 was recorded by the index of employment calculated by the Dominion Bureau of Statistics. This decline while greater than in January 1943 or 1942 was considerably less than usually occurred in pre-war years. The 14,251 establishments furnishing information to the Bureau reported a personnel of 1,868,615 as compared with their staff of 1,916,728 at December 1. The reduction at January 1 therefore was 2·5 per cent. The index at January 1 was 185·7 as compared with 190·5 at December 1, the highest point recorded. At January 1, 1943, the index was 183·7 as

* Many of the figures in this table with an analysis are included in the Monthly Review of Business Statistics issued by the Dominion Bureau of Statistics, price $1.00 per year.

† Week ended February 24, 1944.

(1) Base, 1926=100. (2) Figures are for the end of the preceding month. (3) Base, June, 1941=100. (4) Base, 1935-1939=100. (5) Adjusted, where necessary, for seasonal variation. (6) Notes in the hands of the public. (7) Figures for four weeks ended February 26, 1944, and corresponding previous periods. (8) MacLean's Building Review.

compared with 165·8 for January 1, 1942, 116·2 for January 1, 1940 and 108·1 for January 1939. The increase of 1·1 per cent at the beginning of 1944 as compared with the level at the beginning of 1943 being much less than that shown in a similar comparison at the beginning of 1943 or 1942 was a further indication of the levelling-off process in industrial employment.

A gain in employment at January 1 was recorded in communication, retail trade and logging while the other principal groups, manufacturing, mining, transportation, construction, and services showed seasonal decline. The largest decline was in construction, 17·6 per cent. In manufacturing the decline was two per cent.

The weekly payroll aggregated $55,446,212, which was a decline of 8·5 per cent as compared with the previous month. Per capita weekly earnings were $29.67 at January 1, as compared with $31.61 at December 1, 1943, $27.92 at January 1, 1943, and $26.13 at January 1, 1942.

The index of the physical volume of business indicating the trend in the production and distribution of goods showed a minor decline in January from the highest point in the record reached in the previous month. A marked gain, 9·4 per cent was recorded as compared with January 1943. This upward trend has been continued since the outbreak of war and was particularly marked in 1941 and 1942. Export trade in January was 38 per cent higher than in January 1943 reflecting the movement of the greatly increased production of war supplies to the various theatres of war.

Annual Report of Dominion Department of Labour

The work of the Department of Labour during the fiscal year ending March 31, 1943, is described in the Annual Report which has recently been issued. Included in the Report is a review of the following activities of the Department during the year: administration of the manpower program; conciliation work of the Department; administration of the Industrial Disputes Investigation Act; training activities; work of the Research and Statistics Branch; work of the National War Labour Board; and the administration of various measures which are the responsibility of the Department. Information concerning the work of the International Labour Organization is also contained in the Report. Copies are available from the Department at twenty-five cents each.

Report on government annuities in Canada

A total of $10,147,590.20 was paid as Annuities out of the Government Annuities Fund during the fiscal year ending March 31, 1943, according to the Report of the Annuities Branch of the Department of Labour, tabled in the House of Commons by the Hon. Humphrey Mitchell, Minister of Labour. In addition, $405,098.26 was paid out in return benefits.

At the end of the fiscal year the Fund amounted to $190,298,479 as compared with $172,911,035 at the end of the previous year. The year's receipts from the sale of Annuities were $20,416,365.41 and with interest on the fund of $7,026,976.79, the total receipts for the year were $27,443,342.20.

There were 81,627 annuities in force as of March 31, 1943.

Labour bodies issue publications on reconstruction

The Canadian Congress of Labour and the Trades and Labour Congress of Canada have both issued publications containing their views on the subject of post-war reconstruction.

Reconstruction: the First Steps was prepared by Eugene Forsey, Ph.D., Director of Research for the Canadian Congress of Labour. A 20-page booklet, it outlines a series of steps by means of which the present system of wartime controls may be "adapted and re-directed to peacetime purposes." It recommends an extension and expansion of existing public enterprise (particularly that which has grown up in wartime) along with the establishment of national policies for finance, transport, food, housing, and fuel and the raising of the rural standard of living. "Full employment" is defined as "genuine full employment, not merely the prevention of mass unemployment."

The program advocated by the Trades and Labour Congress of Canada is outlined in a 20-page pamphlet entitled *Victory—What Then?* It was prepared by the Congress' Committee on Post-war Rehabilitation and Reconstruction, under the chairmanship of John W. Bruce, and adopted unanimously by delegates to the 1943 convention in Quebec. The pamphlet points out that the mass unemployment of the depression period was followed by full production under wartime controls. It urges revision of "our whole economic and social structure" in order to bring about "full employment and plenty for all"; and recommends a series of public works, the shortening of hours without loss of earning power, social security legislation, and various other measures.

Canadian Manufacturers' Association on post-war problems

The plans, organization and work of the Canadian Manufacturers' Association in connection with the war and in preparation for conditions after the war are described in a 48-page booklet entitled *The War and After*. Various standing committees of the Association have been dealing with such problems as war and civilian production, foreign exchange control and currency stabilization, manpower and labour relations, priorities, controls of materials, supplies, wages and prices, external trade relations, taxation, termination of war contracts, disposal of Government-owned plants, equipment, and materials, transportation and communications. The views of the Association on these and related topics are outlined in the booklet.

In regard to post-war employment, the Association expresses its belief that full opportunity should be given for "the readjustment of Canadian business to peace conditions under the stimulus of private enterprise," and that governments should come forward with work-providing projects only as "emergency" or "first-aid" programs, when it is necessary to supplement private enterprise. "Industry," it is considered, "should study carefully exactly what swinging over from wartime to peacetime activity means in terms of physical changes to plant, changes in the business and the labour force, so that there may be a series of plans developed which can be put promptly into effect when the time comes."

It is emphasized in the pamphlet that the "gainful and steady employment" which employers should endeavour to provide for the maximum number of their employees is "that which, while enabling the employee to earn sufficient to steadily increase his standard of living and at the same time provide for his security, also produces a supply of goods and services in such quantities and at such cost that the employer can secure reasonable returns."

Boilermakers form building co-operative

The Victoria Boilermakers' and Iron Shipbuilders' Co-operative Building Association was incorporated as an Association on February 7, 1944. Among its purposes are the acquiring and administering of real estate; the development of buildings on such land for the benefit of its members, and the leasing or renting of space in such buildings. The denomination of the Association's shares is one dollar each.

Appointments to National Council of Physical Fitness

Appointment of a Chairman and eight members to the National Council of Physical Fitness, authorized under the provisions of the National Physical Fitness Act of 1943, was announced in February by the Honourable Ian A. Mackenzie, Minister of Pensions and National Health. Chairman of the Committee will be Major Ian Eisenhardt of Ottawa, whose term of office will expire on December 31, 1946. Members of the Committee are W. A. Wellband of Regina, Saskatchewan, Arthur A. Burridge of Hamilton, Ontario, Dr. Jules Gilbert of Quebec, Jerry Mathison of Vancouver, B.C., J. H. Ross of Calgary, Alberta, Dr. W. C. Ross of Halifax, N.S., Dr. Minot Grewer of New Brunswick, and R. Wray Youmans of Manitoba. The terms of office of Messrs. Wellband, Burridge and Gilbert expire on December 31, 1944, and of Messrs. Mathison and J. H. Ross and Dr. W. C. Ross on December 31, 1945. The other two members hold office until December 31, 1946.

Five provinces—Prince Edward Island, Nova Scotia, Saskatchewan, Alberta and New Brunswick—have so far entered into agreements with the Dominion to participate in the National Physical Fitness Program. At the moment, the Province of Quebec has the program under consideration, while the Province of British Columbia may make "Pro-Rec" the provincial organization. It is believed that eventually all the provinces will associate themselves with the program.

"Major Eisenhardt, a former Canadian Army officer, had a distinguished career in Europe in physical education," said the Honourable Mr. Mackenzie in announcing the appointment. "He specialized in the organization of sports and recreation in Denmark, France and other European countries. In Canada he has held successively the positions of Playground Instructor in Vancouver, Superintendent of Recreation for the City of Vancouver, and Director of Physical Education for the Province of British Columbia. In this latter capacity he organized the "Pro-Rec" plan through which tens of thousands of young people, during the depression period particularly, were encouraged to participate in an all-round program of physical training and recreation."

Major Eisenhardt, Mr. Mackenzie explained, served with the Canadian Active Army on the Pacific Coast until his services were borrowed by the Department of Labour to develop a recreational program in war industry. Subsequently, he was recalled by the Army to organize Army sports and recreational activities. His appointment as Chairman of the National Council of Physical Fitness was

made possible through the co-operation of the Department of National Defence.

Members of the Council are all widely known in physical fitness activities. Mr. Burridge is Director of Physical Education at McMaster University, Hamilton, and was a Canadian champion gymnast, a playground supervisor at Montreal, and football coach and assistant director of physical fitness at McGill University. Mr. J. H. Ross is the Director of Health and Recreation for the Department of Education in the Province of Alberta, while Dr. W. C. Ross is Director of Physical Fitness for the Province of Nova Scotia. Dr. Jules Gilbert is the Director of Heath Education in the Ministry of Health for the Province of Quebec, while Mr. W. A. Wellband is associated with the work of physical fitness in the Regina Y.M.C.A. Mr. Mathison is Physical Director of the "Pro-Rec" classes in Vancouver, B.C.

Child labour in Ontario and Quebec

The February issue of the *International Labour Review* contains information showing the trend of child labour in Ontario and Quebec, as shown by employment certificates issued.

In Quebec certificates from the Department of Labour are required for the employment of children of 14 and 15 years in commercial and industrial establishments. For the period, 1936-1941, the number of such certificates averaged 436 yearly; in 1941-42, 9,238 certificates were granted. During the next year, 1942-43, the number more than doubled again; rising to 22,001. About four of these were granted to boys for every three issued to girls.

The new compulsory school attendance sections of the Quebec Education Act went into effect on July 1, 1943. Children must attend school until the end of the school year in which they attain the age of 14. This new provision would probably reduce the number of certificates granted to children of 14 and 15 in the first months of the school year 1943-4. In Montreal, the only place with figures yet available, a significant decrease is noticeable: 3,230 in 1943-44 as against 4,653 in 1942-43.

In Ontario three types of certificates permitting absence from school are issued:—

(1) certificates permitting children under 14 years of age to be employed for not more than six weeks in a term, that is twelve weeks in a school year;
(2) certificates permitting children 14 and 15 to be employed;
(3) permits for children between 14 and 16 in urban centres for work at home.

In addition, children between 14 and 16 in rural districts are permitted to work at home without obtaining a formal certificate of exemption from school attendance. Figures are not available for 1943, but in 1941, there was a fourfold increase over 1939 in the number of employment certificates granted to children of 14 and 15 years of age—from 2,146 in 1939 to 9,416 in 1941. The 1942 figures (not ready in time for the I.L.O. Study) show a further increase—12,792 certificates issued. The number of home permits issued for children of the same age were 1,389 in 1939, 2,938 in 1941, and 2,717 in 1942. The number of certificates for children under 14 remained fairly constant at 1,382 in 1942, after having risen from 710 in 1939 to 1,318 in 1941.

The recent increase in child labour is by no means confined to any particular country. The Industrial Commissioner of New York State, expresses his concern about the problem in the following words:—

> "While I recognize that the war is largely responsible for this situation and in some degree mitigates it, nevertheless we cannot tolerate it. The law must be enforced and the child labour standards of New York State maintained. I have been well aware of the situation since taking the office of Industrial Commissioner. To me it is one of the utmost concern. The problem is particularly aggravated by the smaller employers, bowling alleys, industrial homework, trucking, retail stores, moving picture theatres, hotels and restaurants.
>
> "Rather than piecing out the present manpower of the State and Nation, the illegal employment of minors is aborting our manpower before it comes into full being. The child who works at too young an age, who works too long or too late after school hours, who because of the undue tax of his labour falls asleep or mopes through his school classes, is not only subjected to physical harm but mental and moral as well. The minor's welfare is the public's welfare and must not be sacrificed for the exigencies facing an individual employer."

Employment re-instatement in Great Britain

Designed to make more adequate provision for the reinstatement in civil employment of persons who have been in the Armed Forces, in certain Women's Services or in a civil defence force, a Bill was recently introduced in the Parliament of the United Kingdom by the Minister of Labour and National Service. The Act will replace certain provisions in the National Service Acts and a Defence Regulation. Unlike the regulations, the Bill applies to volunteers as well as to conscripts and to the Women's Services.

A person desiring to exercise his rights under the Act must apply to his former employer not later than the fifth Monday after the end of his war service and he must be available for employment not later than the ninth Monday. Both these periods may be extended on account of illness or for other reasonable cause. If the employer is not in a position immediately to re-employ the applicant, the latter may renew his application at intervals of not more than 13 weeks, but in no case is the former employer under obligation to employ an applicant after six months have elapsed from the end of "the present emergency," the date to be fixed by Order in Council.

The employer must reinstate an applicant at the first opportunity, if any, at which it is "reasonable and practicable" to do so on or after the date on which he has been notified that the applicant will be available for employment. If it is not "reasonable and practicable" to re-employ the applicant in the occupation in which he was employed and on conditions not less favourable than he would have had if he had not joined the Forces, the employer is under an obligation to employ him in the most favourable alternative occupation that is reasonable and practicable.

A person who is reinstated under the Act must be employed for at least 26 weeks or for as much of that period as is reasonable and practicable. No change to his detriment is to be made in the conditions of his employment unless they are no longer reasonable and practicable. In such case, he must be given the most favourable alternative.

Certain tests as to what is reasonable and practicable are provided in the Bill and the Minister may make regulations to define the meaning of "reasonable and practicable". The Bill gives preference to seniority in employment of two applicants for reinstatement where it is reasonable and practicable to reinstate only one. The one who had been longer in the employment before either of them joined the forces is to be reinstated. Further, the fact that reinstatement of an applicant would involve the dismissal of another person who started later in the employment and who may have been reinstated under the Act is not to prevent the reinstatement of the applicant.

Reinstatement committees of three members each are to be appointed to deal with disputes. Appeals from these local committees may be heard by an Umpire or Deputy Umpires. Each committee is to have an employers' and a workers' representative and may have assessors. The Umpires must have assessors appointed by the Minister.

A committee or the Umpire (on appeal), may make (*a*) an order requiring an employer, who has failed to discharge his obligations under the Act, to make employment available to the applicant, or (*b*) an order requiring the employer to pay the applicant, by way of compensation for loss suffered by reason of the employer's default, a specified sum not to exceed the amount of remuneration the applicant would have been entitled to receive from his former employer. Any sum ordered to be paid may be recovered as a civil debt.

An employer who fails to comply with an order is liable to a fine of not more than £50 and he may be ordered to pay compensation as above.

Protection to magnesium workers in Great Britain

Persons employed in the grinding or polishing of castings and other articles consisting wholly or mainly of magnesium are protected in an Order by the British Minister of Labour and National Service which came into effect in Britain on March 15, 1943. Certain duties of occupiers of factories subject to the Order are laid down. They are responsible for the maintenance of the plant and its apparatus; for taking all necessary precautions to prevent sparking in connection with the processes; for intercepting and removing dust with special listed appliances; for disposing of dust, sludge or scale after it has been removed from scrubbers; for providing protective clothing and keeping it in good condition; and for prohibiting smoking, open lights, fires or any other agency capable of lighting magnesium dust, where grinding is being done or where magnesium dust is kept. The Order stipulates that the employees covered must not wilfully disobey any of its provisions nor misuse any appliance provided under the Order. Employees must report immediately any defects which they find in these appliances or facilities.

British advisory committee on domestic work

Hon. Ernest Bevin, British Minister of Labour and National Service, recently announced the appointment of an advisory committee on domestic work. Mr. Bevin stated that he found it "necessary to give first priority to domestic work, in connection with the care of the sick, wounded, old, infirm, and young children. I attach the highest importance to domestic work, which is essential to the efficiency of these services, and I am instructing my local offices to pay special attention to the filling of vacancies in this work." The committee consists of five men and ten women, including a medical officer, a union official and representatives of hospitals, educational bodies and voluntary agencies.

Payment of night shift premiums in United States

A recent decision of the United States National War Labour Board lays down a set of principles in regard to bonus payments to workers on night shifts.

In future, according to an opinion issued by the Board, decisions in disputes involving night shift premiums will be made on the basis of three considerations: area practice, industry, practice, and intra-plant wage relationships.

One of the considerations which weigh in the granting of premiums for night work is the rotating shift factor, the opinion stated. The Board in the past has directed the payment of such bonuses in cases where it has been established that the "regular hourly rate cannot reasonably be said to take account of the night work factor. . . ." On the other hand night shift differentials have been denied "where it seemed reasonable to assume from surrounding circumstances, that the regular hourly rate properly took the night work into account. . . ."

As far as the consideration of area practice is concerned, "the Board has not, except in very unusual cases, granted a premium for either fixed or rotating shifts if, in the area involved, there is an established practice of not paying such a differential. . . .

"The Board has in a number of cases refused to approve a night shift premium, despite an area practice to pay such bonuses, if a shift differential is contrary to established industry practice."

Community recreation centres in United States

To help United States war workers stay on the job at top efficiency and to reduce turnover and absenteeism, more than 740 new community recreation centres have been opened in 225 critical production areas, the U.S. Office of War Information reported recently. Programs are being sponsored, in places where lack of adequate recreation has been one of the serious hindrances to full production, by the Division of Recreation of the U.S. Office of Community War Services with the co-operation of other government agencies concerned. The communities were selected on the basis of the War Manpower Commission's list of critical labour shortage areas.

In setting up such programs, Government agencies give varied help in developing plans and suggesting means of providing facilities and services, in stimulating local interest and leadership, and in some cases in underwriting construction of buildings. These plans are then carried out by personnel departments or recreational divisions in plants, labour unions, and war recreation committees representative of other community groups as well as municipal recreation departments.

Many of the 4,000 labour-management committees set up in war plants have recreation sub-committees that are active in promoting and developing recreation programs.

The report points out that opportunities for wholesome recreation are needed in war congested areas if war workers are to produce at a high rate of efficiency. Workers who have moved into these areas, particularly those who went without their families, have the most serious problems of adjustment to make. Attention to recreational needs of children is also important during wartime because of the small amount of supervision that working parents are able to give their children. In many families both parents are working or the father is absent serving in the armed forces or working in a war job away from home. The advent of women in industry in large numbers has created additional problems, there being fewer recreation activities in operation for women than for men.

The President's Committee on Congested Production Areas has recognized that in many of the designated areas poor recreation facilities take their place alongside housing shortages, bad transportation and bad shopping facilities as actual detriments to war production.

U.A.W. and Machinists sign no raiding pact

The United Automobile, Aircraft and Agricultural Implement Workers of America and the International Association of Machinists have reached an agreement banning organizing activities by one union in any plant where the other union has been established by a collective agreement or has been certified as the bargaining agency. The agreement states that the other organization shall not interfere with established relations between a union and an employer by soliciting or accepting membership applications or authorization cards.

The new arrangement is expected to end differences impeding progress in the drives of these unions to organize the aircraft industry. It will also help to produce eventually "a united labour movement and make possible the further expansion of the trade union movement among the unorganized workers."

Holidays with pay for New York clothing workers

The first agreement granting holidays with pay in the men's clothing industry was approved on February 11 by the U.S. National War Labour Board. The agreement was between the Amalgamated Clothing Workers of America and the New York Clothing Manufacturers' Exchange. Approximately 30,000 workers in the New York clothing market are covered by the plan which provides for one week's holiday for all employees who have been on the payroll for at least six months. Neither temporary lay-offs nor service in the Armed Forces will disqualify workers from their right to a holiday.

One week's pay is to be granted for service of a year or more; three-quarters of a week's pay for workers with at least nine months, and one-half week's pay for workers with six to nine months service. For those paid by the week, the weekly rate is to be used as a basis, whereas for pieceworkers the holiday pay will be computed at forty times the straight-time average hourly earnings for the four consecutive, busiest weeks of the season before the vacation schedule.

The board held the plan to be in line with its policy of approving "reasonable" holiday schedules, and authorized Regional War Labour Boards to approve similar schemes submitted by the union and clothing manufacturers in other areas.

Child labour standards fixed for U.S. Army establishments

Most juveniles employed by the U.S. War Department will be affected by standards recently established by the Army Service Forces, including the Ordnance Department, the Signal Corps, the Transportation Corps, the nine Service Commands, and other service units. Since neither Federal nor State child labour laws apply to federal employees, these standards fill an important gap.

A 16-year minimum age is fixed for any job in an Army Service Forces installation. Suitable jobs for minors under 18 are to be determined after a survey by the personnel officer in co-operation with the U.S. Civil Service Commission, the U.S. Employment Service and the school authorities. In any case juveniles will not be permitted to take on hazardous occupations which are prohibited under either State law or the federal Fair Labour Standards Act. Parental consent and a certificate of age are to be required for the employment of juveniles under 18.

Maximum hours are restricted to 8 a day, 48 a week, and 6 days a week for those under 18 in full-time employment, except in temporary emergencies. For those attending school and working part-time, no more than 4 hours on school days and 8 hours on Saturday may be worked. Combined hours of school and work are not to exceed 9 a day, or 10 a day including transportation. Evening employment is not to extend beyond 10 p.m., and at least 9 night hours should be free from work.

Provision for maintaining a safe and healthy working environment must be made, with special care taken to ensure adequate rest and meal periods. Wages for those under 18 are to be determined in the same way as for adults doing similar work. State child labour and school attendance laws will be observed by Army Service Forces installations wherever they do not conflict with the above standards.

Community action on child labour

Thirty-four United States leaders concerned with industrial, educational and health problems affecting children and young people, including representatives from 27 national organizations, have issued jointly a "Child Labour Manifesto." The manifesto declares that demands for war production and essential civilian services can be met without exploiting children, and that it is a short-sighted policy to employ them under conditions or for hours which threaten their physical development or impair their educational opportunities. The protection of children is considered as a community enterprise and therefore the manifesto calls on the home, the school, the church, industry, labour and all other community agencies to unite in protecting children.

A leaflet prepared by the continuing committee of this conference group gives suggestions for activities by such local community groups. Among these is the organizing of a local advisory council on child labour whose functions would be to assemble facts on existing child labour laws and their enforcement, to carry on education in the community regarding the need for maintaining legislative standards, and to make recommendations for action. It is also suggested that community groups should participate in the organization of a stay-at-school campaign to prevent students taking summer employment and then failing to return to school in the fall, as well as children quitting school as soon as they reach the minimum school-leaving age. Local organizations could also provide the extension of vocational guidance in schools; might survey the work children are doing outside school hours; check on the practice of requiring pre-employment medical examinations; try to reduce illegal employment; and arrange

groups of young part-time workers, to discuss the effect of their work upon their schooling, health and well-being.

Medical care for children in nursery schools in Minneapolis

A plan adopted by the city of Minneapolis to provide medical services for children attending nursery schools is described in the *CIO News* for February 21, 1944.

There are eleven nursery centres in Minneapolis for the children of mothers working in war plants. When it was found that a certain amount of absenteeism was being caused through the fact that nursery schools could not take care of children who showed symptoms of possible illness, thus obliging mothers to stay home and look after them, arrangements were made for the nursery schools to use a wing in the city hospital as an isolation centre. Children with mild sniffles and minor illnesses are taken to this wing directly from nursery school.

The public health nurse makes the rounds of the nursery centres in Minneapolis every day, picks up the children that need to be separated from the rest of the group, and takes them to the hospital.

Three rooms are set aside for the nursery wing, two rooms with several beds separated by glass partitions, and a play room where the children can play together when they are well enough.

Three trained nursery school teachers are in charge of the wing, and nurse and doctor are available if needed. If a child develops a serious illness the mother can have the child transferred to a ward or put under a private doctor's care.

Reports on Agenda of International Labour Conference

In preparation for the session of the International Labour Conference to open on April 20 in Philadelphia, the International Labour Office has published reports on three topics of the agenda of the Conference. They deal with the organization of employment in the transition from war to peace, principles of social security and recommended minimum standard of social policy in dependent territories. Each report contains proposals for Recommendations or Resolutions by the Conference. These will be used as a basis of discussion after which the Conference will formulate its decision on each topic. The full text of these, both French and English, is given in the reports.

The report on *The Organization of Employment in the Transition from War to Peace* deals with such questions as the technique of the transfer of manpower from the Armed Forces and war industry to peacetime employment, problems in regard to special classes of workers (young persons, disabled workers, women), employment service machinery, vocational guidance and training, public works and financial measures to cope with short-term unemployment.

Social Security: Principles, and Problems arising out of the War is the fourth item on the agenda of the Conference. The first part of the report on this item deals only with principles of social security and contains two sections, one on income security and the other on medical care schemes. A subsequent report will be published on specific social security problems arising out of the war.

The draft Recommendation on income security which is proposed by the International Labour Office " relies on social insurance as the principal means of providing cash benefits in cases of inability to work or to obtain work. It assigns to social assistance the functions of supplementing social insurance benefits in contingencies of a special or ill-defined character" and is intended to be applicable both to urban and rural communities. This proposed Recommendation is based on the series of Conventions and Recommendations on the various branches of social insurance which have been adopted by the International Labour Conference. Cognizance is taken, however, of recent legislative proposals on this subject in different countries.

A Recommendation is proposed also concerning medical care, both preventive and curative, available to all either through a public medical care service or through social insurance and, where necessary, social assistance. The problems connected with such a scheme are discussed in the Report.

In the report on *Minimum Standards of Social Policy in Dependent Territories,* the fifth item on the agenda, the International Labour Office suggests that the Conference should define the social purposes of economic development in dependent territories and adopt a Recommendation laying down general principles of social policy and minimum labour standards for such territories. It also urges all members to ratify the existing indigenous Labour Conventions. The proposed Recommendation sets out certain standards governing general conditions of work, such as the minimum age for employment, protection of wages, general principles of remuneration and wage-fixing, social insurance and freedom of association. A supplementary report on "Social Development in Dependent Territories" is also to be issued on this item of the agenda.

Manpower

Handling of Lay-off by Employment Service

Procedure Adopted in Closing down of War Plant at Nobel, Ontario

AN example of the procedure that has been adopted by National Selective Service for handling lay-offs in war industry is found in the case of the Defence Industries Limited plant at Nobel, Ontario.

As described in the February LABOUR GAZETTE (p. 155), such lay-offs as are from time to time necessitated by developments in Canada's war production program are being dealt with in accordance with the principle that interruption to the war effort must be kept to a minimum.

In order to fill the needs of the army, which continue to be urgent, all persons on deferment who are affected by lay-offs are called up unless they are possessed of definite skills and are indispensable to industry. In many industries Industrial Mobilization Surveys have been undertaken, the purpose of which is to acquaint the Employment Service with the number of employees of military age, along with a description of the work they are doing.

Other workers are laid off in the following order, subject to seniority rights where collective agreements are in force: (1) workers with previous agricultural experience; (2) workers needed in nearby high priority industries; (3) workers who are required by outside high priority industries and can be moved; (4) younger workers without family obligations; (5) married women, if their husbands are supporting them; (6) older workers.

First Shut-down of War Plant

The situation at Nobel, which constituted the first major test of the plans which have been adopted for lay-offs, was the result of the first complete shut-down of a large war plant in Canada. It was the largest individual lay-off with which the Employment Offices have had to deal, over 2,000 workers having been employed in the plant. The problem was complicated by the isolated location of the plant, which made it apparent that the majority of the workers affected would have to be transferred to outside points.

On December 15, 1943, the Department of Munitions and Supply notified the Department of Labour of the impending lay-off. The plan was to lay off approximately 1,300 workers in January and 700 during February, by the end of which time only a skeleton staff of maintenance men would be left at the plant.

On December 16 the Mobilization and Employment Divisions of the Department were advised. A conference of Employment Service officials was at once held in Toronto, the employer was consulted by telephone, and that night four special officers including one woman, left for the plant, where a temporary Employment Office was set up. Since an Industrial Mobilization Survey of the Nobel plant had not been completed, three of the Employment Service officials immediately undertook this task. The fourth was directed to determine from the personnel records, both at the plant and at the Employment Office at Parry Sound, the background and experience of those who would be involved in the lay-off.

The Mobilization Survey disclosed that of the 2,235 persons employed at the plant, 520 were in the military service age group. But of this number 260 had discharge certificates or rejection papers, and a number of others had been deferred because of special skills. This left 157 men to be called for military service.

In four days the survey was completed, and it was possible to proceed with definite plans for the re-employment of all men not subject to immediate call for military service. A number of employers were invited to send representatives to Nobel to interview prospective employees.

Transfer of Workers

From day to day as men and women received their seven-day notice of separation they consulted with the Employment Service officials and with representatives of such firms as Victory Aircraft, International Nickel, International Harvester, Canadian National Railways and others regarding the choosing of their next occupation. Arrangements were made by the firms for the transportation of workers to their new jobs and for living accommodation, and efforts were made so that the transfers might be accomplished promptly and with as little inconvenience as possible.

The four officials remained at Nobel for two weeks, interviewing applicants and assisting the

Parry Sound Employment Office to issue permits and transportation warrants. Subsequently, for two days each week, they were available at Nobel for interviewing and the making of referrals.

A partial list of placements effected up to February 4, not including cases where an employer took on less than five men or women, is as follows:

MALE	
Victory Aircraft	462
International Nickel Co., Sudbury	63
Bush Labour	62
Massey-Harris Co. Ltd., Toronto	53
Farms	33
Defence Industries Ltd., Pickering	21
Canadian National Railways	26
Beardmore Leather Co., Acton	10
International Malleable Iron Co., Guelph	12
International Harvester Co., Hamilton	8
Canadian Pacific Railway	7
Transferred to other local offices	137
FEMALE	
General Engineering, Toronto	39
Victory Aircraft, Ltd	29
Transferred to other local offices	75

Of the women, a number of those who were married retired from employment at their own request.

Workers coming under the category of technical personnel remained in the employment of Defence Industries Limited until the company notified the Wartime Bureau of Technical Personnel that they had become available. A number of these workers were transferred to other plants of Defence Industries Limited, and the remainder transferred to other employment.

Throughout the transfer National Selective Service officials were in touch with officers of the Defence Workers' Union, Local No. 1 (Canadian Congress of Labour) which was the organization authorized to act for the employees in negotiating with Defence Industries Limited at Nobel.

Subsequent to February 4, other placements were made and by March 21, 1,363 men had been placed in other essential work or were in the military service, and another 145 men had been transferred by the Company to their other plants.

Of the women, 477 had either been placed or had voluntarily retired from employment. These men and women account for 1,985 of the 2,000 workers who were to be laid off during January and February.

Return to the Farm of Men Engaged at Seasonal Work

ARTHUR MacNamara, Director of National Selective Service, recently announced that arrangements for the return of farm workers engaged during the winter at essential employment off the farm, are being worked out by regions, so that the men will return in each area when they are needed.

A total of 73,149 Selective Service permits, valid to April 1, were issued to farm workers to engage in other industries. Where provincial authorities agree, some of these permits may be extended for a short while after April 1. Where not extended, men will have to return to the farm by the end of March.

In addition, several thousand men working away from the farms for the winter months and not requiring permits, will have to return to agriculture as soon as they are needed. Employers will require permission from Selective Service to keep men after April 1.

"The men who left farms for the winter," said Mr. MacNamara, "gave vitally needed help in other essential industries. However, the United Nations look to Canada for vast quantities of food, so that agriculture must be given all the manpower assistance needed. The first essential is to have the men temporarily out of agriculture go back to the farm just as soon as their services are required."

Mr. MacNamara further pointed out that as seven days' notice must be served in industries other than agriculture, farm workers will have to give notice of leaving their winter employment in advance of their departure.

Decisions of National War Labour Board

THE National War Labour Board recently issued decisions in the following cases:—

La Fonderie de Plessisville and Le Syndicat Catholique des Employés de Fonderie de Plessisville, Inc. (Catholic Syndicate of Plessisville Foundry Employees, Inc.).

Auto Specialties, Limited, and Local Union 195, UAW-CIO.

Brunner Mond, Canada, Limited, and Local Union 89, UAW-CIO.

General Motors of Canada, Limited, and UAW-CIO, Local 195.

Canadian Industries, Limited, and Local 195, UAW-CIO.

Kelsey Wheel Company, Limited, and Local 195, UAW-CIO.

Walker Metal Products, Limited, and Local 195, UAW-CIO.

Brentwood College, Victoria, B.C.

British Columbia Electric Railway Co., Limited, and International Brotherhood of Electrical Workers, Locals 213 and 230.

Green Manufacturing House, Limited, Portage la Prairie, Man., and United Garment Workers of America, Local No. 35.

Progress Manufacturing Company, Moose Jaw, Sask.

Trenton Steel Works, Limited, and United Steelworkers of America.

Avon Coal Company, Minto Coal Company, Welton and Henderson Coal Company, G. H. King Coal Company, E. S. Crawford Coal Company, and United Mine Workers of America.

Greenwood Coal Company, Limited, New Glasgow, N.S., and Coalburn Mine Workers' Organization.

Intercolonial Coal Company, Limited, Westville, N.S., and Co-operative Labour Protective Association.

Joggins Coal Company, Hillcrest Coal Company, Standard Coal Company, Indian Cove Coal Company, Bras D'Or Coal Company, Sullivan Coal Company and United Mine Workers of America, District 26.

Advertising Agencies of Canada, and Mrs. Claire Wallace Stutt.

Algoma Steel Corporation, Limited, and United Steelworkers of America, Local 2251.

Canada Packers, Limited, Swift Canadian Company Limited, and Burns and Company Limited, and United Packinghouse Workers of America.

Canadian Industries, Limited, Montreal, Que.

Canadian Liquid Air Company, Limited, and Boilermakers' and Iron Shipbuilders' Union of Canada, Local No. 1.

Clark Ruse Aircraft, Limited, Lakeburn, N.B., and United Steelworkers of America, Local 2889.

La Compagnie Legare, Limitee, Quebec, P.Q.

Parke, Davis and Company, Windsor, Ont., and C. A. Magnan.

James Pender and Company, Limited, Saint John, N.B., and United Steelworkers of America, Local No. 2957.

Messrs. Pollard and Pike, Limited, G. H. Wheaton, Parfitt Brothers, Limited, Luney Brothers, Limited, Williams, Trerise and Williams, Limited, Victor Leigh, Leslie G. Scott, E. H. Shockley, A. McKinty, Walter B. Revercomb, all of Victoria, B.C., and members of Victoria Builders' Exchange Limited, and United Brotherhood of Carpenters and Joiners of America, Local No. 1598.

Schell Transports, Limited, Woodstock, Ont.

The Canadian John Woods Company, Limited, and Boilermakers' and Iron Shipbuilders' Union of Canada, Local No. 1.

Dominion Engineering Works (Longueuil Plant) and International Association of Machinists, Lodge 1596.

Machinery Service, Limited, and International Association of Machinists, Lodge 631.

Royal York Hotel, Toronto, Ont., and Hotel and Restaurant Employees International Alliance and Bartenders International League, Locals 299 and 7.

The Slingsby Manufacturing Company, Limited, Brantford, Ont.

Re: La Fonderie de Plessisville and Le Syndicat Catholique des Employés de Fonderie de Plessisville, Inc. (Catholic Syndicate of Plessisville Foundry Employees, Inc.)

Reasons for Decision

(Oral Decision)

We shall dispose of this matter now, without reserving it for further consideration.

The Syndicate is appealing from a decision of the Regional Board on an application for payment of the full cost of living bonus. The National Board's jurisdiction, as that of the Regional Board, is based on subsection 3, of section 34, of P.C. 5963. Our power in the matter is founded upon a comparison to be made within the industry concerned. The industry with which we have to deal here is that of a machinery manufacturer operating a foundry for the purpose of his business. As a basis for comparison, the Syndicate suggested the condition existing in foundries proper, such as at the Hull Iron & Steel Foundry, at the Canada Car & Foundry, or at other similar plants.

With regard to machinery manufacturers, the Appellant has provided us with no basis of comparison and, therefore, we have no other alternative under the provisions of the Order in Council than to dismiss the appeal.

January 26, 1944.

Re: Auto Specialties Limited and Local Union 195, U.A.W.-C.I.O.

Reasons for Decision

(Oral Decision)

In this matter we are all of the opinion that as far as the wage rates are concerned, we have no alternative but to sustain the Regional War Labour Board for Ontario. On the basis of comparison in this particular type of industry, which is a malleable iron foundry, we must take into consideration the question of competition.

On the other requests that have been made by way of appeal we feel that the appeal should be allowed with respect to vacations with pay, that is one week's holidays with pay with the qualifications substantially contained in D.B. No. 17,* and we leave it to the union and the company to negotiate the particulars of that matter, so as to interfere with production as little as possible.

As to the working week, we feel that it should be established throughout the plant on a 45-hour basis, with time and a half for hours worked over the 45 hours in a week.

We are all of the opinion, as well, that the employees' request for off-shift differential of 5 cents per hour should be granted.

Now we would like to point out, before parting with the matter, that while the company has intimated that it is perhaps something of a hardship to have to meet these conditions, particularly with respect to the week's vacation with pay and the off-shift differential premium, we cannot decide a matter of that kind in favour of the company on a mere statement. In other words, it must be established to us, before we can give effect to a plea of inability to pay, by proper means, such as an earnings statement, that what is submitted by the company is the case. We think it would be a very dangerous procedure to accept the company's mere statement in that regard. As a matter of fact, in practice, we do not do so.

Consequently, the appeal will be allowed with respect to the three matters indicated.

The premium for the night shift differential and overtime will be dated back to the date of the decision of the Regional Board, which is August 24, 1943. The vacations with pay will take effect in the calendar year. We hope the parties will be able to agree on the qualifications for the men who worked during the year 1943.

* L.G., Dec., 1943, p. 1635.

February 1, 1944.

Re: Brunner Mond, Canada Ltd., and Local Union 89, U.A.W.-C.I.O.

Reasons for Decision

(Oral Decision)

This is a case which was dealt with by the Regional War Labour Board for Ontario under Section 25, of Order in Council P.C. 5963.

The principle enunciated in that section is not one that is enunciated by the Boards but it is set forth by the government as the basis upon which wage increases could be granted.

It seems quite clear that the Regional Board did not treat this case in any but a reasonable and thorough manner. Apparently they had a hearing and held the case for some time requiring additional data. They eventually made the finding which we are faced with that—I am quoting:—

"The wages generally paid to employees of Brunner, Mond of Canada Limited, are fair and reasonable, and are comparable to the rates paid in the district for similar occupational classifications."

The Board on the basis of that finding declined to authorize increased wage rates, except to some in the soda ash division, which apparently the company agreed in.

We must emphasize that sitting on appeal we are not in the position of trying the case all over again from the beginning to the end, and it must be established before we can interfere, that the Regional Board somewhere has gone wrong in principle. What has been advanced to us does not convince us that they have gone wrong. It is possible they may not be right, but the place to put that kind of case is before the Regional Board itself.

We all feel that we cannot interfere in this matter under the circumstances here, even though direct methods of comparison seem to be very difficult.

Consequently we must dismiss the appeal.

February 1, 1944.

Re: General Motors of Canada, Limited, and Local 195, U.A.W.-C.I.O.

Reasons for Decision

(Oral Decision)

This is an appeal from the decision of the Ontario Regional War Labour Board with respect to its refusal to increase base rates.

The union seeks to make a straight comparison with Ford and Chrysler, although it must be noted that in these two particular companies there is no incentive wage plan, as there is in General Motors. Furthermore, it must be kept in mind that in the latter case it is an engine plant situated in Windsor, whereas the general assembly plant of General Motors is in Oshawa. We suppose that there is a good deal of merit in both contentions that, perhaps, the comparison should be made with Ford and Chrysler on the one hand, or with other operations in Windsor such as manufacturers of accessories.

At any rate the difficulty that we find ourselves in, is that sitting as a Court of Appeal, in order to change the decision of the Regional Board we must reach the conclusion that that Board has erred in some matter of principle, and not purely and simply in its estimation of the facts. In giving reasons for its decision the Regional Board points out that, in its opinion, the rates presently being paid are fair and reasonable for the particular locality, taking all things into consideration. It may be that had we been sitting on the case, we may have taken it in review, but that does not justify us in going behind well established principles that apply to cases coming before us on appeal.

The Regional Board had before it early in the year 1943 an application to have the incentive wage plan in vogue in this plant discontinued and to substitute for it straight time wages or hourly rates as prevailing in Ford and Chrysler. Then in June, 1943, the present application was made. These facts are mentioned to indicate that the Regional Board undoubtedly was thoroughly familiar with the operations, and thoroughly familiar with the wage structure. Evidently also, the question of wages, according to the Regional Board, was considered by them a short time prior to this application, and some upward revision of some of the rates was allowed.

Under those circumstances we feel that no case has been made out to justify us in reversing the Ontario Regional Board on the facts that were before it, and accordingly the appeal will be dismissed, except that the wage rates for janitors will be increased from 62 cents to 67 cents an hour, to date from September 1, 1943.

February 1, 1944.

Re: Canadian Industries Limited and Local 195, U.A.W.-C.I.O.

Reasons for Decision

(Oral Decision)

We are all of the opinion that this appeal must fail. The reasons, I think, have been sufficiently indicated by Mr. Bell, but the dismissal of the appeal will be without prejudice to any application that may be made as the result of the job evaluation study, and that, of course, includes any application that may be made at that time for the off-shift bonus.

The appeal will be dismissed.

February 2, 1944.

Re: Kelsey Wheel Company, Limited and Local 195, U.A.W.-C.I.O.

Reasons for Decision

(Oral Decision)

In this matter we are all of the opinion that no material, or evidence, has been advanced that enables us to interfere, in any way, with the discretion exercised by the Regional War Labour Board.

The appeal will be dismissed.

February 2, 1944.

Re: Walker Metal Products Limited and Local 195, U.A.W.-C.I.O.

Reasons for Decision

(Oral Decision)

We are all of the opinion, in regard to the question of cost of living bonus, and in regard to the straight wage increase asked for, that we cannot disturb the exercise of the discretion of the Regional War Labour Board.

We think the appeal generally will have to be dismissed, except that in line with the decision in the Auto Specialties appeal yesterday, there should be an off-shift premium of 5 cents per hour. This off-shift differential should be dated back to the date of the Regional Board's decision, which was August 20, 1943.

In all other respects the appeal will be dismissed.

February 2, 1944.

Re: Brentwood College (Victoria, B.C.)

Reasons for Decision

The question to be determined in this appeal from the Regional Board for British Columbia is whether the appellant is an "employer" under the provisions of the War-time Wages Control Order (P.C. 5963), and therefore subject to the obligation of paying cost of living bonus.

Section II (I) (v) of the Order, the defining section, excludes any person, firm or corporation operating an educational institution, if such institution "is not carried on for purposes of gain".

The appellant was incorporated under the Societies Act (R.S.B.C. 1936, chapter 265). Section 5 of that statute enacts the following:—

> "No Society shall have a capital divided into shares or declare any dividend or distribute its property amongst the members during the existence of the society, and the interest of a member in a society shall not be transferable."

The long title of the Statute can, we think, be taken as fairly descriptive of its general objective: it is an act to facilitate the incorporation of societies for charitable and other useful purposes, and to provide for their regulation.

The appellant is a private school and is not operated for the purpose of providing any pecuniary profit to its owners, but rather to provide special educational facilities to a perhaps selected clientele. It has been exempted from income taxation.

We therefore conclude that the appellant is excluded from the provisions of the governing Order in Council.

Consequently, the appeal is allowed.

Re: British Columbia Electric Railway Co., Ltd. and International Brotherhood of Electrical Workers, Locals 213 and 230

Reasons for Decision

(Oral Decision)

In this case the union has prepared a very careful and thorough brief setting out various reasons why the increase should be granted. One would judge from the nature of the brief that it was deemed that the National War Labour Board had some powers outside of the Order in Council, P.C. 5963. It must be emphasized that both the Regional War Labour Boards and ourselves, when it comes to applications for increases in wages, cannot go outside of section 25, which makes the yard-stick comparative rates for substantially similar jobs in the same locality or in a comparable locality.

Now, the union has sought to make a comparison with Seattle, pointing out that the Order in Council is silent with respect to points of comparison outside of Canada. We have already intimated in a case—I think it was the National Maritime Federation case,* I have forgotten the reference in the LABOUR GAZETTE and other publications—that we were rather of the opinion that such a

*L.G., Oct., 1943, p. 1347.

contention cannot prevail, because primarily the purpose of the Order in Council was to stabilize wages as they existed in Canada.

As far as the Regional Board's decision is concerned, we are unable to say that they proceeded on any wrong principle in connection with their decision, and they undoubtedly had comparative rates for similar operations in other localities before them, as we have.

On that basis we all feel that we have no alternative but to dismiss the appeal.

February 7, 1944.

Re: Green Manufacturing House Limited (Portage la Prairie, Manitoba) and United Garment Workers of America, Local No. 35

Reasons for Decision

This appeal is taken from a finding and direction of the Manitoba Regional Board, dated October 13, 1943, and bears upon the question whether the Winnipeg piece-work rates in the garment industry should be made to apply in a plant located at Portage la Prairie, some sixty miles from Winnipeg. The Regional Board directed payment of the Winnipeg scale for Government war contract work. As to "civilian work", it reduced the Winnipeg rates by 15 per cent on the ground largely of the lower wage level generally prevailing in Portage la Prairie. No reason appears for the difference made between war work and civilian work as far as a wage structure is concerned. Leave to appeal was refused by the Regional Board because it felt there was no matter of principle involved.

The disposition of this Board has been to refrain from interfering with decisions of Regional Boards in cases where it appeared that a discretion was exercised under local conditions. However, it would seem from a careful perusal of the material filed that an important factor here has been either overlooked or not sufficiently been given weight to. On October 1, 1942, the Union and the Garment Manufacturers' Association of Western Canada entered into an agreement which provided, *inter alia,* for an equalization of wage schedules in all Union factories in the Province of Manitoba. The present owner of the Company concerned in this appeal for a long time has been engaged in the garment industry in Winnipeg and more recently in Portage la Prairie. His knowledge of the principle of general industrial agreements must be taken for granted. He should not have an advantage arising from independent action in an industry accustomed to dealing in wage questions on an industry wide basis. No question arises as to the representative status of the union appellant. Although we would not wish to be taken as being in disagreement with the view that a wage differential between Winnipeg and Portage la Prairie is justifiable, we conclude that in the particular circumstances here present, the appeal should be allowed, with effect from the date of the decision appealed from.

February 10, 1944.

Re: Progress Manufacturing Company (Moose Jaw, Sask.)

Reasons for Decision

An appeal from a decision of the Regional War Labour Board for Saskatchewan by leave of the Regional Board.

The application was for the establishment of a wage range of $150 to $175 per month for an accountant about to be hired by a small plant repairing aircraft equipment.

The Regional Board appears to have dealt with the matter on the basis of comparison with other industries and gave approval to a single rate of $150. The appeal involves nothing more than a review of the exercise of a discretion under local conditions of which the Regional Board presumably was fully informed. We have stated on many occasions that in such cases we will not interfere.

We must therefore dismiss the appeal.

February 10, 1944.

Re: Trenton Steel Works Limited and United Steelworkers of America (U.S.W.A.)

Reasons for Decision

This is an appeal from a finding and direction of the Nova Scotia Regional War Labour Board ordering certain wage increases. In form the appeal was a general one but on the argument it appeared that the Company had put the increased wages into effect and counsel for the Company limited his appeal to the sole question of retroactivity.

The question of wage increases for these workers came before us in the Steel Case—

Re: Dominion Steel and Coal Corporation Limited, Algoma Steel Corporation Limited, Trenton Steel Works Limited and Eastern Car Company Limited.* At that time the issue was whether the workers at Trenton Steel Works Limited qualified for wage increases under the terms of P.C. 689. We reached the conclusion that they did not so qualify but reserved their right to make application to the Regional War Labour Board for Nova Scotia.

Since there was a suggestion during the argument that the Nova Scotia Board quite evidently felt itself firmly bound to follow the exact terms of our decision in the Steel Case, we feel some comment is called for. In the first place, the decision in the Steel Case was based on a special Order in Council P.C. 689 and not on P.C. 5963 at all. The case before the Regional Board was under P.C. 5963. True, we intimated some increase to the Trenton works might be indicated, but we said nothing that could possibly be construed by the Regional Board as in any way hampering their discretion. There were many factors in the situation meriting consideration, not the least of which was the fact that there had been a differential in existence between wages in the industry at Sydney and at Trenton for some twenty years. It must be remembered that the Sydney Steel plant and the Algoma Steel plant were placed on a parity by the Special Order in Council P.C. 689 and not by any decision of ours under P.C. 5963. There was nothing of such a character binding the Regional Board which was left perfectly free to exercise its good judgment under P.C. 5963. The question of ability to pay was not before us in the Steel Case because the Dominion Government under P.C. 689 had underwritten any increases. On the other hand, in the Trenton case, the question of ability to pay was a very important factor which the Regional Board was entitled to take into consideration.

It is not the policy of this Board to dictate to the Regional Boards what they should or should not do in respect to their problems. It is expected that each in its own sphere will administer the Wages Order according to its own honest, independent interpretation of the provisions. Each Regional Board has quite as much responsibility for its decisions as the National Board.

In this case the results have proved rather disastrous. Two departments of the industry have been closed down. We make no comment on whether that procedure was or was not unavoidable as we believe the matter is subjudice—in the process of being investigated by a commission appointed by the Province of Nova Scotia. It appears from the Company's records that its 1942 profits amounted to some $140,000, while the wage increases granted by the Regional Board represent an annual cost of some $300,000. The Company has already closed down two departments but is paying the increased wages as ordered by the Regional Board in the departments still remaining open.

In the circumstances here we feel we should be putting into further jeopardy the job security of the workers if we upheld the Regional Board on its award of retroactive wages. We recognize of course that these workers feel they are entitled to the same treatment as those in Eastern Car Company Limited and Trenton Industries Limited. However, there would be even greater dissatisfaction if the remaining departments had to be closed down as the result of payment of retroactive wages.

Accordingly, we must allow the appeal to the extent of striking out from the Regional Board's Order the provision as to retroactive payment of wage and cost of living bonus increases.

February 10, 1944.

Re: Avon Coal Company, Minto Coal Company, Welton and Henderson Coal Company, G. H. King Coal Company, E. S. Crawford Coal Company, and United Mine Workers of America, District 26

Reasons for Decision

The application is made by the Union for increases of $1 per day and one week's vacation with pay in line with the decision in Dominion Coal Company *et al.**

The operators strenuously oppose the application on the ground that even if they receive compensating increase in price the effect may be completely uneconomic in throwing prices out of line with a steady differential prevailing with the prices of Nova Scotia Coal. Some months ago wages were increased to bring them approximately in line with those paid in Nova Scotia. These increases have had to be met by subsidy without increase in price. Then along came the O'Connor Commission award in the British Columbia and Alberta field. This is just another of its shattering repercussions. The operators in these New Brunswick mines are fearful that if both increases are ultimately reflected in increased prices they will no

*L.G., Dec., 1943, p. 1645.

longer be able to sell their coal. Due to B.T.U. content, prices for Nova Scotia coal have always been about 20 per cent higher per ton than for New Brunswick coal. It is estimated that to compensate for the increased wages asked for the price of coal will have to be increased about 85 cents per ton. In Nova Scotia the price has been increased by 95 cents per ton. If the matter remains there New Brunswick operators will suffer no great disability. If present subsidies are converted into price increases that will mean a further price increase of about 70 cents per ton. If that takes place then the New Brunswick operator has something real to worry about. So has the New Brunswick miner.

However, we have little to do about these matters now beyond knowing about them. They were important factors for overall consideration in wage matters in the industry before Mr. Livett of U.M.W.A. District 18 succeeded in the proceeding resulting in the O'Connor Commission award. We know that the actual physical work of the miner in the Minto field is probably harder than in any mining field in the country. We cannot see why he should be dealt with on a strictly economic basis when that has now ceased to be a factor in the industry generally. It has really become the job of other agencies to adjust the economics of the coal industry.

Accordingly, the application will be granted for increases of $1 per day and one week's vacation with pay on the same terms and conditions laid down in the Joggins Coal Company *et al* case of even date herewith.

February 15, 1944.

Re: Greenwood Coal Company Limited, New Glasgow, N.S. and Coalburn Mine Workers' Organization

Reasons for Decision

This is an application by the Union for increase of $1 per day to bring wage rates in line with those recently established in the coal mining industry in Nova Scotia.

We feel the application should be granted as well as one week's vacation with pay for the same reasons outlined in the Joggins Coal Company *et al* case of even date. Finding and direction effective December 20, 1943, will issue directing increases as applied for and also one week's vacation with pay.

February 15, 1944.

Re: Intercolonial Coal Company, Limited, Westville, N.S. and Co-operative Labour Protective Association

Reasons for Decision

In this case there are two applications before us for consideration. The earlier one arose out of the levelling of rates in this mine to those paid at Acadia Coal Company Limited prior to recent increases of $1 per day and one week's vacation with pay. The second one is for increases of $1 per day and one week's vacation with pay in line with recent award in the case of Dominion Coal Company Limited *et al.**

In the earlier application this Board authorized increases in the case of the datal men and suggested to the parties they should try to agree on increases to contract miners and make a further joint application to the Board. Agreement has not been reached although the Company has increased the contract rates for machine contract miners to the rate prevailing at old Acadia mines. The only important dispute left between the parties is the contract rate for "hand pick" miners. We concluded from the evidence that any increase to this class is not justified. Accordingly, the earlier application will be dismissed except that the increase in rates to machine contract miners heretofore established by the Company is hereby confirmed.

Regarding the second application, the $1 per day increase is hereby granted as well as one week's vacation with pay for the reasons given in the Joggins Coal Company *et al* case being released concurrently. The effective date will be December 20, 1943.

February 15, 1944.

*L.G., Dec., 1943, p. 1645.

Re: Joggins Coal Company, Hillcrest Coal Company, Standard Coal Company, Indian Cove Coal Company, Bras d'Or Coal Company, Sullivan Coal Company and United Mine Workers of America, District 26

Reasons for Decision

This is an application by the Union for overall wage increases of $1 per day and one week's vacation with pay to bring wages and working conditions in line with those granted in the case of Dominion Coal Company Limited, Acadia Coal Company Limited and Old Sydney Collieries Limited.*

All of the mines concerned in the application are situated in Nova Scotia. All of the Companies take the position that the increases applied for should be granted. In order to meet increased wages in the case of Dominion Coal Company, Acadia Coal Company and Old Sydney Collieries, the price of coal had to be increased 95 cents per ton. In our view it would be undesirable that different prices should prevail in the same district. Similarly from an operating viewpoint it is not desirable that there should be a large differential in wages in the same district for the same industry. Whether given effect to on the comparative basis under P.C. 5963, or on the basis of a gross inequality under P.C. 9384, we think the result should be the same.

Accordingly, the application will be granted. There should be an increase of $1 per day to all datal and contract workers in the mines and one week's vacation with pay on the same terms and conditions as in the Dominion Coal, Acadia Coal and Old Sydney Collieries case.

The question of retroactivity is as usual emphasized by the Union. On the other hand where any increase has to be met out of price increases borne by the public in general, we feel that generally speaking the award should not go back beyond the date of the application. Accordingly, the finding and direction will take effect December 20, 1943.

February 15, 1944.

*L.G., Dec., 1943, p. 1645.

Re: Advertising Agencies of Canada and Mrs. Claire Wallace Stutt

Reasons for Decision

This is an appeal from a decision of the Ontario Regional War Labour Board refusing to authorize an increase in remuneration for Mrs. Claire Wallace Stutt (Claire Wallace) from $170 weekly to $200 weekly.

As we view the matter, the sole question to be determined is the status of Claire Wallace. Is she an employee within the meaning of the Wages Order or a salaried official within the meaning of the Salaries Order or is she within the class of those persons whose emoluments are not under control at all? In other words, has she similar status to the doctor or the lawyer and is she subject to the same lack of restriction in so far as wartime controls are concerned?

Two of the members of this Board are quite familiar with her radio program and her personality as reflected over the ethereal waves and we both approve. The other member is prepared to accept our estimation. So much for the principle of solidarity.

Having established that background we are all of the opinion that she is an artist and a very fine artist indeed. As we understand the situation, she enjoys with the National War Finance Committee a retainer for her services which does not exclude her from accepting a similar retainer or retainers with others. Her position is rather analogous to that of the lawyer who is free to engage himself in the service of various clients even though he may for a certain period be engaged in the service of one. Perhaps she could be more closely likened to the portrait painter who can hardly be said to be an employee of the person whose portrait he paints. That being the case, we regret that under our reference we have no control over her destinies and since it falls to our lot to decide whether the Salaries Board has any control we are unanimous in deciding that if we had any control we certainly would not relinquish it to any other Board.

It is a matter of regret to us that we have no jurisdiction whatever over the lady. If we had it is likely we would stretch a point or even two in her favour. We can only deal with her case by way of appeal without her personal appearance, a rather unsatisfactory process. However, she should not be left to the whim or caprice of the Ontario Regional Board without some support.

Accordingly, much as we dislike having no control of her financial destinies, we must conclude that she belongs to the uncontrolled and legally uncontrollable section of the community, not, however, overlooked nor forgotten by the Income Tax Department. Accordingly, in our opinion, if the National War Finance Committee feels that she is worth $200 a week instead of $170 a week that is a matter for them to decide and as far as we are concerned they can make the increased payment retroactive to the extent that they feel the public conscience will tolerate. The appeal is allowed.

February 17, 1944.

Re: Algoma Steel Corporation Limited and United Steelworkers of America, Local 2251

Reasons for Decision

This is an application by the Union under P.C. 689, dated January 26, 1943, for increases or rather for reclassification in maintenance staff.

The relevant provision is to be found in Memorandum of Understanding incorporated into P.C. 689[1] and reads as follows:—

> "That the management and the maintenance men enter into negotiations and that an application be made to the National War Labour Board for such increased wage rates or range of wage rates with respect to such maintenance men as pipe fitters, steamfitters, millwrights, electricians and carpenters as will bring their wage rates on a level with prevailing wage rates paid to maintenance men in such classifications."

In the view we take of this matter it is important to note another provision of the Memorandum of Understanding:—

> "That arrangements be made for the making of a careful study having in view a reclassification and an evaluation of jobs."

The case of the workers here involved has been dealt with already partially in two stages. Under date of March 31, 1943, cost of living bonus was increased from 5 cents an hour to 9 cents an hour.[1] Under date of September 9, 1943, former differentials were restored and the maintenance men benefited to the extent of 4½ cents per hour.[2] In addition they have received a further increase in cost of living bonus under general order of the Board in common with all other workers.

The case as presented to the Board is highly unsatisfactory. This observation is not made in any uncomplimentary way as it applies to both sides. It is just that kind of case. The Union based its contention for increases on wages paid various trades in the shipbuilding industry. The Company undertook comparison by averaging up wages paid to maintenance men in some seven heavy industries in Hamilton, Ontario. Neither method accurately fits the case. Besides in our subsequent research we doubt some of the figures obtained by the Company.

In our view this matter can only be rationally determined by having a survey made on the ground as was done in the shipbuilding industry in Ontario and Quebec. For example, we are asked to institute journeymen rates in many cases where it is denied that the individual concerned qualifies as a journeyman. Then we are confronted with certain classifications quite foreign to the usual craft union set-up as related to the construction trades or the shipbuilding industry. Then again the terms "lead hand" or "charge hand" have been used connoting something entirely different to their accepted meaning in the shipbuilding industry.

As pointed out, the Memorandum of Understanding provided:—

> "That arrangements be made for the making of a careful study having in view a reclassification and an evaluation of jobs."

As far as we have been able to learn nothing has been done by the parties pursuant to this proviso. In our opinion the case as presented by the Union contemplates that reclassification and job evaluation is precisely what is required with respect to the maintenance staff in order to deal properly with this case.

Accordingly, we recommend to the parties that by agreement they undertake such a survey and if they can agree jointly present the results to this Board for approval. If they cannot agree to even undertake such a joint survey and notify us to that effect within a reasonable time we shall appoint a competent referee to make a factual study and report to the Board, when we shall dispose of the case.

In the meantime we shall retain the matter in the hope that the parties will agree to making a joint survey as contemplated by the Memorandum of Understanding.

[2] L.G., Oct., 1943, p. 1346.

Re: Canada Packers Limited, Swift Canadian Company Limited and Burns and Company Limited and United Packinghouse Workers of America

Reasons for Decision

(Oral Decision)

In the packers' cases which we heard this morning, we have had an opportunity to confer during the adjournment, and we are now prepared to dispose of them.

In the appeal of the union in the Canada Packers Limited case, the increase which was granted by the Regional Board and designated as a war premium will be sustained, except that the increase is to be treated as part of the base rate rather than the so-called war premium.

The labour rate was evidently given careful consideration by the Regional Board with respect to local conditions in Winnipeg, and we feel that we should not disturb its judgment, except to provide that the rate should be established as a range of 45 cents to 50 cents an hour. This will enable the employer to grant increases within the range without restriction as to time, and at the same time dispose of any complaint of individual discriminatory treatment amongst employees.

In the joint appeal in the Burns and Company Limited case the result will be the same as in the Canada Packers' case.

In the Swift Canadian case, where the appeal is also a joint one, the same result will obtain as in Canada Packers, except that the appeal as to overtime is dismissed.

February 21, 1944.

Re: Canadian Industries Limited, Montreal, Que.

Reasons for Decision

This is an application for leave to appeal from a decision of the Manitoba Regional War Labour Board refusing authorization to the Company to extend cost of living bonus payments to employees receiving between $300 and $350 monthly under Section 44 of P.C. 5963.

From the material filed it would appear that the Manitoba Board has evolved a policy as to Manitoba employers that it would not extend cost of living bonus payments to employees earning more than $250 a month.

The Company seems to take the position that because other Regional Boards have extended cost of living bonus payments to employees earning up to $350 per month, as a national employer it should be entitled to a reversal of the Manitoba Board's decision.

We prefer the viewpoint that the Regional Board is master in its own house in Manitoba. It has exercised a proper discretion as we judge it on relevant and correct principles. We do not think we should interfere. Accordingly leave to appeal must be refused.

February 21, 1944.

Re: Canadian Liquid Air Company Limited and Boilermakers' and Iron Shipbuilders' Union of Canada, Local No. 1

Reasons for Decision

(Oral Decision)

We think we can proceed to dispose of this matter now. The whole question really has to do with the interpretation of section 25 of P.C. 5963. The Regional Board in this case seems to have dealt with the matter on the basis of the wages generally prevailing in the locality, and perhaps given no consideration, or we see little evidence of consideration, to the matter of substantially similar jobs, positions or occupational classifications.

The comparison with the shipyards, we feel, cannot be sustained in dealing with this case. After all this company has some nine other branches. Those are exactly similar industries. Comparison might well have been made with chemical industries, or with artificial or natural gas industries, or something of that kind, but to make a comparison with the shipyards is, in our opinion, a violation of section 25.

The union case, as far as we can analyse it, seems to be based entirely upon comparison with the shipyard industry. It may be that wages in B.C. are higher as compared with the rest of Canada. No doubt they are. However, that does not mean, in our opinion, that the wage earners in the rest of the country should be sustaining the higher wages in B.C. necessarily.

Accordingly the appeal will be allowed.

The question of overtime which was raised in the union's brief here for the first time, and apparently not actually dealt with by the Regional Board, will have to be dealt with by that Board, the theory, of course, being that we are in an appellate position and any parties have the right to have a matter twice heard, which would not be the case if we dealt with it as if we had original jurisdiction.

February 21, 1944.

Re: Clark Ruse Aircraft Limited (Lakeburn, New Brunswick) and United Steel Workers of America, Local 2889

Reasons for Decision

This is an application for leave to appeal from a finding and direction of the Regional War Labour Board for New Brunswick, dated October 14, 1943, refusing an application by the Union for the full cost of living bonus.

The plant was established in the fall of 1942 and in the summer of 1943, the Company and the Union collaborated in the setting of a schedule of wage rates based upon job analyses and fresh classifications. The Regional Board approved the new rates, but

declined the application for the full bonus. The cost of living bonus then being paid was $1.85 (now $2.20).

The Regional Board could accede to the application only if it found that an inequality or unfairness resulted for the employees concerned from a comparison, within the industry, of wage rates and cost of living bonuses combined. The only source of jurisdiction is the proviso added to section 34 (3) of the Wages Control Order (P.C. 5963) and Regional Boards must exercise their discretion within the limits laid down in the Order in Council.

The Union's case rests on the contention that aircraft plants in the Montreal area and elsewhere, and particularly a plant of the Canadian Car & Foundry Limited located at Amherst, N.S., are paying the full bonus. It must first be observed that we are concerned with a repairing and overhauling plant and comparisons are not to be made with the aircraft manufacturing industry. With regard to the Amherst plant, it is not shown that when wage rates and cost of living bonus are combined the result indicates any unfairness to the employees concerned in this appeal.

We are faced however with the action of the Nova Scotia Regional Board who on the basis of the "practice generally prevailing in the locality" have granted the full bonus to the employees of the Dartmouth, N.S. plant of the Company concerned in this appeal, presumably on the basis that the full bonus was being paid to the Canadian Car plant at Amherst. The basic rates and bonus were the same in both the Lakeburn and Dartmouth plants of the Clark Ruse Company. The Nova Scotia Board seems to have disregarded the terms of the Order in Council under which it, as well as ourselves, operate. There was no choice to be made between the locality provision of section 25 and the rules of section 34 (3), to suit a board's convenience in disposing of an application. When an application involved the cost of living bonus, the provisions of section 34 (3) and of no other directed the Board's action.

We think the New Brunswick Board was right in its decision and, so far as our present information goes, that the Nova Scotia Board was wrong. We will therefore dismiss the appeal.

February 21, 1944.

Re: La Compagnie Legare, Limitée (Quebec, P.Q.)

Reasons for Decision

This is an appeal by the employer from a decision of the Quebec Regional Board, dated December 7, 1943, declaring that two employees of the appellant company are not above the rank of foreman or comparable rank.

The employees concerned are styled Manager of the Quebec Division and Branch Manager at Quebec City respectively. They receive salaries of more than $250 per month and, as a result, the presumption is that they are to be controlled by the Salaries Order and not by the Wages Order (see section 13 (2) of P.C. 5963 and the decision in the Canadian Aircraft Instruments and Accessories case,* dated January 13, 1944).

In the description of duties supplied by the Company, there is no clear indication that they are merely supervisory, but rather that the responsibilities involved have an executive character.

The appeal will be allowed.

February 21, 1944.

*L.G., Feb., 1944, p. 162.

Re: Parke, Davis and Company (Windsor, Ontario) and C. A. Magnan

Reasons for Decision

An appeal from a decision of the Quebec Regional Board, dated December 18, 1943.

The employee concerned is a salesman and on the effective date of P.C. 5963 was remunerated by flat monthly salary plus a 5 per cent commission on the amount of sales originating in a given territory in excess of a fixed quota. The application was for authorization to increase the sales quota by $8,000 on the ground that the area assigned to Mr. Magnan had been enlarged. No change was requested in the amount of either the monthly salary or the commission rate. The Regional Board not only declined the application with respect to this particular employee but went further and ordered the Company to

> "re-establish the same rule or practice of remuneration as was prevailing on November 15, 1941, and to adjust the difference in said wages including commissions to any salesmen in the Province of Quebec, whose working conditions or remunerations have been affected by the mentioned changes."

What happened was that the Company had eliminated one of its sales territories and subdivided it among five salesmen. It would appear from the record that the change has been approved by the Regional Board in the case of at least one of the five men involved.

Now the Regional Board, reversing itself, finds that there has been a contravention of Section 23 (1) of the Order in Council (P.C. 5963) prohibiting the decrease of wage rates by the alteration of working conditions.

The matter must be considered not under Section 23 (1) but rather under Section 18:—

> "No employer shall decrease a range of wage rates or a single wage rate calculated on a time or commission basis forming part of the basic scale of wage rates paid by him on November 15, 1941."

In the Safeway Stores Limited case[1] this Board has said that what in essence was stabilized by the Wages Control Order was their basis of calculation. In this case the increase in the sales quota is offset by an enlarged opportunity to earn commissions. Whether the one is in line with the other is a matter for consideration in the case of each salesman affected by the change. There is no evidence in this instance that the stabilized "wage rate" has been decreased and the employee has accepted the new arrangement.

Therefore the order of the Quebec Regional Board, dated December 18, 1943, will be set aside and the appeal in respect of Mr. Magnan is allowed.

February 21, 1944.

[1] L.G., Oct., 1943, p. 1352.

Re: James Pender & Company Limited (Saint John, New Brunswick) and United Steelworkers of America, Local No. 2957

Reasons for Decision

By leave of the Regional War Labour Board for New Brunswick, this appeal is taken by the Union from a Finding and Direction of that Board, dated November 5, 1943.

The Company is a division of the Dominion Steel and Coal Corporation Limited and operates a wire and nail mill. The Union's application was for a general wage increase based from a minimum hourly rate of 50 cents and certain increases in piece-work rates: broadly speaking, a 10 cent increase. It contended for the rates paid in the nail and wire mill of the Dosco steel plant at Sydney, N.S.

The Regional Board appears to have given the application careful consideration. Rather than establish parity with the Sydney rates, it preferred keeping the Pender rates in line with those generally paid in the Saint John area. As a consequence it ordered a 3 cent hourly increase with a roughly equivalent percentage increase in piece-work rates.

Having thus exercised its discretion under section 25 of P.C. 5963, that is upon the basis of local comparison, can we say, reviewing the case as a board of appeal, that the principle proceeded upon was erroneous. We have just pointed out in the Trenton Steel Works case (February 10, 1944) that the Steel rates at Sydney came into existence as the result of a special Order in Council (P.C. 689) and that the discretion of war labour boards in administering the provisions of P.C. 5963 remained unfettered.

The Regional Board in this case properly viewed its responsibility and weighed what it considered to be the circumstances material to the case, among which the Company's future ability to pay. Having arrived at a decision upon that basis, we are not disposed to interfere with it, because in our view it was no error of principle in this case to have adopted a local comparative base.

We must therefore dismiss the appeal.

February 21, 1944.

Re: Messrs. Pollard & Pike Ltd., G. H. Wheaton, Parfitt Brothers Ltd., Luney Brothers Ltd., Williams, Trerise & Williams Ltd., Victor Leigh, Leslie G. Scott, E. H. Shockley, A. McKinty, Walter B. Revercomb, all of Victoria, B.C. and members of Victoria Builders' Exchange, Ltd., and United Brotherhood of Carpenters and Joiners of America, Local No. 1598

Reasons for Decision

This is an application for leave to appeal from a decision of the British Columbia Regional Board who by Finding and Direction, dated November 2, 1943, directed some ten members of the Exchange to increase the basic hourly rate of construction carpenters from 90 cents to $1. The Regional Board refused leave to appeal.

The effect of the decision under appeal is to raise the construction carpenter rate in Victoria to the Vancouver level. In the past, there have been times when the rates were the same and in fact they were stabilized at 90 cents following collective agreements in September, 1942. During the summer of 1943, a process of wage increase was initiated by the Regional Board for which no support appears in the Order in Council (P.C. 5963)

which gave the Board its existence and authority. The Vancouver rate was increased to $1 and then Vancouver contractors were permitted to pay the increased rate on their jobs in Victoria. The Western Labour Board adopted the new rate for government and defence projects. No appeals have been taken from these decisions. The result has been the establishment of a new rate which the Union local in Victoria naturally sought to obtain from the remainder of the employers in Victoria and the Regional Board has seen fit to take the new rate as a basis of comparison. This case affords a typical illustration of the ineffectiveness of section 25 as a wage control measure when the comparative formula is cut loose from the anchor date (November 15, 1941).

However to allow the appeal would be to create difficulty and upset what now appears to be a settled rate in the area.

In the circumstances, we think the application should be denied.

February 21, 1944.

Re: Schell Transports Limited (Woodstock, Ontario)

Reasons for Decision

An appeal from a decision of the Ontario Regional Board, dated December 4, 1943.

The appellant operates a motor freight transportation service in Western Ontario and has eight branch managers located at various points. When the control order became effective on November 15, 1941, the weekly remuneration of these employees ran from $36 at Woodstock to $50 at Windsor. The Company states that there was no particular basis used to fix individual salaries and that they were increased according to general ability, regardless of location or volume of business. Its contention is that it was paying a "range of wage rates" and, under the blanket authorization of section 24 (1) of P.C. 5963, that it had been permitted to grant increases within the limits of the range ($36-$50). The Regional Board took a different view and held that each branch had to be considered separately and that there was no range in effect for the occupational classification involved.

Section 17 (1), we think, supplies the answer to the problem presented by this appeal, in the following terms:—

> "A range of wage rates means, for the purposes of this Order, a group of two or more wage rates inclusive of the highest and lowest wage rates in such group, paid by an employer in respect of jobs or positions or an occupational classification involving the performance by the employees therein of similar work or duties and requiring a similar type and degree of skill, such wage rates varying with respect to the relative merit, skill, length of service or other matters of a like nature, of such individual employees."

There is nothing in this definition to limit its scope to employees working in a given locality or establishment. Further, no feature appears in this case to negative the proposition that all of these branch managers belonged to the one occupational classification. Upon those premises, the appellant was correct in assuming that, without authorization, it could increase wages within the limits of the range.

Consequently, we think the appeal should be allowed.

February 21, 1944.

Re: The Canadian John Woods Company Limited and Boilermakers' and Iron Shipbuilders' Union of Canada, Local No. 1

Reasons for Decision

(Oral Decision)

In this appeal we have the advantage of a report from the Regional Board, which must be taken to know the local circumstances pretty well, and better than we do. It is quite apparent from that report that the Regional Board's opinion of the submission by the union was that it was quite inaccurate as to rates. Rates had been increased on two or three occasions, and in fact at the time this application was launched increases had been granted but a short time before.

Then that means that the Regional Board has taken the viewpoint that direct comparison with the shipyard rates is not a proper one in the case of this company. We feel that we cannot interfere with their discretion in any way, so the appeal will be dismissed.

February 22, 1944.

Re: Dominion Engineering Works (Longueuil Plant) and International Association of Machinists, Lodge 1596

Reasons for Decision

(Oral Decision)

We are all of the opinion that this appeal must be allowed, and the decision of the Quebec Regional War Labour Board, as evidenced in their letter of October 6, 1943, will be restored.

In order that there shall not be any further difficulties about the interpretation of what we mean, we put it this way, that the normal working week is to be regarded as fifty-four hours, and that the weekly wage presently being obtained will be divided by fifty-four in order to ascertain the hourly rate.

After fifty-four hours in any week, time and a half will be applied.

It appears that the original application here was made about June 25, 1943, but the Regional Board, for some reason or other that we do not know, did indicate in one of its findings that the award should be retroactive to July 20, 1943. We will adopt the same basis.

February 22, 1944.

Re: Machinery Service Limited and International Association of Machinists, Lodge 631

Reasons for Decision

(Oral Decision)

We are all of the opinion that, under section 34 of the Order P.C. 5963, there is no doubt that these employees are legally entitled to cost-of-living bonus which was not paid at the then rate of sixty cents, and no matter what has transpired in the way of adjustment and so on, we feel that we can do nothing arbitrary about taking away a legal right.

With regard to the question of vacations with pay, evidently there was an agreement contemplated, and, we are informed, subsequently authorized, which started the qualifying period as at December 31, 1943. For all practical purposes with the plant closing down at the end of the month, that would mean that only two days could be qualified for, and in view of the fact that the plant is closing down, those who will be leaving should be entitled to two days' pay in lieu of the vacation, which they would have been entitled to had the company decided to continue in operation.

Therefore there will be a finding and direction that the employees affected are entitled to the back cost-of-living bonus applied for, but that the order will apply only to those who are presently in the employ of the Company. The same employees will also be entitled to receive two days' pay in lieu of vacations with pay.

February 24, 1944.

Re: Royal York Hotel (Toronto) and Hotel and Restaurant Employees International Alliance and Bartenders International League, Locals 299 and 7

Reasons for Decision

(Oral Decision)

We are all of the opinion that this application must be treated as one asking for an increase of ten dollars a month right across the board, and five cents per hour for hourly rated employees.

Now it may be that there are instances in the schedule of low wages, but this is not the way to establish the proposition that everybody is entitled to an increase.

There is besides that, a matter that weighs a great deal with us. On the 13th March, 1943, an agreement was entered into, and regardless of the exact wording of clause 17, we are of the opinion it was entered into in good faith, and for a comparatively short period of fifteen months.

We are all very strongly of the opinion that these agreements cannot simply be wiped out by application to these Boards and they must be taken to have been made in good faith, and it is a fundamental proposition that they should be carried through. There are instances where the Boards have interfered in connection with wages during the currency of an agreement, in most of the cases with adjustments, and that sort of thing, but to give effect to this application would simply mean, as far as the wages are concerned, a complete scrapping of an agreement which runs until June 30th next.

Therefore we feel that we have no alternative but to dismiss the application.

February 24, 1944.

Re: The Slingsby Manufacturing Company, Limited (Brantford, Ontario)

Reasons for Decision

This is an appeal from a decision dated October 20, 1943, of the Ontario Board declining a joint application of the Company and the Council of its employees for permission to inaugurate a 2½ cents premium for time worked between 7 p.m. and 7 a.m. and to increase present differential to 5 cents in the case of the small number of steady night workers now receiving 2½ cents. The Regional Board granted the required leave to bring the appeal.

The Company is largely engaged in production for war purposes and workers are employed at night by rotation with the exception of about 15 who work continuously at night, and who have been receiving an hourly bonus of 2½ cents. The Regional Board refused the application because no other industry in Brantford was paying a night-work differential.

Section 29 (P.C. 5963) was the governing provision in a case of this kind. Its terms are perhaps more elastic than those of section 25, although the comparative basis, as a "principle of (the) Order", still remains at the root of it. But comparison need not always be confined within a locality; it can extend to other areas.

Premium for night work is a growing practice in war industries. Peterborough and Windsor, for instance, are districts in which it prevails. On comparison with those localities, we think that approval should have been given to the application in so far as it relates to the rotating shift workers; but we do not think that there should be a further differential to the steady night workers.

We shall therefore allow the appeal to the extent indicated subject, however, to the provision that the premium shall be excluded from the base rate in the computation of over-time.

February 24, 1944.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with Recent Proceedings under the Industrial Disputes Investigation Act, Conciliation Work of the Department of Labour, and Strikes and Lockouts in Canada, Great Britain and other countries.

Recent Proceedings under the Industrial Disputes Investigation Act.—This article gives an account of all applications for Boards of Conciliation and Investigation, and the disposition of these applications. In cases where Boards are established, the LABOUR GAZETTE publishes in due course the full text of their reports, as submitted to the Minister of Labour.

Since the outbreak of war and the extension of the Industrial Disputes Investigation Act to cover disputes in war industries, the number of applications for Boards of Conciliation and Investigation has greatly increased. In recent months the majority of applications for Boards have been referred to Industrial Disputes Inquiry Commissioners for preliminary investigation, to determine whether the circumstances warrant the establishment of a Board. Reports of Commissioners appointed under the Act are summarized in this article.

Disputes which concern wage demands come under the jurisdiction of the National and Regional War Labour Boards.

Conciliation Work of the Department of Labour.—Conciliation proceedings are carried on by the Department of Labour for the most part under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seen expedient for the purposes of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned. In some disputes occurring in industries coming directly under the Industrial Disputes Investigation Act, namely, mines and public utilities, and war work, preliminary inquiries and mediation by officers of the Department result in the settlement of the matters in dispute without the necessity of the establishment of Boards of Conciliation and Investigation.

Strikes and Lockouts.—The latest information concerning strikes and lockouts in Canada is published monthly in tabular form, with a summary appearing once a year. The summary of strikes and lockouts in Canada and other countries during 1943 appear in the current issue of the LABOUR GAZETTE.

The latest available information as to strikes and lockouts in Great Britain and other countries appears from month to month.

Recent Proceedings under the Industrial Disputes Investigation Act

IN the month of February three Boards of Conciliation and Investigation submitted their reports in connection with the following disputes:

(1) Between Consolidated Plate Glass of Canada, Limited, Hobbs Glass, Limited, J. P. O'Shea Company, Limited, Pilkington Bros. (Canada), Limited, and Star Glass Company, all of Montreal, P.Q., and their employees, members of Local No. 1135, Brotherhood of Painters, Decorators and Paper Hangers of America.

(2) Between Central Aircraft, Limited, London, Ont., and its employees, members of the Central Aircraft Workers' Association, Unit 2 of the Canadian Aircraft Workers' Association (C.C.L.).

(3) Between the Dominion Textile Company, Limited (Mount Royal, Colonial and Hochelaga Mills), Montreal, P.Q., and employees, members of Local 102, United Textile Workers of America (A.F. of L.).

Applications Received

Seven applications* for the establishment of Boards of Conciliation and Investigation under the provisions of the Industrial Disputes Investigation Act were received in the Department of Labour during the month of February. These were:—

(1) From employees of Research Enterprises, Limited, Leaside, Ont., members of the Association of Technical Employees. The dispute concerned union recognition and the negotiation of a collective labour agreement and was said to affect 300 employees directly and 7,500 indirectly. The applicant union was advised that a board could not be established in this case, as the bargaining agency of all the employees of the company had been previously determined in accordance with the provisions of Order in Council P.C. 10802, applying to Crown Companies, and an agreement entered into between the company and the United Steelworkers of America.

(2) From employees of the Union Steamship Company, Limited, Vancouver, B.C., members of the British Columbia Seamen's Union. The dispute, which arose over the union's request for the negotiation of a collective labour agreement, was said to affect 173 employees directly and 224 indirectly. On February 4, Mr. G. R. Currie, Industrial Relations Officer, Vancouver, B.C., was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute.

(3) From employees of the Anglo Canadian Pulp and Paper Mills, Limited, Shipbuilding Division, Louise Basin, P.Q., members of the Quebec Professional Union of Construction Workers. The dispute, which was said to affect 1,400 employees directly and 2,100 indirectly, concerns union recognition and the negotiation of a collective labour agreement. Mr. Bernard Rose, K.C., Montreal, P.Q., was authorized on February 22, as Industrial Disputes Inquiry Commissioner to investigate the dispute.

(4) From employees of the Langley Manufacturing Company, Limited, Granville Island, Vancouver, B.C., members of Local 2765, United Steelworkers of America. The dispute, which developed out of the union's request for the negotiation of a collective labour agreement including clauses providing for maintenance of membership, check-off, seniority, promotion, demotion and proper adjustment of grievance procedure, was said to affect 45 employees directly and 11 indirectly. On February 16, Mr. G. R. Currie, Industrial Relations Officer, Vancouver, B.C., was appointed an Industrial Disputes Inquiry Commissioner to investigate the dispute.

(5) From employees of the Halifax Shipyards, Limited, Halifax, N.S., members of Local 1, Industrial Union of Marine and Shipbuilding Workers of Canada (C.C.L.). The dispute, which arose out of the union's request for the negotiation of an agreement providing for the check-off of union dues and a closed shop, was said to affect 2,250 employees directly and 250 indirectly. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., was authorized on February 17, as Industrial Disputes Inquiry Commissioner to investigate the dispute.

(6) From employees of the Dairy Pool Cooperative Association, Limited, Prince Albert, Sask., members of Local 241, United Packinghouse Workers of America. The dispute, which was said to affect 27 employees, concerns union recognition.

(7) From employees of the Dominion Forge and Stamping Company, Windsor, Ont., members of Local 195, United Automobile Workers of America. The dispute which developed out of the union's request for the inclusion of certain additional clauses in the existing agreement covering piece work, classifications and seniority, was said to affect 480 employees. Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, Ont., was authorized on February 29, as Industrial Disputes Inquiry Commissioner to investigate the dispute.

* By P.C. 9384, the National and Regional War Labour Boards are specifically charged with the duty of adjudicating wage demands. Therefore all applications for the establishment of Boards of Conciliation and Investigation in which wages are the sole cause of the dispute are removed from the ambit of the Industrial Disputes Investigation Act and the applicants are referred to their respective War Labour Board.

Boards Fully Constituted

Horseshoe Lake Mining Company, Ormiston, Sask.—Reference was made in the January issue of the LABOUR GAZETTE, p. 46, to the establishment of a Board of Conciliation and Investigation to deal with a dispute between the Horseshoe Lake Mining Company, Ormiston, Sask., and its employees, members of Local No. 2, Sodium Sulphate Workers' Union (C.C.L.). During the month, the personnel of the Board was completed and is as follows: His Honour Judge J. H. McFadden, Arcola, Sask., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board; Mr. D. S. MacDonald, Regina, Sask., and Professor John E. L. Graham, Winnipeg, Man., appointed on the nomination of the employer and employees respectively.

Johnson Wire Works, Limited, Montreal, P.Q.—The constitution of the Board of Conciliation and Investigation established to deal with a dispute between the Johnson Wire Works, Limited, Montreal, P.Q., and its employees, members of Lodge 1758, International Association of Machinists (L.G., Feb., 1944, p. 174), was completed during February. The personnel of the Board as originally constituted was as follows: Honourable Mr. Justice Oscar L. Boulanger, Quebec, P.Q., chairman, appointed on the joint recommendation of the other two members of the Board; Messrs. D. A. Paterson and Paul Fournier, both of Montreal, P.Q., appointed on the nomination of the employer and employees respectively. On February 12, Mr. Paul Fournier informed the Department that owing to unforeseen circumstances it would not be possible for him to act as a member of the Board and tendered his resignation. Subsequently the applicant employees submitted the name of Mr. George Smith, Verdun, P.Q., to replace Mr. Fournier on the Board and his appointment was confirmed.

Dominion Engineering Works, Limited, Longueuil and Lachine, P.Q.—The Board of Conciliation and Investigation established on January 27, to investigate a dispute between the Dominion Engineering Works, Limited, Longueuil and Lachine, P.Q., and its employees, members of Lodges 1660 and 1596, International Association of Machinists (L.G., Feb., 1944, p. 174) was fully constituted on February 14. The personnel of the Board is as follows: Mr. F. W. Edge, Montreal, P.Q., chairman, appointed on the joint recommendation of the other two members of the Board; Messrs. Hector M. Sparks, Hampstead, P.Q., and George Smith, Verdun, P.Q., appointed on the nomination of the employer and employees respectively.

Other Disputes Referred to Industrial Disputes Inquiry Commissioners

West Coast Shipbuilders, Limited, and Hamilton Bridge (Western), Limited, Vancouver, B.C.—On February 2, Honourable Mr. Justice S. E. Richards, Winnipeg, Man., was authorized as Industrial Disputes Inquiry Commissioner to investigate the dispute between West Coast Shipbuilders, Limited and Hamilton Bridge (Western), Limited, Vancouver, B.C., and their employees, members of eight trade unions (L.G., Dec., 1943, p. 1674). Following Board procedure, and the rejection of the majority report of the Board by the applicant unions, officers of the Department of Labour located in Vancouver, B.C., arranged several conferences between the parties to explore the possibility of securing a settlement of the dispute but without success. An application was then made to the Minister of Labour for the taking of a strike vote under the provisions of Order in Council P.C. 7307. With a view to the possibility of settling the dispute without recourse to the taking of a strike vote, the Minister of Labour authorized Mr. Justice Richards to investigate.

Aluminum Company of Canada (Kingston Works), Kingston, Ont.—An application for the establishment of a Board of Conciliation and Investigation was received from employees of the Aluminum Company of Canada (Kingston Works), Kingston, Ont., members of Local 54, International Association of Machinists and Local 43, International Union of Aluminum Workers of America (L.G., Feb., 1944. p. 174). On February 23, Mr. J. P. Nicol, Industrial Relations Officer, Toronto, Ont., was authorized as Industrial Disputes Inquiry Commissioner to investigate and report on the application.

Industrial Disputes Inquiry Commission at Shawinigan Falls, P.Q.

Aluminum Company of Canada, Shawinigan Falls, P.Q.—On February 7, the Industrial Disputes Inquiry Commission which was established as a result of a dispute between the Aluminum Company of Canada, Shawinigan Falls, P.Q., and its employees, members of the International Union of Aluminum Workers (L.G. Feb., 1944, p. 175), was full constituted.

The personnel of the Commission, which is to investigate the union membership of the employees of the company at Shawinigan Falls, P.Q., is as follows: Mr. Cyprien Miron, Montreal, P.Q., chairman, nominated by the Quebec Department of Labour; Messrs. Paul Fournier, Montreal, P.Q., and Hervey Pelletier, Shawinigan Falls, P.Q., appointed on the nomination of the International Union of Aluminum Workers and the National Catholic Syndicate of Aluminum Workers of Shawinigan Falls, respectively.

Application for Strike Votes

Goodyear Tire and Rubber Company of Canada, Limited, Bowmanville, Ont. — On January 26, 1944, the Department received the unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between the Goodyear Tire and Rubber Company of Canada, Limited, Bowmanville, Ont., and its employees, members of Local 189,

United Rubber Workers of America (L.G., Feb., 1944, p. 181). On February 5, the company advised the Department that it was not prepared to implement the unanimous recommendation of the Board, that the new agreement between the parties concerned should contain a maintenance of membership clause. On being advised as to the attitude of the company toward the recommendation of the Board, the applicant union requested that a strike vote be taken under the provisions of Order in Council P.C. 7307. On February 24, the Minister of Labour granted the application of the employees for the taking of a strike vote. However, before proceeding to make the necessary arrangements for the taking of this vote, Mr. F. J. Ainsborough, Industrial Relations Officer, Toronto, Ont., was instructed to endeavour to arrange a meeting of the interested parties with a view to bringing about a settlement of the matters at issue without recourse to strike vote procedure.

Dominion Textile Company, Limited (General Machine Shop and Merchant Branches), Montreal, P.Q.—On November 2, the Department received the majority and minority reports of the Board of Conciliation and Investigation established to deal with a dispute between the Dominion Textile Company, Limited (General Machine Shop and Merchant Branches), Montreal, P.Q., and its employees, members of Local 102, United Textile Workers of America (A.F. of L.) (L.G., Dec., 1943, p. 1657). On November 17, the Department was advised by the applicant union that the union was accepting the recommendation of the majority report of the Board which recommended that Local 102, United Textile Workers of America be recognized by the company as bargaining agent of the employees concerned. The company addressed a letter to the Canadian representative of the union on November 25, advising him that the management was prepared to negotiate with the union, as soon as it had been established that the applicant union represented a majority of the employees affected by the production of membership records, and financial statements. The union refused to make these documents available and requested that a strike vote be taken in accordance with the provisions of Order in Council P.C. 7307. The Minister of Labour granted the request of the applicant union for the taking of a strike vote. However, before proceeding with the vote, Mr. R. Trepanier, Industrial Relations Officer, Montreal, P.Q., was instructed to endeavour to bring about a settlement without recourse to strike vote procedure.

Montreal Cottons, Limited, Valleyfield, P.Q.—The majority and minority reports of the Board of Conciliation and Investigation established to deal with a dispute between Montreal Cottons, Limited, Valleyfield, P.Q., and its employees, members of Local 100, United Textile Workers of America (A.F. of L.) (L.G., Dec., 1943, p. 1666) were received in the Department on November 6, 1943. Subsequently, the union representative advised the Department that his organization accepted the recommendation of the Board as a basis for the negotiation of a collective labour agreement. The majority report of the Board recommended that the company recognize Local 100, United Textile Workers of America, as the bargaining agent of its employees. The Company disagreed with the union's claim that it represented a majority of the employees affected and insisted that a Commissioner should be appointed to examine the union's membership records. On February 28, the Department received from the union a request for the taking of a strike vote in accordance with Order in Council P.C. 7307. The request of the applicant union for the taking of a strike vote was granted by the Minister of Labour. However, Mr. R. Trepanier, Industrial Relations Officer, Montreal, P.Q., was instructed to endeavour to arrange a meeting of the interested parties with a view of bringing about a settlement without recourse to strike vote procedure.

Dominion Textile Company, Limited (Mount Royal, Colonial and Hochelaga Mills), Montreal, P.Q.—On February 18, the majority and minority reports of the Board of Conciliation and Investigation established to deal with a dispute between the Dominion Textile Company, Limited (Mount Royal, Colonial and Hochelaga Mills), Montreal, P.Q., and its employees, members of Local 102, United Textile Workers of America (A.F. of L.) (L.G., March, 1944, p.). The majority report of the Board recommended against the recognition of Local 102, United Textile Workers of America as the bargaining agent of the employees. On February 28, the union representative advised the Department that his organization was unable to accept the recommendation of the Board of Conciliation and Investigation and requested that a strike vote be taken in accordance with the provisions of Order in Council P.C. 7307. The Minister of Labour granted the request of the applicant union for the taking of a strike vote. However, Mr. R. Trepanier, Industrial Relations Officer, Montreal, P.Q., was instructed to endeavour to arrange a meeting of the interested parties with a view to bringing about a settlement of the matters at issue without recourse to strike vote procedure.

Settlements

Certain Glass Companies, Montreal, P.Q.—The unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between the Consolidated Plate Glass Company of Canada, Limited, Hobbs Glass, Limited, J. P. O'Shea Company, Limited, Pilkington Bros. (Canada), Limited, and the Star Glass Company, all of Montreal, and their employees, members of Local 1135, Brotherhood of Painters, Decorators and Paper Hangers of America (see Report below) was accompanied by five similar agreements signed by the employing companies involved and the representative of the applicant union. The memorandum of agreement in each case was appended to the report of the Board appearing at the conclusion of this section.

Canadian Marconi Company, Limited, Montreal, P.Q.—On February 10, the Department was supplied with a copy of a renewal agreement which had been signed between the Canadian Marconi Company, Limited, Montreal, P.Q., and its employees, members of Division 59, Canadian Marconi System, Commercial Telegraphers' Union (L.G., Jan., 1944, p. 54).

C. S. Hyman Company, Limited, London, Ont.—On February 11, at the request of the applicant union, the application for the establishment of a Board of Conciliation and Investigation to deal with a dispute between the C. S. Hyman Company, Limited, London, Ont., and its employees, members of Local 25, Shoe and Leather Workers Organizing Committee (L.G., Dec., 1943, p. 1649) was withdrawn, an agreement having been signed between the interested parties.

Report of Board in Dispute between Consolidated Plate Glass Company of Canada, Limited, Hobbs Glass, Limited, J. P. O'Shea, Company, Limited, Pilkington Bros. (Canada), Limited, and Star Glass Company, all of Montreal, P.Q., and their employees

On February 1, the Minister of Labour received a unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between the Consolidated Plate Glass Company of Canada, Limited, Hobbs Glass, Limited, J. P. O'Shea, Company, Limited, Pilkington Bros. (Canada), Limited and Star Glass Company, all of Montreal, P.Q., and their employees, members of Local 1135, Brotherhood of Painters, Decorators and Paper Hangers of America (L.G., Oct., 1943, p. 1358).

The personnel of the Board was as follows: His Honour Mr. Justice Wilfrid Lazure, Montreal, P.Q., chairman, appointed on the joint recommendation of the other two members of the Board; Messrs. Auguste Mathieu, K.C., and Isidore Ballon, K.C., both of Montreal, P.Q., appointed on the nomination of the employer and employees respectively.

The report of the Board follows:—

Report of Board

MONTREAL, January 27, 1944.

Re: Industrial Disputes Investigation Act and re dispute between Consolidated Plate Glass of Canada Ltd., Hobbs Glass Ltd., Star Glass Company, all of Montreal, and employees, members of Glass Workers Local Union No. 1135, Brotherhood of Painters, Decorators and Paper Hangers of America, and J. P. O'Shea Company Ltd., and Pilkington Brothers Limited.

Hon. HUMPHREY MITCHELL,
Minister of Labour,
Ottawa.

SIR,

As members of the Board of Conciliation duly appointed to investigate the above matter, we have now the honour to submit the following report.

We may say at first that the glass workers of the City of Montreal and also of the whole province were not formed into any labour association before 1943; that they were receiving for their work comparatively low wages and, no doubt on account of their inexperience, they were suspicious about entering into any agreement with their employers, though they would not listen to anything but a shop agreement with them, and they even wanted our Board to order a full recognition of a closed shop union; this last claim was not even mentioned in their petition to your department.

Finally both parties were willing to sign a shop agreement, but including a schedule fixing the rate of wages to be paid. We immediately and repeatedly told the parties that our Board had no jurisdiction over the settlement of any question of wages and that this was clearly the law. Notwithstanding our suggestion to that effect, the employees absolutely refused to go before the National or Regional Labour Board or before the Provincial Minimum Wage Commission in order to settle their dispute regarding the

rate of wages; as we were facing a deadlock with our investigation, our Board finally agreed to listen to and preside over their discussions as to this matter, but with the clear understanding that they would finally sign an agreement including all the matters in dispute and also that the salary question will have to be submitted to and approved of by the Regional Labour Board and the Minimum Wage Commission before it comes into force.

We clearly understood that we had no jurisdiction to settle any dispute regarding wages, but we thought that if a full agreement was signed, containing the settlement of all their differences, it would be advantageous for all the parties concerned, and even so for the Regional Labour Board and the Provincial Commission. After numerous meetings with the parties, we finally succeeded in having the workers sign an agreement with the five interested companies. We have met with the representatives of the Minimum Wage Commission and we have arranged with them to have the schedule of wages adopted for all the glass workers of the province; this requisition was strongly demanded by both parties to the agreement.

We are enclosing herewith an original memorandum of agreement duly signed by the different parties concerned, and you will find also annexed thereto a copy of a resolution by the Local Union 1135, authorizing President Boisvert and Secretary St-Pierre, with organizer Fred Mollineux, to sign agreements with the various companies. The agreements have a retroactive effect to the first of January, 1944.

You will notice that in paragraph 22, the agreement has to be approved by the Regional War Labour Board and the parties wanted us to respectfully ask you to request the Regional War Labour Board to approve their agreement, specially the clause relating to the question of wages. No doubt that the members of the Labour Board will be only too glad to approve this proposed and accepted schedule of wages, as its arrangement has necessitated a lot of work and argument.

We may add that finally all the parties were entirely satisfied with the work of the Board and have promised to work in harmony for their mutual benefit.

We are enclosing herewith the following documents:

(a) Five memorandums of agreement signed by the parties concerned and one copy of resolution by local union 1135;*

(b) Briefs and documents submitted by the parties concerned;

(c) Documents that we have received from you and that the party concerned does not wish to retain;

(d) The oath of office taken by the three members of the Board;

(e) Statement of sittings.

We have the honour to be, Sir,

Your obedient servants.

(Sgd.) Wilfrid Lazure,
(Sgd.) Isidore Ballon,
(Sgd.) Auguste Mathieu.

Memorandum of Agreement

BETWEEN

Glass Workers Local Union 1135, of the Brotherhood of Painters, Decorators and Paperhangers of America, a body having its head office in the City of Montreal herein acting and represented by the undersigned, duly authorized for the purpose hereof by and in virtue of a resolution passed at a meeting held on the 7th day of January, nineteen hundred and forty-four; a certified copy whereof has been annexed to the original of these presents after having been signed by the parties hereto, for identification,

AND

(Name of Company)

This agreement is entered into between Glass Workers Local Union 1135 of the Brotherhood of Painters, Decorators and Paperhangers of America, hereinafter called the "Union", the Party of the first part, and ..... Company, hereinafter called the "Employer", the Party of the second part, for the purpose of preventing and adjusting misunderstandings by establishing rules governing wage rates and conditions of employment.

1. The Superintendent, working for the employer, is not to belong to the Union.

2. The Union agrees that there shall be no slowdown, strike or other stoppage or interference with work and the employer agrees that there shall be no lockouts, and it is expressly agreed upon that, in case of a slowdown, strike, stoppage or interference with work or lockout, the present Agreement shall be considered *ipso facto* as null and void and the parties in the same condition as if they had never dealt between themselves and free to proceed as they may consider in their own interests.

3. The employer agrees to pay to the members of the Union the minimum wage

*(A sample of the agreements signed by the parties is appended hereto).

rates hereunder or any higher rates up to the maximum wages hereunder;—But a higher rate of wages may be paid to any worker if agreed between employer and employee and if within the limit of the maximum rate that may be fixed by the Minimum Wage Commission or the Regional Labour Board.

4. The rates of wages paid, as at January 1, 1944, by the employer to the Members of the Union are increased by 10 per cent as from that date, any fraction to be computed to the nearest cent or half cent, leaving aside although the rates paid to the apprentices. The provisions of this paragraph however, shall not oblige the employer to pay any higher wage than the maximum set out in paragraph 3 above, without prejudice to any higher rate which may be agreed between the employer and employees as mentioned in the said paragraph.

4a. Notwithstanding the minimum rates mentioned above, the minimum rates for the female workers will be 40 cents per hour instead of 45 cents and this for the period of one year from the date of this contract; after said period, the minimum wage rates for female workers will be the same as the minimum wage rates granted to men.

5. The rates of wages already fixed by agreement or otherwise, on the date of the execution of the presents, for all work, operation or occupation if higher than the rates fixed by the present agreement, must be maintained and considered fixed at such rates without any decrease.

5a. The standard working day shall consist of nine (9) hours, with four (4) on Saturday, to be worked consecutively with the exception of lunch intermission. There shall, however, be no specified hours of starting and finishing provided it is between 7.00 a.m. and 7.00 p.m.

6. Late starting shall be penalized to the amount of fifteen (15) minutes for lateness in excess of three minutes of each quarter of the hour on clocks which punch in minutes, i.e.—for lateness from four (4) to eighteen (18) minutes, the penalty will be fifteen (15) minutes; from nineteen (19) to thirty-three (33) minutes, penalty one-half hour, etc.

On time clocks which punch in tenths of an hour, an employees' time must be punched one (1) point before starting time and one point after quitting time. Lateness on cards punched on these clocks shall be penalized as follows: Employees late one (1) or two (2) tenths of an hour shall be penalized fifteen (15) minutes; three (3), four (4) and five (5) tenths shall be penalized one-half (½) hour.

7. All time worked over nine (9) hours in any one day or over four (4) hours on Saturday shall be paid at overtime rates.

In case of absenteeism of any member of the Union, said member shall be entitled to overtime rates only after forty-nine (49) hours in any one week, unless he can establish to the satisfaction of the employer the merits of his absenteeism. If there is a holiday in any one week, the standard working day shall be deducted from the forty-nine (49) hours for the purpose of the present paragraph.

8. Overtime shall be paid at the rate of time and one-half of the hourly rate.

9. There will be no overtime paid for any emergency order as replacement of breakage, replacement glazing of a building to save fuel, interior glass work in such establishments where the public is admitted such as department stores and restaurants when the work would be dangerous to the public.

10. Overtime rates of wages shall be paid for all work on Sundays and the following days:—New Year's Day, Good Friday, June 24, Dominion Day, Labour Day, Thanksgiving Day, Christmas Day.

11. There will be no overtime paid when, for an employee, the overtime required results from the positive negligent act of said employee or his fault.

12. Travelling expenses shall be paid by the employer to the members of the Union in accordance with the provisions of the Glass Workers Special Ordinance of the Minimum Wage Commission.

13. One (1) week's holiday with pay is granted to all members of the Union after having worked continuously for the employer, for one year, said holiday to be taken at the most convenient time, at the discretion of the employer.

14. The employer may require an employee to work temporarily in a category to which he does not belong but, in such case, his rates of wages shall be at his regular rate.

15. All disputes arising under these presents, and all grievances of employees may be submitted by a Shop Committee of three members elected by the members of the Union working for the employer to the superintendent of the plant, and, failing agreement, they may be brought before the employer.

16. Should there be any dispute which cannot be adjusted, the men shall continue to work and such dispute shall, at the request of either party to the Agreement, be submitted to arbitration, in accordance with the Industrial Disputes Investigation Act. The decision of this Board is to be final and binding upon the parties in the same manner as parties are bound upon an award made pursuant to a reference to arbitration on the order of a Court of Record.

17. The parties covenant to sign, on demand, at the request of either party, any document that may be required, in accordance with the provisions of the Industrial Disputes Investigation Act, to have any matter referred to a Board of Conciliation and Investigation and, upon default of doing so, their signature to the present Agreement shall be considered as their signature to any such document.

18. In case the Industrial Disputes Investigation Act may not, at that time, apply to the dispute or to the parties, then the parties shall be governed in accordance with the provisions of the Quebec Trade Disputes Act.

19. The parties expressly agree not to take advantage, directly or indirectly, of any of the provisions of the Collective Labour Agreement (Chap. 163, R.S.Q. 1941). It being well understood that, otherwise, the present Agreement would never have been entered upon.

20. Any employee of the employer, not a member of the Union, may elect, in writing duly served to the employer, to be governed by the present Agreement.

21. The present Agreement is to be considered as null and void until being approved by the Regional War Labour Board.

22. The present Agreement shall remain in effect subject to the above mentioned restrictions, for one year from the date of its execution by the parties. At the end of such period, it renews itself automatically, each year, unless either of the contracting parties gives the other party a written notice, sixty (60) days prior to the expiration of the original duration of the Agreement, of its intention to repeal same.

Executed at Montreal, this 24th day of January, 1944.

Report of Board in Dispute between Central Aircraft, Limited, London, Ont., and its employees

On February 9, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between Central Aircraft, Limited, London, Ont., and its employees, members of Central Aircraft Workers Association, Unit 2 of the Canadian Aircraft Workers Association (C.C.L.) (L.G. Sept. 1943, p. 1225).

The personnel of the Board was as follows: The Honourable Mr. Justice J. G. Gillanders, Toronto, Ont., chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board; Col. E. E. Reilly, London, Ont., and Mr. Bora Laskin, Toronto, Ont., appointed on the nomination of the employer and employees respectively.

The report was signed by the chairman and Col. Reilly, employer's representative. Mr. Bora Laskin submitted a minority report.

The texts of the report of the Board and the minority report follow:—

Report of Board

Re Industrial Disputes Investigation Act and re Dispute between Central Aircraft Limited and its employees, members of Central Aircraft Workers' Association, being Unit 2 of Canadian Aircraft Workers' Association.

To: The Honourable Humphrey Mitchell,
Minister of Labour,
Ottawa, Ontario.

The Board of Conciliation appointed by you in connection with this dispute begs to submit its report herewith.

Sittings were held at Toronto and London, Ontario. At the sittings in London, representatives of the Union and the Company fully presented to the Board their respective views of the matters in dispute.

The Union was represented by Messrs. D. Rawlins, President of Canadian Aircraft Workers' Association; J. A. Willsie, an employee and president of the local Union, the Central Aircraft Association; and W. McNeil, an employee and vice-president of the local Union.

The Company was represented by Messrs. W. J. McDonough, president and managing director; and G. G. Parker, personnel manager.

The Dispute

The dispute between the parties, so far as the Board is concerned, involves only one matter, the inclusion of "union-shop" and "check-off" provisions in a collective employment agreement in the course of negotiation between the parties. The Union urges that such provisions be included, and the Company declines.

The Facts

Collective employment agreements have been in existence at this plant since at least August, 1941, when an agreement in writing was entered into between Fleet Aircraft Limited, the predecessor of the present Company, and the Fleet Aircraft Workers' Association, the predecessor of the present Union.

Subsequently, on June 1, 1942, following negotiations between the parties, a written agreement was completed between Central Aircraft Limited, which had then succeeded Fleet Aircraft Limited, and Central Aircraft Workers' Association, which Union succeeded the Fleet Aircraft Workers' Association as bargaining agent for the employees. The agreement between the parties of June, 1942, contains some 19 articles, and covers the matters usually provided for by such agreement, recognition of the Union as bargaining agent, wages, hours of employment, overtime, seniority, discipline, grievances, and other matters. *Inter alia*, it also contains the following provisions:—

"Article 2 (*d*).

Both parties are agreed that in order to ensure that the Association shall be truly representative of the employees of the Company, it is desirable that all regular employees take advantage of the privilege of membership in the Association, so that their voice and vote may make the deliberations of the Association truly representative of the wishes of the majority of the employees of the Company.

(*e*) All future hourly rated employees who have completed an accumulative period of service of two months, shall be considered regular employees of the Company. All future regular employees, together with all the present regular employees, who are now, or who may later become members of the Association, shall remain members in good standing during the life of this Agreement as one of the conditions of employment with the Company.

Note: re Article 2 (D and E)

Should Clauses D and E be detrimental to the efficient operation of this contract, upon written consent of both parties these clauses should be withdrawn; and notwithstanding anything herein contained in Clauses D and E, the undertaking entered into between either parties of this Agreement shall at all times be subject to subsequent acts or regulations imposed upon this Company by the Federal Government."

"Article 18.

Strikes, Stoppage and Lockouts

During the term of this Agreement, this Company agrees that there shall be no lockout, and the Association agrees that there shall be no strike or stoppage by the employees."

This agreement was to remain in force for one year unless changed by mutual consent, and was to remain binding on a year to year basis unless either party within one month of the termination gave notice in writing of such termination. Notice of such termination having been given, the parties proceeded with the negotiation of a new agreement. Several matters were raised for revision, but the only point on which real difficulty was found was the demand by the Union for the inclusion of a union shop and check-off provision in the new agreement and the refusal of the Company to consider any such provision or to renew or continue provision for maintenance of membership such as had been included in the previous agreement.

The Company is a Crown company, the assets being wholly owned by the Crown. It is engaged 100 per cent in the production of munitions of war, aeroplanes, and ancillary equipment. In June, 1942, the Company had about 600 employees, and it is said that approximately 500 of these were members of the Union. In June, 1943, the number of employees had approximately doubled, there being then 1,259 hourly-rated employees of whom it is said there were 840 to 870 who were paid up members of the Union. When the present Company took over there were no hourly-rated female employees but at the present time about 33 per cent of the hourly-rated employees are female.

There is no dispute over Union recognition. The representatives of the Company stated unequivocally that they recognized the Union as the exclusive bargaining agent for the hourly-rated employees. When the present management took over control before the agreement of June 1, 1942, was negotiated, Mr. McDonough, the president and managing-director, spoke to the employees and pointed out that all employees who desired to be members of any union would receive the protection of the management, and, likewise, employees who wished to remain outside the influence of any union would receive the same protection.

At the request of the Union the maintenance of membership provision above quoted was included in the agreement. No difficulties arose from this provision until April, 1943. It is said that the matter was mentioned several times between the management and the Union but there was some delay in checking up the Union membership rolls and in ascertaining what members were delinquent. Finally the Union commenced to send out notices to delinquent members. Fifteen notices were first sent out, and of these seven paid their back dues and eight omitted to do so. The names of these eight employees were finally forwarded by the Union to the Company for disciplinary action. These eight employees were interviewed individually by the personnel manager, and he says that all signified that they would leave the employment of the Company rather than pay up their back dues and become members in good standing. They gave various reasons for not wishing to be, or continue as, members of the Union. The eight employees reported to the Company for disciplinary action varied from senior lead hand to "B" class female employees. The Union had in the meantime, sent out 135 notices to members who were delinquent, and of these some 30 paid their back dues. It is said that there were a further lot of about the same number who were also delinquent. A number of the employees receiving such notices inquired from the management what the attitude of the management would be. This was during the period of the victory loan drive, and it is said that a number of employees advised the management that if an attempt was made to enforce the provisions of the agreement they would decline to buy bonds and leave the Company's employ.

The Company was short of men. Under existing conditions the greatest difficulty attended the procuring of replacements or new employees, and the management informed the Union that they found it impossible to enforce the provisions of the agreement respecting "maintenance of membership" and therefore would take no action to discharge employees for failure to pay their union dues and remain members in good standing. When the employment agreement came up for revision there was some discussion between the management and the Union with respect to renewing a "maintenance of membership" clause in some modified form, but this fell through. In view of instructions the management is unable to accede to the inclusion of any provision for closed shop, union shop, maintenance of membership, or check-off of union dues, and the Union finally instructed representatives that even the renewal of maintenance of membership provisions would be unacceptable and to insist upon a provision for a union shop and check-off of union dues.

Discussion of the Dispute

The Union submitted, with other material, a very carefully prepared written argument in support of the principle of the union shop and check-off. It is unnecessary to discuss the matter at length. The union shop is in effect a form of closed shop. Provision is made for the hiring of employees who may not be union members but to retain employment they must become union members within a certain period fixed by the agreement. Various submissions are made both for and against such a provision, but under the circumstances here they need not be elaborated.

Under normal circumstances it is conceivable that such a provision could be included with some beneficial results both to employees and management. The circumstances, however, at present are abnormal. The Company is fully engaged in the manufacture and supply of essential munitions of war. The experience of the past year indicates that the enforcement of the maintenance of membership clause included in the contract of June

1, 1942, requiring employees to become or continue as members of a union as a condition of their employment, would have resulted in some employees leaving the employment of the Company. Under present circumstances, the prime necessity for maintaining the production of munitions of war, the shortage of man-power, and the difficulty of obtaining replacements, makes it highly undesirable that any provision should be inserted in the agreement which might operate against any employee continuing in his present capacity.

Furthermore, neither employers nor employees are free to deal with the matter as they wish. The Board is informed that a Selective Service order now applies to this Company which in effect "freezes" all employees in their present occupations. The Company is not free to dispense with the services of an employee unless the action is approved by Selective Service. Selective Service may or may not approve of action taken in pursuance of an employment agreement of this nature. The Board was not referred to any provision or order limiting their discretion.

The Board recommends that no provision for a "union shop", "check-off" or "maintenance of membership" be included in the collective bargaining agreement to be negotiated with the employers at this time. The Board expresses no opinion on whether or not these features, or any of them, might be desirable under other conditions.

The Board was deeply impressed by the discretion and consideration shown by both parties in the presentation of their views and supporting evidence. It was freely admitted that the friendliest of relations have existed, and continue to exist. Every point of difference, except this one, has been adjusted to the satisfaction of both parties. In degree, as the efficiency of the firm is promoted by this friendly co-operation of workers and management, so is the welfare of every member of the Company, and of the Union, dependant on the continuance of this goodwill.

After considering the matter, the Board met with the parties, reviewed the considerations mentioned in this report, and suggested that under the circumstances the application be withdrawn at this time. While the applicants were disinclined to accede to this suggestion, the Board expresses the hope that in view of the factors mentioned in the preceding paragraph, and with due appreciation of the particular conditions referred to in the report, the applicant may concur in deferring consideration of the point in question while existing conditions prevail.

If the point were open, the gravest doubt might be expressed as to whether the matter involved in this dispute is one within the ambit of the Industrial Disputes Investigation Act. However, this point was not urged upon the Board and is probably not open. In the preamble to the order establishing the Board it is stated: "And whereas the Minister of Labour, Canada, hereinafter called the Minister, is satisfied that the said dispute is one to which the provisions of the said Act apply."

The Board desires to express its appreciation to the representatives of both parties for their co-operation and helpful assistance in presenting their views on the question in dispute.

Dated at Toronto this 3rd day of February, 1944.

(Sgd.) J. G. GILLANDERS,
Chairman.

(Sgd.) E. E. REILLY,
Member.

Minority Report

Re Industrial Disputes Investigation Act and re Dispute between Central Aircraft Limited and its employees members of The Central Aircraft Workers Association, being Unit 2 of The Canadian Aircraft Workers Association.

To: THE HONOURABLE HUMPHREY MITCHELL,
MINISTER OF LABOUR,
OTTAWA, ONTARIO.

I am of the opinion that the parties to this dispute should renew the provision for maintenance of union membership in their collective agreement and that, in addition, they should arrange for voluntary check-off of union dues and assessments. In reaching these conclusions, I have taken into consideration the following, among other, matters:

(1) the position and attitude of the union;
(2) the position and attitude of the company;
(3) the relations between them;
(4) the impact of the war emergency on manpower;
(5) the operation of the National Selective Service civilian regulations;
(6) the fact of the inclusion of a maintenance of union membership clause in the agreement heretofore in force between the parties.

There is no question but that the membership strength of the union among the employees of the company is more than adequate to sustain a claim for a maintenance of union membership clause. I do not think

that the claim is affected by the operation of the National Selective Service civilian regulations, and especially by the operation of Section 202A, as enacted by P.C. 6625 of September 1st, 1943. Undoubtedly, the parties may be compelled to modify their administration of a maintenance of union membership clause in the face of inconsistent and overriding legislation. Such a condition might exist in relation to any term of a collective bargaining agreement. It cannot, however, be categorically asserted that a maintenance of union membership clause is presently incompatible with the National Selective Service civilian regulations. Especially is this so when we consider the flexibility which necessarily characterizes the operation of the Regulations, and further the fact that female help, which now constitutes upwards of one-third of the company's working force, is excluded from the terms of P.C. 6625.

The company's attitude to the renewal of the maintenance of union membership clause seemed out of harmony with the evidence of the co-operative and healthy relationship existing between it and the union. This evidence is persuasive that enforcement of a maintenance of union membership clause is well within the reach of reasonable effort on the part of both parties to see that it should work. The evidence advanced to show that the maintenance of union membership clause heretofore in effect could not be carried out was not convincing when considered in the light of the company's expressed reluctance to make it work. I would suggest that provision should be made in the collective bargaining agreement being negotiated by the parties for regular and continuous consultation on the operation of the agreement, including the working out of the maintenance of union membership clause. Such consultation will provide a firm basis for appraising the feasibility of a maintenance of union membership clause under existing conditions.

Admittedly, there is a tight man-power situation in Canada, but it will not be relieved by what appears to me to be a short-sighted refusal to recognize that the union is a real party in interest in collective bargaining in its own right and not only as a convenient tag for a collection of individual employees. It is my belief that in undertaking to co-operate and securing the union through a maintenance of union membership clause, the company will purchase benefits, both calculable and intangible, and both long and short term, which will outweigh any inconvenience which it might invite through a bona fide effort to enforce a provision for maintenance of union membership.

Dated at Toronto, this 17th day of January, 1944.

(Sgd.) Bora Laskin,
Member.

Report of Board in Dispute between the Dominion Textile Company, Limited (Mount Royal, Colonial and Hochelaga Mills), Montreal, P.Q., and its Employees

On February 18, the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between the Dominion Textile Company, Limited (Mount Royal, Colonial and Hochelaga Mills), Montreal, P.Q., and its employees members of Local 102, United Textile Workers of America (A.F. of L.) (L.G. Dec. 1943, p. 1649).

The personnel of the Board was as follows: Honourable Mr. Justice Oscar L. Boulanger, Quebec, P.Q., chairman, appointed on the joint recommendation of Messrs. D. A. Paterson and Paul Fournier, both of Montreal, P.Q., employer's and employees' nominees on the Board.

The report of the Board was signed by the chairman and Mr. Paterson, employer's nominee. Mr. Paul Fournier submitted a minority report.

The texts of the report of the Board and the minority report follows:

Report of Board

In the matter of the Industrial Disputes Investigation Act and of the dispute between Dominion Textile Company, Limited (Mount Royal, Colonial and Hochelaga mills) Montreal, Que., employer, and its employees members of Local 102 of the United Textile Workers of America (American Federation of Labor), employees.

To The Honourable The Minister
of Labour of Canada

This Board was constituted by Order of the Minister, dated November 15, 1943, and the Chairman was appointed on November 27, 1943. On November 30, the Chairman wrote the other two members of the Board trying to arrange a date for the first meeting. December 11 was first selected, but the Company was not ready to proceed on that date and the meeting was postponed to December 14. On

December 14, the Chairman happened to be sick and the first meeting of the whole Board actually took place on December 20 in Mr. Paterson's office to whom the thanks of the other members of the Board are due for this favour.

Appearances

Messrs. F. R. Daniels, General Manufacturing Manager, and Bertrand Boissoneault, Director of Industrial Relations, 710 Victoria Square, Montreal, appeared for the Company.

Misses Madeleine Parent, 4634 West Notre-Dame Street, Montreal, organizer of Local 102; Aurore Lemon, 225 St. Denis Street, Montreal, secretary-treasurer of the Local; and Mr. Azelus Beaucage, 4634 West Notre-Dame Street, Montreal, business agent for the United Textile Workers, represented the employees. R. Kent Rowley, Canadian Representative of the United Textile Workers of America, also came in towards the end of the hearing.

Nature of the Dispute

In the application of the Employees for a Board, dated September 28, 1943, the dispute is stated as follows:—

> Application for a Conciliation Board for the Merchants and General Machine Shop branches of the Dominion Textile Company in Montreal was made on June 25th, and Board has been granted. As there now exists immediate threat of a strike not only in the two above-mentioned mills but in all mills of the Dominion Textile Company in Montreal, the union is requesting that the Conciliation Board granted for the Merchants and the General Machine Shop deal also at the same time with the dispute concerning the other Dominion Textile mills in Montreal.
>
> Corresondence and explanations given in *re* application of June 25th, will furnish sufficient explanations for the present application—please refer.
>
> Outline of efforts made by parties concerned to adjust the disputes.
>
> (*See* correspondence *re* first application).

Mr. Fournier supplied the Board with the majority report of the Board which investigated the application of the employees of the General Machine Shop and the Merchants Mill of the Company to which reference is made in the application before this Board. In the report concerning the General Machine Shop and the Merchants Mill the demands of the employees are stated as follows according to their brief:

> (*a*) The recognition of the United Textile Workers of America as the sole bargaining agent between the Company and its employees, in the handling of their relations and grievances with the Dominion Textile Company.
>
> (*b*) Acceptance of the company, subject to the approval of the National War Labour Board, of the following:—
>
> 1. Payment of a cost-of-living bonus of $4.25 a week.
> 2. Payment of holiday of one week for all employees in service for a year or more, and of two full weeks for all employees in service for five years or more.
> 3. General increase of wages of ten cents an hour for all employees.

The main conclusion of that report is as follows:

> However, beyond anything that might be said on either side, there always remains the fact that the majority of the employees have manifested their desire to form a union and have their interests looked after by the United Textile Workers of America.
>
> It was admittted by officials of the company at the hearing, that if a vote were taken of the employees as a whole, a substantial majority would have stated that they were in favour of being represented by the United Textile Workers of America.
>
> Such is undoubtedly the desire of the majority of the employees of the company, and in itself satisfactory evidence that they are behind this application and its conclusions. It is true that the evidence submitted would not be sufficient, if the law respecting evidence was strictly enforced; but, as already stated, in all matters pertaining to labour and the study of problems arising in that connection Boards can exercise their discretion in appreciating and weighing the evidence.
>
> In this case the Board considers that if a vote were taken a substantial majority would vote in favour of being represented by the union; and it may be added that on this particular question the officials of the company are also of that opinion.
>
> Therefore, the present Board considers that it is in the best interest of all concerned that the desire and wish of the employees be approved and sanctioned and that the United Textile Workers of America be, accordingly, recognized as the bargaining agent.

Mr. Fournier has also supplied us with the majority report of the Board which investigated a dispute between Montreal Cottons, Limited, Valleyfield, and Local 100 of the United Textile Workers of America. Montreal Cottons Limited is a distinct entity altogether from Dominion Textile Limited, but both companies have interlocking directorates. The question at issue was the recognition of the union as bargaining agent of the employees. As in the other case, the Board recommended the recognition of the union on the evidence placed before it, but said that the evidence could and should have been better.

The Evidence

The local presented a brief in which, after stating that "the United Textile Workers of America is the only organization representing the workers in the mills concerned"..... and that there is no "question of union jurisdiction.....involved", it concludes, illogically enough, for "a Government supervised vote

on the condition that the company will agree before the Conciliation Board to negotiate with and recognize our Union as sole bargaining agency in the event that the vote should prove that we have the majority of the workers". It is true that further it is stated with more logic that:

> In the event that the Company does not agree to the proposal of a vote, the Union finds itself forced (sic!) to ask that the Board certify the United Textile Workers of America as sole bargaining agency.

The company also presented a brief in which it states correctly that the question before the Board is "the recognition of Local 102 of the United Textile Workers of America as a bargaining agent for the employees". The company professes its willingness to deal with any responsible union representing the majority of its employees. And the company requires of the applicants "legal proof of their contention that their union contains in its paid-up membership a majority of the employees". That legal proof, says the company, can only be made by an audit of the books of the union establishing the paid-up membership. "After a proper investigation and examination has been made by the Board," says the company again, the company is prepared to consider immediately (sic!) the recommendations of the Board."

From the start the local took the position that it would prove its case only on the condition that the company undertake beforehand to sign a contract. The company refused to give in to this kind of chantage or blackmail; it declared itself ready to recognized the local as the agent of the employees, in the local proved that it controls the majority of the company's employees, but it desired to reserve its right to discuss the terms of the contract before signing it.

The Board spent a great deal of time, effort and patience trying to convince the local that, having affirmed that its members constituted a majority of the company's employees, it had to prove it to the Board. The contention of the local was that two Boards have already reported in its favour but that nothing has come of it, and that in the case of the three mills which are the subject of the present investigation, the Department has already satisfied itself that the local has the majority through the preliminary investigation of Mr. Bernard Rose. The local refused to show its books in order that the Board might establish by a comparison with the company's pay-rolls the membership strength of the local. The reason for the refusal was that it is against the policy of international unions to show their books. The local would not admit that the members of the Board are not governed by the policies of international unions, but by the laws of Canada, the rules of evidence and their conscience.

The local produced as a witness Mr. Bernard Rose who told us that after some difficulty he succeeded in obtaining some kind of evidence of the local's membership which he considered satisfactory for his purpose. There is no need to point out that evidence received by Mr. Rose does not help this Board.

Instead of making good before this Board its claim that it controls the majority of the employees in the Colonial, Mount Royal and Hochelaga mills and is, therefore, entitled to recognition as bargaining agent for said employees, the local demanded that the Board order a vote among the employees to establish its right of representation. A vote can only be ordered* when there is a choice to be made between two or more rival organizations claiming the right to represent. Here there is only one union in the field. A vote under the circumstances would only amount to a recruiting campaign conducted by the Government, the Government asking, in effect, the employees of the company to be so kind as to join Local 102, although by voting in favour of the local the employees would not effectively become members of the local, even if their votes could be interpreted as showing that they want to be represented by the local. And it all comes back to the preliminary essential question: before a vote can be ordered the local must satisfy the Board, at least prima facie, that it controls an important group of the employees and that a majority of the employees are likely to vote for the local.

* In order that there shall be no misunderstanding of the policy of the Department of Labour in this regard, the following explanation of procedure is given: Neither the Government nor the Department of Labour had authority under legislation existing at the time this report was made, to order the taking of a representation vote. Representation votes were taken only on the joint consent of the parties concerned and it was not considered essential that there be two or more organizations seeking recognition as the bargaining agency of the employees. In all cases the parties concerned in a vote agreed on the text of ballots used and procedure followed in such votes.

After a lot of useless discussion Miss Lemon was finally put under oath and she declared that, according to the books, cards and records in her possession, the effective membership of the local in the three mills is as follows:

Colonial mill	199	members	on	280	employees
Mount Royal	577	"	"	721	"
Hochelaga ..	668	"	"	1,014	"
	1,444	"	"	2,015	"

The representatives of the company then declared that they had a strong suspicion that

the figures were not accurate, but they were not in a position to prove it.

With this evidence before them, the members of the Board would have been prepared to recommend the recognition of the local. The Board assumed from Miss Lemon's evidence that the 1,444 members of the local representing 71·66 per cent of the employees of the three mills had, at least, signed affiliation cards and had paid their initiation fees, if not their monthly dues. The Board considered this sufficient to make them members of the local according to the Constitution.

But the company asked for a reopening of the investigation and produced an affidavit by Mr. Boissonnault raising doubts as to the accuracy of the membership figures. The local replied by the annexed statement. It was then decided to clear up the matter once and for all by an audit of the company's pay-rolls and of the local's books. The firm of Coulter & Jones was selected to make the audit. The local objected to Coulter & Jones and proposed the firm of Sheper Dobrin & Dainow, Mr. Sheper appearing before the Board to receive instructions. The company then objected to the Sheper firm and it was finally agreed to leave it to the Chairman to select an independent and disinterested auditor. The Chairman, after being authorized by the Department, chose Mr. Jacques Larue, of Quebec, chartered accountant, to whom instructions were given in writing, a copy of these instructions being sent to the other members of the Board.

Before proceeding to Montreal, Mr. Larue notified both the company and the local by long distance telephone. As appears from Mr. Larue's report the local refused him access to its books, in order that he might verify the payment of the $2 initiation fees by the 1,444 signers of application cards, a total of $2,888. Mr. Larue no doubt did not like the condition of the application cards and as a conscientious professional, he requested the information which he considered necessary to make a complete and proper report and which as a delegate of the Board he had the right to request under section 51 of the Act.

After Mr. Larue had left Montreal the local called up the Chairman asking for a reopening of the investigation, probably because the company having obtained a reopening the pride of the local could not be satisfied unless it got a reopening also. The Chairman at first took the definite stand that owing to the evident lack of co-operation and understanding on the part of the local, he and other members of the Board were not ready to waste any more time in hearing purposeless and irrelevant recriminations which could not advance the case. But on the advice of the Department a reopening of the hearing was granted the local.

At this reopening the local did not bring out any new facts likely to help the Board come to a decision. They merely re-hashed the sophistic arguments which from the beginning of the investigation we have heard from them. They presented a brief with a letter from Mr. Adrien Villeneuve, chairman of the Executive Board of the Montreal Trades & Labour Council and another letter from the accounting firm of Sheper Dobrin & Dainow. The documents are annexed to the present Report.

The contentions of the local already have been mentioned in this Report but for the sake of greater clarity we might perhaps summarize them again with our opinion on each of them.

1. The Board has no business to try to find out whether the local represents the majority of the employees. This question has been disposed of by Mr. Rose's investigation. The right of the local to represent the employees has been established by the setting up of the Board. The only business of the Board is to conciliate i.e. recommend the recognition of the local as bargaining agent. On this point, the Board is of the following opinion: The local is entitled to the agency of the employees only if the majority of the employees are members of it. Therefore, recognition depends on membership. The Board cannot recommend recognition unless it is satisfied beyond any reasonable doubt that the local has the membership. We cannot be satisfied by evidence heard by somebody else and by a report which was not placed before us. It is true we have the evidence of Miss Lemon, but this evidence was challenged by the company whose affidavit has created doubt in our mind. It would have been extremely easy for the local to dissipate this doubt and to clear up the point, in spite of all that can be said about the sacredness of the books. The refusal of the local to comply with the order of the Board and to take us and our auditor into their confidence can only confirm us in our doubting attitude.

2. The Union pretends to forbid to the Board an examination of its books on the ground that said books are secret and confidential and that an examination of them by the Board's auditor may expose to discrimination and persecution by the company the employees who are members of the Union and may disclose to the company the amount of the funds the Union has in store to fight the company with.

Our first answer is that such a pretension is a reflection on the integrity of the Board and of our auditor, who was to our complete

satisfaction absolutely impartial—he does not even reside in Montreal—no matter what the local may say about the "tick marks" of Coulter & Jones. But we do not want the names of the members of the Union: we only want the total number of them given to us by somebody on whose evidence we can rely absolutely. And if we are no more interested in the finances of the local than we are in the names of its members. Any way, nobody needs see the books to know that if the local has enrolled 1,500 members at $2 apiece it has $3,000. We agreed that two conditions were necessary to become member of the Union: signature of an application card and payment of the initiation fee. We wanted our auditor to see the books in order to ascertain that the second condition had been complied with, as anybody can make cards. Verification of the books is the only way by which we can arrive at correct union membership figures. If we admit the Union contention that it can prove membership by a mere unsupported statement and that it ends there, union recognition becomes an ex parte affair and the Board a mere rubber stamp, as the employer and the Board would be deprived of all means of checking the accuracy of the statement. For the purpose of proving membership the books of a Union should be no more secret or confidential than are the books of an individual or corporation for the Income Tax Department. In the latest brief of the local and in the letter of its auditors we have the admission that the books were in no fit condition to be seen. That is the real reason for keeping the Board away from them. All the rest is camouflage.

3. The two Boards presided by Honourable Mr. Justice Savard have recommended recognition of the Union as bargaining agent. Therefore, this Board should do the same.

Each Board is independent and is the master of its own decision. It decides according to the evidence which it hears and according to its own knowledge and conscience. The reports of the Savard Boards appear to have been based largely on an admission by the company. Such an admission was not made in the present case.

4. The local, at least, has presented sufficient evidence to warrant the ordering of a vote in the mills.

A vote is ordered* when there are at least two unions claiming the agency and each of them pretends that it controls the majority of the employees. Then a vote is the only possible way of settling the question. The right to the agency depends on majority control. The control of the majority by the agent which signs the collective agreement is the only guarantee that the employer and the State have that the agreement will be carried out. The agent must first prove control before he is given the right to act and bargain for the employees. A ballot would not necessarily prove control when there is only one Union claiming the agency, because by voting for a Union as agent the employees do not become members of it. Let us illustrate the above stated principles by an example. Let us suppose that a vote is ordered in the three mills, and let us suppose that the Union does not really control before the vote. But nevertheless, when the ballots are counted it is found that 51 per cent of the employees have voted in favour of the Union as the agent to negotiate a collective agreement. The agreement is signed. Then a few weeks later a group of employees become dissatisfied with the contract and claim that they are not bound by it because they are not members of the Union which signed it, although they voted for the Union. They bring in another Union and start an agitation to take the contract away from the first Union. The first Union having no control over the dissedent group could not force them to respect the contract. To prevent a situation like that, a Union has to prove that it controls the majority of the employees, i.e., that the majority of the employees are bona fide members of it, before it can be recognized as bargaining agent. A vote does not prove membership, especially when there is no choice to be made between Unions.

* See footnote on page 4.

Conclusions

We are forced to conclude that Local 102 of the United Textile Workers of America has not proved to our satisfaction and beyond any reasonable doubt that it controls the majority of the company's employees in the Mount Royal, Colonial and Hochelaga plants and that it is consequently entitled to be recognized as the bargaining agent of the employees to negotiate a collective agreement with the employer. Further we are of the opinion that a vote in the circumstances of the present case would not decide the question of majority control on which depends the right of agency. However, the Department of Labour is not bound by our opinion and, after studying the situation, can always order a vote* if it thinks that course is fit and proper.

Recommendation

We therefore recommend that for the present Local 102 cannot be recognized as the bargaining agent of the employees on account of insufficient evidence as to majority control.

Montreal, February 5, 1944.

(Sgd.) G. L. Boulanger
(Sgd.) D. A. Paterson

Minority Report

Dominion Textile Company Limited (Mount Royal Colonial and Hochelaga Mills), Montreal, Que., employer, and its employees, members of Local 102 of the United Textile Workers of America (American Federation of Labor), employees.

To The Honourable Minister of Labour of Canada.

Nature of Dispute

This dispute arose because of a refusal on the part of the Dominion Textile Co. Ltd., to recognize the applicant United Textile Workers of America as bargaining agent for its employees in the Hochelaga, Mount Royal and Colonial mills in Montreal. A strike vote taken by the workers at a regularly called meeting constituted the authorization for the application for the Board. According to the Union, in evidence before the Board, the meeting was attended by over 2,000 of the company's Montreal employees. The Union contended further that prominent public men in attendance at the meeting could verify their statement that the vote was unanimously adopted by this large number present.

Duties of Board

In the authority and instructions given to the Commissioners by virtue of the Industrial Disputes Investigation Act, it is clear that the Board's primary duty was to "conciliate" the dispute, to bring about some amicable solution to the problem in order to avoid strike action in the industry. It is because of the danger of strike that this Board was constituted and should the Board fail to bring about an amicable solution it has not accomplished its purpose.

It is clear from the Majority Report of my colleagues that the above was not their attitude and here I am forced to differ sharply from them. They assumed that the Board's primary duty was to act as an accounting body before which the Union should carry all the obligation and before which the sole requirement was that the Union should prove its right to speak on behalf of a certain percentage of employees. In this respect too it was concluded by the Chairman that the sole, valid method of determining same was by the exposure of financial records of the Union to prove that every worker who expressed by his signature on an application card that he desired to be represented by the Union had also undertaken a financial obligation. For this, to my mind, arbitrary and unfair mode of procedure I do not find authority in the Act. Furthermore, the turnover of employees would have not justified the procedure because of the fact that it would create great injustice to all new employees, which at the time of the application were not in the plant, and a recognition on the passed application of September 30, which force a union upon many people, new employees of the company that might want a union or not.

Therefore, as a member of the Board, I feel that the union in requesting a vote at large in the plant would give us what we were after, which is the frank opinion of all employees to decide whether they wanted the applicant to represent them as their bargaining agency or not.

It is a fact that every Union applicant for a Board of Conciliation is required to first of all pass a preliminary Inquiry under a Commissioner named by the Minister of Labour. The duty of this Inquiry Commissioner is (*a*) to atempt to conciliate the dispute without examining the "merits" of the questions involved, and (*b*) failing in this attempt, to satisfy himself that the Union represents a majority of the workers according to standards established by the Department of Labour and, if so, to recommend the appointment of a Board which shall then consider the merits of the questions in dispute. Therefore, it seems to me that the Union's argument was sound when it claimed that the question of their representing the majority of the employees had already been determined by the very fact of the Board's existence. Otherwise, taking the assumption of my colleagues, we must conclude that the sole purpose of this lengthy and expensive proceeding is to require of the applicant Union to prove twice before two different bodies that it speaks on behalf of the majority of the workers. This would be to eliminate the real purpose of such Boards and would, to my mind, reduce their meaning and value to little or nothing.

Previous Board Reports Upon This Company

It is necessary to note here that in two previous Boards of Conciliation under the chairmanship of Mr. Justice Savard, the recommendations made were that this company recognize the same Union as bargaining agency. Upon publication of the reports, the company refused to accept the majority recommendation and undoubtedly this undeniable fact, which from time to time entered into the proceedings of this present Board, influenced the Union's stand. They felt obliged to ask that some guarantee be given by the company before any additional proof be adduced from the Union. Thus it was that

the Union agreed to submit evidence before the Board, provided the company would sign a statement that it would recognize the Union if a majority membership were shown. This the company signally failed to do. This, it seems to me, indicates a clear lack of good faith upon the company's part. And I find it strange that the company was at no time required by the Chairman to do so, despite the onerous demands placed upon the Union.

Union's Evidence

The chairman's report rejects a recommendation for recognition of the Union "on account of insufficient evidence as to majority control". I must express my astonishment at this conclusion in view of the facts of the case as presented and in view of all the evidence placed before the Commissioner.

(*a*) The Union laid before our Board the results of the inquiry conducted under Mr. Bernard Rose, K.C., in his capacity as Inquiry Commissioner. Mr. Rose himself personally testified before the Board and the report of his investigators rests in the hands of the Department of Labour. This was a detailed inquiry in which the original application cards of the Union were checked against "lists of names" (Note: not the payrolls) of the company. This inquiry took some time and its result was a definite report to the Department stating that the investigators were satisfied that the Union represents the majority of the employees concerned. Mr. Rose testified clearly to this effect. And yet, it seems, his sworn testimony was not considered "evidence" by my fellow-commissioners.

(*b*) The Union made sworn statements by responsible officers of their local Union No. 102, namely Miss Aurore Lemon, Treasurer, and Miss Madeleine Parent, Organizer, as to the Union's majority membership. (The Union further offered to bring every Executive Board member before the Board to testify and did in fact at one time bring them (twenty-one in all) only to find that the Board's session was cancelled at the last minute.) President Alfred Gendron did however testify at a later date.

(*c*) The Union testified that the Executive officers were duly elected at local Union meetings. That the decisions to ask for bargaining rights and later the taking of a strike vote took place at large mass rallies of the company's employees, filling to capacity the well-known hall in Montreal called "Assistance Publique"; and that well-known public figures attended several such meetings (Members of Parliament) who could testify as to the accuracy of the Union's statement, that over 2,000 workers were in attendance.

(*d*) The Union again offered to submit its original signed application cards to be checked against the company payroll by some independent party named by the Chairman. Each application card is signed under the following statement:

> "By these presents, I join as a member of the United Textile Workers of America, and I authorize this Union to represent me in relations with my employer and to negotiate in all matters relating to my employment."

Attached to each card is a detachable receipt for the $2 initiation fee. This evidence was offered but was refused by the agent appointed by the Chairman and the Union found itself unable to have such evidence introduced. It seems to me that this evidence is of decisive value, for when an adult signs a document as above quoted he surely must be responsible for his action and must indeed desire representation by the organization concerned.

(*e*) The Union further, upon many occasions throughout the Inquiry offered to agree to the holding of a vote by secret ballot administered by the Department of Labour, even on the company's property. There even non-union employees could vote and if, as the company contended, the majority of the workers did not desire to be represented by the Union, then they could exercise their democratic privilege of voting against it. It seems to me that the Union's complete readiness, even after long months of delay before the institution of this Inquiry, to agree to a secret ballot vote constitutes strong evidence in favour of their claim. And, equally, the company's continued refusal to agree to a vote constitutes strong evidence against the company's contentions. Again, the Chairman refused to acknowledge the value of a democratic secret ballot. The Union's attitude on the vote, taken with the company's refusal, is, in my opinion, alone sufficient evidence to recommend Union recognition.

All these facts were laid before the Board, and I cannot therefore agree that there was "insufficient evidence" presented by the Union.

Company's Evidence

It must be borne in mind that at no time was there a discussion of the merits of a Union contract or of its provisions. This mode of procedure necessarily favoured the company before the Board. However, little evidence was presented by the company to disprove the Union's contention that it represents the majority.

(*a*) The company admitted that there is only one Union in the mills, namely, the United Textile Workers of America.

(*b*) The company admitted that the Union signed up a majority of the workers in the Mount Royal mill and had a considerable percentage in the other two.

(*c*) The company refused to sign a statement that, should the majority be proven in the Union even by the company's standards, it would negotiate a contract. They said they would "give it consideration".

(*d*) The company then insisted that the Union prove it has a majority of "paid-up" membership amongst the company's employees, that for this purpose the Union expose its confidential records.

(*e*) The company flatly refused to accept a vote amongst its employees. The company implied that workers are not responsible for their vote, in suggesting that when workers vote for a Union they "really" vote for a wage increase. This, despite the evidence of the Union that their wage proposals are already before the Regional War Labour Board and that the sole question involved is Union recognition.

(*f*) The company submitted an affidavit of its personnel director the entire content of which is presumptive and whose sum and substance is that the company does not believe that the Union represents a majority of the workers. In this affidavit, however, the company makes an alarming admission. It states clearly that when the "lists of names" given to inquiry Commissioner Rose were returned to the company, "tick marks" were found opposite large numbers of these names. From these "tick marks", the company adduces that it is aware of the names of a large percentage of the Union members in their mills. And that, with this information, the personnel director interviewed overseers and questioned them as to Union membership in their Departments. I must here state that I feel the Union was fully justified in protesting to the Board that such an Affidavit is only support for their contention that a Union's confidential records should never be exposed. As proof of percentage of membership, however, it may be said that this affidavit is worthless, as we have no knowledge of whether or not the investigators followed such system, or if they followed it consistently through to the end.

It appears from the above that the company did not enter the Inquiry in the spirit of conciliation, but solely to disprove the Union's claim that it represents the majority of the workers.

Unions Books

(*a*) In reference to the production of the Union's books, I must disagree with the majority report. To my knowledge, the Union at no time agreed to the production of its confidential financial records. The decision to request the production of such records was taken without consultation with the Union. In the majority Report it is suggested that the Union at one time agreed and then changed their mind. Actually, Miss Parent stated that the Union was willing once again to submit its original application cards to be checked against the company payrolls, provided the company would sign a statement in advance that they would recognize the Union should a majority be shown. The company refused to do so.

(*b*) When the Chairman sent Mr. Jacques Larue of Quebec to the Union's Office, Mr. Larue asked the Union to reproduce the following:—

1. Original signed application cards;
2. Day sheets showing daily dues and initiation fee entries;
3. Central cash ledger of the local union;
4. Local union's bank book;
5. Access to the union's bank account;
6. A cross-check of the original signature against the day sheet entry against the cash entry in the ledger against the deposit in the bank.

(*c*) Mr. Larue categorically refused to accept the Union's cards as evidence.

(*d*) The Union asked for a new Hearing in order to clear this situation, and when the Hearing was finally granted, new evidence was presented. And here I must differ again from my fellow-commissioner's who imply that Mr. Rowley, Canadian Representative of the Union, merely re-hashed old arguments. To my mind, new and important evidence was submitted. The Union had called in a firm of Chartered Accountants, whose report upon the Local bookkeeping system was submitted to the Board. Nowhere is it even suggested that the "Books were in no fit condition to be seen". To show how incorrect such a statement is, I quote this letter as follows:—

Montreal, February 2, 1944

United Textile Workers of America,
4634 Notre Dame Street West,
Montreal, Quebec.

Attention Mr. R. Kent Rowley

Re: Local Union No. 102

Dear Sir,—

In answer to your letter of January 31st, I wish to advise that I have examined the bookkeeping system of your Local Union No. 102. Before proceeding with any audit or report in connection with the financial records I think it advisable to report the following:—

(1) The records of this local include financial data regarding not only the mills on which you have asked me to report, namely, Mount Royal, Hochelaga, and Colonial Mills, but also Merchants, General Ma-

chine Shop and others which may have been organized through this local.

(2) In view of the fact that the local has only one cash record for all its transactions it would be impossible to report on the three mills in question without, at the same time, giving a complete report on the other mills referred to above.

(3) In any case any report on the financial records of your local union No. 102 would not disclose its status as regards to membership in these mills. The reason for this is that a large portion of the initiation fees has never been recorded in the books of the local. According to the information which I received, these original sums were withheld as a charge by your grand lodge.

It is our opinion that in view of this the only way to established your status in these mills would be a complete and detailed examination of the signed applications for membership in your local union No. 102.

Since this is not in the nature of an audit we do not know whether it would be your intention to have us make an investigation. We would be pleased to do so or to conduct a detailed audit of your financial records and advise or assist your office in the matter of its bookkeeping system if you so desire.

Awaiting your further instructions in this matter and thanking you for the confidence you have placed in us, we are,

Yours truly,

Sheper, Dobrin & Dainow,
per (signed) H. Dainow

From this document, it is evident that the type of inquiry suggested by the Chairman would be eminently unfair to the Union and secondly would not furnish the Commission with the information desired.

(*e*) I must register my objection to the procedure employed. For many years Unions have been guaranteed freedom from incorporation and the secrecy of their confidential records, for the well-known reasons of danger of discrimination, firing, etc. It appears, from the testimony made, that the employees of this industry have legitimate reason to fear such malpractices on the part of the employers. Above all when we consider the affidavit presented by the employers themselves admitting access illegitimately to information in respect to Union membership as a result of a previous inquiry. I cannot agree that this procedure is the sole method of determining the Union's right to speak on behalf of the majority of the workers, as wide experience both here and in the United States has shown that the democratic secret ballot is the most satisfactory method to all concerned.

Industry

Here I must draw attention to the peculiar conditions of this industry. A rough estimate would show that 40 per cent to 50 per cent of all employees are female and secondly that a high percentage in certain unskilled operations are very young. In an employment of this character, there is necessarily a high turnover in staff and it is understandable that it is exceedingly difficult for any organization to maintain continuously a high percentage of paid-up members. This, to my mind, is an additional strong argument in favour of the voting principle. Here, too, the opportunity for intimidation and discrimination enters much more easily than in many other industries. It must strike any public-minded individual to-day as strange that this large industry, existing for many years in our Province and well-known for its low-wage level, should continue to operate without any machinery of collective bargaining between workers and employers. In P.C. 2685, the Government laid down the principle that employers should enter into collective bargaining relations with free unions of the workers' choice, as such relations would be of aid to the maintenance of peaceful relations and production in time of war. I must conclude that, so long as such relations do not exist, harm is being done to the war effort of our country.

I must state, too, that throughout this Inquiry all concessions have been made on the part of the Union. The Union agreed to withdraw the question of wages from the dispute and leave it to the Regional War Labour Board. The Union agreed to withdraw the question of working conditions and leave it to future negotiations with the company. The Union asked the Board only to conciliate the dispute on the question of recognition. The company, however, refused to conciliate in the real meaning of the term and, to my mind, the majority report fails completely to find any solution that would eliminate the danger of strike action in this important industry.

It is a peculiar and interesting fact that a majority report was originally drawn up by the Chairman of this Board recommending recognition of the Union and stating clearly that the Board was satisfied that the Union had proven its right to represent the majority. The company was then granted a special hearing in which only the affidavit was presented, containing only a re-affirmation of the company's oft-repeated opinion that the Union does not represent the majority. On the basis of this "evidence", apparently, the Chairman's opinion was reversed and the recommendation for recognition refused. The following is the previous majority report made by our Commission present to the last Hearing and is as follows:

"Conclusions": We consider that where employees of an industry go to the trouble of

signing an application to become members of a labour union and pay two dollars to bind the bargain, they show that they are serious, that they mean business and that they want that union to act for them. We, therefore, find that Local 102 is entitled to act as bargaining agent collectively for its 1,444 members. We further find that Local 102 controls the majority of the employees of the company in the Colonial, Mount Royal and Hochelaga mills.

We consider also that a vote among the employees of the three mills would be unnecessary and a useless waste of time, effort and money. At best it would amount to a recruiting campaign conducted by the Government for the local. It would not prove anything more than we know already, i.e. that the local controls the majority of the employees. There is no question of reresentation to be decided, the local being the only labour union in the field, and there is no occasion to choose between organizations, two programs, two policies.

Recommendations: Therefore, in the circumstances of the present case and with a view of offering practical suggestions for the settlement of the dispute, we beg to recommend as follows:—

1. That the employer should concede that Local 102 of the United Textile Workers of America controls and represents about 71·66 per cent of the employees of its Colonial, Mount Royal and Hochelaga mills and is entitled, therefore, to speak and act for said employees collectively.
2. That the employer should recognize said Local 102 as the sole bargaining agent of its employees for the conclusion of a collective labour agreement between the employer and the employees.
3. That the employer should sign a collective labour agreement with its employees in accordance with the recommendations of this board."

In comparing and studying the affidavit presented by Mr. Bertrand Boissonnault, Director of Personnel of Dominion Textile Co., I cannot agree that evidence of that nature would have been sufficient to change the above mentioned report, but however, it is true that any person has a right to change opinion in the face of certain circumstances for which in the present case, I do not see any of them that would change my opinion.

I cannot agree that such "evidence" was of any real weight and feel the following is true:

1. That the union had indeed satisfied the Department of Labour's Inquiry Commission that it represented the majority, from the testimony of Mr. Rose, K.C.;
2. That the union's offer of vote, even at this late date, was proof of their good faith;
3. That the company's refusal to accept this vote indicates bad faith on their part and a certain knowledge that the majority of their workers favour the union;
4. That the majority report's recommendation leaves the union and the workers only one solution—a strike vote followed by strike action, which is and was this board's task to avoid.

CONCLUSION

I therefore, having examined all evidence submitted, recommend that the United Textile Workers of America, Local No. 102, be recognized as sole bargaining agency for the employees of the Mount Royal, Colonial and Hochelaga mills of the Dominion Textile Co. Ltd.

As the other alternative I would like to state that I am in full accord with the majority Report on page 14, at the bottom of the paragraph, whereby the Majority Report have been doubtful as to whether that present decision is correct and just, quoting the following. "However, the Department of Labour is not bound by our opinion and, after studying the situation, can always order a vote,* if it thinks that course is fit and proper."

In this present clause, as said once before, the Majority of the Board is more than doubtful as to their correct procedure and though it might be entirely new policy, but nevertheless, I strongly urge the Department of Labour to either recognize the union, United Textile Workers of America Local No. 102, as sole bargaining agency, or follow the suggestions of the majority report which recommends action from the part of the Department of Labour and take a vote which would in my opinion decide definitely whether the majority of the employees in these above mentioned mills want the United Textile Workers of America, Local No. 102 as their bargaining agency.

All of which is respectfully submitted.

(Signed) PAUL FOURNIER.

*(See footnote on page 4 of the Majority Report.)

Conciliation Work of the Industrial Relations Branch During February, 1944

DURING February officers of the Industrial Relations Branch were called on to handle 48 industrial disputes or controversial situations involving 10,940 workpeople employed in 88 different establishments. Of these, 34 were new disputes which originated during the month while 14 were situations which had been unterminated as at January 31 and received further attention in February.

Classified by industries, the disputes occurred as follows:

Mining:	
Coal Mining	7
Metal Mining	1
Non-metallic (other than coal), quarrying, etc	1
Manufacturing:	
Animal Food Products	4
Metal Products	17

Manufacturing—*Con.*

Textile, Clothing Products, etc.	3
Pulp and Paper Products	3
Shipbuilding	3
Non-metallic Minerals, Chemicals, etc.	3

Transportation:

Water	2
Local and Highway	3

Service:

Public Administration	1

Classified as to type of situation, the disputes were broken down as follows:

Nature of Dispute:

Strikes or Lockouts	11
Threatened Strikes	8
Controversies	17
Controversies and Services of Commissioners	2
Controversy and request for Vote	1
Arbitrations	2
Requests to conduct consent elections	7

Predominant Cause or Object:

Increase in Wages	6
Other causes affecting wages or working conditions	5
Recognition of Union	13
Employment of Union members only (*a*)	2
Discharge of Workers for Union activity or membership	9
Union Jurisdiction	3
Other Union questions	3
Discharge of workers (*b*)	3
Unclassified	4

The disposition and settlement of the disputes handled was tabulated as follows:

Disposition:

Strike terminated by mediation or other Departmental action	7
Strike terminated and situation referred to Board of Conciliation	1
Threatened strike averted by mediation, etc.	2
Strike averted and matter referred to N.W.L.B.	1
Strike averted but dispute unterminated	1
Controversy terminated by mediation, etc.	6
Decision rendered in arbitration	2
Election or vote conducted	5
Commissioner appointed under P.C. 4020, but situation unterminated	3
Board of Conciliation applied for	2
Dispute lapsed or called off; no further action required	1
Referred to N.W.L.B. or R.W.L.B.	1
Referred to Provincial authorities	1
Other disposition	3
Unterminated	12

Results:

In favour of employees	10
In favour of employer	3
Compromise or partially successful	4
Indefinite	11
Not known	5
Unterminated	15

(*a*) Including employment of members of only one Union.
(*b*) Other than in connection with Union activity and including refusal to reinstate.

Method of Settlement:

Conciliation or mediation (*a*)	31
Direct negotiations	2
Arbitration	2
Administrative Action	1
Votes or Elections held	5
Investigation only	2
Settlement pending	15

The disputes and situations referred to above were dealt with under the provisions of the Conciliation and Labour Act and were in addition to those described on previous pages, which received attention under the Industrial Disputes Investigation Act. In those situations in which it was possible for conciliation to be successful, the efforts of the Industrial Relations Officers met with success in 18 cases and mediation definitely failed in only 4 disputes.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B., and Sydney, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario, and work in close collaboration with the Provincial Conciliation Service; two officers in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton, N.B. and Sydney, N.S. represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Summaries of some of the disputes in which mediation took place, together with the union representation votes conducted during February, are given below.

Foundry Workers, Vancouver, B.C.—Reference was made in the February issue of the Labour Gazette to Departmental conciliation in a dispute between various foundry companies belonging to the Metal Trades Section of the Canadian Manufacturers Association in Vancouver and their employees as represented in joint negotiations by two unions, namely, Local No. 281, International Moulders' and Foundry Workers' Union of North America, and Local No. 3, Moulders' and Foundry Workers' Union (C.C.L.). After an apparent deadlock had been reached on the questions of maintenance of membership or closed shop provisions in the proposed collective agreement between the parties, Mr. G. R. Currie, Industrial Relations Officer, Vancouver, in-

(*a*) Conciliation or mediation took place in a number of disputes which were unterminated at the end of the period.

duced the officers of the two unions to refrain from making application for a Board of Conciliation and Investigation until he had further conversations with the employers. At a discussion with the employers' committee Mr. Currie also succeeded in persuading them to hold a meeting of all members of the Metal Trades Section, C.M.A., to give further consideration to the draft agreement proposed by the union. Subsequently the employers' group decided to accept the recommendation of Mr. Currie that the maintenance of membership clause proposed by the unions should be approved. A joint conference of representatives of the unions and of the foundry companies was held on February 15th at which minor revisions were agreed upon and arrangements made for the drafting of a contract. An interesting feature of the understanding reached is that the two unions engaged in the joint negotiations have agreed that the organization having a majority of the employees in any particular establishment shall enter into an exclusive bargaining contract, but that the members of both unions will participate in the election of a shop committee, and at the same time both unions will be guaranteed maintenance of their own membership for the duration of the contract.

Coal Miners, New Waterford, N.S.—All classes of miners employed at No. 12 Colliery of the Dominion Coal Company, Ltd., New Waterford, N.S., were thrown idle for several shifts in mid-February when production became tied up because of a dispute over the renewal of a local contract covering longwall brushers. The employees involved, who were members of Local 4527, United Mine Workers of America, had given thirty days' notice of cancellation of the brushing contract on January 6th demanding its renewal at higher rates of pay. The company refused to consider the question of increased wages. With the expiration of the local brushing contract on February 7th the 29 longwall brushers reverted to datal wages as provided for in the wage schedule of the general contract between the company and District No. 26, U.M.W.A. The men began to fall behind in their brushing, reportedly because they refused on grounds of safety to follow their former practice of handling stone as it was produced. The management tried to overcome this situation by having the brushers work in smaller groups, but the men refused claiming that this would be a change in working conditions. Meanwhile the brushing fell so far in arrears that one wall on which 97 men were employed could not operate on February 14th, and on the afternoon shift the following day the mine was completely idle throwing 149 out of work. On the 16th and 17th the mine was idle on both shifts, affecting 535 and 476 men respectively. Mr. Allan MacDonald, Industrial Relations Officer, Sydney, N.S., was assigned to the situation on February 15th and held a series of separate conferences with officials of the company and District No. 26, U.M.W.A. The Board member of the Union for the New Waterford district called a meeting of the brushers on February 17th, at which they agreed to resume work the following day under the terms of the contract which expired on February 6th.

Textile and Clothing Workers, Montreal, P.Q.—Approximately 2,690 workers belonging to the Amalgamated Clothing Workers of America went on strike on February 1, 1944, in a large number of establishments in the Montreal area. The employers were all members of the Associated Clothing Manufacturers of the Province of Quebec, Inc. The reason for the strike was the refusal of the Manufacturers' Association to accede to demands of the Montreal Joint Board of the Union for an increase of 10 cents per hour for all workers and for a contribution by the employers amounting to 2 per cent of the "union payroll" to be applied to the Union's sick and death benefit insurance fund. In denying the Union's requests the employers laid particular stress upon a clause in the Collective Agreement between the parties which provided that either side might request a revision of the scale of wages and conditions of labour, but only between March 1st and March 15th in any year. The strike was first referred to the Conciliation Service of the Department of Labour for the Province of Quebec but when a deadlock persisted between the parties, the services of Mr. Trepanier, Federal Industrial Relations Officer, Montreal, were also utilized by joint consent. Finally agreement was reached that the Manufacturers' Association would not question the right of the Union to make wage demands and that the said demands would be submitted to arbitration by the impartial chairman provided in the Collective Agreement. It was understood that work would be resumed before arbitration commenced and the Association reserved the right to defend its side of the case in any manner it saw fit. In regard to the demands connected with the Union's insurance scheme, the Association requested information from the Union as to contracts and practices in other markets, following receipt of which the Association promised to study and discuss the question with the Montreal Joint Board of the Union. Work was resumed on February 15.

Metal Products Workers, Winnipeg, Man.—A dispute over Union recognition between the Manitoba Bridge and Iron Works Ltd., Winnipeg, Man., and its employees, members of the Winnipeg Iron Workers Federal Union, No. 22 (T.L.C.C.), was reported to the Department early in February by Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg. Claims of the Union that it represented a majority of the Company's hourly rated production workers were challenged by the management. A check of the Union's membership records, which was conducted by Mr. Johnstone, revealed that while the Union had a substantial proportion of the employees as members in good standing, it did not have a majority.

Public Utility Employees, Winnipeg, Man.—During February Mr. H. S. Johnstone, Industrial Relations Officer, Winnipeg, concluded mediation in connection with a dispute over the negotiation of an Agreement between the Greater Winnipeg Sanitary District and its employees, members of a unit of the One Big Union. It was decided that an Agreement should be executed in the name of the employer and the Greater Winnipeg Sanitary District Employees' Unit of the One Big Union. An understanding was also reached in regard to the classes of employees who should be covered by the Agreement. No settlement was secured in regard to demands of the Union concerning methods and conditions governing promotions.

Packing Plant Employees, Hamilton, Ont.—During January a dispute between the F. W. Fearman Company, Limited, Hamilton, Ont., and its employees, members of Local 239, United Packinghouse Workers of America, was brought to the attention of the Department. The controversy arose over the refusal of the Company to recognize the Union as the collective bargaining agency for the workers. Mr. J. P. Nicol, Industrial Relations Officer, Toronto, arranged a joint meeting between the management and Union representatives in mid February. The Company stated it would agree to a representation vote providing all employees participated. Union officials refused to agree to the inclusion of the office staff and foremen and, when no settlement could be reached on this point, stated that they would apply to the Labour Court for Ontario in order to obtain certification.

Transportation Workers, Montreal, P.Q.—On February 18, the Department was advised of a dispute involving the Montreal Tramways Company and its employees. Later in the day it was reported that there had resulted a complete cessation of the transportation service of the Company. The dispute was within the jurisdiction of the Quebec provincial authorities but, after consultation with the Quebec Department of Labour, arrangements were made to have a Federal Industrial Relations Officer proceed to Montreal to co-operate with the provincial authorities in endeavouring to effect a resumption of work. Work was resumed within 30 hours, the Union concerned, the Canadian Brotherhood of Railway Employees and Other Transport Workers, making application for an investigation into the circumstances surrounding the dispute. On February 21, the provincial authorities nominated Mr. C. Miron, Chief Conciliation Officer for Quebec, and Mr. B. Wilson, Industrial Relations Officer, Ottawa, to investigate jointly the causes of the trouble. The investigators were instructed to recommend a solution to prevent the recurrence of such incidents and to ensure a better relationship between the management and employees and among employees themselves. The investigators were required to report within 14 days, with the parties to the dispute being directed to make application for a Board of Arbitration under the Quebec Public Services Employees' Disputes Act if a settlement were not arranged as a result of the investigation. At the end of the month, the Quebec Department of Labour was considering the report and recommendations made as a result of the investigation.

Coal Miners, Stellarton, N.S.—When two employees of the Acadia Coal Company, Stellarton, N.S. were transferred from shift work to the coal face about 500 other miners ceased work in protest on February 18, 1944. Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., immediately asked the President of District 26, United Mine Workers of America, to instruct the local Union to resume work at once and, if a legitimate grievance existed to have it dealt with in accordance with the procedure provided for in the Agreement between the Company and the Union. On February 19 the President of District 26, U.M.W.A., advised the employees to return to work pending investigation by Union and Company officials. All strikers resumed operations on February 21st after a time loss of two working days.

Merchant Seamen, Vancouver, B.C.—When agents of the Park Steamship Company, Limited at Vancouver, B.C. refused to accede to demands of crew members of the ss. *Mohawk Park* that their ship be furnished with certain equipment with which newer vessels of the Company were being outfitted,

about 30 unlicensed seamen employed on the vessel went on strike on February 8, 1944. The specific demands of the men, which were supported by the local business agent of the Deepsea and Inlandboatmen's Union of the Pacific, were that a power pump should be extended to the seamen's quarters aft in order to provide hot water facilities and that steam percolators be installed. While the incident was being dealt with by a Committee of Investigation under the Merchant Seamen Order, Mr. G. R. Currie, Industrial Relations Officer, Vancouver, conferred with representatives of the shipping agents of the Company and the Union and made suggestions which would permit an immediate return to work. Later the Manager of the Company met the business agent of the Union and a Committee from the Vancouver District Labour Council (C.C.L.) as a result of which the Company agreed to instal the extra piping when the vessel arrived in New Zealand and to furnish percolators in the sailors' and firemen's messrooms when it returned to the Port of Vancouver. Work was resumed on February 9.

Copper Miners, Britannia Beach, B.C.—An unauthorized strike by about 264 underground employees of the Britannia Mining and Smelting Company Limited, Britannia Beach, B.C. took place on February 4, 1944, in protest against the dismissal of an employee who was a member of Local 663, International Union of Mine, Mill and Smelter Workers. Mr. G. R. Currie, Industrial Relations Officer, Vancouver, communicated with the International Representative of the Union, and the President of the local organization, both of whom admitted that the stoppage of work was a breach of the Collective Agreement with the Company and agreed to advise the men to resume work. The Company was also approached by Mr. Currie and the General Manager stated his willingness to treat the case of the discharged employee as a grievance under the provisions of the Agreement. Work was resumed after one day's time loss and at a meeting of the Local Union a motion was passed undertaking to live up to the conditions of the Agreement in future. The aggrieved employee chose to appeal his case later to National Selective Service officers, but a review of his dismissal was denied because of the existence of a Collective Agreement embodying grievance procedure.

Coal Miners, Bellevue, Alberta.—In the January issue of the LABOUR GAZETTE (p. 58) mention was made of a strike from December 1st to 6th by employees of Hillcrest-Mohawk Collieries Limited and West Canadian Collieries Limited at Bellevue, Alberta, which was called when Army authorities called up the medical doctor who had been engaged under contract to Local 7924, United Mine Workers of America. When the leave extended to the Doctor expired on January 31, he was again called up for military service and on February 1st some 688 employees of the same two mines again refused to work unless the services of a physician were available in case of accident. The Minister of Labour made representations to the Minister of National Defence (Army), as a result of which a further extension of leave was granted to the Doctor in question. Work was resumed by the miners on February 2nd.

Transport Workers, Windsor, Ont.—In the February issue of the LABOUR GAZETTE mention was made of a strike by 25 employees of the Direct-Winters Transport Company at Windsor, Ontario. Towards the end of January the Company offered during negotiations to sign an Agreement with Local No. 880 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, recognizing the Union as sole bargaining agent in terms similar to the contracts which had been signed by the Union with three other major transport Companies in the area. The Union refused this offer and held out for the inclusion of a maintenance of membership clause in the Agreement. This was rejected by the management and all further offers to mediate on the part of Mr. J. P. Nicol, Industrial Relations Officer, Toronto, met with no success. The Director of Industrial Relations then took the matter up with International Officers of the Union in Detroit and secured an undertaking that work would be resumed immediately by the strikers if the Minister of Labour would refer the dispute to a Board of Conciliation and Investigation established under Section 65 of the Industrial Disputes Investigation Act. The Company in turn agreed to permit all its men to return to work without discrimination. The strike was terminated on February 28 and a Board was established by the Minister on February 29th.

Union Representation Votes

Packing Plant Employees, Montreal, P.Q. —By joint consent of the parties a representation vote was conducted on February 18, 1944, under the supervision of Mr. R. Trepanier, Industrial Relations Officer, Montreal, among certain employees of the Swift Canadian Company, Limited, Place Viger Market, Montreal, P.Q. The ballot was to determine whether the employees desired to be represented by the Montreal Packing Plant Employees' Federal Union, Local 66 (T.L.C.C.) in negotiations with their employer. There were 100 persons eligible to vote, of whom 75 cast their ballots in favour of the Union while 10 opposed Union representation.

Metal Products Workers, Montreal, P.Q. —A representation vote was conducted on February 11, by joint consent of the parties, among employees of Cambridge Machine Tool and Aircraft Supplies, Limited, Montreal, P.Q. There were 175 employees eligible to vote, of whom 147 cast their ballots. There were 78 votes in favour of representation by the United Electrical Radio and Machine Workers of America and 68 in favour of a Shop Committee of Employees with one spoiled ballot. Mr. R. Trepanier, Industrial Relations Officer, Montreal, supervised the vote as Returning Officer.

Chemical Workers, Hamilton, Ontario.— On February 28, by joint consent of the parties Mr. J. P. Nicol, Industrial Relations Officer, Toronto, supervised a representation vote to determine whether or not the majority of 226 employees of the General Chemicals and Fertilizer Division of Canadian Industries Limited, Hamilton, Ontario, wished to be represented by the Canadian Industrial Workers' Union, Local No. 2 (C.C.L.). Out of 205 ballots cast, 159 favoured the Union as sole collective bargaining agent, while 45 were opposed and there was one spoiled ballot.

Chemical Products Workers, Sydney, N.S. —By joint consent of the parties a representation vote was conducted on February 11, to ascertain whether employees of Dominion Tar and Chemical Company, Limited, Sydney, N.S. were in favour of the Sydney Tar and Chemical Workers' Union, Local No. 1 (C.C.L.), as their collective bargaining agent in dealings with their employer. The ballot was conducted under the supervision of Mr. Allan MacDonald, Industrial Relations Officer, Sydney, N.S. There were 52 employees eligible to vote, of whom 49 cast their ballots. The results were unanimously in favour of representation through the Union.

Packinghouse Workers, Moncton, N.B.— Under the supervision of Mr. H. R. Pettigrove, Industrial Relations Officer, Fredericton, N.B., a representation vote was conducted on February 8, at the Swift Canadian Company, Limited, plant in Moncton, N.B., by joint consent of the parties. The ballot was to determine whether the employees desired to be represented for the purpose of collective bargaining by the United Packinghouse Workers of America, Local No. 244. In the first poll 221 out of 265 eligible employees cast their ballots. A group of 219 voted in favour of representation through the Union, while two were opposed. In a second poll there were two employees eligible to vote both of whom favoured Union representation. Following the ballot the parties agreed to confer jointly with a view to the consummation of a collective agreement.

Strikes and Lockouts in Canada During February, 1944

THE number of strikes and lockouts in existence in Canada for the month of February showed a decrease of seven as compared with the previous month but the number of workers involved and the time loss in man-working days showed some increase as compared with the previous month and also with February, 1943. Preliminary figures show 19 strikes on record for February, 1944, as compared with 26 for January and 31 in February, 1943; the workers involved numbered 8,785 in February, 8,140 in January and 5,239 in February, 1943; and the time loss in man-working days amounted to 39,868 in February, 23,408 in January and 24,301 in February, 1943.

During the month under review two strikes, one of men's clothing factory workers and one of street railway employees, both at Montreal, accounted for almost 65 per cent of the workers involved and caused about 85 per cent of the time loss.

Two strikes, involving 45 workers, were carried over from January and 17 commenced during February. Of these 19 strikes, 17 were terminated during the month. Four resulted in favour of the workers, one in favour of the employer, one was a compromise settlement and eleven were indefinite in result, work being resumed pending final settlement in each case. At the end of the month, therefore, there

were two strikes unterminated, namely: hotel employees at Edmonton, Alta., and seed packers at Brandon, Man.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated. Information is available as to one dispute of this nature, namely: fur factory workers, Quebec, P.Q., one employer, May 12, 1943.

The following table gives comparative figures for the first two months of 1943 and 1944:—

Strikes and Lockouts, January and February, 1943-1944.

STRIKES AND LOCKOUTS IN CANADA, JANUARY AND FEBRUARY, 1943-1944

Date	Number of Strikes and lockouts		Number of workers involved		Time loss in man-working days
	Commencing during month	In existence	Commencing during month	In existence	
*January, 1944	26†	26	8,140†	8,140	23,408
*February, 1944	17	19	8,740	8,785	39,868
Cumulative totals	43		16,880		63,276
January, 1943	33†	33	19,860†	19,860	166,715
February, 1943	27	31	2,611	5,239	24,301
Cumulative totals	60		22,471		191,016

* Preliminary.

† Strikes unterminated at the end of the previous year are included in these totals.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout, included as such in the records of the Department, is a cessation of work involving six or more employees and lasting at least one working day. Disputes of less than one day's duration and disputes involving less than six employees are not included in the published record unless ten days or more time loss is caused, but a separate record of such disputes is maintained in the Department, and the figures are given in the annual review.

The records include all strikes and lockouts which come to the knowledge of the Department, and the methods taken to obtain information preclude the probability of omissions of disputes of importance. Information as to a dispute involving a small number of employees, or for a short period of time, is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING FEBRUARY, 1944*

Industry, occupation and locality	Number involved		Time loss in man-working days	Particulars†
	Establishments	Workers		
Strikes and Lockouts in Progress Prior to February, 1944				
TRANSPORTATION—				
Other Local and Highway—				
Truck drivers, Windsor, Ont.	1	19	425	Commenced January 3, 1944; for a closed shop agreement; terminated February 26; conciliation, federal, and return of workers pending reference to an IDI‡ Board; indefinite.
SERVICE—				
Business and Personal—				
Hotel employees, Edmonton, Alta.	1	26	350	Commenced October 1, 1943; for payment of wage increases for porters as approved by the RWLB‡; unterminated.
Strikes and Lockouts Commencing During February, 1944				
LOGGING—				
Bush workers, Timmins, Ont.	1	(a) 45	45	Commenced February 23; for increased wages, piece rates; terminated February 23; conciliation (National Selective Service); in favour of employer.
MINING—				
Coal miners, Bellevue, Alta	2	688	688	Commenced February 1; against call-up of medical doctor for military service; terminated February 1; conciliation, federal; in favour of workers.

	Establishments	Workers		
Strikes and Lockouts Commencing During February, 1944—Concluded				
TRANSPORTATION—				
Electric Railways and Local Bus Lines—				
Street railway employees, Montreal, P.Q.	1	3,000	4,000	Commenced February 18; against working with members of another union; terminated February 19; conciliation, federal, and return of workers pending reference to a Provincial Commission; indefinite.
Water Transport—				
Seamen, Vancouver, B.C.	1	30	30	Commenced February 8; for steam percolators and hot water in crew quarters; terminated February 9; conciliation, federal; in favour of workers.
TRADE—				
Seed packers, Brandon, Man.	1	35	235	Commenced February 22; for increased wages, reduced hours and improved working conditions; unterminated.

* Preliminary data, based where possible on direct reports from parties involved, in some cases incomplete; subject to revision for the annual review.

† In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

‡ IDI—Industrial Disputes Investigation; RWLB—Regional War Labour Board.

(a) 40 indirectly affected; *(b)* 1,090 indirectly affected; *(c)* 100 indirectly affected.

Recent Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month. The annual review including a table summarizing the principal statistics as to strikes and lockouts in Great Britain and other countries appears elsewhere in this issue.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones. An order under the Defence Regulations, effective July 25, 1940, provides for the settlement of disputes and the prevention of strikes and lockouts, as noted in the LABOUR GAZETTE, August, 1940, page 760.

The number of disputes beginning in December was 128, and 16 were still in progress from the previous month, making a total of 144 disputes in progress during the month, in which 39,500 workers were involved. The time loss in October was 131,000 working days.

Of the 128 disputes beginning in December, 21 arose out of demands for increased wages and 41 over other wage questions, 2 over working hours, 15 on questions respecting the employment of particular classes or persons, 44 over questions as to working arrangements and two on questions of trade union principle; 3 were sympathetic strikes. Final settlements were reached in 121 disputes, of which 18 were settled in favour of workers, 76 in favour of employers and 27 resulted in a compromise; in 11 other disputes, work was resumed pending negotiations.

United States

Preliminary figures for January show 330 new strikes beginning in the month, in which 110,000 workers were involved. The time loss for all strikes in progress during the month was 625,000 working days.

Strikes and Lockouts, 1943

Strikes and Lockouts in Canada During 1943

DURING the year 1943, 402 strikes and lockouts were recorded in Canada. These involved a total of 218,404 workers and caused a time loss of 1,041,198 man-working days. During 1942, 354 strikes were recorded in which 113,916 workers were involved causing idleness of 450,202 man days. The figures for 1943 show a substantial increase in strike activity as compared with recent years. The total loss of time was less however than the average, 1,101,694 man days, for the 15-year period 1911 to 1925, even though the working force during that time was much smaller than in 1943.

In times of rapid expansion in the working force and in industrial activity strikes usually become more numerous. As shown in Table I this has been the case since 1939, and it also occurred in the years of high production and employment during the last war and immediately preceding and following it. The Dominion Bureau of Statistics index of employment has increased about 75 per cent since January, 1939, and has more than doubled since 1921. Industrial production in 1943 was about 2½ times what it was in 1939.

A large proportion of the strikes in 1943 were of short duration and many involved a comparatively small number of workers. Three hundred and ten of the 402 strikes during the year (or 77 per cent) were of less than 5 days' duration and caused about one-fifth of the total time loss, about the same proportion as was caused by a single strike of aircraft workers in Montreal. One hundred and fifty strikes were of one day's duration or less. Nineteen of the largest strikes, or less than 5 per cent of the total number, caused 76 per cent of the total time loss.

More than half the strikes in 1943 were in manufacturing and caused nearly 75 per cent of the number of man days lost. A great increase in loss of time was recorded in metal manufacturing and in shipbuilding, both of which industries have shown great expansion since the outbreak of war. Strikes in mining numbered 120, of which 111 were in coal mining. The latter caused nearly one-fifth of the total time loss, a large increase as compared with recent years due to a strike in District 18 in Alberta and British Columbia which involved more than 9,000 workers and caused a loss of 94,000 man days.

The principal cause of strikes in 1943, as is usually the case, was to obtain increases in wages, there being a total of 135 such strikes during the year. Forty-five strikes were for recognition of union. Twenty-seven per cent of the workers involved in all strikes were successful in their demands, 31 per cent were partially successful and 37 per cent were unsuccessful. Conciliation was a factor in the settlement of 186 strikes and negotiations in the case of 102.

Compilation of Statistics

Since its establishment toward the end of 1900 the Department of Labour has maintained a record of strikes and lockouts in Canada, publishing in the LABOUR GAZETTE each month a complete list of those in progress, so far as available, with particulars as to the nature and result of each strike. In each year a review of the previous year has been given, including statistical tables analysing the data, and since 1912 including a complete list of the disputes on record during the year. As the monthly statements in the LABOUR GAZETTE are necessarily of a preliminary nature the annual review constitutes the revised record for the year. A special report on "Strikes and Lockouts in Canada, 1901 to 1912", issued in 1913, contained a complete list of strikes and lockouts for that period with analytical tables. The annual reviews in the LABOUR GAZETTE have brought the lists of strikes and lockouts and analytical tables down to date each year.

The annual review for 1930 appearing in the LABOUR GAZETTE, February, 1931, included summary tables back to 1901, the result of a revision of the record on the basis of the classification of industries adopted by the Dominion Bureau of Statistics and other government departments for official statistics. This classification had been used for strikes and lockouts since 1921, and it was advisable to have the record for earlier years on the same basis. Other revisions to secure uniformity throughout the whole period were also made.

The record of the Department includes lockouts as well as strikes, but a lockout, or an industrial condition which is undoubtedly a lockout, is rarely encountered. In the statistical tables, therefore, strikes and lockouts are recorded together.

A strike or lockout included as such in the records of the Department, is a cessation of work involving six or more employees and lasting one working day or more. Strikes of less than one day's duration and those involving less than six employees have not been included in the published record unless a

time loss of 10 days or more is caused. A separate record of such strikes involving less than 10 days' time loss is maintained in the Department. During 1943, there were 25 such disputes involving 958 workers and causing a time loss of 122 man days. In 1942, 28 were recorded involving 1,040 employees and causing a loss of 152 days.

In Tables I and X the number of employers involved is given. In strikes which involve large numbers of shops or factories, clothing, fur, furniture, etc., or building construction jobs, logging and fishing operations, etc., only the approximate number of employers is usually reported.

The figures in this report are inclusive of all strikes which come to the knowledge of the Department, and the methods taken to secure information practically preclude probability of omissions of a serious nature. As to duration of strikes, numbers of employees concerned, etc., it is not always possible to secure exact information, but the estimate made in such cases is the result of painstaking methods in the collection of data, and it is believed that the statistics indicate the conditions with reasonable precision. The estimate of time loss is reached by multiplying the number of working days during which each strike lasted by the number of employees directly involved from time to time so far as known. The number of employees recorded for each strike is the number of those directly involved, that is on strike or locked out, and does not include those indirectly affected. The figures in the tables as to workers are therefore the number of those directly involved. In recent years, when the information was available, the numbers indirectly affected, if important, have been shown in footnotes to Table X, which is a detailed list of the strikes and lockouts during the year. The workers indirectly affected in each strike are those in the establishment who are unable to continue work because of the stoppage but not participating in the strike.

Charts

The accompanying charts show the results of strikes and lockouts according to the numbers of workers involved and the time loss in man working days by groups of industries each year, for the period 1901 to 1943.

Analysis of Statistics, 1943

Table I is a summary of the principal statistics for the period for which the record has been compiled, beginning in 1901. The table shows the number of strikes and lockouts beginning in each year, and the number in existence during the year, the difference in each case being the number carried over at the end of the previous calendar year. The approximate number of employers involved in all strikes as well as the number of workers involved and the time loss, is given. In addition to these data, the number of strikes in existence during each year in coal mining and in industries other than coal mining is given, along with the number of workers involved and the time loss. A study of the latter figures reveals that a few strikes in coal mining in some years account for a large proportion of the workers involved and for a still larger proportion of the time loss resulting.

Table II an analysis of the 1943 record, by the number of workers involved shows that a large proportion of the strikes involved comparatively small numbers of workers and caused a small proportion of the total time loss while a relatively small number of strikes involving comparatively large numbers of workers resulted in a very large percentage of the total time loss. Thus one hundred and ninety-six strikes, or nearly 50 per cent of the total, involved fewer than 100 workers in each case and caused less than 3 per cent of the total time loss. Forty-four strikes, less than 11 per cent of the total number, involved 1,000 workers or more. The total number of workers in these 44 strikes was 163,788 or 75 per cent of the numbers involved in all strikes, while the time loss was 80 per cent of the total.

Table III an analysis by time loss shows that 141 strikes or 35·1 per cent of the total number caused a loss of less than 100 days in each case and a total time loss in the 141 strikes of less than one per cent of the loss in all strikes during the year. Nearly 80 per cent of the strikes had less than 1,000 days loss in each case. These involved 21·6 per cent of the total number of workers in all strikes and caused only 6·3 per cent of the total number of working days lost. On the other hand 19 strikes, 4·7 per cent of the total number, caused more than 10,000 days time loss in each case. These involved nearly one-half of the workers in all strikes and caused more than three-quarters of the total number of days lost. Four strikes had a time loss of more than 50,000 days each and the combined loss was 41·9 per cent of the total for all strikes and lockouts.

Table IV, an analysis by duration, shows that three-quarters of the strikes involving nearly two-thirds of the total number of workers were settled within five days with the result that the time loss from these strikes numbering 310 was only slightly more than one-fifth of the total time loss. The number of strikes of between 10 and 15 days' duration each was 28 and these caused 55·7 per cent

of the total days of idleness due to strikes but involved only 25·7 per cent of the number of workers in all strikes. Twelve strikes lasted 25 days or more and caused about 10 per cent of the time loss.

As shown in Table V the number of strikes, 27·1 per cent of the total, was greater in Quebec than in any other province with Ontario and Nova Scotia following closely with 24·4 per cent and 23·4 per cent respectively. Other provinces ranged from 10·2 per cent in Alberta to less than one per cent in Prince Edward Island. In the latter province only one strike was recorded involving a very few workers. Nearly 50 per cent of the time loss in Quebec was due to one strike in Montreal of aircraft workers. In Nova Scotia 59 strikes were in coal mining. Three strikes were interprovincial in character. One of these involved 9,850 coal miners in Alberta and British Columbia causing 94,000 days loss.

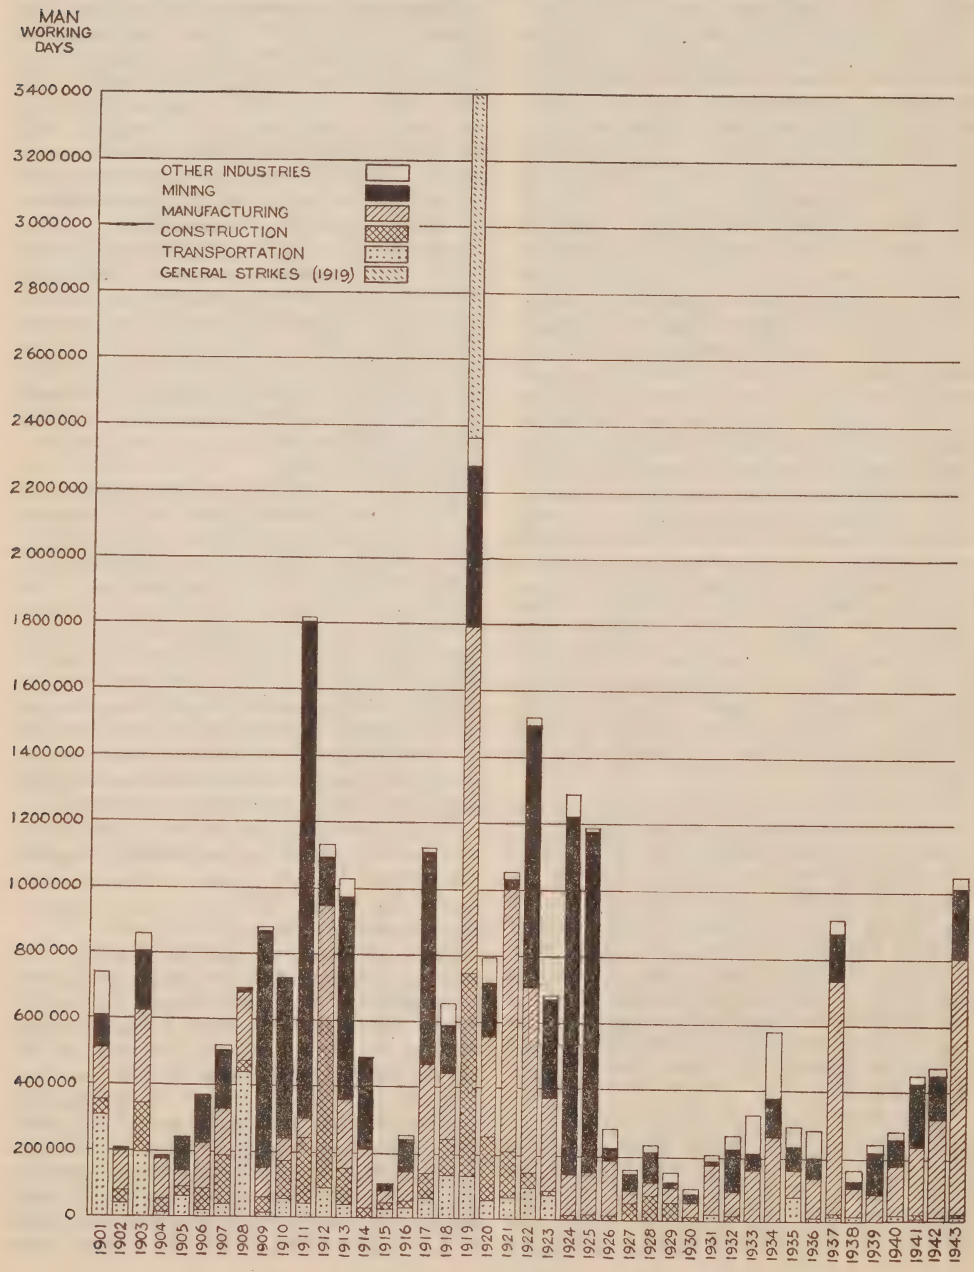
Table VI, an analysis by industries, shows that strikes were more numerous in manufacturing than in all other industries combined. These involved 139,656 workers or 63·9 per cent of the total in all strikes and caused nearly three-quarters of the total time loss. Nearly one-half the strikes in this group occurred in the manufacture of metal products. These included a strike of more than 20,000 aircraft workers in Montreal which caused a loss of 200,000 days; three strikes of steel workers in January in Nova Scotia and Ontario which caused a loss of 147,000 days; a strike of workers engaged in the manufacture of motor vehicles at Windsor caused a loss of 40,000 days; steel workers at Galt, 41,000; and aircraft workers at Vancouver 31,000 days. Thirty-two strikes in shipbuilding involved 39,110 workers and caused a loss of 121,764 man days. Two strikes of shipyard workers in Montreal, Quebec and Lauzon caused 95,800 days time loss.

Twenty-nine per cent of all strikes during the year occurred in mining involving 59,552 workers and causing 208,314 days time loss or 20 per cent of the total. More than 90 per cent of the strikes in this industry were in coal mining. The few strikes in other mining involved very few workers and caused little time loss. A strike of coal miners in Alberta and British Columbia in November caused a loss of 94,000 man days, another earlier in the year at Drumheller caused 20,000 days loss and a third at Springhill in Nova Scotia caused 14,500 days loss.

Table VII, which gives the statistics of strikes by causes and results shows that as is usually the case the predominant cause of strikes during 1943 was for increase of wages, there being 115 for this cause alone. In addition 20 strikes were recorded as being due to demands for increases in wages and other changes. These 135 strikes involved 53,619 workers, about 25 per cent of the total in all strikes and caused a time loss of 326,343 man days, more than 30 per cent of the total. The demands of the workers were obtained in 47 cases while a compromise settlement resulted in 37; the demands were not obtained in 39 cases and the remainder, 12 in number, were unterminated or indefinite in result.

Union questions caused a total of 75 strikes. These involved 41,566 workers and caused a time loss of 166,203 man days. Recognition of union was the cause of 45 strikes in which the total time loss was 139,127 days or about 13 per cent of the total. The workers were successful in 19 of these strikes, were unsuccessful in 15 while in nine cases a compromise settlement was reached and two were indefinite in result. Demands in connection with employment of union members only, "closed union shop", caused 21 strikes of which 11 were successful, six were unsuccessful and three resulted in a compromise. Included among the strikes which involved union questions were 10 inter-union disputes as to which union should be the bargaining agency. Discharge of workers for other than union questions caused 46 strikes but the total time loss from these was not large.

In Table VIII, an analysis by industries and methods of settlement, shows that 225 or about 55 per cent were settled by various government agencies, Dominion and Provincial. Of these, 106 were settled by conciliation, 93 by reference to War Labour Boards, Labour Courts, etc., 17 by arbitration and 9 by reference under the Industrial Disputes Investigation Act. Of the disputes referred to War Labour Boards, Labour Courts, etc., resumption of work was preceded by conciliation in 61 cases and by negotiations between the parties in 11 cases. Conciliation was a factor therefore in the settlement of 186 strikes.



Of the remaining 177 strikes, a settlement was brought about by negotiations between the parties in 102 cases. Sixty-two were settled by return of workers, and eight by replacement of workers.

Table IX gives the number of strikes, the number of workers involved and the time loss in man days by months during the last 11 years. While there is not a definite seasonal pattern in strike activity the number of strikes tends to be lowest at the beginning and the end of the year with the greatest number in the intervening period. In 1943 the number of strikes declined from 33 in January to 27 in March and then increased to 59 in June which was the month in which strikes were most numerous. The low point was in December when 22 strikes were

recorded. The time loss in man days being very materially affected by a few large strikes tended to be greatest in the months during which these strikes occurred. Therefore August was the month in which the most idleness was recorded because of one strike which caused 200,000 days loss. January was the next highest due to three strikes of steel workers in Nova Scotia and Ontario. February was the month during which the time loss was the lowest during the year.

Table X is the list of strikes and lockouts in existence during the year with details as to causes, results, dates, etc.

LOSS IN MAN-WORKING DAYS THROUGH STRIKES AND LOCKOUTS BY GROUPS OF INDUSTRIES EACH YEAR 1901-1943

RESULTS OF STRIKES AND LOCKOUTS ACCORDING TO NUMBERS OF WORKERS INVOLVED EACH YEAR 1901-1943

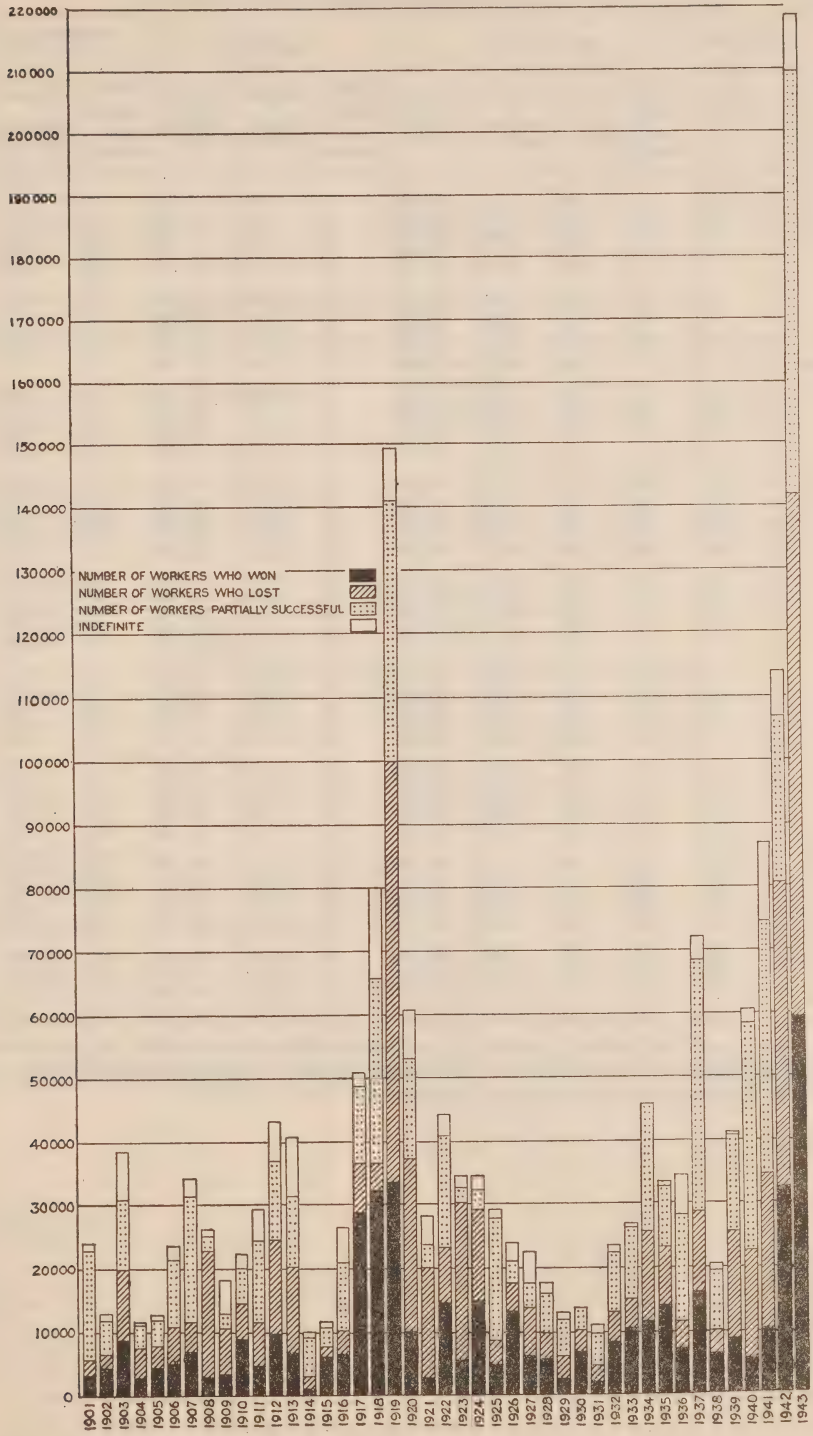


TABLE I—STRIKES AND LOCKOUTS IN CANADA BY YEARS, 1901-1943

Year	Number beginning during the year	Strikes and Lockouts in existence during year

a In this table figures for strikes and lockouts extending over the end of the year are counted more than once.
b Two protest strikes in Nova Scotia involved workers in various industries. The figures in these two totals do not add up to the number of strikes for the year, namely 402. See explanatory footnote on Table X.

TABLE II.—STRIKES AND LOCKOUTS, 1943, BY NUMBER OF WORKERS INVOLVED

Number of workers involved	Strikes and lockouts		Workers involved		Time loss	
	Number	Per cent of total	Number	Per cent of total	Man-working days	Per cent of total
Under 10	13	3·2	93	0·0	332	0·0
10 and under 50	108	26·9	2,886	1·3	14,572	1·4
50 and under 100	75	18·7	4,976	2·3	12,637	1·2
100 and under 500	135	33·6	28,521	13·1	99,883	9·6
500 and under 1,000	27	6·7	18,140	8·3	79,339	7·6
1,000 and over	44	10·9	163,788	75·0	834,435	80·2

Finance						
Service	**16**	**4·0**	**8,865**	**4·1**	**26,340**	**2·5**
Public administration (a)	9	2·0	8,562	3·9	21,661	2·1
Recreation						
Custom and repairs	1	0·3	15	0·0	12	0·0
Business and personal	7	1·7	288	0·2	4,667	0·4
Total	(d) **402**	**100·0**	**218,404**	**100·0**	**1,041,198**	**100·0**

(a) Non-ferrous smelting is included with Mining; Electric Light and Power does not include undertakings mainly public utilities; erection of all large bridges is under Bridge Construction; water service is under Public Administration.

(b) Shipbuilding was included prior to 1942 under Construction; very few strikes in Shipbuilding between 1921 and 1941.

(c) No Air Transport group prior to 1943 as there were no strikes.

(d) This total is not the sum of the figures given above because two protest strikes in Nova Scotia involved workers in more than one industry.

2821—54

TABLE VII.—STRIKES AND LOCKOUTS, 1943, BY CAUSES AND RESULTS

Cause or object	In favour of workers			In favour of employers			Compromise or partially successful			Indefinite or Unterminated			Total

(a) Including cost-of-living bonus.
(b) Including vacations with pay.
(c) Inter-union dispute caused one strike, involved 413 workers and caused a time loss of 6,652 man-working days.
(d) Inter-union disputes caused seven strikes, involved 5,842 workers and caused a time loss of 41,450 man-working days.
(e) Inter-union disputes caused two strikes, involved 325 workers and caused a time loss of 520 man-working days.
(f) Union jurisdiction refers to disputes between unions as to the character or class of work which their respective members should perform, not to disputes re bargaining agency.
(g) Other than in connection with union questions.
(h) Including suspension and refusal to reinstate.
